PURPOSE

The purpose of this task is to provide strategic communications and outreach support for headquarters. This work shall supplement federal, state, tribal and local government, and private sector implementation of federal statutes and regulations designed to provide grant funding. The organization needs wide-ranging communications and outreach support to improve understanding, benefits, stimulate interest, and lead to effective grants and program decisions.

In support of this task, the organization requires assistance with program management, outreach, and communications in the following ways:

- **Hazard Mitigation Assistance - Program Management**

    - Implement sound program management practices to enable reliable and efficient operations, support governance structures, and forward-thinking innovation throughout the grant programs.

    - Identify, capture, and adapt best practices and lessons learned to create or increase program efficiencies. Eliminate duplicative work, identify, and create templates or standard processes, provide standardized materials, and streamlined approaches across programs.

- **Hazard Mitigation Assistance - Program Outreach and Communications**

    - Support staff with communications and engagement by developing and disseminating materials including, but not limited to: webinars, feature stories, fact sheets, infographics, graphics, video productions, toolkits, bulletins, and digital content in accordance with FEMA branding and messaging guidelines. This shall include implementation of programmatic, statutory, legislative changes, andother key program issues.

    - Apply behavioral sciences, data sciences, marketing, design, and strategic planning principles in material development and engagements.

    - Assist with improving readability and ease of use of all Hazard Mitigation Assistance (HMA) materials, including plain language.

    - Develop and execute a strategic stakeholder engagement and outreach plan in support of programmatic goals.

    - Provide evaluation and suggestions to improve HMA and Hazard Mitigation Directorate webpages on FEMA.gov to improve navigation and ease of access to information, in accordance with 21st Century Idea requirements and FEMA web guidelines.

    - Collaborate and coordinate across organization components to effectively engage and communicate with stakeholders on grant programs.

    - Provide strategic communications advice and counsel during programmatic planning efforts. Create a communications strategy to executive on from the Hazard Mitigation Directorate.

    - Support executive communications for leadership including talking points, speechwriting, and presentation development.

- Provide media outreach and pitch support during steady state, disasters, program events, and campaigns.

- Develop the strategy and execution for annual stakeholder event that last between 3-5 days (virtually and in-person) for training and information.

- Support the updating and execution of a conference strategy. Support includes talking points, presentation materials, etc. to ensure a consistent public image for the Hazard Mitigation Directorate brand.

- Assist in developing, maintaining, and strengthening beneficial partnerships with a wide-range of entities including other government components—federal, state, local, tribal, and territorial agencies—other contractors, non-governmental organizations, private sector organizations, andother stakeholders.

- Provide subject matter expertise in applied behavioral sciences, data sciences, marketing, design, strategic planning, and strategy to create position papers, memos or other inputs for broader planning, strategy development, or decision-making processes in support of program integration and strategic alignment.

- Provide outreach and communications operations strategy options, assessment, and planning support.

DELIVERABLES

Deliverables shall be delivered in electronic format using Microsoft or Adobe products. Some of these deliverables could be shared with stakeholders. Some products are more ad hoc and requests for items such as talking points or presentation materials for leadership will be discussed in a standard operating procedure.
