OASIS+ Phase II RFI - Domains Summary:

OASIS+ contracts are organized into "domains" - groups of related services that include multiple industry codes (NAICS codes). This setup follows a category management approach, with some specialized domains created for specific agency needs. When agencies need services, they choose the domain that best matches their needs, then select the specific industry code that represents the main purpose of their project. This industry code determines whether they need large or small businesses for that particular contract.

When a company qualifies for a domain, they automatically qualify for all the industry codes within that domain. However, a company can be classified as both "large" and "small" within the same domain, depending on which specific industry code applies to each project.

(Phase I) OASIS+ has already awarded contracts for services under eight domains:

- Management & Advisory
- Technical & Engineering
- Intelligence Services
- Research & Development
- Logistics
- Facilities
- Environmental
- Enterprise Solutions (large businesses only)

(Phase II) The OASIS Plus program team is now researching the next phase, which potentially cover five additional domains:

- **Business Administration**
- **Financial Services**
- **Human Capital**
- **Marketing and Public Relations**
- **Social Services**

The details of these domains, including their functional areas, subareas, and NAICS codes, are listed below:

OASIS+ Phase II RFI - Domains Summary:
