US Naval Community College

Data Analytics and Data Science Support Services

1.0 General: This is a non-personnel services contract to provide **Data Analytics, Data Science & Administrative Services** for the United States Naval Community College (USNCC). Consistent with Federal Acquisition Regulation (FAR) 37.104 guidance, all functions and activities will be task driven and the government shall not exercise any supervision or control over the contract service providers performing the services herein. Such contract service providers shall be accountable solely to the contractor who, in turn, is responsible to the government.

1.1 Description of Services: The contractor shall provide all personnel, equipment, supplies, facilities, transportation, tools, materials, supervision, and other items and non-personal services necessary to provide supplemental support to the United States Naval Community College (USNCC) by providing Data Analytics & Data Science support as defined in this Performance Work Statement, except for those items specified as government furnished property and services. The contractor shall meet the standards in this contract.

1.2 Background: The USNCC works with active-duty enlisted Sailors, Marines, and Coast Guardsmen to apply credits earned from military training and prior education toward a naval-relevant associate degree and/or professional certificates. The USNCC envisions offering approximately 15 different associate degree pathways relevant to our Sailors, Marines, and Coast Guardsmen – regardless of their rating or Military Occupational Specialty (MOS) – covering both technical fields (e.g. nuclear engineering technology, cybersecurity) and non-technical fields (e.g. organizational leadership, military studies). Enrollment in current USNCC programs has reached thousands after two years in operation.

1.3 Objectives: Provide an array of comprehensive, integrated program and administrative services for the United States Community College (USNCC) towards continued support for design, operation, and optimization of USNCC academic programs.

2.0 Scope: The contractor shall provide all administrative and logistical resources necessary to perform the required tasks outlined in this Performance Work Statement (PWS). The scope includes the provision of professional services to meet the Data Analytics and Data Science needs of the entire USNCC organization. Contractor efforts shall provide supplemental support to the College's workstreams.

3.0 Tasks: The contractor shall provide qualified personnel with expertise in database management, data analytics, data integration, data visualization, and data governance, capable of performing the following tasks:

3.1 General Data Analytics & Data Science Services

Perform data analytics, data engineering, and data science activities by working with large and complex datasets to identify trends, anomalies, correlations, and other actionable information. Deliverables shall include monthly analytical reports and dashboards that support decision-making at the College. All analyses must meet or exceed defined accuracy and timeliness standards as specified below:

3.1.1 Analyze and interpret data from sources such as Salesforce Education Cloud, AWS Redshift, flat files, Excel Spreadsheet, and PostgreSQL databases using statistical and computational techniques.

3.1.2 Deliver one comprehensive admissions/enrollment dashboard per month (applicant pipeline, admit-to-enroll rates, enrollment distribution).

3.1.3 Provide weekly performance dashboards that classify students as high, medium, or at-risk based on grades, attendance, and LMS activity.

3.1.4 Analytics shall be divided by branch of service, duty location, partner

DRAFT

institution, race/ethnicity, gender, age, and program of study.

3.1.5 Ensure dashboards achieve 98% accuracy compared to source systems.

3.1.6 Identify at a minimum of 3 actionable student success insights per quarter, validated by Government staff.

3.1.7 Achieve at a minimum of 80% positive staff feedback on functionality of dashboards.

3.2 Data Integration & Transformation

Integrate, validate, and transform data from multiple sources to ensure consistency, accuracy, and reliability in reporting and analysis.

3.2.1 Join, transform, and validate datasets from multiple disparate sources to create unified, accurate, Standardized, and comprehensive datasets.

- Achieve at least 95% completeness and accuracy for integrated datasets, measured by automated validation tools.
- Document and resolve all data discrepancies or mismatches within 3 business days.

3.2.2 Apply data validation and transformation logic at the presentation layer to ensure accuracy, reliability, and consistency of reported data.

- Validate 100% of presentation layer data prior to release, with less than 1% error rate in final reports
- Implement automated validation rules that cover at a minimum of 90% of all presentation layer transformations.

3.2.3 Develop and apply complex formulas, expressions, and calculated fields within reporting and visualization tools to support advanced data transformations, aggregations, and analytical requirements.

- Deliver all complex formulas and calculated fields with unit test coverage of at least 95%..
- Maintain formula performance benchmarks with query execution times not exceeding 5 seconds for standard reports.
- Update or add formulas within 5 business days of identified new requirements.

3.2.4 Identify, document, and remediate incomplete data through systematic data quality monitoring and error detection techniques.

- Detect and log 100% of data quality issues through automated monitoring tools.
- Remediate at least 90% of identified data issues within 7 business days.
- Provide monthly data quality reports summarizing issues, remediation status, and trends.

3.2.5 Deliver unified student datasets with 95% or greater completeness and 98% or greater accuracy within 10 business days of receipt.

3.2.6 Resolve data discrepancies (duplicate enrollments, missing grades, unassigned courses) within 7 business days.

3.2.7 Provide monthly data quality reports highlighting anomalies and remediation status.

3.3 Business Process Development

Support the documentation and development of business processes and requirements that enable effective use of data and analytics.

3.3.1 Develop, document, and maintain business process flows using tools such as Lucidchart, Microsoft Visio, diagrams.net (draw.io), or similar software to capture current and future-state workflows.

3.3.2 Write and refine user requirements, use cases, and functional specifications in support of new reports, dashboards, and analytics capabilities.

3.3.3 Deliver a minimum of one updated or new business process flow per quarter, documented using approved tools (Lucidchart, Visio, diagrams.net, or equivalent).

3.3.4 Ensure 100% of business process flows include version control, date of last update, and stakeholder approvals.

3.3.5 Deliver initial draft workflows or process documentation to Government

DRAFT

stakeholders within 20 business days of request, incorporate stakeholder feedback and submit final versions within 5 business days thereafter.

3.3.6 Develop or refine user requirements, use cases, and functional specifications for 100% of new report/dashboard requests within 10 business days of tasking.

3.3.7 Achieve at a minimum of 80% positive staff feedback on functionality of dashboards.

3.4 Reporting, Dashboards, and Visualization

Develop and deliver visualizations and reporting solutions that provide actionable insights to internal and external stakeholders through both enterprise intelligence platforms and advanced spreadsheet-based tools.

3.4.1 Design and develop reports, dashboards, charts, graphs, and tables using enterprise reporting and visualization tools (Salesforce Reports, Dashboards, CRM Analytics, Power BI, and Tableau Cloud) to deliver insights to both internal and external stakeholders.

3.4.2 Develop and Excel-based analytical tools, including pivot tables, advanced formulas, macros, and VBA scripting, to support data analysis, ad hoc reporting, and decision-making needs.

3.4.3 Aggregate data and develop advanced calculations, formulas, and expressions to support complex reporting needs.

3.4.4 Incorporate predictive analytics and statistical modeling to forecast outcomes, measure performance, and support student success initiatives.

3.4.5 Publish monthly program effectiveness dashboards showing outreach, admissions, enrollment, and student demographics.

3.4.6 Provide course registration trends each term showing distributions of new/continuing students by program and demographics.

3.4.7 Deliver predictive dashboards each semester projecting completion rates and identifying students needing intervention before the add/drop deadline.

3.4.8 Ensure dashboards are 508-compliant and achieve at a minimum of 80% user satisfaction on accessibility and usability.

3.4.9 The Contractor shall ensure 100% compliance with all applicable DoD and DON cybersecurity requirements and report all security incidents to the COR within 24 hours of discovery.

3.5 Data Governance & Policy Support

Support USNCC's data governance and policy functions by monitoring data quality, reviewing adherence to established policies and validations, and providing recommendations to Government personnel.

3.5.1 Review existing data to identify anomalies, discrepancies, and quality issues, and report findings to Government personnel in alignment with USNCC's governance standards.

3.5.2 Monitor data against established validations, business rules, and policies to ensure data integrity and compliance.

3.5.3 Provide recommendations to Government personnel on process improvements, efficiencies, and best practices based on data quality analysis and monitoring activities.

3.5.4 Detect and report 100% of anomalies in grades, invalid credit applied by PIs, and eligibility data prior to term start.

3.5.5 Provide monthly and quarterly student progression reports showing the percentage of students on track to completion and graduation, disaggregated by program and demographics

3.5.6 Maintain less than 2% error rate in curated datasets after quality checks.

3.6 User Support & Training

Provide user training and documentation to build data literacy and enable effective use of reporting and analytics solutions.

3.6.1 Prepare user guides, training materials, and technical documentation to

DRAFT

enable end users to effectively prepare datasets, build reports and dashboards, and interpret analytical outputs.

3.6.2 Deliver data literacy and dashboard training sessions to USNCC staff and external partners as directed.

3.6.3 Develop and deliver 100% of required user guides, training materials, and technical documentation within 20 business days of new report/dashboard deployment.

3.6.4 Ensure all documentation includes step-by-step instructions to include screenshots and is version-controlled.

3.6.5 Deliver a minimum of one formal data literacy or dashboard training session per quarter for USNCC staff or external partners, or as directed by Government tasking.

3.6.6 Follow up with 100% of training attendees within 5 business days to provide 1-on-1 support sessions as needed, ensuring user questions are addressed and issues are resolved.

3.6.7 Achieve at a minimum of 90% positive stakeholder feedback on clarity, relevance, and usefulness of user guides and training sessions, measured via surveys or evaluations.

3.7 Analytical & Administrative Support

Provide ongoing analytical and administrative support to leadership and stakeholders.

3.7.1 Provide general analytical support to senior leadership, including the preparation of briefing materials that summarize data findings for management, internal, and external stakeholders.

3.7.2 Schedule, coordinate, and participate in meetings, workshops, and training sessions with internal and external stakeholders as required to accomplish performance requirements.

3.7.3 Manage support cases submitted by functional users related to data issues, reporting, or dashboard requests, ensuring prompt review, resolution, or escalation. As necessary, create and manage Jira tickets to escalate data quality or system issues to Data Engineers and the development team, and track status through to closure.

3.7.4 Respond to 100% of Salesforce support cases within 1 business day.

3.7.5 Escalate unresolved issues to Data Engineers via Jira within 1 business day.

3.7.6 Deliver quarterly briefing reports summarizing applicant trends, enrollment distributions, attrition, financial risk, and program effectiveness.

4.0 Deliverables and Acceptance: The specific deliverables and schedule shall be per the deliverables outlined in 4.3 Deliverables Schedule and 5.0 Performance Requirements Summary USNCC reserves the right to prioritize work and negotiate any changes in delivery dates. The acceptance of deliverables and satisfactory work performance required herein shall be based on the tasks specified in Section 3 of this document. The COR will review the contractor's performance indicators in accordance with all the specifications stated in this document. Only the COR or authorized alternate has the authority to inspect, accept, or reject work performed under this task order.

4.1 Quality Assurance: The government shall evaluate the contractor's performance under this contract in accordance with the Quality Assurance Surveillance Plan (QASP). This plan is primarily focused on what the government must do to ensure that the contractor has performed in accordance with the performance standards. It defines how the performance standards will be applied, the frequency of surveillance, and the minimum acceptable standards. The COR will perform a Quality Assurance Review with the contractor on a quarterly basis. The QASP/contract administration plan will be incorporated into the resultant task order(s). It will outline the duties of the procuring contracting officer (PCO) and the monitoring duties of the COR.

4.2 Contracting Officer Representative (COR): The (COR) will be identified by a separate letter. The COR monitors all technical aspects of the contract and assists in contract administration. The COR is authorized to perform the following functions: assure that the contractor performs the technical requirements of the contract: perform

DRAFT

inspections necessary in connection with contract performance: maintain written and oral communications with the contractor concerning technical aspects of the contract: issue written interpretations of technical requirements, including government drawings, designs, specifications: monitor contractor's performance and notifies both the Contracting Officer and contractor of any deficiencies; coordinate availability of government furnished property, and provide site entry of contractor personnel. A letter of designation issued to the COR, a copy of which is sent to the contractor, states the responsibilities and limitations of the COR, especially with regard to changes in cost or price, estimates or changes in delivery. The COR is not authorized to change any of the terms and conditions of the resulting order.

4.3 Deliverables Schedule:

Deliverable	Copies	Due Date	Medium
Comprehensive Admission/Enrollment Dashboard	1 Dashboard	Monthly	Electronic Copy
Performance Dashboard with student classification	1 Dashboard	Weekly	Electronic Copy
Deliver unified student datasets	1 copy	10th business day of the following month	Electronic Copy
Deliver report identifying data discrepancies	1 copy	Within 7 days of receipt	Electronic Copy
Data Quality Report	1 copy	Monthly	Electronic Copy
Deliver a minimum of one updated; or new business process flow	1 copy	Per quarter	Electronic Copy
Deliver initial draft workflows or process documentation	1 copy	Within 20 business days of initial request, incorporate all feedback and submit final versions within 5 business days thereafter.	Electronic Copy
Develop or refine user requirements, use cases, and functional specifications	1 copy	Within 10 business days of tasking	Electronic Copy
Deliver predictive dashboards projecting completion rates and identifying students needing intervention before the add/drop deadline.	1 copy	Per semester	Electronic Copy
Provide student progression reports showing the percentage of students on track to completion and graduation, disaggregated by program and demographics	1 Copy	Monthly / Quarterly	Electronic Copy
Develop and deliver user guides, training materials,	1 Copy	Within 20 business days of new report/dashboard deployment	Electronic Copy

DRAFT

and technical documentation			
Provide a minimum of one formal data literacy or dashboard training session per quarter for USNCC staff or external partners as required.	1 Copy	Quarterly	Electronic Copy
Provide Report summarizing applicant trends, enrollment distributions, attrition, financial risk, and program effectiveness	1 Copy	Quarterly	Electronic Copy
Monthly Status Report provided to the COR	1 Copy	Monthly	Electronic Copy

4.4 Monthly Status Report: The contractor shall provide detailed monthly status reports identifying all actions taken and work performed during the previous month, no later than the 10th business day of the following month The reports may be in a contractor-defined format. The detailed information shall directly align to the performance requirements summary and associated PWS tasks. It shall identify all active projects, describing actions completed, problems encountered, actions to be taken, actions to be completed in the next two weeks, actions to be completed in the next month, and any other information, comments, or recommendations that may be beneficial to the success of the project. The report should also include any communications that occurred throughout the month with other government employees and/or contractors involved with relevant efforts. The report shall include any barriers that the contractor is facing, as well as recommendations for overcoming such barriers.

5.0 Performance Requirements Summary: The contractor service requirements are summarized into performance objectives that relate directly to mission essential items. The performance threshold briefly describes the minimum acceptable levels of service required for each requirement.

SPEC ITEM REFERENCE	PERFORMANCE OBJECTIVE	STANDARD	PERFORMANCE THRESHOLD	SURVEILLANCE METHOD	INCENTIVE
3.1 General Data Analytics Services	Perform General Data Analytics Services tasks in accordance with the PWS and technical direction of the COR.	Adhere to requirements specified in paragraph 3. of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation
3.2 Data Integration & Transformation	Perform Data Integration & Transformation tasks in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.2 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation
3.3 Business Process Development	Perform Business Process Development tasks in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.3 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation
3.4 Reporting, Dashboards, and Visualizations	Perform Reporting, Dashboard development and maintenance, and visualization tasks in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.4 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation

3.5 Data Governance & Policy Support	Ensure Data Governance & Policy support tasks are current and in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.5 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation
3.6 User Support & Training	Provide User Support & Training in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.6 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation
3.7 Analytical & Administrative Support	Provide Analytical & Administrative support services are in accordance with the PWS and technical direction of the COR or designee.	Adhere to requirements specified in paragraph 3.7 of the PWS	95% on time and 5% or below error rate.	Random Review	Exercise option and favorable past performance evaluation

6.0 Requirements:

6.1 Type of Contract: Firm Fixed Price

6.2 Period of Performance: The period of performance shall be for one (1) Base Year and three (3) 12-month option years. FAR 52.217-8 is included in the contract, extending performance up to 6 months. The option period(s) will be exercised solely at the government's discretion. The Period of Performance reads as follows:

Base:	12 JAN 2026 TO 11 JAN 2027
Option Year I:	12 JAN 2027 TO 11 JAN 2028
Option Year: II	12 JAN 2028 TO 11 JAN 2029
Option Year: III	12 JAN 2029 TO 11 JAN 2030
FAR 52.217-8	12 JAN 2030 TO 11 JULY 2030

6.3 Place of Performance: The primary places of performance will be at the United States Naval Academy (USNA), Annapolis Maryland and Marine Corps Base, Quantico (MCBQ), Virginia. Due to the nature of the requirement, performance will also occur at other National Capital Region (NCR) government locations. Local travel will not be reimbursed. Occasional performance may occur at the contractor site upon coordination

7.0 Contractor Security Requirements:

7.1 Contractor Unclassified Access to Federally Controlled Facilities, Sensitive Information, IT Systems or Protected Health Information: Homeland Security Presidential Directive (HSPD)-12, requires government agencies to develop and implement federal security standards for federal employees and contractors. The Deputy Secretary of Defense Directive-Type Memorandum (DTM) 08-006 Department of Defense (DOD) Implementation of HSPD-17 dated November 26, 2008 (or its subsequent DOD Instruction (INST)) directs implementation of HSPD-12. This clause is in accordance with HSPD-12 and its implementing directives.

7.2 Applicability: This text applies to contractor employees requiring physical access to any area of a federally controlled base, facility or activity and/or requiring access to a Department of the Navy (DON) or DOD computer/network/system to perform certain unclassified sensitive duties. This clause also applies to contractor employees who access Privacy Act and Protected Health Information (PHI), provide support associated with fiduciary duties, or perform duties that have been identified as National Security Position, as advised by the command security manager. It is the responsibility of the responsible security officer of the command/facility where the work is performed to ensure compliance. Each contractor employee providing services at a Navy command under this contract is required to obtain a DOD Common Access Card (CAC). Additionally, depending on the level of computer/network access, the contract employee will require a successful investigation as detailed below.

DRAFT

7.3 Access to Federal Facilities: Per HSPD-12 and implementing guidance, all contractor employees working at a federally controlled base, facility or activity under this clause will require a DOD CAC. When access to a base, facility or activity is required contractor employees shall in-process with the Command's Security Manager (CSM) upon arrival to the command and shall out-process prior to their departure at the completion of the individual's performance under the contract.

7.4 Access to DOD IT System: In accordance with Secretary of the Navy (SECNAV) M-5510.30, contractor employees who require access to DON or DOD networks are categorized as IT-I, IT-II, or IT-III. The IT-II level, defined in detail in SECNAV M-5510.30, includes positions which require access to information protected under the Privacy Act, to include PHI. All contractor employees under this contract who require access to Privacy Act protected information are therefore categorized no lower than IT-II. IT Levels are determined by the requiring activity's Command Information Assurance Manager (CIAM).

- Contractor employees requiring privileged or IT-I level access, (when specified by the terms of the contract) require a Single Scope Background Investigation (SSBI) or T5 or T5R equivalent investigation, which is a higher level investigation than the National Agency Check (NAC) with Law and Credit (NACLC)/T3/T3R described below. Due to the privileged system access, an investigation suitable for High Risk national security positions is required. Individuals who have access to system control, monitoring, or administration functions (e.g. system administrator, database administrator) require training and certification to Information Assurance (IA) Technical Level 1, and must be trained and certified on the Operating System (OS) or Computing Environment (CE) they are required to maintain.
- Access to sensitive IT systems is contingent upon a favorably adjudicated background investigation. When access to IT systems is required for performance of the contractor employee's duties, such employees shall in-process with the Navy command's security manager and IA manager upon arrival to the Navy command and shall out-process prior to their departure at the completion of the individual's performance under the contract. Completion and approval of a System Authorization Access Request Navy (SAAR-N) form is required for all individuals accessing Navy IT resources. The decision to authorize access to a government IT system/network is inherently governmental. The contractor supervisor is not authorized to sign the SAAR-N; therefore, the government employee with knowledge of the system/network access required or the COR shall sign the SAAR-N as the supervisor.
- The SAAR-N shall be forwarded to the CSM at least thirty (30) days prior to the individual's start date. Failure to provide the required documentation at least thirty (30) days prior to the individual's start date may result in delaying the individual's start date.
- When required to maintain access to required IT systems or networks, the contractor shall ensure that all employees requiring access complete annual Information Awareness (IA) training, and maintain a current requisite background investigation. The contractor's security representative shall contact the command security manager for guidance when reinvestigations are required.

7.5 Interim Access: The CSM may authorize issuance of a DOD CAC and interim access to a DON or DOD unclassified computer/network upon a favorable review of the investigative questionnaire and advance favorable fingerprint results. When the results of the investigation are received and a favorable determination is not made, the contractor employee working on the contract under interim access will be denied access to the computer network and this denial will not relieve the contractor of his/her responsibility to perform.

7.6 Denial or Termination of Access: The potential consequences of any requirement under this clause including denial or termination of physical or system access in no way relieves the contractor from the requirement to execute performance under the contract within the timeframes specified in the contract. Contractors shall plan accordingly while processing their employees and subcontractor employees. The contractor shall insert this clause in all subcontracts when the subcontractor is permitted to have unclassified access to a federally controlled facility, federally-controlled information system/network and/or to government information, meaning information not authorized for public release.

7.7 Contractor's Security Representative: The contractor shall designate an employee to serve as the contractor's security representative. Within three (3) business days after contract award, the contractor shall provide to the requiring activity's Security Manager and the Contracting Officer, in writing, the name, title, address and phone number for the contractor's security representative. The contractor's security

DRAFT

representative shall be the primary point of contact on any security matter. The contractor's security representative shall not be replaced or removed without prior notice to the Contracting Officer and CSM.

7.8 Background Investigation Requirements and Security Approval Process for Contractors Assigned to National Security Positions or Performing Sensitive Duties: Navy security policy requires that all positions be given a sensitivity value based on level of risk factors to ensure appropriate protective measures are applied. Contractor employees under this contract are recognized as Non-Critical Sensitive [ADP/IT-II] positions when the contract scope of work require physical access to a federally controlled base, facility or activity and/or requiring access to a DOD computer/network, to perform unclassified sensitive duties. This designation is also applied to contractor employees who access Privacy Act and PHI, provide support associated with fiduciary duties, or perform duties that have been identified as National Security Positions. At a minimum, each contractor employee must be a US citizen and have a favorably completed NACLC or T3 or T3R equivalent investigation to obtain a favorable determination for assignment to a non-critical sensitive or IT-II position. The investigation consists of a standard NAC and a Federal Bureau of Investigation (FBI) fingerprint check plus law enforcement checks and credit check. Each contractor employee filling a non-critical sensitive or IT-II position is required to complete:

- SF-86 Questionnaire for National Security Positions (or equivalent Office of Personnel Management (OPM) investigative product)
- Two FD-258 Applicant Fingerprint Cards (or an electronic fingerprint submission
- Original Signed Release Statements

Failure to provide the required documentation at least thirty (30) days prior to the individual's start date shall result in delaying the individual's start date. Background investigations shall be reinitiated as required to ensure investigations remain current (not older than ten (10) years) throughout the contract performance period. The contractor's security representative shall contact the command security manager for guidance when reinvestigations are required.

Regardless of their duties or IT access requirements ALL contractor employees shall in-process with the CSM upon arrival to the command and shall out-process prior to their departure at the completion of the individual's performance under the contract. Employees requiring IT access shall also check-in and check-out with the Navy command's information assurance manager. Completion and approval of a System Authorization Access Request Navy (SAAR-N) form is required for all individuals accessing Navy IT resources. The SAAR-N shall be forwarded to the Navy command's security manager at least thirty (30) days prior to the individual's start date. Failure to provide the required documentation at least thirty (30) days prior to the individual's start date shall result in delaying the individual's start date.
The contractor shall ensure that each contract employee requiring access to IT systems or networks complete annual IA training, and maintain a current requisite background investigation. Contractor employees shall accurately complete the required investigative forms prior to submission to the CSM. The CSM will review the submitted documentation for completeness prior to submitting it to the Office of Personnel Management (OPM); Potential suitability or security issues identified may render the contractor employee ineligible for the assignment. An unfavorable determination is final (subject to SF-86 appeal procedures) and such a determination does not relieve the contractor from meeting any contractual obligation under the contract. The CSM will forward the required forms to OPM for processing. Once the investigation is complete, the results will be forwarded by OPM to the DOD Central Adjudication Facility (CAF) for a determination.

If the contractor employee already possesses a current favorably adjudicated investigation, the contractor shall submit a Visit Authorization Request (VAR) via the Joint Personnel Adjudication System (JPAS) or a hard copy VAR directly from the contractor's Security Representative. Although the contractor will take the JPAS owning role over the contractor employee, the command will take the JPAS "Servicing" role over the contractor employee during the hiring process and for the duration of assignment under that contract. The contractor shall include the IT position category per SECNAV M-5510.30 for each employee designated on a VAR. The VAR requires annual renewal for the duration of the employee's performance under the contract.

DRAFT

7.9 Background Investigation Requirements and Security Approval Process for Contractors Assigned to or Performing Non-sensitive Duties: Contractor employee whose work is unclassified and non-sensitive (e.g., performing certain duties such as lawn maintenance, vendor services) and who require physical access to publicly accessible areas to perform those duties shall meet the following minimum requirements:

- Must be either a United States (U.S.) citizen or a U.S. permanent resident with a minimum of 3 years legal residency in the U.S. (as required by the Deputy Secretary of Defense DTM 08-006 or its subsequent DOD INST), and
- Must have a favorably completed National Agency Check with Written Inquiries (NACI) or T1 investigation equivalent including a FBI fingerprint check prior to installation access.

To be considered for a favorable trustworthiness determination, the CSR must submit for all employees each of the following:

- SF-85 Questionnaire for Non-Sensitive Positions
- Two FD-258 Applicant Fingerprint Cards (or an electronic fingerprint submission)
- Original Signed Release Statements

The contractor shall ensure each individual employee has a current, favorably completed NACI or T1 equivalent investigation, or ensure successful FBI fingerprint results have been gained and investigation has been processed with OPM. Failure to provide the required documentation at least thirty (30) days prior to the individual's start date may result in delaying the individual's start date.

8.0 Government Furnished Property, Equipment, And Services:

8.1 Services: The government will provide telephone, e-mail services, and commercial internet service provider service in the facility. The government will provide access to the existing MCU Network as needed for the function of official business use only.

8.1.1 The government will provide access to the student information system (SIS), Learning Management System (LMS), Project Management System (PMS) and any other systems or applications needed to complete assigned tasks. Necessary systems, programs and IT support will be provided to adequately complete all the requirements stated in this PWS.

8.2 Facilities: The government will provide the necessary workspace for the contractor staff to provide direct support outlined in the PWS to include desk space, and/or allow telework or remote work at the discretion of the government.

8.3 Utilities: The government will provide all utilities in the facility for the contractor's use in performance of tasks outlined in this PWS.

8.4 Equipment: The government will provide Common Access Cards (CACs), phones, computers, and multi-functional devices (on-site) and other items necessary to maintain an office environment for completion of requirements. The contractor shall be liable for loss or damage to government furnished property and equipment beyond fair wear and tear.

8.4.1 The contractor will be responsible for tracking Government-furnished Equipment (GFE), for each contractor on the contract, when applicable. An ad hoc report for the equipment assigned to each contractor will be required when the COR deems necessary. The report should include, at a minimum: name of contractor, the equipment assigned to the contractor and the date of when the equipment was acquired and a date when the equipment was returned.

8.5 Government Furnished Information: All DOD, DON, and USNCC procedural/policy guidelines, standards, reference material and other pertinent documentation needed to complete the tasks outlined in this PWS.

9.0 Contractor Furnished Items, Services And Responsibilities:

9.1 General: Except for those items specifically stated to be government furnished in Section 8, the contractor shall furnish all everything required to perform the tasks as outlined within this PWS.

9.2 Cost of Doing Business: The contractor will not be reimbursed for the normal cost of doing business. This includes, but is not limited to, personnel, administrative costs, and contractor owned equipment, automotive cost, training, day-to-day office supplies and any items determined by the contracting officer.

DRAFT
