**PERFORMANCE WORK STATEMENT (PWS)**
**Defense Language Institute Foreign Language Center (DLIFLC)**
**Academic Network Labor Contract**
**26 JAN 2026**

# PART 1

# GENERAL INFORMATION

**1. GENERAL:** This is a non-personal service(s) contract under which the personnel rendering the service(s) are not subject, either by the contract's terms or by the manner of its administration, to the supervision and control usually prevailing in relationships between the Government and its employees.

**1.1 DESCRIPTION OF SERVICES/INTRODUCTIONS:** This is a non-personal service(s) contract to provide the required support services as defined in this PWS except for those items specified as Government furnished property and services. The Contractor shall perform to the standards specified in this contract.

**1.2 BACKGROUND:** DLIFLC supports a population of approximately 5,950 military and federal civilian employees worldwide. The Deputy Chief of Staff for Information Technology (DCSIT) manages the unclassified DLIFLC Language Training Network (EDU Network). There are 84 buildings (estimated) at the Main Post (393 acres— Monterey, CA), and the Ord Military Community (OMC/797 acres— Seaside, CA). DLIFLC also supports the DLI –Washington DC (DLI-W) (15 personnel), Fort Huachuca, Arizona (FHAZ) (12 personnel), Hawaii Learning Center (HLC) (12 personnel), and the DLIFLC Vilseck, Germany (VLC) Language Training Detachment (LTD) remote site (20 personnel) and newly established Fort Huachuca, AZ Detachment. Resident instruction is provided at the Presidio of Monterey in 23 languages plus several dialects. There are approximately 850 classrooms and conference rooms with educational network services. The present facilities at the Presidio of Monterey can accommodate approximately 4,000 students. Instruction in over 23 languages and dialects is also routinely provided under DLIFLC- supervised contractual arrangements in Washington, DC. The DLIFLC also provides remote access capabilities in support of extensive non-resident instructional support in a variety of languages and dialects at 23+ Language Training Detachment locations.

The Language Training Network, referred to as the "EDU" is the primary network at the DLIFLC at the unclassified level. Approximately 300 EDU customers operate on both the Army military (MIL) network and the EDU. The NIPR-MIL and EDU networks are physically separate. The Helpdesk technicians provide both NIPR-MIL and EDU support to approximately 1,600 faculty, 4,000 students and 350 staff. Palo Alto Firewall and Proof Point SPAM Filter provide perimeter security for the network and Extreme edge devices are distributed to 84 buildings with 728+ Wireless Access Points deployed. There are Smart Boards, SmartTVs, with Windows computers deployed to all 850 classrooms and conference rooms. All staff, faculty, and students are issued MacBook

Pro laptops and iPads for their tenure at DLIFLC. There are graduating classes of students nearly every week and equipment is turned in, reimaged, and then reissued to new incoming students and faculty daily.

The EDU network is a mixture mostly of Apple and Academic Microsoft centric solution; VMWare is used to deliver the 100% virtualized server environment (34 physical and 499 virtual servers, including dev, staging and production, internal and external facing). Virtual Desktop Infrastructure is deployed and used for the Windows desktop on the Apple devices. Microsoft 365 Academic Tenant with Azure is utilized with SharePoint Online, OneDrive, Microsoft Teams, and the full suite of MS Office products (Outlook, Word, Excel, PowerPoint, Project, and Visio) and Power BI/Applications. The School and the LTDs use Canvas as the Learning Management System as well as many Academic tools for language education. DCSIT maintains business applications for the institution to include the Internal and Public Facing systems, a SharePoint Portal, SharePoint Business Intelligence and Data warehouse, Student Information Repository, Curriculum Authoring tools, video and audio editing tools, and pronunciation tools. ACAS is used to scan for vulnerabilities and Ivanti (or equivalent IT Service Management (ITSM) Platforms, and Jamf Pro are used to deploy patches. Windows Defender and Proofpoint is the Anti-Virus and host-based monitoring solution. SecureVue, ClearPass, SafeNet, Web Inspect, and Alienvault are used for access control, monitoring and log management. The network maintains an Approval to Operate (ATO) based on criteria that are like a NIPR and Navy network standards using the DoD Risk Management Framework (RMF) methodology.

The Extreme Network devices are the backbone of the DLIFLC .EDU network. These systems must be maintained by a qualified systems engineer with Extreme Networks hardware and knowledge of all the network hardware, software, processes, requirements, and specific configurations unique to DLIFLC.

**1.3 SCOPE:** The Contractor shall provide non-personal service(s). The contractor shall provide full range of IT support and system engineering services of hardware and software, infrastructure (including network support and data center) maintenance, operation, and Cybersecurity for the EDU network and the entire DLIFLC campus at the secret level. This will include support to activities such as:

1.3.1 IT Resource Management (ITRM)
- 1.3.1.1 Supply – Technical Equipment/ Hardware Issuance
- 1.3.1.2 Supply Chain/Warehouse Operations
- 1.3.1.3 IT Supply Inventory and Asset Tracking Customer Supply
- 1.3.1.4 Support Services Warranty Coordination/Handling

1.3.2 Information Technology Support (ITS)
- 1.3.2.1 Help Desk Operations
- 1.3.2.2 Client Configuration Management
- 1.3.2.3 Classroom, Conference and Audio-Visual Support

1.3.3 Cyber Infrastructure Network (CIN)
- 1.3.3.1 Network operation and maintenance (O&M) support
- 1.3.3.2 Engineering and integration
- 1.3.3.3 Network infrastructure design and architectural planning
- 1.3.3.4 Wireless networking
- 1.3.3.5 Wireless mobility controllers
- 1.3.3.6 Perimeter firewall administration
- 1.3.3.7 Dense Wavelength Division Multiplexing (DWDM)
- 1.3.3.8 O&M Data center switching
- 1.3.3.9 Network Access Control (NAC)

1.3.4 Cybersecurity (CS)
- 1.3.4.1 Vulnerability Management and coordination
- 1.3.4.2 Enterprise cybersecurity solutions
- 1.3.4.3 Incident response
- 1.3.4.4 Advisement of secure architectures and application development/sustainment
- 1.3.4.5 Performing information security risk assessments
- 1.3.4.6 Enterprise Implementation and sustainment of the Risk Management. Framework (RMF)

1.3.5 Application Development (AppDev)
- 1.3.5.1 Software systems planning, creation planning, creation, and implementation
- 1.3.5.2 Software application development/sustainment, maintenance, enhancements, and engineering
- 1.3.5.3 Communications support
- 1.3.5.4 Unified communications
- 1.3.5.5 Communication of project objectives and progress tracking
- 1.3.5.6 Learning Management System (LMS) Administration
- 1.3.5.7 Artificial Intelligence (AI) and Virtual Reality (VR)

1.3.6 Data Center Operations Support (DCO)
- 1.3.6.1 Infrastructure database architecture, modeling architecture, modeling, and administration Business continuity
- 1.3.6.2 Backup and storage management
- 1.3.6.3 IT infrastructure support
- 1.3.6.4 IT system administration
- 1.3.6.5 Communications support Data Center configuration and operations
- 1.3.6.6 IT Support to Knowledge Management

1.3.7 Remote Site Services (RSS)
- 1.3.7.1 Mobile Device Management (MDM)
- 1.3.7.2 Client Configuration Management
- 1.3.7.3 End User Support
- 1.3.7.4 Telecommunications Management Services

1.3.7.5 Apple Enterprise Management/Planning

**1.4 OBJECTIVES:** The objective of this contract is to administer, maintain, secure, and accredit the DLIFLC Academic Network which provides the IT environment for 100% of the DLIFLC teaching and instructing, for all students, staff, faculty and guests in a learning environment at an unclassified level. Additionally, this contract is to provide a senior level Onsite Engineer (OSE) certified to work on all Extreme Network devices. (With maintenance and warranty contracts in place, the OSE's primary focus lies on critical tasks, including Resource Utilization, Performance Optimization, Capacity Planning, Security Enhancements, Troubleshooting and Maintenance, Software License Management, and Virtualization and Cloud Solutions. None of these tasks would require any unauthorized modifications or work on Extreme equipment and risk of voiding its warranties.

**1.5 GENERAL INFORMATION:**

**1.5.1 QUALITY CONTROL PLAN (QCP):** The Contractor shall develop and maintain a QCP to ensure services are performed in accordance with (IAW) this PWS. The Contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The Contractor's QCP is how they assure that the work provided complies with the requirements of the contract.

The Contractor’s Proposed QCP shall be submitted to the Contracting Officer (KO) through the Contracting Officer’s Representative (COR) for review within thirty (30) days after the Period of Performance start date.

The Government will review and either notify the Contractor in writing of acceptance of the plan or return their comments to the Contractor within fourteen (14) days. If the Government has provided comments, the Contractor shall then have seven (7) days to submit a Final QCP. After receipt of the Final QCP, the Contractor may receive the Contracting Officer’s acceptance in writing. Any proposed changes to the accepted QCP are required to be resubmitted for acceptance by the Contracting Officer no later than seven (7) days prior to the anticipated change and before implementation by the Contractor. The timeline noted above will apply for review and acceptance of proposed changes. At a minimum, the QCP must include and answer the following to be acceptable:

1.5.1.1 How the contractor will monitor work to ensure performance complies with all deliverables (etc. timelines, deadlines, and goals).

1.5.1.2 How the contractor will monitor work to ensure performance complies with all specifications and requirements of the contract, including the contract’s clauses.

1.5.1.3 How the contractor will monitor and ensure staff qualifications remain current and valid throughout contract performance.

1.5.1.4 How the contractor will ensure all keys issued will remain controlled items (Paragraph 1.7 Key Control)

1.5.1.5 How the contractor will identify, investigate, and correct any non-confirming performance and prevent similar deficiencies in the future; and

1.5.1.6 How the contractor will file and save all Quality Control related documents for the life of the contract plus 5 years.

1.5.1.7 An analysis of Quality Control and Timeliness of Submittals (i.e. deliverables) shall be provided to the COR and CIO within thirty (30) days upon completion of each option period or Task Order .

1.5.1.8 The contractor shall inform the COR and CIO of issues or potential issues that might affect the performance within twenty-four hours of identifying those issues. Verbal reports shall be followed by written reports within five (5) days.

**1.5.2 QUALITY ASSURANCE (QA):** The Government will evaluate the Contractor's performance under this contract in accordance with the PWS. In addition, the Performance Requirements Summary (PRS) defines how the performance standards will be applied.

**1.5.3 RECOGNIZED HOLIDAYS:** The following provides information on recognized holidays for the purpose of the PWS. If the submittal of any documentation (e.g. deliverables, submittals, etc.) deadlines fall on a holiday, the closest workday prior to the holiday will apply as the deadline for submittal.

**1.5.3.1 U.S. HOLIDAYS:** Work shall not be performed on U.S. federally recognized holidays occurring during the normal workweek unless otherwise directed by the KO. When a U.S. holiday occurs on a Saturday or a Sunday, the holiday is observed on the preceding Friday or following Monday, respectively.

| **Table 1. US Holidays** | |
|---|---|
| New Years Day | 1st day of January |
| Martin Luther King Jr's Birthday | 3rd Monday of January |
| Presidents Day | 3rd Monday of February |
| Memorial Day | Last Monday of May |
| Juneteenth | 19th day of June |
| Independence Day | 4th day of July |
| Labor Day | 1st Monday of September |
| Columbus Day | 2nd Monday of October |
| Veterans Day | 11th day of November |
| Thanksgiving Day | 4th Thursday of November |
| Christmas Day | 25th day of December |

**1.5.3.2 Host Nation Holidays:** ***(As applicable to OCONUS requirements)*** Work *shall not* be performed on local Host Nation holidays occurring during the normal workweek unless otherwise directed by the Contracting Officer.

**1.5.4 OPERATING HOURS:** The Government facility office hours, facility operating hours, and the Contractor support hour requirements often coincide, however, they may differ. Please refer to the following.

**1.5.4.1 GOVERNMENT FACILITY OFFICE HOURS:** The Government facility office hours are 0730 - 1630 Monday through Friday except U.S. Holidays identified in paragraph 1.6.3.1 above or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government directed facility closings.

**1.5.4.2 GOVERNMENT FACILITY OPERATING HOURS:** The Government facility operating hours occur between the hours of 0730 – 2100, Monday – Friday or 0800 – 1700, Saturday and Sunday. The Government facility is not open for operations during the recognized U.S. Holidays identified in paragraph 1.5.3.1 above. The Government facility may close due to local or national emergencies, administrative closings, or similar Government directed facility closings and will be communicated by the Contracting Officer to the Contractor.

**1.5.4.3 CONTRACTOR SUPPORT HOURS:** The Contractor shall provide support between the hours of 0730 - 1630, Monday through Friday. The Contractor shall always maintain an adequate workforce, for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. When hiring personnel, the Contractor shall keep in mind that the stability and continuity of the workforce is essential.

**1.5.4.3.1 CONTRACTOR WORK PLAN:** The Contractor shall prepare and maintain a Work Plan. The plan, as a minimum, shall identify regularly scheduled work (to include location, work to be completed, timeline, etc.). The Contractor's proposed Work Plan shall be submitted to the Contracting Officer and CIO via the COR for review within thirty (30) days after Period of Performance start date. The Government will review and either accept or return their comments to the Contractor within fourteen (14) days. The Contractor shall then have seven (7) days to submit a Final Work Plan. Any proposed change to the accepted Final Work Plan is required to be resubmitted via the COR for review and acceptance by the Contracting Officer at a minimum seven (7) days prior to implementation. The timeline noted above shall apply for review and acceptance for proposed changes.

**1.5.5 TRAINING HOLIDAYS: USAREUR theater** has historically granted military personnel training holidays as compensation for time that they spent in field training. These are typically combined with regular holiday leave schedules (for example, Christmas half days or day on day off schedules). Training holidays may affect access to military operated facilities. If scheduled work or access to facilities is required,

coordination with occupants will be necessary or the work in affected facilities shall be rescheduled after the training holiday. However, announced training holidays or exodus of military personnel may provide the Contractor with an opportunity for unrestricted access to facilities and areas. The Contractor shall take full advantage of such opportunities by planning maintenance or actions that are better accomplished when such areas are vacant.

**1.5.6 PLACE OF PERFORMANCE:** The work to be performed under this contract will be performed at the Presidio of Monterey (POM), Monterey CA, Mililani, HI (HLC), Fort Huachuca, AZ (FHAZ), and Crystal City, VA (DLI Washington). Performance could also be located at LTD sites throughout the Continental United States (CONUS). Taskings requiring work performance at other locations will be specified in detail as needed.

Telework/Remote may be authorized on a case-by-case basis to include place of performance. Historically, 20% of employees telework/remote work. Currently the Government has no plans to change telework/remote work availability and will continue to utilize this flexibility, but the government reserves the right to approve or disapprove based on mission needs. Over the course of performance telework/remote work may increase, decrease, or be eliminated entirely subject to mission requirements and changes in public policy. Any changes to telework/remote work during the period of performance shall be at no cost to either party. Changes in telework/remote work do not abrogate the contractor's responsibility to perform services IAW this PWS.

**1.6 SECURITY REQUIREMENTS:** The following information is provided on security related matters.

**1.6.1 SECURITY PROGRAM:** Work on this contract will require that Contractor personnel have access to sensitive, privileged, or Privacy Act Information. Personnel shall adhere to the Privacy Act, (5 U.S.C. & 552a) and applicable Agency rules and regulations. Contractor personnel shall not divulge, or release privacy data or information developed or obtained in the performance of this contract award, until made public or specifically authorized by the Government. The Contractor shall not use, disclose, or reproduce third-party company's propriety data, other than as authorized and required in the performance of this contract award. The Contractor shall notify the Primary COR within 24 hours, identifying personnel that no longer require access to Government information systems.

Contractor personnel performing work under this contract must have the security background that meets the AR 25-1 requirements for an unclassified network and IAT Level identified in paragraph 1.10 and attachment 5 of this PWS at time of the proposal submission and must maintain the level of security required for the life of the contract. The awarding contracting company must have a valid facility clearance at the time of the award. The security requirements are IAW with the DoD Contract Security Classification Specification (DD Form 254), which is currently accessible at the following link: http://www.dtic.mil/whs/directives/forms/eforms/dd0254.pdf.

**1.6.2 PERSONNEL SECURITY REQUIREMENTS:** Contractor shall work with the government component to provide assistance to manage and facilitate the support of personnel security activities to include submission of security clearance documentation and employee's official security files IAW but not limited to AR 380-67 and 32 CFR Part 117. The nature and sensitivity of the supported tasks under this contract requires that all contractor personnel working within the unclassified EDU network obtain and maintain a favorable Tier 1 level background investigation and IAT Level IAW para 1.10 and attachment 2 to include fingerprints in the current DoD system of record.

Contract personnel that require Tier 2 level background investigation indicated in Attachment 5 must be able to obtain and maintain a SECRET security clearance. Clearance shall be in place for personnel within 30 days of contract award.

Interim clearances for personnel may be approved on a case-by-case basis and at no cost to U.S. government. Denial of interim clearance shall not abrogate the contractor's responsibility to fully perform under this contract and shall not be a basis for adjustment under this contract.

**1.6.3 INSTALLATION/POST ACCESS:** IAW Army and service regulations and instructions, all prospective Contractors will undergo verification process to determine the trustworthiness and suitability prior to being granted access to Federal property. Limited access with escorts may be granted (at the installation's discretion) for an interim period while investigations are being conducted. Contractor shall provide all information required for background checks to meet installation access requirements to be accomplished by the installation Provost Marshall Office, Director of Emergency Services or Security Office. Contractor workforce must comply with all personal identity verification requirements (FAR clause 52.204-9, Personal Identity Verification of Contractor Personnel) as directed by DoD, HQDA and/or local installation policy. In addition to the changes otherwise authorized by the changes clause of this contract, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in contractor security matters or processes. The Contractor clearance must be verified for a favorable Tier 1 with fingerprints and cleared through the local DLIFLC Security Office, prior to execution of this effort.

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE 12 BACKGROUND INVESTIGATION REQUIREMENTS: The Contractor shall ensure Common Access Cards (CACs) are obtained by all Contract personnel assigned to work on the Government site and by personnel requiring access to a DoD network and are required to, at a minimum, have received a favorable FBI fingerprint check and must have submitted to the Office of Personnel Management (OPM) a National Agency Check with Inquiries (NACI/Tier 1/SF85P) or equivalent/higher investigation. It is the responsibility of the Contractor to ensure that all employees requiring an initial background investigation complete a Personnel Security Investigation Portal (PSIP) form at the earliest possible date and that this form is forwarded to the COR-RA immediately. The COR-RA will review the form for completeness and accuracy and forward through

DCSIT Acquisition Specialist to the DLIFLC Security manager who will initiate the investigation process via the PSIP. Contractor personnel will then receive two e-mail messages; the first will confirm that the request has been received by OPM, and the second will provide instructions for the completion of the appropriate form via the Electronic Questionnaires for Investigations Processing (e-QIP) system. Upon completion of the e-QIP questionnaire and submittal of all required documents, including fingerprint card to the security manager, the background investigation will be initiated.

The Contractor shall ensure all instructions regarding background investigation processing, including those provided verbally, by e-mail or via a Government system are complied with immediately. The Contractor is cautioned that the entire process from submittal of the PSIP form to return of the FBI fingerprint check may routinely take from 2-6 weeks and shall factor this lead time into its hiring/placement process. The Contractor shall make all reasonable efforts to ensure that Contractor employees meet CAC eligibility standards upon assignment to DLIFLC and shall be held responsible for delays, failure to meet performance requirements or decreases in efficiency IAW the applicable inspection clause.

CACs will not be issued before the fingerprint check results have been completed and the investigation has been submitted by the government component. Prior to CAC issuance, a Tier 1 background investigation with fingerprint check must be completed without adverse comment in the current DoD system of record. The government component will submit the background investigations for positions that require a CAC for information technology (IT) access for the unclassified DLIFLC LTN (EDU).
The Contractor shall submit each contractor personnel information into the current DoD system of record providing support under this contract using provided SMO code(s) for Visit Authorization to the DLIFLC Organization Security Office and comply with but not limited to AR 380-67 and 32 CFR Part 117 (NISPOM) and other applicable DoD governance.

Employee information is maintained and retained in the strictest confidence and prevent the unauthorized duplication, use, and disclosure of such information. Information shall only be provided to personnel having a need to know such information in the performance of their duties involving or associated with this PWS.

**1.6.3.1 INSTALLATION PASS LOG:** In addition, the Contractor shall provide the Contracting Officer and CIO, via the COR, an Initial Installation Pass Log within thirty (30) days after Period of Performance start date. The log must at a minimum contain the following information (PSIP Application, Birth Certificate or proof of US Citizenship, Driver's License, Third Party Background Release Form, Third Party Background check, resume, and IT certifications (if applicable). The log shall be updated at DLIFLC Security Office as employees are added or removed. The Updated Installation Pass Log shall be current and available at any time upon request by the Government and submitted to the COR within five (5) days after any changes to the log.

**1.6.3.2 INDIVIDUAL TERMINATION OR EXPIRATION OF EMPLOYMENT:** The Contractor shall collect the installation access passes and or CACs the same day employment of an individual has expired or has been terminated and shall return them to the COR within one (1) and no later than three (3) working days. Also, the departing contractors shall turn in CAC to their Program Manager. The security managers will terminate all access to be removed in MP-ICAM formerly TASS.

**1.6.3.3 CONTRACT TERMINATION OR CANCELLATION:** Upon termination or cancellation of this contract, the Contractor shall collect all outstanding installation access passes and return them to the issuing office within five (5) working days.

**1.6.3.4 COMMON ACCESS CARD (CAC) and CAC LOG:** Contractor employees requiring access to Government installations or unclassified DoD computer information system must be issued a CAC. Proof of employment and security clearance (if required) and an initiated Tier 1 background investigation with favorable FBI fingerprints with "No Record" is required before a CAC will be issued authorizing access to approved Government installation(s). If access to an unclassified DoD computer information system is required, the Contractor must be a U.S. Citizen and hold at least a favorable Tier 1 investigation and if applicable, complete a DD Form 2875 - System Authorization Access Request (SAAR), prior to loading network certificates onto the CAC. Upon notification from the government component, the contractor personnel will go to the designated DEERS facility and obtain the CAC. All CAC identification credentials shall immediately be delivered to the COR for cancellation/revocation in the MP-ICAM portal upon release/departure from this contract. The Contractor shall ensure safeguarding of Personally Identifiable Information (PII) and comply with requirements under 1.23.5.

In order for the Government Security Management Office (SMO) to initiate the required Tier 1 investigation, the Contractor Security Office will ensure the Contractor provides an Optional Form (OF) 306, Declaration of Federal Employment, PSIP form, if required, DD Form 2875, SAAR, and a birth certificate or proof of US citizenship at the earliest possible date. The Contractor Security Officer will review the forms for completeness and accuracy, then forward them to the Government SMO who will initiate the Tier 1 investigation process.

Prior to the Government SMO submitting the Tier 1 investigation, Contractor employees must have a data record present in the Defense Enrollment Eligibility Reporting System (DEERS) before being issued a CAC. The Trusted Agent (TA) will use the secure encrypted MP-ICAM an authorized means of entering the automated CAC application and approval process into DEERS. MP-ICAM is a web-based system that allows eligible DoD Contractors to apply for a CAC through the Internet.

Government sponsors (also known as Trusted Agent (TA)) approve the application to receive Government credentials otherwise authorized by the changes clause of this contract, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in contractor security matters or processes.

The Contractor shall provide a CAC log within the first thirty (30) days after Period of Performance start date and within five (5) days after changes have been made (unless circumstances require otherwise and as directed by the Contracting Officer). The COR will provide format and content for the log during the post award meeting. Note - CACs are Government property and must be accounted for.

**1.6.4 BACKGROUND CHECKS:** The Contractor employee must receive a favorable background check approved by DLIFLC Security Manager.

**1.6.4.1 U.S. CITIZENS:** *RESERVED.*

**1.6.4.2 LOCAL NATIONALS AND THIRD COUNTRY NATIONALS:** *RESERVED.*

**1.6.5 PHYSICAL SECURITY:** The Contractor shall safeguard all Government equipment, information, and property provided for Contractor use. At the close of each work period, Government facilities, equipment, and materials shall be secured IAW the Army Physical Security Program (AR 190-13).

**1.6.6 OPERATIONS SECURITY (OPSEC) REQUIREMENTS:** Contractor personnel shall adhere to facility security policies and restrictions. The Contractor shall immediately report suspicious activities to security personnel.

**1.7 KEY CONTROL:** The Contractor shall establish and implement methods of making sure all keys issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. NOTE: All references to keys include key cards. No keys issued to the Contractor by the Government shall be duplicated. The Contractor shall develop procedures covering key control that shall be included in the Contractor's Security Plan and the Quality Control Plan. Such procedures shall include turn-in of any issued keys by personnel who no longer require access to locked areas. The Contractor shall immediately report any incidents of lost or duplicate keys to the Contracting Officer and CIO via COR. In the event keys, other than master keys, are lost or duplicated, the Contractor shall, upon direction of the Contracting Officer, re-key or replace the affected lock or locks; however, the Government, at its option, may replace the affected lock or locks or perform re-keying. When the replacement of locks or re-keying is performed by the Government, the total cost of re-keying or the replacement of the lock or locks shall be deducted from payment due to the Contractor. In the event a master key is lost or duplicated, all locks and keys for that system shall be replaced by the Government and the total cost deducted from the payment due to the Contractor. The Contractor shall prohibit the use of Government issued keys by any persons other than the Contractor's employees. The Contractor shall prohibit the opening of locked areas by Contractor employees to permit entrance of persons other than Contractor employees engaged in the performance of assigned work in those areas, or personnel authorized entrance by the Contracting Officer. The Contractor shall establish and implement methods of ensuring that all lock combinations are not revealed to unauthorized persons. The Contractor shall ensure that lock combinations

are changed when personnel having access to the combinations no longer have a need to know such combinations. These procedures shall be included in the Quality Control Plan.

**1.8 POST AWARD CONFERENCE/PERIODIC PROGRESS MEETINGS:** The Contractor shall attend any post award conference convened by the contracting activity or contract administration office in accordance with FAR Subpart 42.5. The Contracting Officer, COR, and other Government personnel, as appropriate, may meet periodically with the Contractor to review the Contractor's performance. At these meetings the Contracting Officer will apprise the Contractor of how the Government views the Contractor's performance and the Contractor shall apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the Government.

**1.8.1** The Contractor shall attend, participate in, and furnish input to scheduled and unscheduled meetings, conferences, and briefings that relate to the functions and services herein as required by the Government to provide effective communication and impart necessary information. The Contract Manager or designated representative shall attend meetings as requested by the Government. Meeting attendees shall at times include Contractor managerial, supervisory, and other personnel knowledgeable of the subject matter. Meetings may start or end outside of regular duty hours.

**1.9 CONTRACTING OFFICER'S REPRESENTATIVE (COR):** Refer to Part 2 of this PWS for the definition of a COR. As determined by the Contracting Officer, a COR will be appointed and identified by letter of designation, a copy of which will be provided to the Contractor by the Contracting Officer. The designation letter states the responsibilities and limitations of the COR, especially regarding changes in cost or price, estimates, or changes in delivery dates. The COR is not authorized to change any of the terms and conditions of the resulting order. The COR monitors all technical aspects of the contract and assists in contract administration. The COR is not authorized to obligate the Government. If the work is not written in the contract, the COR is not authorized to request new work. The COR is authorized to perform the following functions: assure that the Contractor performs the technical requirements of the contract, perform inspections necessary in connection with contract performance, maintain written and oral communications with the Contractor concerning technical aspects of the contract, issue written interpretations of technical requirements, including Government drawings, designs, specifications, monitor Contractor's performance and notifies both the Contracting Officer and Contractor of any deficiencies, coordinate availability of Government property, and coordinate site entry of Contractor personnel.

**1.10 KEY PERSONNEL:** The following personnel are considered key personnel by the Government:

The Contractor shall provide a Program/Contract Manager who shall be responsible for the performance of the work. The name of this person and an Alternate Program/Contract Manager, who shall act for the Contractor when the

Program/Contract Manager is absent, along with a Curriculum Vitae (CV) for each of these individuals, shall be provided in writing to the Contracting Officer no later than five (5) days after Period of Performance start date. The Program/Contract Manager and Alternate Program/Contract Manager shall have full authority to act for the Contractor on all contract matters relating to daily operation of this contract.

Key Personnel other than the Program/Contract Manager:

The contractor shall present to the COR the resumes for all other key personnel within the first five days of phase-in at the start of the contract. The COR shall verify the key personnel provided meet the standards laid out in this contract and provide concurrence when the criteria have been met.

After contract performance commences the contractor shall present any changes to key personnel to the COR for verification/concurrence as soon as practicable. Key personnel whose qualifications have not been verified/concurred may not perform work under this contract.

Substitutions in key personnel shall be presented to the COR at least 30 days prior with a written explanation and resume of proposed replacement when circumstances surrounding the substitution are within the contractor's knowledge or control. When circumstances necessitating a substitution are outside of the contractor's knowledge or control the contractor shall provide to the COR a written explanation and resume of proposed replacement as soon as possible.

The contractor shall provide a stable workforce and limit substitutions of key personnel whenever possible. Frequent and/or multiple substitutions of key personnel, when circumstances surrounding the substitution are within the contractor's control, are not permitted and will be considered a violation of the terms and conditions of this contract.

Qualifications for all key personnel are listed below:
See Labor Positions Table Below

| **Table 2.** | |
|---|---|
| **Labor Category** | **Key Position** |
| Program/Contract Manager | 1 |
| **IT Support** | |
| ITS Lead | 1 |
| ITS Tier 2 DLI-W | |
| ITS Tier 2 POM | |
| ITS Tier 2 Classroom + MIL Support | |
| **Remote Sites Services** | |
| Remote Site Tier 2 (POM,FHAZ,HLC) | |
| **Cyber Infrastructure Network** | |
| Network Engineer V (Onsite Engineer Extreme Certified) | 1 |
| Network Engineer IV | 1 |

| | |
|---|---|
| Network Engineer III | |
| Network Engineer II | |
| **Cybersecurity** | |
| Cybersecurity Team Lead ISSM | 1 |
| Security Control Assessor | |
| Security Architect | |
| Cyber Defense Analyst | |

**1.10.1. Program/Contract Manager*:*** The program/contract manager or alternate shall have full authority to act for the contractor on all contract matters relating to daily operation of this contract. The program/contract manager or alternate shall be available between during regular business hours 0745-1645 (PST) and during off-duty hours for maintenance and emergency conditions as needed. The person in this position manages the overall contract onsite. All sections report to this position. The administrative aspects of the contract are managed by this position. This person ensures the manning and training of the contract staff is adequate for meeting the deliverables. This person handles all administrative functions and liaisons with the government for establishing priorities and training in new technologies as needed.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience, AA/AS with 7+ years experience, or substitute with 9 years experience in program management.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP,

GSEC, Security+ CE, or SSCP) Certification.

c. Project Management Professional (PMP) Certification required.

**1.10.2. Information Technology (IT) Lead:** This position provides the highest level of support to end users by handling service requests that have been escalated by lower tiers. Support will be provided onsite, remotely, over the phone, or via email. They will be required to develop solutions for complex network, desktop, and server problems. They will have the ability to analyze existing systems and make proactive recommendations for improvements. Develops, maintains, and implements all systems, applications, and networking configurations.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience, AA/AS with 7+ years experience or substitute with 9+ years of related technical experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must be Windows or Apple Certified Technician.

d. Must have Advanced knowledge of current Microsoft desktop and server operating systems, advanced knowledge of Microsoft SQL, Exchange, SharePoint, and other server applications.

e. Must have Advanced knowledge of computer and server hardware, familiarity with network troubleshooting, Ivanti Management Suite (or equivalent IT Service Management (ITSM) Platforms), Microsoft SCCM, or Jamf Pro.

f. Must have following skill set: Professional customer service skill, resourceful and able to take initiative in a dynamic environment and troubleshoot technical problems effectively and efficiently.

**1.10.3. Network Engineer V (Onsite Engineer Extreme Certified):** The individual in this position will work on Extreme Networks, possess a combination of experience, skills, and qualifications. A Senior Level Network Onsite Engineer is expected to have 10+ years of relevant experience working with network infrastructure, preferably with a focus on Extreme Networks products and solutions. The engineer has a strong understanding of networking concepts, protocols, and technologies, including but not limited to LAN, WAN, routing, switching, VLANs, TCP/IP, DNS, DHCP, and network security. Is certified to work on Extreme Networks products, such as switches, routers, access points, and network management tools. Holding relevant industry certifications. adept at troubleshooting complex network issues, identifying root causes, and implementing effective solutions. Strong analytical and problem-solving skills. The Senior OSE has experience in managing network related projects, including planning, implementation, and documentation, including network upgrades, migrations, and

infrastructure expansions.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years, AA/AS with 7+ year's experience or substitute with 9+years of relevant experience working with network infrastructure, with focus on Extreme Networks products and solutions.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Cisco Certified Network Associate (CCNA) Certification or equivalent required.

d. Shall possess a combination of experience and skills with the following manufacturers and applications:

1. VMware NSX: Install, Configure, Manage (V6.2)

2. Ruckus Layer 2 Switches / Wireless Controller / Wireless Access Points

3. Palo Alto Networks Firewall knowledge of PA-7050 / PA-3060 / PA-3260 / PA-5450 / WildFire/URL Filtering

4. Brocade MPLS Implementation Layer 2 and Layer 3 switches

5. Cisco Networks switches and routers

6. Aruba Networks Excellent knowledge of Wireless Controllers / Access Points / Airwave / ClearPass

7. Ciena 100G OME 6500 DWDM System

8. Extreme Networks Layer 2/3, MLXE Switches /Extreme IQ / OSPF, BGP, and MPLS

9. SolarWinds, InMon Sentinel, Uptrends

**1.10.4. Network Engineer IV:** The individual in this position will serve as the contract lead Network Engineer IV. Responsibilities include wired and wireless network performance monitoring, network optimization, testing, IT project management, implementation of network security controls, advanced troubleshooting and analyzing all elements of the network infrastructure. Background in Team Management, Project Leadership, Network.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience, AA/AS with 7+ years experience or substitute with 9 years relevant experience working with network infrastructure products and

solutions.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Cisco Certified Network Associate (CCNA Certification, Cisco Certified Network Professional (CCNP) or equivalent required.

**1.10.5. Cybersecurity Team Lead (ISSM):** This position will serve as the Cybersecurity Team Lead and will be responsible for management, coordination, and oversight of the contract Information Assurance team. The duties will include all Tier 2 duties, planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Cybersecurity servers and applications.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience or substitute with AA/AS with 7+ years experience, or substitute with 9+ years of progressive experience in serving as a cybersecurity specialist.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Require Secret Clearance

d. Experience leading a team

**1.10.6. Data Center Lead:** The person in this position will serve as the lead of the Data Center Operations, which includes the responsibilities of proper configuration and support of domain system servers, SAN, backup systems, identity management, security of the datacenter. The duties include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all servers and applications. The duties will include assessment of customer needs and implementation of improved configurations for customer needs.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience, or substitute with 9+ years of progressive experience in serving as a data center system administrator.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Experience leading a team

d. Experience maintaining a high availability datacenter

e. Experience with Amazon, Microsoft, or Google cloud services.

f. Experience with VMware vSphere platform.

g. Must have extensive experience in both application development/sustainment as well as operational support for large, highly scalable applications.

**1.10.7. System Engineer:** The person in this position will serve in the datacenter support group, which includes the responsibilities of proper configuration and support of domain system servers, SAN, NAS, backup systems, identity management, and security of the datacenter. The duties will include managing development/sustainment, staging, production systems in a hybrid cloud/datacenter environment. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all System servers and applications.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience or substitute with AA/AS with 7+ years experience, or substitute with 9+ years experience serving as a system administrator.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have experience with Microsoft O365, VMWare, Vsphere and NsX-T, Linux Red Hat, Windows Server, SQL, MySQL, EMC SAN technologies and applications, Active Directory, AWS or Microsoft Azure.

d. Require to have deep technical knowledge: Expertise in operating systems (Windows, Linux), networking protocols, storage technologies, cloud computing platforms, and security best practices.

e. Must have problem-solving skills: Strong analytical abilities to diagnose complex technical issues and develop effective solutions.

f. Must have experience maintaining a high availability hybrid data centers.

**1.10.8. Storage Engineer:** The individual in this role will be a part of the data center support group, tasked with configuring SAN/NAS systems, managing backup solutions, and maintaining the security of the data center. This position includes monitoring and providing daily support to ensure the health and availability of IT systems and infrastructure, both on-premises and for cloud-based programs and applications. Responsibilities will involve planning, installation, and maintenance, as well as troubleshooting and managing all Storage Engineer servers and applications. The role involves designing, implementing, and overseeing an organization's data storage systems, working with networks, databases, and other high-capacity systems. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Storage Engineer servers and applications.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience or substitute with AA/AS with 7+ years experience or substitute with 9+ years experience serving as storage engineer.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have experience with SAN technologies in a highly virtualized and converged environment and maintaining a high availability datacenter.

d. Relevant skills include VMWare Vsphere, Linux Red Hat, Windows Server, SQL, MySQL, EMC SAN technologies and applications, and Active Directory.

**1.10.9. Application Developer Senior Lead:** The person in this position will serve as the lead of the DevOps Application Development/Sustainment Center of Operations, which includes the responsibilities of ensuring overall leadership of all Application Development/Sustainment within DLIFLC. This includes ensuring timely delivery and best DevOps practices, Agile Methodology, SDLC, and Release Management. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all AppDev servers and applications.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience or substitute with 9+ years experience in serving as an Application Developer.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have experience leading teams.

d. Must have experience with DevOps Methodologies, GitLab, and Agile Methodologies.

e. Must have experience with Amazon, Microsoft, or Google cloud services.

f. Required Skills include .NET, JAVA, SQL, MySQL, VDX, IIS, HTML5, Linux, Tomcat, Apache, SharePoint, .Net, SQL, HTML5, SQL, MySQL, iOS Development/Sustainment, PhP, WordPress.

g. Must have extensive experience in both application development/sustainment as well as operational support for large, highly scalable applications.

h. Must have experience with using Microsoft Power Platforms such as Power Apps, Power BI, Power Automate, etc.

**1.10.10. Project Manager:** The person in this position upholds, defends, coaches and

mentors sound agile practices and values. They are responsible for guiding the development/sustainment of an agile team into a self-organized, effective, development/sustainment unit with a sustainable cadence. Duties include identifying, understanding, and documenting functional requirements and user stories.

a. Educational requirements include BA/BS from an accredited college or university with a minimum of 5+ years experience or substitute with AA/AS with 7+ years experience or substitute with 9 years+ experience with Project Management.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification.

c. Scrum Master Certification (CSM, PSM) required.

d. Must be knowledgeable and/or experience with widely successful Waterfall and Agile techniques: User Stories, ATDD, TDD, Continuous Integration, Continuous Testing, Pairing, and Automated Testing.

e. Must be experienced with project planning and facilitating the complete life cycle of projects with competing availability, priorities, and multiple stakeholders.

**1.11 IDENTIFICATION OF CONTRACTOR EMPLOYEES:** All Contractor personnel attending meetings, answering Government telephones, and working in other situations where their contractor status is not obvious to third parties must identify themselves, to include proper marking of signature blocks in correspondence, to avoid creating an impression in the minds of members of the public that they are Government officials. The Contractor shall ensure that all documents or reports, produced by Contractors are suitably marked as Contractor products or that Contractor participation is appropriately disclosed.

**1.11.1** Contractor workspace (staging site, on-site office, desk or work area, etc.) shall contain a sign signifying the space is occupied by Contractor employee(s) to ensure that Government employees and the public know that they are not Government employees. Contractor employees shall identify themselves by name and company affiliation when answering the telephone, presenting briefings, conducting or attending meetings, and seminars. All Contractor correspondence (written, facsimile, and email display) shall include their company name. Requirements for Contractor vehicles is addressed under Part 4 paragraph 4.4.

**1.12 CONTRACTOR IDENTIFICATION BADGES:** Contractor personnel shall be easily identifiable through the display of badges IAW Contractor Identification (AE Reg. 27-715).

**1.13 CONTRACTOR TRAVEL:** The Contractor may be authorized travel expenses at rates no higher than the substantive provisions of the Joint Travel Regulation (JTR), IAW FAR Part 31.205-46, and the limitation of funds specified in this contract. All travel

requires Government approval and authorization thirty (30) days prior to scheduled travel. Travel shall be reviewed and approved in writing by the COR prior to the contractor incurring any billable expenses. Unapproved travel expenses are not a billable expense. Contractor may be required to travel both CONUS and OCONUS during the performance of this contract to attend meetings, conferences, and training. The contractor may be required to travel to off-site training locations and to ship training aids to these locations in support of this PWS.

1.13.1 The Contractor shall provide the following information with their invoice to substantiate any Cost Reimbursable Travel Expense payment claim:

a. A brief description of the travel to include traveler(s) name(s), dates of travel, destination, and purpose of travel.
b. Copies of receipts for all airfare, lodging and any expense in excess of $75.00.
c. Claims for payment of per diem shall be accompanied by a corporate worksheet or copy of the employee's per diem voucher listing the location, dates and per diem rate applied to the claim.
d. Acceptable submissions include paid receipts from airlines and hotels or copies of corporate credit / purchase card statements providing that the statement lists the date, vendor's name and amount of purchase.
e. All backup documentation shall clearly indicate the actual date that the contractor incurred the claimed expense.
f. Failure to provide the required documentation may result in rejection of the contractor's invoice as not being a proper invoice as described in FAR 32.905(b)(2).
i. Travel invoices shall be submitted separately from labor invoices.
j. Travel invoices shall be submitted within 60 calendar days of completion of the travel event. Failure to do so will be noted in the performance assessment.

**1.14 OTHER DIRECT COSTS (ODCs):** *RESERVED*

**1.15 DATA RIGHTS:** The Government has unlimited rights to all documents and materials produced under this contract. All documents and materials, to include the source codes of software, produced under this contract shall be Government owned and are the property of the Government with all rights and privileges of ownership and copyright belonging exclusively to the Government. These documents and materials may not be used or sold by the Contractor without written permission from the Contracting Officer. All materials supplied to the Government shall be the sole property of the Government and may not be used for any other purpose. This right does not abrogate any other Government rights.

**1.16 NON-DISCLOSURE REQUIREMENTS:** Performance under this contract may require the Contractor to access data and information proprietary to a Government agency, another Government Contractor, or of such nature that its dissemination or use other than as specified in this work statement would be adverse to the interests of the Government or others. The Contractor and Contractor personnel shall not divulge or release data or information developed, or obtained under performance of this PWS,

except to authorized Government personnel or upon written approval of the Contracting Officer. The Contractor shall not use, disclose, or reproduce proprietary data, which bears a restrictive legend, other than as specified in this PWS. All documentation showing individual names or other personal information shall be controlled and protected under the provisions of the Privacy Act of 1974, Public Law 93-579, 5 United States Code (U.S.C.) Section 552a.

**1.17 PROTECTION OF GOVERNMENT AND CONTRACT INFORMATION:** Per Public Use Notice of Limitations stated by Defense imagery Management operations Center and contained at www.dimoc.mil/resources/limitations/ , the Contractor shall not cite any information (e.g., contract information, pictures, locations, etc.) obtained through this contract on any hard copy or digital marketing tools to include its company website.

**1.18 NON-DISCLOSURE AGREEMENTS:** The Contractor shall provide signed non-disclosure agreements to the Government no later than ten (10) days prior to commencement of work under the contract. Disclosure of information by Contractor personnel may result in removal of Contractor personnel from performance under this contract.

**1.19 ORGANIZATIONAL CONFLICT OF INTEREST (OCI):** Contractor and subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent OCI as defined in FAR Subpart 9.5. The Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential OCI and shall promptly submit a plan to the Contracting Officer to avoid or mitigate any such OCI. The Contractor's OCI Mitigation Plan will be determined to be acceptable solely at the discretion of the Contracting Officer. In the event the Contracting Officer unilaterally determines that any such OCI cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the OCI.

**1.20 PHASE IN/ PHASE OUT:** To minimize decreases in productivity and to prevent possible negative impacts on additional services, the Contractor shall have personnel on board, during the thirty (30) calendar days phase in period and ten (10) business days phase out periods. During the phase in period, the Contractor shall become familiar with performance requirements in order to commence full performance of services on the contract start date.

**1.21 SAFETY:** The following provides information pertaining to Safety and Accident Prevention: DLIFLC Safety Officer and or DCSIT duty appointed Safety Officer shall provide information pertaining to Safety and Accident Prevention.

**1.21.1 SAFTEY LAWS AND REGULATIONS:** The Contractor shall comply with FAR 52.236-13, Accident Prevention (November 1991), the references contained therein (e.g. U.S. Army Corps of Engineers Safety and Health Requirements Manual (EM 385-1-1)), and applicable Host Nation Safety Laws and Regulations.

**1.21.2** The requirements under FAR 52.236-13 and specifically of the EM 385-1-1 include, but are not limited to the following:

**1.21.2.1** Before initiation of work at the job site, an Accident Prevention Plan, written by the Contractor for the specific work and hazards of the contract and implementing in detail the pertinent requirements of EM 385-1-1; will be reviewed for acceptance by designated Government personnel. Specific requirements for development of the Accident Prevention Plan are found in 01.A and Appendix A of EM 385-1-1. EM 385-1-1 is available online at www.usace.army.mil.

**1.21.2.2** Before beginning each activity involving a type of work presenting hazards not experienced in previous project operations or where a new work crew or subcontractor is to perform work, activity hazard analysis (AHA) shall be prepared by the Contractor performing the work activity (See paragraph 01.a.09 of EM 385-1-1);

**1.21.2.3** The Contractor shall require subcontractors to submit their plan of operations showing methods they propose to use in accomplishing work.

**1.22 ENVIRONMENTAL COMPLIANCE:** The following provides information on Environmental Compliance.

**1.22.1 ENVIRONMENTAL COMPLIANCE PLAN AND PROGRAM:** The Contractor shall ensure that all of its operations and activities conform to the Garrison Installation Command's environmental policy requirements. Current Environmental Policy is available at the Garrison website: https://home.army.mil/monterey/index.php/my-fort/all-services/environmental.

The Contractor shall ensure that all of its operations and activities conform to the USAG Bavaria's environmental policy requirements.

**1.23 REQUIRED TRAINING:** The following provides information on training requirements.

**1.23.1 ANTI-TERRORISM (AT) LEVEL I TRAINING:** All Contractor employees, including subcontractor employees, who are employed under the contract, shall complete AT Level I Training within thirty (30) days after contract start date or effective date of incorporation of this requirement into the contract, whichever applies, or thirty (30) days after employment of new personnel. Contractor personnel travelling overseas shall complete area of responsibility (AOR) specific AT awareness training for U.S. based Contractor employees and associated subcontractor employees. The Contractor shall submit certificates of completion for each affected Contractor employee and

subcontractor employee to the COR (or to the Contracting Officer, if a COR is not assigned) within thirty (30) days after completion of this training by all employees and subcontractor personnel. AT Level I awareness training is available at https://jkodirect.jten.mil. Contractor personnel shall complete refresher training every twelve (12) months except AOR specific AT Level I training which shall be completed as required by local AT policies.

If training cannot be conducted on the website, the Contractor shall coordinate with the COR who will contact the local AT Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the AT Officer. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.2 OPSEC TRAINING:** All Contractor employees, including subcontractors, shall complete Level I OPSEC training within thirty (30) days of employment under this contract. Verification of the training shall be provided to the COR within thirty (30) days after completion of the training. OPSEC Level I training is available at http://www.cdse.edu/catalog/elearning/GS130.html . Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

If training cannot be conducted on the website, the Contractor shall coordinate with the COR, who will contact the local OPSEC Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the OPSEC Officer. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.3 iWATCH TRAINING:** The Contractor and all associated subcontractors shall brief all employees on the local iWATCH program (training standards provided by the requiring activity ATO). This locally developed training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. This training shall be completed within thirty (30) days after the contract is awarded and within thirty (30) days after new employees commence contract performance, with the results reported to the COR within thirty (30) days after the contract is awarded and within thirty (30) days after new employees commence contract performance. Verification of the training shall be provided to the COR within five (5) days after completion of the training. Training slides can be found on the Army OneSource we site: http://www.myarmyonesource.com/familyprogramsandservices/iwatchprogram/default.aspx

**1.23.4 INFORMATION ASSURANCE (IA) TRAINING**

**1.23.4.1** All Contractor employees, including subcontractors, requiring access to Government information systems shall complete the DoD IA Cyber Awareness Training within thirty (30) days after contract start date or effective date of incorporation of this

requirement into the contract, whichever applies, or thirty (30) days after employment of new personnel. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.4.2** All Contractor employees, including subcontractors, working information technology (IT)/IA functions shall comply with DoD and Army training requirements per Information Assurance Training Certification and Workforce Management DoD Directive (DoDD) 8570.01, Information Assurance Workforce Improvement Program DoD 8570.01-M, and Information Assurance AR 25-2 within thirty (30) calendar days of employment. Training is available at https://ia.signal.army.mil/DoDIAA/default.asp .

**1.23.4.3** All Contractor employees, including subcontractors, performing services under this contract with access to a Government information system must be registered in the Account Validation System (AVS), the web address is https://iga.army.mil/identityiq/home.jsf (requires CAC to access). Verification of registration shall be provided to the COR within thirty (30) days after registration. Contractor personnel must complete refresher training every twelve (12) months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.4.4 SPECIAL QUALIFICATIONS:** All contractor employees with elevated privileges on any IT system or network are considered part of the DoD Cybersecurity workforce and shall be appropriately certified at a minimum Information Assurance Technician (IAT) Level II and comply with DoD and Army training requirements in DoDD 8140.01, DoDI 8140.02, DoDM 8140.03 and AR 25-2. Contractor must obtain appropriate certificates within 90 days of being appointed as a privileged user and maintain thereafter the appropriate DODD 8140-01 and Dod 8570-01-M certifications.

**1.23.5 PERSONALLY IDENTIFIABLE INFORMATION (PII):** Contractor employees, including subcontractors, performing services under this contract with access to PII and Government information shall complete “Identifying and Safeguarding PII” within 30 calendar days of employment. Contractor personnel shall complete refresher training every twelve (12) months from initial completion. The Contractor shall provide the COR a copy of the training certificates for its employees no later than five (5) days after completion. Training is available at https://jkodirect.jten.mil/Atlas2/page/desktop/DesktopHome.jsf Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.6 INFORMATION SECURITY (INFOSEC):** All Contractor employees, including subcontractors, shall complete INFOSEC training within 30 days of employment under this contract. Verification of the training shall be provided to the COR within 5 days after completion of the training. INFOSEC training DoD Annual Security Awareness Refresher is available at http://www.cdse.edu/training/elearning/IF142/ or https://www.lms.army.mil/ Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.7 SEXUAL HARASSMENT/ASSAULT RESPONSE AND PREVENTION (SHARP):** All Contractor employees, including subcontractors, shall coordinate with the COR, who will contact the local SHARP Trainer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the SHARP Trainer. Verification of the training shall be provided to the COR within 5 days after completion of the training. Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.8 THREAT AWARENESS REPORTING PROGRAM (TARP):** All Contractor employees, including subcontractors, shall complete TARP training within 30 days of employment under this contract. Verification of the training shall be provided to the COR within 5 days after completion of the training. TARP training is available at https://www.lms.army.mil/. Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

**1.23.9 DoD MANDATORY CONTROLLED UNCLASSIFIED INFORMATION (CUI):** All Contractor employees, including subcontractors, shall complete DoD Mandatory CUI training within 30 days of employment under this contract. Verification of the training shall be provided to the COR within 5 days after completion of the training. DoD Mandatory CUI training is available at https://securityhub.usalearning.gov/index.html. Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within five (5) days after completion of the training.

## 1.24 AUTHORIZATION TO PERFORM SERVICES IN GERMANY

**1.24.1** Contractors performing services in the Federal Republic of Germany (FRG) shall comply with German law. The Contractor shall determine whether performance requires registration with German authorities or authorization to do business in Germany and, if so, shall comply with all requirements. Whether or not registration or authorization to do business is required, the Contractor shall determine what documents or authorization its employees and any subcontractor employees must possess to work in Germany. The Contractor shall ensure affirmatively that its employees and subcontractor employees possess such documents or authorizations.

**1.24.2** Contractor employees who: (a) are not nationals of Germany or other European Union countries; (b) are not members of the force, the civilian component or their dependents; or c) do not have assimilated status under Articles 71, 72, or 73 of the Supplementary Agreement to the North Atlantic Treaty Organization Status of Forces Agreement shall possess work and residence permits.

**1.24.3** By acceptance of and performance under this contract, the Contractor affirms

that it has complied with the requirements above. Compliance with this requirement and German law is a material contract requirement. Noncompliance by the Contractor or subcontractor at any tier shall be grounds for issuing a negative past performance evaluation and terminating this contract for default.

**1.25 GOVERNMENT PROPERTY AND SERVICES:** Refer to Part 3 of this PWS for Government property (GP) for this contract. The contractor shall be responsible for securing, maintaining, and accounting for all property (desktop, laptop, monitors, and tablets) purchased with government funds. Employees will immediately report to their supervisor/program manager any loss, damage, or destruction of these properties. For all issued GP for this contract, the Contractor will be financially liable for lost, and or damaged property.

**1.26 STATUS REPORTS:** Contractors must submit status reports to the COR as mentioned in the Deliverables Schedule IAW Part 5 of this PWS.

## PART 2
## DEFINITIONS AND ACRONYMS

## 2. DEFINITIONS AND ACRONYMS

**2.1 DEFINITIONS:** Although not inclusive of every term used within this PWS, the following provides a list of definitions used throughout this PWS and commonly used in the acquisition field.

**Contracting Officer** – means a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings on behalf of the Government. Note: The only individual who can legally bind the Government.

**Contracting Officer's Representative (COR)** – As defined in DFARS 202.101, means an individual designated and authorized in writing by the Contracting Officer to perform specific technical or administrative functions. DoD Instruction (DoDI) 5000.72, Part II Definitions states the following when defining a COR: "Defined in subpart 202.101 of Reference (f). Any individual delegated responsibilities pursuant to subpart 1.602-2 of Reference (e), regardless of local terminology, must be certified in accordance with this instruction. For example, local terminology can be COR, Contracting Officer's technical representative, technical point of contact, technical representative, alternate COR, administrative COR, assistant COR, line-item manager, task order manager, quality assurance personnel, quality assurance evaluator, or COR management." In addition, Army Regulation 70-13, Chapter 2, paragraph 2-2g, states, in part, the following when providing other surveillance support personnel to assist the COR when needed, "…These other surveillance support personnel may serve as on-site representatives of the COR in performance of actual contract surveillance if they meet all COR requirements and have been appointed by the Contracting Officer as alternate CORs."

**Contractor** – means a supplier or vendor awarded a contract to provide specific supplies or service to the Government. The term used in this contract refers to the prime.

**Day** – means, unless otherwise specified, a calendar day.

**Deliverable** – means anything that can be physically delivered but may include non-manufactured things such as meeting minutes or reports.

**Government-furnished Property** – As reflected in FAR 52.245-1, Government-furnished Property "means property in the possession of, or directly acquired by, the Government and subsequently furnished to the Contractor for performance of a contract. Government-furnished property includes, but is not limited to, spares and property furnished for repair, maintenance, overhaul, or modification. Government-furnished property also includes contractor-acquired property if the contractor- acquired property is a deliverable under a cost contract when accepted by the Government for continued use under the contract.

**Government Property** - means all property owned or leased by the Government. Government property includes both Government-furnished and Contractor-acquired property. Government property includes material, equipment, special tooling, special test equipment, and real property. Government property does not include intellectual property and software.

**Physical Security** – means that part of security concerned with physical measures designed to safeguard personnel; to prevent unauthorized access to equipment, installations, material, and documents; and to safeguard against espionage, sabotage, damage, and theft.

**Quality Assurance** – (or Government contract quality assurance) means the various functions, including, inspection, performed by the Government to determine whether a Contractor has fulfilled the contract obligations pertaining to quality and quantity.

**Quality Control** – means all necessary measures taken by the Contractor to assure that the quality of an end product or service shall meet contract requirements.

**Work Day** - The number of hours per day the Contractor provides services in accordance with the contract.

**Work Week** - Monday through Friday, unless otherwise specified.

**2.2 ACRONYMS:** Although not inclusive of every term used within this PWS, or that may be included in an acquisition, the following provides a list of acronyms commonly used in the acquisition field.

| | |
|---|---|
| AA | Associate of Arts |
| ACAS | Assured Compliance Assessment Solution |
| ACOR | Alternate Contracting Officer Representative |
| AE | Army in Europe |
| AI | Artificial Intelligence |
| AOR | Area of Responsibility |
| APPDEV | Application Development |
| AR | Army Regulation |
| AS | Associate of Science |
| AT | Anti-Terrorism |
| ATDD | Acceptance Test-Driven Development |
| ATO | Authority to Operate |

# PART 3

# GOVERNMENT PROPERTY (GP) AND SERVICES

## 3. GOVERNMENT PROPERTY AND SERVICES

**3.1 SERVICES:** The Government a commercial internet network connection from the Academic Network.

**3.2 FACILITIES:** The Government will provide the necessary workspace for Contractor personnel to provide the support outlined in the PWS to include desk space, telephones (wired), computers, other items necessary to maintain an office environment, to include a golf cart.

**3.3 UTILITIES:** The Government will provide all utilities for the Contractor's use in performance of the tasks outlined in the PWS. The Contractor shall instruct employees in utilities conservation practices. The Contractor shall operate under conditions that preclude the waste of utilities, which include turning off the water faucets or valves, light switches, etc. after using the required amount to accomplish tasks requiring the use of the utilities. The Contractor shall instruct employees in utilities conservation practices. The Contractor shall operate under conditions that preclude the waste of utilities, which include turning off the water faucets or valves, light switches, etc. after using the required amount to accomplish tasks requiring the use of the utilities.

**3.4 EQUIPMENT:** This equipment is not considered true Government property because it is incidental to the place of performance, when the contract requires contractor personnel to be located on a government site or installation, and when the property used by the contractor within the location remains accountable to the Government. Items considered to be incidental to the place of performance include, for example, office space, desks, chairs, telephones, computers, and fax machines. The Contractor shall use Government property only for performing this contract, unless otherwise provided for in this contract or approved by the KO. Modifications or alterations of Government property are prohibited. Contractor personnel may be required to sign for electronics equipment provided herein. If travel is required, the contractor assumes responsibility for the Government equipment when not located at the primary place of performance.

**3.5 SPECIAL TOOLING AND TEST EQUIPMENT:** *RESERVED*

**3.6 MATERIALS:** The Government will provide access to documentation detailing the current configuration of the commercial internet infrastructure as well as network monitoring software and policies and replacement equipment and repair parts as specified in the tasks below.

**3.7 TRAINING:** The Government will provide a link to the necessary training and upon completion, the Contractor will provide the Government with certificates of the following trainings: AT Level 1 Awareness, OPSEC, iWATCH, INFOSEC, SHARP, TARP, CUI, PII and various IT Certifications. Training can be found at https://jkodirect.jten.mil.

**3.8 COMMON ACCESS CARDS (CAC):** The Government will issue Common Access Cards (CAC) via the Mission Partner Identity Credential, and Access Management (MP ICAM) (Web site https://www.dmdc.osd.mil/tass/) when cleared.

# PART 4

## CONTRACTOR FURNISHED ITEMS AND SERVICES

### 4. CONTRACTOR FURNISHED PROPERTY AND SERVICES

**4.1 GENERAL:** The Contractor shall furnish all supplies, equipment, facilities, and services required to perform work under this contract that are not listed under Section 3 of this PWS.

**4.2 SECRET FACILITY CLEARANCE:** The Contractor shall possess and maintain a valid facility clearance from the Defense Security Service IAW DoD 5220.22-M, National Industrial Security Program Operating Manual (NISPOM) and AR 380-49, Industrial Security Program. While work under this contract is not classified, three positions require clearance and personnel assigned to these positions will require Secret Clearance. The Facility Security Clearance must match the highest security clearance required for personnel. The DoD Contract Security Classification Specification (DD 254) is provided as an attachment in the basic contract.

**4.3 MATERIALS:** The Contractor shall provide all supplies, equipment, facilities, and services required to perform work under this contract that are not listed under Section 3 of this PWS.

**4.4 VEHICLES AND EQUIPMENT:** *RESERVED.*

**4.5 BACKGROUND CHECKS:** The Contractor shall provide Background Checks in accordance with this PWS and as determined by the Government.

# PART 5

## SPECIFIC TASKS

**5.1 BASIC SERVICES:** The Contractor shall provide services for a full range of IT and support services to systems (hardware and software), infrastructure (including network support and data center) routine and after-hours (maintenance and emergency), operation, and Cybersecurity for the Language Training Networks (.edu) and the entire DLIFLC campuses at various locations.

**5.2 TASKS:** Tasks consist of the following:

**Information Technology Service Management: ITS and RSS**

5.2.1 Task 1: Setup desktop/notebook/tablet devices: Includes placement and setup of complete systems; installation of internal components such as hard drives, video cards, Peripheral Component Interconnect (PCI) or Peripheral Component Interconnect Express (PCIe) interface cards. For re- imaging of various operating systems (Apple & Windows), perform backups of existing profile data and restore after imaging is completed. (See Attachment #3)

5.2.1.1 Standard: Set up all assigned Government furnished (GF) laptop or desktop computers with installed and configured computer hardware within 72 hours of task notification. Hardware shall successfully connect to the network and be free from manufacturer hardware errors at the time of installation. This task takes approximately 1.5 to 2 hours to complete.

5.2.1.2 Report monthly to the contracting officer's representative (COR) the total number of new or re-imaged PC/notebook deployments conducted for the previous month. Operating System (OS) and base application installation, including current OS and application security patches, shall be accomplished using DCSIT provided images.

5.2.1.3 Estimated Frequency: 10 times per month Frequency will increase dramatically during times of lifecycle refresh. DCSIT estimates it will lifecycle one-third of its approximately 2500 computers every year.

5.2.1.4 Standard for LCR: During times of lifecycle refresh, the contractor shall accomplish all tasks associated with desktop deployment, including reception, staging, installation, recovery and turn-in of end-of-life systems. These tasks are typically completed in about 1 ½ hours per desktop.

5.2.1.5 Frequency for LCR: Lifecycle refresh efforts for staff and faculty computers are routine and continuous based on warranty status of the computers. LCR requirements for staff and faculty computers do not typically exceed ten per week. For classroom lifecycle requirements, the contractor will be required to mass image and quality check up to 400 computers in one week. These requirements occur

about twice a year. In this scenario, leveraging the ability to image multiple computers at one time, a contractor can successfully lifecycle a computer every 40 minutes on average.

5.2.2 Task 2: Install and configure organization unique applications on networked computers (physical and virtual systems). Unique applications include but are not limited to Microsoft Project, Microsoft Visio, Ivanti Management Suite (or equivalent IT Service Management (ITSM) Platforms, Microsoft SCCM, Jamf Pro, and other applications. Technicians shall confirm license availability and coordinate with the DCSIT Data Center and Application Development teams to ensure application deployment occurs through automated software delivery and management.

5.2.2.1 Standard: Approved organization-specific applications are installation installed in accordance with user requirements.

5.2.2.2 Report to the COR the total number of software-related work orders resolved monthly.

5.2.2.3 Estimated Frequency: 5-10 organization-specific user requested software installation per month.

5.2.3 Task 3: Respond to and resolve service desk incidents.

5.2.3.1 Standard: The contractor shall respond to LMS service desk support requests by end-user in accordance with the Service Level Agreement in Attachment #4.

5.2.3.2 Report to the COR the total number of service desk incidents resolved monthly. The report shall identify total incidents resolved by category, assigned technician and time to resolution.

5.2.3.3. Estimated Frequency: 250-350 contractor-resolved service incidents per month at an average of 1 to 1.3 hours per incident.

5.2.4 Task 4: IT Related Meetings. Attend meetings as needed to collect information, anticipate future requirements, and provide subject matter expertise. This task includes but is not limited to meetings scheduled by the DCSIT, and meetings internal to ITS/RSS.

5.2.4.1 Standard: Contractors shall attend meetings as needed to provide technical recommendations, fill requests for information, and share information for official purposes. All such requests should be vetted with the COR or the Contracting office. Provide written meeting notes to the COR within 24 hours of meeting conclusion that include agenda items, discussion topics, action items, or decisions reached during the meeting.

5.2.4.2 Report to the COR monthly all meetings attended. Provide written meeting notes to the COR within 24 hours of meeting conclusion that include agenda items, discussion topics, action items, or decisions reached during the meeting.

5.2.4.3 Estimated Frequency: Attend meetings with the DCSIT regarding Information Assurance Vulnerability Management (IAVM) remediation or desktop standardization 2-4 times per month at a duration of 1-2 hours per meeting.

5.2.5 Task 5: Device Support. Install, troubleshoot, maintain, and repair computers, printers, and other peripheral devices. Peripheral devices include but are not limited to telephones, printers, fax machines, digital senders, projectors, flat screens, cable television, Audio and Visual equipment, and Blackberry wireless phones (See Attachment #3). Technical Support requirements include:

1. Prepare and coordinate Return Merchandise Authorization (RMA) warranty claims. (Documents shall be provided to the COR for processing)
2. Maintain listing of needed peripheral IT supplies, equipment, and repair parts.
3. Update the peripheral device location database(s).
4. Initiate DCSIT/NEC work orders as required.

5.2.5.1 Standard: Resolve, or provide estimated time to resolution (ETR), to the customer for all repair incidents within 30 days of notification.

5.2.5.2 Resolve, or provide estimated time to resolution (ETR), to the customer for all repair incidents within 30 days of notification. Report to the COR monthly all unresolved incidents which are pending due to circumstances beyond the contract scope (parts ordered, Government approval required, etc.).

5.2.5.3 Estimated Frequency: 20 times per month install, repair, or replace computers, printers, or other peripheral equipment.

5.2.6 Task 6: Remediate information assurance vulnerabilities on computers and printers in accordance with DCSIT and DoD IA standards.

5.2.6.1 Standard: Coordinate with Cybersecurity to identify and remediate all vulnerable device assets as identified by enterprise vulnerability management tool, mitigations should meet Cybersecurity Vulnerability Management policy standards outlined below; zero-day vulnerabilities shall be remediated per Cybersecurity discretionary timeline.

5.2.6.2 Report bi-weekly the total number of workstations with vulnerabilities, requiring remediation.

5.2.6.3 Estimated Frequency: Remediate workstations continuously in response to weekly- provided vulnerability scans performed by Cybersecurity team. DLIFLC assets are scanned for vulnerabilities every week by the Cybersecurity, with specific

vulnerabilities mitigated during a four-week cycle. If vulnerabilities are not mitigated during those four weeks, the asset is blocked from the network. During a mitigation cycle, as many as 2 percent of DLIFLC assets (12,500 desktop/laptops) are identified as requiring mitigation.

CRITICAL ASSETS

| **PRIORITY LEVEL** | **RESOLVED BY** |
|---|---|
| Critical (CVSS 9-10) | 4 DAYS |
| High (CVSS 7-8.9) | 14 DAYS |

STANDARD ASSETS

| **PRIORITY LEVEL** | **RESOLVED BY** |
|---|---|
| Critical (CVSS 9-10) | 14 DAYS |
| High (CVSS 7-8.9) | 30 DAYS |

5.2.7: Task 7: Service Desk Support. The contractor shall man the DCSIT Service Desk. The service desk is manned by contract personnel.

5.2.7.1 Standard: Each service desk request shall be logged within 15 minutes of receipt. Each entry shall be logged within the DCSIT Ivanti service desk (or equivalent IT Service Management (ITSM) Platforms database and will include customer name, location, contact information, problem category, and problem description at a minimum. The contractor shall respond to LMS service desk support requests by end-users' requests in accordance with the Service Level Agreement in Attachment #4.

5.2.7.2 The contractor shall log each service desk call or walk-in request to the service desk in the Ivanti service desk (or equivalent IT Service Management (ITSM) Platforms database.

5.2.8 Task 8: Learning Management and Systems Support. The contractor shall provide support to end users with learning management systems. Provides configuration management planning and assistance. (See Attachment #4). Implement and administer the change process so that only Configuration Control Board (CCB) approved changes are incorporated into the learning management system.

5.2.8.1 Standard: Each LMS support request shall be logged within 15 minutes of receipt. Each entry shall be logged within the service desk ticket system and will include customer name, location, contact information, category, and description at a minimum. The contractor will assess whether the incident warrants immediate response as defined by DCSIT service levels. Contractor will analyze and evaluates customer requirements. Conducts resource planning for necessary growth and technological changes. Provides face-to-face, and online training options on LMS to

staff, students, and faculty.

5.2.8.2 The contractor shall respond to LMS service desk support requests by end-users' requests in accordance with the Service Level Agreement in Attachment #4.

**Cyber Infrastructure Network (CIN) Support**

5.2.9 Task 9: Academic Network Administration: The Contractor shall ensure the datacenter is operating 24x7 with DoD directed updates and security patches. The contractor shall perform datacenter contingency operations, disaster recovery, and business continuity. The contractor will perform on-call or after-hours support to restore data center functionality during unplanned outages or failures. If contractor is unable to access system remotely, then the contractor shall attempt physical access to system. If contractor is unable to physically access system, then the contractor shall first contact the COR, and then with COR's approval contact the DCSIT on call personnel followed by telephonically contacting in order the remaining DCSIT personnel. The contractor shall receive inquiries, requests, and incident reports and then conduct incident resolution procedures while maintaining feedback to originating party. The Contractor shall provide services for configuring, operating, and maintaining network routers, switches, wireless access points, mobility controllers, VPN, firewall, network access control, radius servers, network UPS's and software application appliances. (See Attachment #3)

5.2.9.1 Standard: The Academic Network shall be Fully Mission Capable (FMC) at least 99.99% availability of each month, less any service provider outages or scheduled maintenance outages.

5.2.9.2 Network accessibility.

5.2.10 Task 10: Academic Network Performance Monitoring. The Contractor shall provide services for monitoring, documenting, and controlling the Academic Network performance for response, through put and availability.

5.2.10.1 Standard: Report exceptions to DCIST Management within 1 business day and maintain 99% operational availability.

5.2.10.2 Weekly report containing client count and bandwidth usage per hour with a maximum for that time period.

5.2.11 Task 11: Academic Network Internet Hardware and Software Issues. The Contractor shall provide services to identify and resolve hardware and software issues related to the commercial network's wireless and hardwired elements. There are, on average, 118 hardware issues and 74 software issues reported monthly.

5.2.11.1 Standard: Zero (0) instances of unresolved repair and reconfigure work orders will exist per month, except for parts-on-order for Government supplied

equipment or warranty items.

5.2.11.2 Weekly report detailing any diagnostic, reconfiguration, replacement, or repair of devices for sustained performance.

5.2.12 Task 12: Academic Network Improvements and Enhancements. The Contractor shall identify opportunities and solutions for improving efficiencies with emerging technologies.

5.2.12.1 Standard: Report is due the 1st Wednesday following a fiscal year quarter to the COR.

5.2.12.2 Quarterly report containing recommendations based on observations to improve the customer's experience.

5.2.13 Task 13: Academic Network Internet IP Addressing and DNS Management: The Contractor shall manage the Academic Network internet IP addressing schemes to ensure the maximum number of IP addresses are available to DLIFLC customers and configure DNS filters IAW the latest Army and DoD standards with exceptions that will allow mission. IP addresses shall be rapidly available to as many simultaneous customers as internet safety standards will allow. The IP addresses must be requested for every connection. However, the Contractor shall take steps to ensure DoD policies are followed and only valid and authorized systems are allowed access to the internal network and that guest systems are monitored. The existing network has a 10.0.0.0/8 private network IP address. A class "A" network ID that allows the following range of valid IP addresses: 10.0.0.1 to 10.255.255.254. The 10.0.0.0/8 private network has 24 host bits that can be used for any sub-netting scheme within our network.

5.2.13.1 Standard: No more than one instance of improper or clearly avoidable poor IP addressing schemes will occur per month.

5.2.13.2 Monthly report detailing any IP address usage depicting anomalous usage.

5.2.14 Task 14: Academic Network Cybersecurity. The Contractor shall manage the Cybersecurity Network and Boundary Defense, Intrusion Detection tools and Techniques and Incident Response on the Academic Network.

5.2.14.1 Standard: Less than 1% instances of successful intrusions, compromised data and systems will occur.

5.2.14.2 Monthly report to the COR validating the integrity of the Academic Network.

5.2.15 Task 15: Academic Network Cybersecurity Practices. The Contractor shall research, recommend, and, subject to Government approval, implement best business practices for controlling and monitoring access to the Academic Network

service, for preventing introduction of malicious programs, and for preventing misuse of the service. The Contractor shall configure the network to prevent instances of malicious use of the commercial internet.

5.2.15.1 Standard: Less than 1% instances of electronically preventable misuse of the Academic Network internet will occur.

5.2.15.2 The Contractor shall submit a monthly report detailing any rogue access violations or detection of malicious viruses or programs and the course of action taken to correct the issue.

5.2.16 Task 16: The contractor shall provide an On-Site Engineer (OSE) Extreme Certified services for maintaining the reliability and security of the DLIFLC Network's voice, data, and wireless services. This is achieved through a combination of planning, problem identification, and system enhancements. The OSE will also be involved in the installation, monitoring, maintenance, improvements to data flow, reduction of latency, enhanced scalability plus optimization of Extreme Network hardware and software, as well as support for a complex wireless infrastructure, multiple firewalls, and NAC devices in a large campus environment. The OSE is expected to quickly and accurately resolve any hardware or software issues that arise, maximizing network uptime for DLIFLC users. Additionally, the OSE will be tasked with sharing their expertise and providing training to new network staff and other IT teams, while also fostering a close relationship with the Extreme Networks Global Technical Assistance Center.

5.2.16.1 Standard: All information provided by the Contractor shall be accurate, complete, and not exceed suspense dates noted in corresponding paragraph above. The OSE should proactively anticipate potential network issues and offer DLIFLC priority services.

1. Act as Senior Network Architect in design updates of the DLIFLC Network
2. Project Manager for High priority Network projects using Extreme devices
3. Tuning and optimization of Network devices including Extreme devices
4. Software release planning and documentation
5. Onsite contact for support and product escalations
6. Assistance with installation of new product installations
7. Assistance with capturing data collections required for problem determination
8. Collect Extreme Network data on a regular basis to facilitate trend analysis
9. Provide additional onsite technical product expertise to support and enhance DLIFLC’s Cyber Infrastructure staff resources and skills
10. Resolve License change issues or requirements
11. Perform proactive maintenance and support to optimize Extreme Network’s product environments
12. Understand, troubleshoot, diagnose, and resolve DLIFLC End User issues
13. Provide comprehensive knowledge transfer sessions to the IT staff to familiarize them with the potential and functionality of network infrastructure devices, specifically

focusing on Extreme products. Define, manage, and execute problem resolution plans and communicate closure/resolution to Extreme technical support, and DLIFLC End Users
14. Submit Weekly reports to COR every Friday

5.2.16.2 Deliverable: In addition to the features in the Premier Support agreement, the OSE shall work side by side with DLIFLC's IT staff, providing onsite technical expertise to keep DLIFLC's Extreme products and IP networking environments running smoothly 99% of the time. The OSE shall take initiative and be actively involved in anticipating and addressing potential issues or changes in DLIFLC's IP networking environments before they become significant problems. The Proactive On-site Engineer is responsible for facilitating communication and coordinating problem escalation and change activities, with the aim of accelerating issue resolution and improving operational efficiency. This proactive approach involves using available resources, including extensive Extreme resources and strategic partnerships, to swiftly troubleshoot and resolve any networking issues that may arise. The OSE shall have access to vast Extreme resources and can leverage strategic Extreme partnerships to quickly troubleshoot and resolve issues in DLIFLC's IP networking environments.

5.2.16.3 Standard: Standard: Planning: Assessing network requirements - The OSE shall analyze the current network infrastructure, identifies limitations, and determines the desired network performance.

Traffic analysis - The OSE shall examine network traffic patterns, peak loads, and bandwidth utilization to identify areas that require optimization.

Capacity planning - By forecasting future growth and resource demands, the OSE shall allocate resources such as: resource utilization of current servers, networking equipment, and applications, to ensure they are utilized effectively; performance optimization by fine-tuning the network and systems configurations to enhance performance and software license management ensuring to optimize software utilization without the need for additional licenses.

Network segmentation - The OSE shall strategically divide the network into smaller segments, isolating different types of traffic to improve performance and security.

5.2.16.4 Deliverable: Design: Network topology optimization - The OSE shall review the existing network topology and suggests opportunities to streamline data flow, reduce latency, and enhance scalability by fine tuning the network and systems configurations to enhance performance, ensuring that critical applications and services receive sufficient resources to operate efficiently.

Quality of Service (QoS) implementation - By prioritizing critical applications and services, the OSE shall ensure that they receive adequate network resources, improving performance for those applications without additional equipment.

Redundancy and resilience – The OSE's shall design redundant paths and failover mechanisms to minimize network downtime and enhance reliability, making efficient use of existing resources.

Traffic engineering - The OSE shall optimize routing protocols and traffic distribution to balance the load across network links, improving overall network performance.

5.2.16.5 Standard: Problem Identification: Network monitoring and analysis - The OSE shall deploy network monitoring tools to identify performance bottlenecks, latency issues, and areas with high error rates. This data helps in pinpointing problem areas.

Troubleshooting and root cause analysis - By analyzing network logs, error messages, and performance metrics, the OSE shall identify the root causes of network issues and develop appropriate solutions.

5.2.16.6 Deliverable: System Enhancement: Network optimization -The OSE shall fine-tune network configurations, such as adjusting buffer sizes, optimizing routing protocols, and improving network security settings, to enhance performance without purchasing new equipment.

Bandwidth management - By implementing traffic shaping, compression, or caching techniques, the OSE shall optimize bandwidth utilization and reduce congestion. Protocol and application optimization – They shall optimize network protocols and applications to reduce overhead, improve data transfer efficiency, and minimize latency.

Performance tuning - The OSE shall fine-tune network parameters, such as Transmission Control Protocol (TCP) window sizes, packet sizes, and timeouts, to maximize throughput and minimize packet loss.

By combining careful planning, thoughtful design, thorough problem identification, and systematic system enhancements, a network OSE can significantly improve a network's performance and efficiency without the need for purchasing new equipment.

**Information Assurance/Cybersecurity**

5.2.17 Task 17: Academic Network Information Assurance Requirements. The Contractor shall:

1. Ensure the Academic Network meets all AR 25-2, DODI 8510.01, and any other applicable DA, CAC and/or DLIFLC information assurance requirements.
2. maintain a file(s) of all requisite documentation as prescribed by the government's information assurance mandates. (System Accreditation (Risk Management Framework), Task Orders, Alerts).
3. Track and support the governance of common Agency commercial off-the-shelf application and operating system lifecycles.

4. Maintain an in-depth awareness of the DLIFLC IT Enterprise Cybersecurity Architecture.
5. Assist with related enterprise cybersecurity initiatives and incorporate security into DLIFLC standards and other SOW deliverables.
6. Provide recommendation on National Institute of Standards and Technology (NIST) SP800 series controls that would be applicable to all assets.
7. Provide criticality rating for all NIST 800-53 controls and enhancements, then tailor control criticality based on the differing missions of the system/asset.
8. Develop and recommend a plan to evaluate security plans for accuracy and completeness.

5.2.17.1 Standard: Academic Network meets all AR, DoD and published IAVA requirements. The Contractor will ensure that requirements are met prior to the published compliance dates.

5.2.17.2 The Contractor shall present documentation and/or reports to verify compliance with AR and DoD regulations as stated above. This task shall be completed quarterly at the request of the COR.

5.2.18 Task 18: Academic Network Information Assurance Secure Architecture and Application requirements. The Contractor shall ensure that all new projects are built, configured, and implemented to meet NIST, RMF, and best practices standards for Secure architecture and application development/sustainment build security into DLIFLC software development life cycles, configuring and tuning web application firewalls, performing application security design reviews.

5.2.18.1 The Contractor shall present documentation and/or reports to verify compliance with RMF, NIST DoD regulations, and industry best practices as stated above. This task shall be completed quarterly at the request of the COR.

**Data Center Operations Support (DCO) and Application Development (AppDev)**

5.2.19 Task 19: System Engineering. This requirement applies to all of the components of the Academic Network platforms. The contractor shall provide support for maintaining the existing systems, new systems, making recommendations for system modernization, and expansion to meet mission requirements IAW established governing agreements. The Academic Network currently utilizes a hybrid cloud environment with a mixture of on-premises and private cloud services. Our on- premises data center consists of a mixture of Microsoft Windows and Linux solution on VMware virtualized servers. The systems include attached Server/File Storage Area Network, and backup systems. Documentation shall be made available and maintained up to date in the Academic Network Portal Support site in the Portal Administration section.

5.2.19.1 Standard: The contractor shall have 5 business days after an application change to update the documentation. The COR will be notified when documents are updated, and the documents shall be submitted to the COR for review. Content shall

reflect 95% accuracy of application design and have no more than 10 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. If the document is rejected, the contractor shall have 5 business days to update the document with comments from the Government and submit the final version.

5.2.19.2 The Contractor will have 30 days from notification by COR to create the application design documents for identified applications. COR will be notified when documents are updated, and the documents shall be submitted to the COR for review. Content shall reflect 95% accuracy of application designs and have no more than 50 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. If the document is rejected, the contractor shall have 5 business days to update the document with comments from the Government and submit the final version.

5.2.20 Task 20: System Architecture Document: A description of the system components, connections, and constraints including the operational architecture (data stores and flows), technical architecture (functional components and profile of corresponding standards and implementing products), network architecture (servers and connections), system interfaces, and security architecture for As-Is system and for major changes to system architecture to include design, coding, documentation and testing of the search infrastructure. Changes shall be incorporated into the original document and captured with the appropriate revision number. This documentation already exists and will be updated when triggered by proposed new systems, or changes as detailed in the deliverables below. Develop and maintain a thorough and complete architecture package with a clear description defining the architecture of the system and supporting visual attachments. Documentation listed in this paragraph is considered Government Furnished Information (GFI) and available after award.

5.2.20.1 Contractor shall provide and maintain a System Architecture Document for the systems to include staging system 30 calendar days prior to establishing a new system and within 15 business days for changes to the existing system. The document shall be in Microsoft Word, Visio, and Excel. COR will be notified when document is updated, and the document shall be submitted to the COR for review. The Contractor shall perform a document review with COR every six (6) months.

5.2.20.2 Frequency: Historical information indicates an average of two (2) documents per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.21: Task 21, Detailed Design Document: This requirement applies to all of the components of the Academic Network: Public Internet, Unclassified Restricted, and Hosted platforms. Description of the software components at the module level, the logical data model, and data flows for application databases, user interfaces, and security mechanisms. Changes shall be incorporated into the original document and

captured with the appropriate revision number. Existing document shall be updated, and new documents created when triggered by proposed new systems, or changes as detailed in the deliverables below. Develop and maintain a thorough and complete architecture package with clear descriptions defining the application architecture and supporting visual attachments. Documentation listed in this paragraph is considered GFI and available after award.

5.2.21.1 Contractor shall provide a Detailed Design Document for the system to include staging system 30 days prior to a new system and within 15 business days for changes to existing system in Microsoft Word, Visio, and Excel. COR will be notified when document is updated, and the document shall be submitted to the COR for review.

5.2.21.2 Frequency: Historical information indicates an average of two (2) documents per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.22 Task 22: System Security Plan: Contractor shall provide a thorough and complete description of the security mechanisms, policies, and procedures. Changes shall be incorporated into the original document and captured with the appropriate revision number. A thorough and complete description clearly defining the security of the system with supporting visual attachments. Documentation listed in this paragraph is considered GFI and available after award.

5.2.22.1 Contractor shall provide a Detailed Security Plan with an accompanying incident response plan and DLIFLC Security Plan for the Academic Network systems to include staging systems 15 calendar days prior to a new system or changes to existing system in Microsoft Word with supporting Microsoft Office Products. COR will be notified when document is updated, and the document shall be submitted to the COR for review.

5.2.22.2 Frequency: Historical information indicates an average of two (2) documents per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.23 Task 23: Business Continuity, Contingency, and Recovery Plan: The Contractor shall provide an assessment and recommendations of contingency plans for software, hardware, and applications to ensure business resumption plan adequately addresses Academic Network requirements and established timeframes. The plan shall include a description of the approach, processes, and mechanisms for business continuity, a test plan, and system recovery procedures following a catastrophic failure. Changes shall be incorporated into the original document and captured with the appropriate revision number. Documentation listed in this paragraph is considered GFI and available after award.

5.2.23.1 Contractor shall provide a Business Continuity, Contingency, and Recovery Plan Academic Network systems to include staging system 15 calendar days prior to a

new system or changes to existing system in Microsoft Word with supporting Microsoft Office Products.

5.2.23.2 Frequency: Historical information indicates an average of two (2) documents per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.24 Task 24: Deployment & Operations Guide: Contractor shall submit a description of the system- specific configuration settings, deployment procedures, administrative tools, and operations procedures. Changes shall be incorporated into existing system documentation.

5.2.24.1 Contractor shall provide a Detailed Deployment and Operations Guide for the Academic Network to include staging system 15 calendar days prior to a new system or changes to existing system in Microsoft Word with supporting Microsoft Office Products. A thorough and complete description clearly defining the implementation plant, deployment, and operations of the system with supporting visual attachments, checklists, and configurations. COR will be notified when document is updated, and the document shall be submitted to the COR for review.

5.2.24.2 Frequency: Historical information indicates an average of one (1) document per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.25 Task 25: System Deployment Plan: Description of the detailed tasks, schedule, resources, responsibilities, and dependencies for system deployment. This plan will outline all the required steps to deploy a system. Deployment plan will also consist of contact information for govt. agencies, vendors, and key personnel that assist in deploying the system. A thorough and complete description clearly defining the deployment and operations of the system with supporting visual attachments, checklists, and configurations. Deployment plan will also consist of contact information for agencies, vendors, and key personnel that assist in deploying the farm. Minor clerical mistakes that are merely a matter of form and not of substance will be noted for correction.

5.2.25.1 Contractor shall provide a System Deployment Plan for the Academic Network systems to include staging system 15 calendar days prior to a new system or changes to existing system in Microsoft Word with supporting Microsoft Office Products. COR will be notified when document is updated, and the document shall be submitted to the COR for review. Documentation listed in this paragraph is considered GFI and available after award.

5.2.25.2 Frequency: Historical information indicates an average of one (1) document per month are required to be modified. Historical information indicates an average of one (1) document need to be created per year.

5.2.25.3 The contractor shall integrate and administer commercially available artificial intelligence (AI), augmented reality (AR), and virtual reality (VR) technologies that can enhance language learning training.

5.2.26 Task 26: Operations and maintenance: This requirement applies to all of the components of the Academic Network. The contractor shall provide support for maintaining the existing systems, any new systems, making recommendations for system modernization, and expansion to meet mission requirements. A sustainment plan will be developed based on requirements to maintain and operate all facets of the DLIFLC and supporting systems. DLIFLC provides services to an audience throughout the world with mission critical activities. The availability of Academic Network services is a critical priority of DLIFLC. The Contractor shall perform daily operations and maintenance of the Academic Network consisting of the Public systems, and Restricted Systems, and Staging platforms.

Maintenance Hours of Operation: The Contractor may work outside regular business hours to perform routine production server or application maintenance and upgrades. The scheduled maintenance windows are Monday - Friday, 1700 – 2100, or Saturdays and Sundays, 0800 - 1700.

The contractor shall perform daily operations and maintenance IAW agreements established for DLIFLC platforms. These systems each contain unique content, permissions, and functions on independent hardware systems. The Public systems present DLIFLC information to the general public and consists largely of dynamic and very frequently changing content. The internal systems focus on internal business of the command (heavy in terms of SQL business applications, workflows, and business intelligence functions of SharePoint), cross organizational collaboration of the command, and content management. The DLIFLC platforms consist of virtual and physical servers that host DLIFLC business solutions for DLIFLC entities, which supports DoD initiatives. Operations and maintenance for the Academic Network: Public facing systems, internal systems, and DLIFLC staging platforms includes system administration, database administration, data backups, application monitoring, performance monitoring, capacity planning, problem resolution, infrastructure software deployment, application software deployment, configuration/patch management, and incident response. All IA, “Spillage,” and computer incidents shall be reported, investigated, and cleaned IAW AR 25-2 Section VI and VIII, and local DLIFLC/NEC policy. A reportable incident is defined as any break in operations of the system that prevents an end-user from accessing the site and performing the functions of the system.

Enterprise-level Datacenter Administration: The Contractor shall ensure the datacenter is operating 24x7 with DoD directed updates and security patches. The Contractor shall perform datacenter contingency operations, disaster recovery, and business continuity. The contractor will perform on-call or after-hours support to restore data center functionality during unplanned outages or failures. If contractor is unable to access system remotely, then the contractor shall attempt physical access to system. If contractor is unable to physically access system, then the contractor shall first contact

the COR, and then with COR's approval contact the DCSIT on call personnel followed by telephonically contacting in order the remaining DCSIT personnel. The contractor shall receive inquiries, requests, and incident reports and then conduct incident resolution procedures while maintaining feedback to originating party.

5.2.26.1 Standard: Datacenter availability of 97% with a 97% accessibility rate. Positive telephonic contact with the COR/ACORs for situational awareness.

5.2.26.2 SITREP: Datacenter availability of 97% and an accessibility rate of 97%, outside of scheduled maintenance periods. COR/ACOR positive notification within 30 minutes of identifying a system outage, with an update 30 minutes following the identification of the problem.

5.2.26.3 Standard: Timely and accurate notification to the COR with no more than one incident falling outside of this notification timeframe.

5.2.26.4 SITREP: Datacenter Critical Incidents Notification, a brief description of a critical incident (completely down or loss of functionality) with estimated return to full functionality sufficient to alert stakeholders and coordinate a rapid response to restore service within 1 hour of the incident occurrence or immediately if the system is completely down and not functioning. Attempt to restore full functionality within 30 minutes of discovered failure/disruption or immediately if system is completely down and not functioning.

5.2.26.5 Standard: Telephonic notification to COR first, and then necessary Combined Arms Center individuals/organizations. Provide estimate of return to full functionality within prescribed timeframe 95% of the time.

5.2.26.6 SITREP: Datacenter Non-critical Incidents Notification, a brief description of a non-critical incident (loss of services or reduced functionality) with estimated return to full functionality sufficient to alert stakeholders and coordinate a response within 4 hours to restore full-service functionality.

5.2.26.7 Standard: Complete Incident Report documented (Microsoft Word) within 48 hours of notification. Content shall reflect 95% accuracy of incident and have no more than 10 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. Incident Report will be submitted to the COR. The Government will have 5 business days to review and either accept or reject with comment. If the document is rejected, the contractor shall have 5 business days to update the document with comments from the Government and submit the final version.

5.2.26.8 SITREP: Datacenter Critical and Non-Critical Incident Reports, A detailed narrative and description of system operations or security incidents including a description of the response, impacts, and recommendations to prevent future incidents of the occurrence.

5.2.26.9 Standard: Complete Incident Response Plan documented (Microsoft Office products). Content shall reflect 95% accuracy for incident response and have no more than 50 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report.

5.2.26.10 On Call Monthly Roster.

5.2.26.11 Standard: Contractor shall provide a monthly “On Call Roster” 5 business days prior to start of applicable month, with proper contact information and phone numbers in Word format. Any changes to monthly “On Call Roster” require an immediate update and delivery of new roster to the COR by close of business (COB).

5.2.26.12 SITREP: Contractor shall provide a Datacenter Incident Response Plan 60 days following award of contract. The Datacenter Incident Response Plan, a detailed plan defining roles, responsibilities, timelines, and responses to incidents.

5.2.26.13 Standard: Ability for contractor personnel to assess proper actions, procedures, and policies to operate and maintain the platform along with immediate impacts, long-term impacts, criticality, and resolution in absence of key contractor personnel. Content shall have no more than 10 substantive, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. The Government will have 5 business days to review and either accept or reject with comment. If the document is rejected, the contractor shall have 5 business days to update the document with comments from the Government and submit the final version.

5.2.26.14 Update and maintain on SharePoint the Standard Operating Procedures (SOP) detailing how operation and maintenance of the Academic Network (includes public systems, Internal systems, and staging) is performed no later than 45 business days after the start of the contract and every 6 months thereafter. Updates and changes may be required based on regulatory changes, changes in applications or systems, or changes in the enterprise network. SOP shall include steps for issue resolution, maintenance, and operation procedures steps/flowchart/checklist with Microsoft Word with support from other Microsoft Office products; 15 business days after change in procedures is identified and approved by COR.

5.2.26.15 Standard: Contractor, COR, and submitter able to track/verify resolution, closure, and submitted inquiries, incidents, and request for information 100% of the time in a SharePoint dashboard/ticketing system. No help desk tickets will be closed without first notifying the end user of the intent to do so.

5.2.26.16 Maintain and improve incident, inquiry, and service requests Ivanti Service Desk (or equivalent IT Service Management (ITSM) Platforms tracking system for systems. Ability for contractor, COR, and submitter to track/verify resolution, closure,

and submitted inquiries, incidents, and request for information in a dashboard/ticketing system.

5.2.26.17 Standard: Response time for inquiries is within 1 business day 100% of the time.

5.2.26.18 Respond to inquiries (non-critical and no impact to service quality). Unless otherwise written, it is expected that the initial response is one day during normal working days, which is M-F 07:45-16:45. It is expected that if someone drops a ticket into the support request site that an automated response is sent to the user notifying them that their ticket submission has been received and that someone will be in contact with them within 1 business day to investigate or mitigate the issue. Any tickets issued that the contractor is not able to resolve will be immediately brought to the attention of the COR for resolution.

5.2.26.19 Frequency: Historical data reflects an average of 9 to 10 tickets per week.

5.2.27 Task 27: Configuration Management and Patching: The Contractor shall perform software installation; upgrades to operating systems and software packages, apply security patches, configure, and maintain operations of the Academic Network. Hardware, major software, and logical changes to configurable items require Configuration Control Board (CCB and Change Request (CR)). These are submissions that the contractor is required to submit. These changes will also be the catalyst and trip points for changes needed in the previous 5.18 documentation sections. In coordination with Cybersecurity monitor IAVAs, test and apply security updates and patches, and conduct routine hardware and software audits to ensure compliance with established standards, policies, and configuration guidelines. Changes to datacenter shall be documented in a location determined by the COR.

5.2.27.1 Standard: The Contractor shall maintain servers and applications at current update and patch levels, ensuring full compliance with DoD and Army policies and regulations, while ensuring system and application availability and accessibility rates are met IAW Task 5.28.

5.2.27.2 Update and patch datacenter.

5.2.27.3 Standard: POAM’s content shall reflect 95% accuracy with regards to issue(s), constraints, and system configuration. Content shall have no more than 10 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. The POAM shall be submitted NLT 5 business days from identify issues.

5.2.27.4 The Contractor shall create a Plan of Actions and Milestones (POAM) for submission to the COR and Cybersecurity, when a work around, mitigations, or schedules cannot be met.

5.2.27.5 Standard: The change management list shall be updated weekly reflecting 95% accuracy of changes made. Content shall have no more than 10 substantives, grammatical or spelling errors, submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report.

5.2.27.6 Document changes in datacenter hardware, software, and configuration in Academic Network Change Management list.

5.2.28 Task 28: Backup and Restoration: The Contractor shall conduct and monitor daily Backup and Restore activities for the Academic Network. Backups include SQL databases, servers, configuration files, virtual images, and item level documents and may be technically accomplished through multiple systems, organization, and installation support.

5.2.28.1 Standard: Backup and Restored datacenter is fully functional within 48 hours upon catastrophic failure or notification by COR. Backups are fully functional and existing operational file list. Restored files and applications are accessible, operational, and available within 48 hours.

5.2.28.2 Item level backup and restore datacenter.

5.2.29 Task 29: Redundancy and Virtualization: The Contractor shall ensure that a redundant solution, capable of restoring the Academic Network functionality in the event of catastrophic systems failure or prolonged service disruption. Redundancy solution includes the following areas: content stored in SQL Server databases, content stored in SANs, NAS, shared services (search, index, single sign-on), configuration settings for SharePoint, IIS, configuration databases, customizations, and binary files for the operating systems and applications throughout the datacenter. On Call 24x7 support required to implement the redundant solution upon notification.

5.2.29.1 Standard: Fully restore datacenter functionality within 48 hours of catastrophic failure or notification by COR. Application are fully operational, sites and files are restored to the latest available recovery point.

5.2.29.2 Restore DLIFLC datacenter after catastrophic failure, or after notification by COR. Test applications, randomly check sites and files for corruption.

5.2.29.3 Frequency: Historical data indicates this occurs on average one to two times a year.

5.2.30 Task 30: Web Content and MDC Operations and maintenance: The Contractor shall perform daily operations and maintenance of the web and portals and subordinate pages and associated data. Routine maintenance, patching, and upgrades of web servers will occur outside regular scheduled operations hours. Contractor support includes both building and maintaining web pages and providing assistance to

organizations designing and building pages. Software and web application developers shall ensure that Section 508 and accessibility requirements are built into the early phases of lifecycle development/sustainment to avoid the time and cost of retrofitting for Section 508 conformance after the fact.

5.2.30.1 Standard: Portals and web pages shall have less than 10 broken links, obsolete, or out of date materials at any given time. Portals and Web Pages shall be Section 508 compliant. Portal and web content shall have no more than 5 substantives, grammatical or spelling errors, content that exceeds this error rate shall be found insufficient and the Contracting officer will be notified via a deficiency report.

5.2.30.2 The contractor shall maintain existing public web pages, portals, and services; monitoring pages on a daily basis for out-of-date, obsolete, and inappropriate materials; improving designs and graphical representation of information on public web pages; preparing documentation of site design page structure, design and build new pages per the Government's needs. The contractor shall work on submitted ticket request from DLIFLC organizations in relation to needed updates or fixes to pages, content, or features. Ticket priority will be based on requestor or project input, any conflicts will be addressed by COR. Redesign and deployment of the DLIFLC public web portal will ensure a smooth transition to the new design. Initial support response within 1 business day. Software and web application developers shall ensure that Section 508 and accessibility requirements are built into the early phases of lifecycle development/sustainment to avoid the time and cost of retrofitting for Section 508 conformance after the fact.

5.2.31 Task 31: SharePoint User Instruction: The contractor shall develop SharePoint instructional products based on the DLIFLC Portal operational environment, and capabilities. Instructional products will also include video creation. Topics may vary from an entire class or short 1 – 5 minute "How To" videos.

SharePoint User Instruction Guide: The contractor shall organize and maintain a User Instruction Guide for the current SharePoint instantiation for each topic. User Instruction Guides will require periodic updates and/or revisions based on user feedback. The guide will be based upon the DLIFLC Portal policy, and functionality of SharePoint.

5.2.31.1 Standard: The User Instruction Guide is in compliance with the agreed upon template, standard Army formats, and is delivered on time. The draft submission submitted to the COR shall be within 85-95% complete regarding content, minor clerical mistakes that are merely a matter of form and not of substance will be noted for correction. Content shall have no more than five (5) substantives, grammatical or spelling errors, content that exceeds this error rate shall be found insufficient and the Contracting officer will be notified via a deficiency report.

5.2.31.2 The contractor shall provide User Instruction Guides in digital, video, and paper formats. User Instruction Guides consisting of structure, notes, and examples posted in the government designated SharePoint location 5 calendar days prior to a scheduled

class when changing the guide.

5.2.31.3 Frequency: Quarterly review and as application change requires.

5.2.32 Task 32: Database Administration. Contractor shall configure, operate, maintain, backup, and administer a Database Server utilizing Microsoft SQL Server with Microsoft Windows Server operating system. Database server(s) consisting of approximately 900 databases totaling 10TB to support the students, staff, and faculty. The official database of record for the schools falls under DLIFLC, DAA organization and DCSIT manages the servers and ensures that data is stored and secured according to DoD regulations, the Higher Learning Commission accreditation policies, and in best practice with industry database management techniques. This includes but is not limited to, encryption of sensitive data elements such as personally identifiable information (PII), normalizing the database, performance monitoring and fine-tuning of database operations, and access control security to provide data confidentiality as well as availability for authorized users.

5.2.32.1 Standard: Maintain the Databases and database server with an availability rate of 98% or better with no loss of data or data integrity outside of scheduled routine maintenance, patching, and upgrades windows encrypt sensitive data within the databases IAW all applicable policies; normalize the Database.

5.2.32.2 Continuous database availability with encryption of the database. The database will be normalized to unbundle any overlapping entities and eliminate redundancies, incompleteness, and anomalies.

5.2.32.3 Standard: The contractor shall submit the technical documentation within 5 business days of a change to the server or database.

5.2.32.4 Technical Documentation for each configuration, interface, and operation of the server and database. Written document detailing the technical diagrams, specifications, and architecture of the system, which includes details of each interface webpage, graphical user interface (GUI) control, SQL query, functions, external system integration, and other capabilities. The Government will have 3 business days to review the deliverable and provide comments back to the contractor. The contractor shall submit the final deliverable within 5 business days of receiving the Government's comments. A negative response from the Government within the time specified above constitutes acceptance.

5.2.32.5 Standard: Provide update in weekly report on the verification of weekly backup data and test data restoration procedures on the testing and transfer to the back-up server.

5.2.32.6 Documented Plan and Schedule of backup and data restoration procedures, to include daily, incremental, and full back up schedules.

5.2.33 Task 33: Operate and Maintain Web Applications. Contractor shall operate and

maintain a front end, web-enabled Java and/or ASP.NET applications which connects to the databases and provides user input and output capability. Front end applications shall provide intuitive user input capability supporting school administration as well as producing reports and information as output to the user. Contractor is responsible for developing and maintaining the functionality of the following key tasks: student information management, staff & faculty information management, transcript generation, student grade management and reporting, course management and reporting, a simplified course manager dashboard user interface, course management and registration, learning path (a.k.a. tracks) management and registration, processing of standardized test results, curriculum scheduling details, LMS Integration which includes batch functionality to create/enroll LMS users into courses on LMS and receiving student academic and grade data for permanent storage, curriculum management, counselor assignment, email integration, detailed audit logging, role-based access control, DoD Provided authentication certificate generation, and dashboard monitoring.

5.2.33.1 Standard: Maintain the Web Application to support listed key tasks and functions in section 5.2.1 with an availability rate of 98% or better, with no loss of data or data integrity; Upon identification of a required application maintenance update (a.k.a. fixing a “bug”), the contractor shall resolve it within 48 hours, report it to the COR, and update the Ivanti (or equivalent IT Service Management (ITSM) Platforms work-order log with the issue. The contractor shall submit the technical documentation within 5 business days of a change to the web application.

5.2.33.2 Technical Documentation for the Web Application. Written document detailing the technical diagrams, specifications, and architecture of the system, which includes details of each interface webpage, graphical user interface (GUI) control, SQL query, functions, external system integration and other capabilities. All updates and fixes shall be documented. The Government will have 3 business days to review the deliverable and provide comments back to the contractor. The contractor shall submit the final deliverable within 5 business days of receiving the Government's comments. A negative response from the Government within the time specified above constitutes acceptance.

5.2.33.3 Standard: Maintain a code database for the web application using Microsoft Team Foundation Server and/or Jenkins, GitHub, or GitLab CI/CD.

5.2.33.4 The web applications utilize GitHub/GitLab for code maintenance and to continue maintenance, troubleshooting and testing of the code prior to deployment to the production environment.

5.2.34 Task 34: Provide Database and Web Application Recommendations

5.2.34.1 Standard: Once per month (last Monday of each month), contractor shall provide a written review of and recommendations to the COR by official letter attached via email.

5.2.34.2 Review new developments in the field of database administration, SQL, ASP

.NET, Java programming and recommend useful or required upgrades to the databases or web applications.

5.2.35 Task 35: Conduct user and administration training. Contractor shall provide training modules and instructor led training for users of the Web Application as well as specialized administration training for school/department site administrators. The training will be a power point presentation conducted by desk side, classroom and/or by video teleconference depending on the location and number of personnel for training.

5.2.35.1 Standard: Quarterly, the contractor shall provide instructor led training on location or via Teams to faculty and staff of all schools utilizing the application; approximately 20 personnel per session. This training will be up to one hour in duration. Contractor shall provide training materials updated at least every three months or as needed to reflect changes in systems.

5.2.35.2 User manual and training products which includes quick reference guides on how to use and overviews of the critical functions.

5.2.36 Task 36: Technical Writer. The contractor shall prepare instruction manuals, how-to guides, journal articles, and other supporting documents to communicate complex and technical information more easily. Develop comprehensive documentation that meets organizational standards. Gain deep understanding of products and services, and translate complex information into simple, polished, engaging content. Write user-friendly content that meets the needs of target audience, turning insights into language for user success. Develop and maintain detailed database of reference materials, including research, usability tests, and design specifications. Evaluate current content and develop innovative methods for improvement.

5.2.36.1 Standard: Research, outline, write, and edit content, working closely with various IT teams to understand project requirements. Gather information from subject-matter experts and develop, organize, and write procedure manuals, technical specifications, and process documentation. Work with development and support leads to identify documentation repositories, revise and edit, and determine best solutions for data compilation and centralized storage. Research, create, and maintain information architecture templates that adhere to organizational and legal standards and allow for easy data migration. Develop content in alternative media forms for maximum usability, with consistent voice across all documentation.

5.2.36.2 The contractor shall respond to technical writing request submitted in the Ivanti service desk (or equivalent IT Service Management (ITSM) Platforms database and will participate in projects for IT writing requirements for new systems and technologies being implemented.

**Information Technology Resource Management (ITRM)**

5.2.37 Task 37: The Contractor shall support DLIFLC material control function of

tracking Information Technology (IT) equipment, consumable materials, tool control, issuing, mobile equipment, assigning control numbers, and marking equipment in accordance with local command inventory control processes. As a member of the Technical Distribution Center and DCSIT Supply team, the Contractor will assist with the requisition, receipt, storage, issue, inventory, and disposition of over 10,000 pieces of government-furnished equipment (GFE) such as desktops, laptops, monitors, printers, and mobile cell phones. The Contractor shall maintain an administrator function with acquisition receiving, checking orders to ensure part numbers are correct, powering up units to ensure the GFE works out of the box, and removing packing materials.

5.2.37.1 Standard: The internal property online IT assets tracking databases content shall have no more than 10 substantives, grammatical, or spelling errors. All content that exceeds the error rate shall be found insufficient, and the Contracting officer will be notified via a deficiency report.

5.2.37.2 The Contractor shall maintain an online database to track all IT assets. Perform monthly cyclic inspections. The contractor shall submit reports of all Inventory / Utilization Data.

5.2.38 Task 38: According to established procedures, the Contractor will support the receipt, storage, and distribution of all 10,000 IT goods and equipment. This includes all warehouse and LTD locations. The Contractor will maintain and channel paperwork to ensure transactions' efficient and accurate completion. The Contractor will perform clerical and technical administrative work for the supply work center, such as preparing documentation to requisition, issue and disposition general supplies and equipment. The Contractor will provide support operations, performing warehousing functions to receive, inspect, identify, classify, store, protect, and deliver all supplies and equipment to ensure timely and effective responses to customer requirements. The Contractor shall log each Supply/TDC service desk email or walk-in support request to the service desk in the Ivanti service desk (or equivalent IT Service Management (ITSM) Platforms database.

5.2.38.1 Standard. All Supply/Tech Distribution Center (TDC) Service Desk requests shall be logged within 15 minutes of receipt. Each entry shall be logged within the DCSIT Ivanti service desk (or equivalent IT Service Management (ITSM) Platforms database and include the customer name, location, contact information, problem category, and problem description at a minimum. The Contractor shall respond to end-users' supply/TDC service desk support requests per the Service Level Agreement in Attachment #4.

5.2.38.2 Contractor shall maintain and store paperwork online and secure a physical storage database to track all IT assets. Perform monthly cyclic inspections. The Contractor shall submit reports of all Inventory / Utilization Data. Creating approximately 50 Return Material Authorizations per year with manufacturers for shipping and receiving repairs. Must correctly maintain and channel paperwork to ensure efficient and accurate completion of transactions.

5.2.39 Task 39, Project Management: The contractor shall provide a comprehensive monthly report that addresses the progress and status of each deliverable in the PWS.

5.2.39.1 Standard: Content shall have no more than 10 substantive, grammatical or spelling errors. Submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report. The Government will have 5 business days to review the deliverable and provide comments back to the contractor. The contractor shall submit the final deliverable within 5 business days of receiving the Government's comments. A negative response from the Government within the time specified above constitutes acceptance.

5.2.39.2 Content is to be complete, accurate, informative, and timely. Minor clerical mistakes that are merely a matter of form and not of substance will be noted for correction. At a minimum the report shall include: the contract/task order number, company name, report date, report period, prepared by, and the status of each deliverable, efforts this reporting period, projected efforts for next reporting period, problem areas, and any significant actions. The report is due on the 10th business day of each month. The Government will have 5 business days to review the document and either accept or reject with comment. The contractor will have three days to make the corrections and submit the final document.

5.2.40 Task 40: Summarized Requirements Report: Collect and summarize into a SharePoint page (dashboard) within a Portal Support site, support and system requirements, project statuses, concerns, and priorities for the week. Inputs to the report include, but not limited to meetings (i.e., Change Control Boards, Workgroups, planning meetings, etc.), project updates, system/application changes, Help Desk reports, and user feedback. The Contractor shall maintain the page and present it during a weekly COR update (currently Tuesdays at 2:00 pm).

5.2.40.1 Standard: The Contractor shall provide a weekly report of summarized system/process requirements in a SharePoint page designed to provide critical situational awareness at a glance. Upon update of the page, the Government will have 5 business days to review content for accuracy to projects, and either accept or reject with comments. The contractor shall then have three days to make any corrections and submit the final document. Content shall have no more than 10 grammatical or spelling errors. Submissions that exceed this error rate shall be returned as insufficient and the Contracting officer will be notified via a deficiency report.

5.2.40.2 The weekly report shall be maintained online, and the format shall put COR critical information up front and contain information that will inform the COR of relevant information IAW the task (i.e., top customer support issues, updates on priority projects, etc.). The report page format shall be accurate and timely, providing comprehensive situational awareness with historical information maintained for decision making. Minor clerical mistakes that are merely a matter of form and not of substance will be noted for correction. Meeting notes shall be recorded and maintained with the information on the

SharePoint page and should be in standard Army memorandum for record format per Army Regulation 25-50 uploaded with appropriate metatags for discoverability and search. Special note should be given to milestones, timelines, suspense's (internal or external), and next events.

5.2.41 Task 41: Contract Phase-Out Plan. The Contractor shall prepare a Transition Plan to minimize any decreases in productivity and to prevent negative impacts on service due to contract transition.

5.2.41.1 The Contractor shall have personnel on board during the ten (10) business day phase out period. A Transition Plan shall be developed to focus on Tasks included in paragraph 5.2 of the PWS. The Contractor shall review and revise the Phase Out plan as processes change.

5.2.41.2 Standard: The Phase-Out plan shall be delivered to the COR and KO, via e mail, no later than the mid-point of the period of performance (10th of the month). The Government will have five business days to review the deliverable and provide comments back to the Contractor. The Contractor shall submit the final deliverable within five business days of receiving the Government's comments.

5.2.41.3 A Phase-Out plan delivered in MS Word format with an associated M.S. Project plan with project data and identifies milestones and critical tasks, addressing each of the required tasks listed above.

5.2.42 Task 42, Execute Phase-Out.

## 5.3 SERVICE CONTRACT REPORTING

**5.3.1 SYSTEM FOR AWARD MANAGEMENT(SAM) SERVICE CONTRACT REPORT(SCR):** The Contractor shall report ALL Contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract for the DLIFLC DCSIT via a secure data collection site. The Contractor is required to completely fill in all required data fields through the following web address: www.sam.gov. Reporting inputs will be for the labor executed during the period of performance during each Government FY, which runs from October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk by clicking "View Assistance for SAM.gov" which is located at the top of the SAM.gov website. From there, you can the select "Contact Our Service Desk" which will allow you to contact SAM.gov directly. If contract period of performance ends prior to September 30, the Contractor has 30 calendar days from end date of the contract to complete the SAM SCR requirement.

**Steps for Submitting a Service Contract Report (SCR)**

1. Go to www.sam.gov and log in.

2. Select Entity Registrations and then select Service Contract Reporting.
3. SAM displays your entities which have service contracts and meet the reporting criteria. Select View by entity to see the service contracts for each entity.
4. Next, select Add for the service contract against which you want to create a Service Contract Report. Each service contract which meets the FAR Subpart 4.1703 reporting thresholds is displayed.
5. You will be taken to the Complete Service Contract Report page. SAM displays the contract details and allows you to report. You are required to enter the following information:
   - •Total Amount Invoiced: Total dollar amount invoiced for services performed during the previous Government fiscal year under the contract (this amount should include the prime and any subcontract amount).
   - •Prime Contractor Hours Expended: Prime contractor direct labor hours expended on the services performed during the previous Government fiscal year. The amount you enter is automatically divided by 2,080 hours to calculate a Full Time Employee (FTE) equivalent, displayed under the Prime Contractor Hours Expended as Prime Contractor FTEs.
6. Report any required Tier 1 subcontractor information by selecting the Add Tier 1 Subcontract Information button.
7. When you are ready to submit the report, select Submit. This saves your report and returns you to the Select Service Contract page where you can create other SCRs or edit an existing SCR.

**Steps for Editing a Submitted Report**

1. Follow steps 1-4 above. Any previously submitted SCR will have a View/Edit button instead of an Add button.
2. Select View/Edit. You will be able to view the current SCR, edit available fields, and resubmit the record. You can also delete previously entered information altogether.

STD: All information provided by the Contractor shall be accurate, complete, and not exceed suspense dates noted in corresponding paragraph above.
AQL: 100% Compliant

# PART 6

## APPLICABLE PUBLICATIONS

**6. APPLICABLE PUBLICATIONS (CURRENT EDITIONS):** The following publications, manuals, regulations, etc. are mentioned in this PWS and are listed below.

6.1.1 Department Of Defense Contract Security Classification Specification (DD Form 254)
6.1.2 The Army Physical Security Program (AR 190-13)
6.1.3 U.S. Army Corps of Engineers Safety and Health Requirements Manual (EM 385-1-1)
6.1.4 Information Assurance Workforce Improvement Program (DoD 8570-M)
6.1.5 Information Assurance Training Certification and Workforce Management Directive (DoDD 8570.01)
6.1.6 Information Assurance (AR 25-2)
6.1.7 Army Information Technology (AR 25-1)
6.1.8 Personnel Security Program (AR 380-67)

## ATTACHMENT AND TECHNICAL EXHIBIT LISTING

### 7. ATTACHMENT AND TECHNICAL EXHIBIT LIST

**7.1 TECHNICAL EXHIBIT A:** Performance Requirements Summary

**7.2 TECHNICAL EXHIBIT B:** Deliverable Schedule

**7.3 ATTACHMENT 1:** Estimated Workload Data

**7.4 ATTACHMENT 2:** List of Contract Positions

**7.5 ATTACHMENT 3:** DLIFLC System/Device List

**7.6 ATTACHMENT 4:** DLIFLC Service Level Agreement

**7.7 ATTACHMENT 5:** Labor Category and Current Duty Location

## TECHNICAL EXHIBIT A

## PERFORMANCE REQUIREMENTS SUMMARY (PRS)

The contractor service requirements are summarized into performance objectives that relate directly to mission essential items. The performance threshold briefly describes the minimum acceptable levels of service required for each requirement. These thresholds are critical to mission success.

| PERFORMANCE OBJECTIVE | STANDARD | PERFORMANCE THRESHOLD ACCEPTABLE QUALITY LEVELS (AQLs) | INCENTIVE/ DISINCENTIVE |
|---|---|---|---|
| **PRS#1 – PWS 5.2.1**. The Contractor shall Setup desktop/notebook/tablet devices (See Attachment #3) | The contractor shall perform the subject Tasks in this PWS in accordance with DLIFLC provided Standard Operating Procedures and Maintenance Operations directives on Information Technology | 90% Compliance; no more than 5 instances found per month | **Incentive:** Positive CPARS Rating **Disincentive:** Negative CPARS Rating |

| PERFORMANCE OBJECTIVE | STANDARD | PERFORMANCE THRESHOLD ACCEPTABLE QUALITY LEVELS (AQLs) | INCENTIVE/ DISINCENTIVE |
|---|---|---|---|
| **PRS#2 – PWS 5.2.9**<br>The Contractor shall ensure the datacenter is operating 24x7 with DoD directed updates and security patches.(See Attachment #3) | The Academic Network shall be Fully Mission Capable (FMC) at least 99.99% availability of each month, less any service provider outages or scheduled maintenance outages. | Unannounced service interruptions are no more than one (1) per month, and recovery time when an outage occurs is within six (6) hours of discovery/report of the outage, both during and outside of normal duty hours | **Incentive:**<br>Positive CPARS Rating<br>**Disincentive:**<br>Negative CPARS Rating |

| PERFORMANCE OBJECTIVE | STANDARD | PERFORMANCE THRESHOLD ACCEPTABLE QUALITY LEVELS (AQLs) | INCENTIVE/ DISINCENTIVE |
|---|---|---|---|
| **PRS#3 – PWS 5.2.16**<br>The contractor shall provide an On-Site Engineer (OSE) Extreme Certified services for maintaining the reliability and security of the DLIFLC Network's voice, data, and wireless services. | Planning: Assessing network requirements - The OSE shall analyze the current network infrastructure, identifies limitations, and determines the desired network performance. | 95% of the DLIFLC Language Training Network mission systems achieve a favorable ATO at 95% of Accreditation and Authorization events, and DLIFLC passes 95% of cybersecurity inspections with some CAT I and CAT II findings on local mission systems, per the system ATO and most current POA&M. 95% of findings are mitigated and resolved within the timelines indicated on the POA&M. | **Incentive:** Positive CPARS Rating<br>**Disincentive:** Negative CPARS Rating |

| PERFORMANCE OBJECTIVE | STANDARD | PERFORMANCE THRESHOLD ACCEPTABLE QUALITY LEVELS (AQLs) | INCENTIVE/ DISINCENTIVE |
|---|---|---|---|
| **PRS#4 – PWS 5.2.17**<br>Academic Network Information Assurance Requirements. | Academic Network meets all AR, DoD and published IAVA requirements. The Contractor will ensure that requirements are met prior to the published compliance dates | System service interruptions are one per month. All web capabilities are delivered on time and meet 95% of mission requirements of supported organizations. All web systems are 100% compliant and have a current ATO. | **Incentive:**<br>Positive CPARS Rating<br>**Disincentive:**<br>Negative CPARS Rating |
| **PRS#5 – PWS 5.2.12**<br>Academic Network Improvements and Enhancements. The Contractor shall identify opportunities and solutions for improving efficiencies with emerging technologies | Report is due the 1st Wednesday following a fiscal year quarter to the COR. | 100% Compliance Zero Deviation from standard | **Incentive:**<br>Positive CPARS Rating<br>**Disincentive:**<br>Negative CPARS Rating |

## TECHNICAL EXHIBIT B

## DELIVERABLE SCHEDULE

| Deliverable | Frequency | Medium/Format | Submit To |
|---|---|---|---|
| PWS 1.5.1<br>Quality Control Plan | 30 days after Period of Performance start date and annually thereafter with corrections complete within 5 days | Email in MS Word or Adobe Acrobat | COR, CIO, KO |
| PWS 1.5.4.3.1<br>Contractor Work Plan | 30 days after Period of Performance start date | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 1.6.3.1<br>Installation Pass Log | 10 days after Period of Performance start date | Email in MS Word using DoD SAFE | COR, KO, CIO |
| PWS 1.6.3.2<br>Contractor collect and turn in CAC | 1 – 3 days after termination | Email in MS Word or Adobe Acrobat | COR |
| PWS 1.6.3.4<br>CAC Log | 10 days after new hire | Email in MS Word using DoD SAFE | COR |
| PWS 1.13<br>Contractor Travel – Preapproval and invoicing in WAWF | 30 days prior to travel and invoicing within 60 days after travel | Email in MS | COR, KO, CIO |
| PWS 1.18<br>Contractor to provide signed Non Disclosure Agreement. | NLT 10 days after start of work | Email in MS Word or Adobe Acrobat | COR |
| PWS 1.23<br>Training Certificates | 5 days after completion of training and annually as required when onboarding new employees | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 1.26<br>Contractor must submit weekly deliverable reports. | Weekly every Friday | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 1.26<br>Contractor must submit Bi-weekly deliverable reports. | Bi-Weekly every Friday | Email in MS Word or Adobe Acrobat | COR, KO, CIO |

| | | | |
|---|---|---|---|
| PWS 1.26<br>Contractor must submit Monthly Deliverable Report. | 1-5th of the Month | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 1.26<br>Contractor must submit Quarterly Status Report. | The 30th of the month – Dec/Mar/Jun/ Sep | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 5.2.40<br>Weekly Status Brief | Tuesday DCSIT Status Brief/1400 | Brief/Slide Presentation | COR, CIO |
| PWS 5.2.26<br>SITREP Report. | After Outage | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 5.2.41<br>Phase Out Plan | Mid Point of PoP- 10th of the Month | Email in MS Word or Adobe Acrobat | COR, KO, CIO |
| PWS 5.3<br>Service Contract Reporting (SCR) | 31st October of each year. 30 days from end date of the contract | Email in MS Word or Adobe Acrobat | COR, KO, CIO |

## ATTACHMENT 1

## ESTIMATED WORKLOAD DATA

| ITEM | NAME | ESTIMATED QUANTITY |
|---|---|---|
| **Task Areas 5.2.1 to 5.2.8** | All Information Technology Service Management: ITS and RSS Positions: ITS Lead, ITS Tier 1 OMC, ITS Tier 1, ITS Tier 2 – DLI-W, ITS Tier 2 Classroom, ITS Tier 2 Support, Imaging Tech/TDC, Remote Site Tier 2 (FHAZ, WLC, and HLC) | **25%** |
| **Task Areas 5.2.9 to 5.2.16** | All Cyber Infrastructure Network (CIN) Support Positions: Network Engineer V, Network Engineer IV Network Engineer II, Wireless Network Engineer II | **20%** |
| **Task Areas 5.2.17 to 5.2.18** | All Information Assurance/Cybersecurity Positions: IA Tech (Network), IA Tech (Mobile), IA Tech | **20%** |
| **Task Areas 5.2.19 to 5.2.36** | All Data Center Operations Support (DCO) and Application Development (AppDev) Positions – See Labor Positions Table 1 | **30%** |
| **Task Areas 5.2.37 to 5.2.40** | All Information Technology Resource Management (ITRM) Positions: Project Managers, Business Analysts, IT Logistics Supply Technicians | **5%** |

## ATTACHMENT 2

## LIST OF CONTRACT POSITIONS

1. Estimated number of Contract Manpower Equivalents is based on historical data and provided as a reference point only.

***Tier 2 IT Support Technician DLI-W****:* Serves as IMO and ISO Representatives; monitors conventional and web applications; assesses knowledge management needs; identifies and obtains required resources; provides oversight, planning coordination with Garrison IT requirements; initiates and forwards Requests for Services to the NEC; acts as liaison to the NEC for repair of IT equipment; monitors all common-user C4/IT baseline services; coordinates backup and archive services.

The individual who reports to a commander/director/chief for coordination service. It includes, advice, planning, and coordination of all IM/IT requirements (business and mission) for their organization. The IMO representative assists the commander/director/chief in effectively managing the organization's IM/IT processes and resources that enable the organization's business and mission processes.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must be Windows or Apple Certified Mac Technician.

d. Must be familiarity with Ivanti Management Suite (or equivalent IT Service Management (ITSM) Platforms, and Microsoft SCCM.

e. Require Secret Clearance.

f. Must provide customer support (tier 1, and tier 2 help-desk support). The IMO task is to provide requests for service to DOIM.

g. Must ensure that all installed IT products are supported by the vendor for security patches to address publicly known security vulnerabilities.

***Tier 2 IT Support Technician Classroom +MIL Support:*** The person in this position providing trouble shooting and assistance with classrooms equipment; images and repairs classroom equipment; and simulates or recreates user problems to resolve operating difficulties. The duties will include all Tier 2 duties, Interact with Undergraduate School (UGE), helpdesk staff, DEVOPS, network team to restore service and or identify and correct core problems. Documents, tracks, and monitors problems to ensure a timely resolution.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have knowledge of macOS, Windows, iOS, and Active Directory.

d. Secret Clearance required.

***Tier 2 IT Support Technician POM:*** The person in this position provides telephone, or office support services. The duties will include all Tier 1 duties, advanced OS support, intermediate account support, advanced software support, intermediate hardware support, deploying Mac, Windows and iOS images to devices.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must be Windows or Apple Certified Mac Technician.

d. Must be familiar with Ivanti Management Suite (or equivalent IT Service Management (ITSM) Platforms, and Windows imaging.

***RSS Tier 2 Technician (POM, FHAZ, HLC )*****:** The person in this position will perform the following - Mobile Device Management (MDM), Client Configuration Management, End User Support. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all RSS servers and applications.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have knowledge of macOS, Windows, and iOS.

***Network Engineer III:*** The individual in this position will serve as the Senior Network Engineer Level II. Responsibilities include wired and wireless network performance monitoring, network optimization, testing, IT project management, implementation of network security controls, advanced troubleshooting and analyzing all elements of the network infrastructure.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must have CCNA or CCNP or equivalent computing environment certification requirements. 7 years documented experience in addition to previously stated experience requirements can be used as equivalent for certification.

d. Must have advanced knowledge or experience with management of Palo Alto Networks firewall policy and content management, PAN OS management and threat monitoring and detection.

e. Must have advanced knowledge of wireless network deployment, implementation, configuration and management. Experience with HPE Aruba Wireless Networking architecture or similar (ie. Extreme Networks or Cisco).

f. Must have advanced knowledge of policy management, troubleshooting and upgrading network access control system. Experience with Aruba ClearPass or similar NAC system (i.e. Cisco ISE).

***Network Engineer II:*** The person in these positions will serve as network engineer II. Responsibilities include monitoring, testing, and analyzing all elements of the network facilities. The duties will include planning, installation, maintenance during or after- work hours, troubleshooting, and network management.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Experience requirements include 3 years of progressive experience in computer system/network engineering, including 2 years of specialized experience related to the tasks.

d. Must have CCNA or equivalent certification requirements. 3 years documented experience in addition to previously stated experience requirements can be used as equivalent for certification.

e. Must have relevant experience with Palo Alto Networks, Extreme Networks, HPE Aruba Wireless Networking or similar (ie. Extreme Networks or Cisco), ClearPass or similar network access control system (ie. Cisco ISE).

f. Must have experience or knowledge with wireless network deployment,

implementation, configuration and management.

g. Must have experience or knowledge of managing, maintaining, and troubleshooting a network access control system.

***Security Control Assessor*:** The Security Control Assessor is responsible for conducting independent, comprehensive assessments of the management, operational, and technical security controls and control enhancements within or inherited by an information technology (IT) system. The primary objective is to determine the overall effectiveness of these controls, as defined in NIST 800- 37.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Must be able to evaluate Security Controls: Perform thorough evaluations to ensure compliance with NIST 800- 37 and related standards.

d. Must be able to identify and Recommend Improvements: Assess control effectiveness, identify vulnerabilities, and recommend enhancements.

e. Must be able to document and Report Findings: Provide detailed reports and communicate findings to stakeholders.

f. Must be able to collaborate with Teams: Work with IT and security teams to implement recommended measures.

g. Must Stay Informed: Keep up-to-date with security trends, threats, and best practices.

h. Must have following relevant Skills: ACAS, Microsoft Defender, STIGs, Microsoft 365, SaaS Security, RHEL, Windows Server, MacOS, and eMASS.

***Security Architect:*** The Security Architect is responsible for designing enterprise and systems security throughout the development lifecycle. This role involves translating technology and environmental conditions, such as laws and regulations, into effective security designs and processes, with a focus on implementing Zero Trust principles.

a. Educational requirements include AA/AS from an accredited college or university or substitute with 3+ years of equivalent technical related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Security Design: Develop and implement security architectures for enterprise systems throughout the development lifecycle, incorporating Zero Trust principles.

d. Regulatory Compliance: Translate laws, regulations, and environmental conditions into security designs and processes.

e. Lifecycle Management: Ensure security is integrated at every stage of the system and software development lifecycles.

f. Collaboration: Work with cross-functional teams to ensure security requirements are met.

g. Stay Informed: Keep up-to-date with security trends, threats, and best practices.

h. Relevant Skills: Zero Trust, Microsoft 365, Entra ID/Active Directory, GitLab, SaaS Security, Palo Alto Networks.

***Cyber Defense Analyst:*** The Cyber Defense Analyst is responsible for using data collected from various cyber defense tools (e.g., IDS alerts, firewalls, network traffic logs) to analyze events within their environments. The primary goal is to mitigate threats and enhance the organization's security posture.

a. Educational requirements include AA/AS from an accredited college or university or substitute with 3+ years of equivalent technical related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Data Analysis: Utilize data from cyber defense tools to analyze and interpret security events.

d. Threat Mitigation: Identify and respond to potential threats to mitigate risks.

e. Incident Response: Participate in incident response activities to address security breaches.

f. Continuous Monitoring: Maintain ongoing surveillance of network traffic and security alerts.

g. Collaboration: Work with all teams to implement effective defense strategies and improve overall security measures.

h. Relevant Skills: Microsoft Defender for Endpoint, ACAS, Palo Alto Networks, GitLab, BurpSuite, MacOS, iPadOS, Windows, and RedHat Enterprise Linux.

***Development Operations (DevOps) Engineer:*** The person in this position is

responsible for designing and building automated processes keeping reproducibility, auditability, and traceability in for deployment, monitoring and operations. The duties include providing customized continuous integration/continuous delivery (CI/CD) solutions with are fully compliant with ITIL change, incident and configuration management processes. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all DevOps servers and applications.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Programming Languages: Proficiency in scripting languages like Python, Bash, Ruby, and familiarity with at least one general-purpose programming language

d. DevOps Tools: Expertise in CI/CD tools, configuration management tools, container technologies, and cloud platforms

e. System Administration: Understanding of operating systems (Linux, Windows), networking concepts, and system management

f. Cloud Computing: Familiarity with major cloud providers like Azure, or GCP

g. Software Development Lifecycle (SDLC): Knowledge of the entire software development process, including Agile methodologies
h. Communication and Teamwork: Strong ability to collaborate with different teams and communicate technical concepts effectively

i. Experience administration of Windows and Linux operating systems, VMWare ESXi deployment and operations experience.

j. Experience with GitLab and Microsoft Team Foundation

k. SAN technologies and applications

***Exchange Administrator****:* The persons in this position will serve as the Microsoft Exchange and Server Management Engineer, which include the responsibilities of managing email accounts and supporting the transfer of data into the new network. The duties will include planning and configuration of the Microsoft Exchange server. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Email Administrator servers and applications.

a. Educational requirements include AA/AS from an accredited college or university or substitute with 3+ years of related technical experience.

b. Require anyone of the following IAT Level I (A+ CE, Network+ CE, SSCP, CCNA Security) and applicable CE/OS Certification.

c. Experience requirements include 7 years of related experience.

d. Microsoft Exchange certification required.

e. Subject Matter Expertise in Microsoft technologies and solutions including but not limited to Windows Server 20XX/, Active Directory, Domain Controller, Azure, Office365, etc.

***Learning Management Systems (LMS) Administrator:*** The individuals in this role will act as administrators for all web-based and mobile applications utilized to deliver curricula, conduct assessments, and track the progress of DLIFLC students. They will be tasked with the day-to-day operation, maintenance, and support of the organization's Learning Management System (LMS) platform. This includes ensuring the platform's smooth functionality by configuring settings, managing user access, uploading course content, troubleshooting technical issues, generating reports on learner progress, and collaborating with stakeholders to enhance the learning experience within the system.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Strong technical proficiency with Learning Management Systems (LMS) platforms (e.g., Moodle, Canvas, Blackboard)

d. Understanding of instructional design principles and e-learning development

e. Excellent problem-solving and troubleshooting abilities

f. Data analysis skills to interpret learning reports and metrics

g. Strong communication and interpersonal skills to interact with users at all levels

h. Ability to work independently and as part of a team

i. Relevant experience includes Sakai, Kaltura, Blackboard, Moodle, Angel, Webex, DCO, Connect, iOS, Confluence, SharePoint, Canvas.

***IT Technical Writer:*** The contractor shall develop, write, and edit materials for reports, manuals, briefs, technical specifications, instruction books, catalogs, and related technical and administrative publications concerned with work methods and procedures.

Specifically, Microsoft Office Suite, SharePoint, Wiki, GitLab Technical Writing and UI text.

a. Educational requirements include AA/AS from an accredited college or university or substitute with 3+ years of equivalent related experience.

b. Require anyone of the following IAT Level I (A+ CE, Network+ CE, SSCP, CCNA Security) and applicable CE/OS Certification.

c. Ability to multi-task, prioritize staff requests, and set expectations.

d. Meticulous attention to detail and effective professional correspondence.

e. Self-sufficient and resourceful, and able to work independently and take overseership of the project.

f. Ability to work under tight deadlines.

g. Solid understanding of IT concepts, ability to translate into technical software documentation.

***Application Developer - Senior:*** The person in this position will serve as the lead of the DevOps Application Development/Sustainment Center of Operations, which includes the responsibilities of ensuring overall leadership of all Application Development/Sustainment within DLIFLC. This includes ensuring timely delivery and best DevOps practices, Agile Methodology, SDLC, and Release Management. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all AppDev servers and applications.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Specialized experience requirements include 7 years of progressive experience in serving as an Application Developer in .NET.

d. Experience with DevOps Methodologies, GitLab, and Agile Methodologies.

e. Relevant Experience with Amazon, Microsoft, Google cloud services.

f. Required Skills include .NET, JAVA, SQL, MySQL, VDX, IIS, HTML5, Linux, Tomcat, Apache, SharePoint, .Net, SQL, HTML5, SQL, MySQL, iOS Development/Sustainment, PhP, WordPress.

***Application Developer - Junior:*** The person in this position will serve as the lead application administrator, which includes the responsibilities of proper configuration and support administrative systems. The duties include assessment of customer needs and recommendations for improved configuration and implementation of improved applications. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Application Developer servers and applications.

a.
Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. Experience requirements include 2 years of experience in Application Development /Sustainment.

d. Required Skills include .NET, JAVA, SQL, MySQL, VDX, IIS, HTML5, Linux, Tomcat, Apache, SharePoint (Developer/Designer), .Net, SQL, HTML5, SQL, MySQL, Power Apps, Power Automate, WordPress.

***Tester Automation:*** The person in this position design and maintains automated tests that provide functional, regression and integration test coverage for applications and services. The duties include architecting and implementing scalable test automation infrastructures, test fixtures and harnesses that will be utilized by the DevOps team.

a.
Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require IAT Level I (A+ CE, CCNA Security, Network+ CE, and SSCP) Certification, and applicable CE/OS Certification.

c. 5+ Years of Software Engineer/QA Experience.

d. Hands-on experience in setting up continuous integration (CI) build environments.

***User Interface Developer:*** The person in this position is responsible for designing, developing, and maintaining dynamic user interfaces for web applications and interfaces. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Application UI servers and applications.

a.
Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level I (A+ CE, Network+ CE, SSCP, CCNA Security) and applicable CE/OS Certification.

c. Experience requirements include 3 years of experience in user interface or graphic design.

d. Experience with modern web/UI development/sustainment tools and techniques to include responsive design frameworks, HTML5, JavaScript frameworks.

***Database Architect/Developer-Data Warehouse:*** The person in this position is responsible for performing analysis, modification, documentation, and support of daily operations for the data warehousing and reporting system. Responsibilities include supporting the data development/sustainment lifecycle, including data profiling, ETL and data model design and development/sustainment, testing, and support. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Database Developer servers and applications.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification..

c. Minimum of 5 years of experience designing and developing data warehouses.

d. Proven track record of successfully implementing complex data warehouse projects

e. Experience with relational database design/modeling using tools. Expert-level SQL coding/querying skills in SQL Server and/or MySQL

f. Proficient in SQL and advanced SQL query optimization techniques

g. Expertise in data warehouse technologies like Snowflake, Redshift, or Teradata

h. Knowledge of ETL tools and methodologies

i. Familiarity with data modeling concepts (dimensional, star schema, snowflake schema)

j. Programming skills (Python, Java) may be beneficial depending on the environment

***Database Manager/Administrator:*** The person in this position will serve as a Database Administrator for the Data Center/application development/sustainment team, which includes creating, maintaining, and updating databases for existing and newly

developed applications. This person will ensure security requirements are implemented to ensure data protection, at rest and in transit. The duties will include assessment of customer needs and implementation of improved configurations for customer needs. The duties will include planning, installation, maintenance during or after-work hours, troubleshooting, and managing all Database Developer servers and applications.

a.
Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require anyone of the following IAT Level II (CCNA Security, CSA+, GICSP, GSEC, Security+ CE, or SSCP) Certification and applicable CE/OS Certification.

c. 3 years' experience in database administration.

d. Experience requirements include 2 years of experience in testing applications and describing issues found in testing.

e. Database Management Systems (DBMS): Expertise in specific database technologies like Oracle, SQL Server, MySQL, PostgreSQL.

f. SQL Programming: Proficiency in writing complex SQL queries for data manipulation and retrieval.

g. Data Modeling: Understanding of data modeling concepts to design efficient database structures.

h. System Administration: Knowledge of operating systems and system administration practices.

i. Problem-solving: Ability to analyze complex database issues and implement effective solutions.

j. Communication: Clear communication skills to collaborate with developers, analysts, and other stakeholders.

k. Attention to Detail: High level of accuracy to ensure data integrity.

***Business Analyst:*** The person in this position upholds, defends, coaches and mentors sound agile practices and values. They are responsible for eliciting and documenting user requirements and user stories in real time in an Agile/DevOps environment. They are responsible for establishing the minimum viable product, grooming the backlog, and Change Management.

a. Educational requirements include an AA/AS Degree in a related discipline from an accredited college or university or three years of related experience.

b. Require IAT Level I (A+ CE, CCNA Security, Network+ CE, and SSCP) Certification, and applicable CE/OS Certification.

c. Product Owner certification.

d. 4 years+ of successful agile planning and facilitating the complete life cycle of large- scale projects, with competing availability, priorities, and multiple stakeholders

e. 4 years' experience eliciting and documenting user requirements.

f. Knowledge and/or experience with widely successful Agile techniques: User Stories, ATDD, TDD, Continuous Integration, Continuous Testing, Pairing, and Automated Testing.

***IT Logistics/Supply Technician:*** The person in this position will work in the Technical Distribution Center and DCSIT Supply. The duties will evolve around issuing and receiving IT mobile devices, and hardware to and from users respectively. Duties will involve detailed documentation and tracking of supply assets. Responsibilities are based around Supply - Technical Equipment/hardware Issuance, Supply Chain/Warehouse Operations, IT Supply Inventory and Asset Tracking, Customer Supply Support Services, and Warranty Coordination/Handling.

a. Educational requirements include AA/AS from an accredited college or university or substitute with 3 or 4+ years experience.

b. Must have a Supply Chain Management, 2 years of Asset Tracking and Management, and 1 year of Warehouse experience.

c. Must be able to lift at minimum 40 lbs.

d. Forklift Operators must be trained and have valid certifications.

e. All Technicians/warehouse employees must wear steel-toed boots with non-slip soles.

## ATTACHMENT 4

## DLIFLC SERVICE LEVEL AGREEMENT (SLA)

Defense Language Institute Foreign Language Center Deputy Chief of Staff
Information Technology Service Level Agreement

- **Low priority** – Response within 4 business days
    - Preferential/convenience configurations and installations
    - Nice to have, not need to have
- **Medium** – Response within 2 business days
    - Work-related troubles that does not cause work stoppage
    - Standard issues indirectly related to mission support
        - Computer configuration changes
        - Hardware setup/upgrade
        - Installation of mission related software
- **High** – Response within 1 business day
    - Partial work stoppage - customer's ability to perform their job function is severely delayed or limited without DCSIT support
    - Examples:
        - Account locked
        - Computer is out of commission and another computer is available
        - Inaccessible server or services
        - Security group permission settings that affect ability
- **Urgent** – Immediate response (within 1 hour)
    - Mission stoppage - anything that prevents the school's mission for even a single individual
        - Any stoppage that affects class/instruction
    - Total work stoppage - customer is unable to perform their (primary) job function(s) without DCSIT support
        - Password resets
        - Computer is out of commission and no other computer is available
    - Outages of services that DCSIT directly controls that directly impact a significant portion of customers. For example,
        - Email
        - Databases
        - File Shares
        - Network
