Contract Vehicle: GSA Schedule (BPA, DO/TO, PO)	**Small Business Program:** TBD
Contract Status: Recompetition	**Incumbent:** Weris, Inc.
Contract Number: 70T04018C9CAP3023	**Anticipated Award Quarter:** Q2 FY2023
Estimated Solicitation Release: 2022-08-01	**Contract Complete:** 2028-03-31
Requirements Title: TSE Maintenance Data	
Description: The establishment and implementation of a maintenance data analytical services contract that provides the technical services required to analyze and evaluate Transportation Security Equipment (TSE) performance metric data, which is critical to effective contract oversight for the TSA Integrated Logistics Support (ILS) maintenance contracts. The analytical services contract validates Maintenance Service Provider (MSP) performance to assure that the airports are receiving the appropriate services as required, employ incentives and disincentives on MSP service contracts, and provides numerous tools and reports utilized by APM divisions and other TSA offices. The maintenance data analytical service contract also processes the TSE maintenance data to create required reports on Government Furnished laptops and stores the historical maintenance data on TSA share drive.	
Estimated Dollar Range: $2,000,000.00 to $5,000,000.00	**Place of Performance:** DMV area, NA
