GENERAL SERVICES ADMINISTRATION (GSA)
ASSISTED ACQUISITION SERVICES (AAS) REQUEST FOR INFORMATION (RFI)
TO
GWAC category Vendors

I. Introduction

General Services Administration (GSA) Assisted Acquisition Services (AAS) is releasing this Request for Information (RFI) on behalf of The GSA Office of the Chief Information Officer (OCIO) Acquisition IT Services. The purpose of this RFI is to assist the Government in conducting market research focused on identifying GWAC contract holders. This information will be used for market research only. The Government is not obligated to release a future solicitation.

This RFI does NOT constitute a Request for Proposal and is not to be construed as a commitment, implied or otherwise, by the Government that a procurement action will be issued. Response to this notice is not a request to be added to a bidders list or to receive a copy of a solicitation. No entitlement to payment of direct or indirect costs or charges by the Government will arise as a result of the submission of the requested information. No reimbursement will be made for any costs associated with providing information in response to this announcement and any follow up information requests. Responses to this RFI may be considered in the future determination of an appropriate acquisition strategy for the program. The Government may not respond to any specific questions or comments submitted in response to this RFI or information provided as a result of this request. Any information submitted by respondents as a result of this notice is strictly voluntary.

II. Background

The Office of Acquisition IT Services provides information technology (IT) support for FAS and other portfolios within GSA. The applications developed and maintained by the Acquisition IT Services organization are used by business portfolios within GSA, customer agencies, the vendor community, the general public and businesses. For each and every business line, the applications are essential to daily operations, future growth, and meeting organizational goals. organizational goals.

III. Functional Areas

A. Perform Site Reliability functions to ensure the Personal Property Management System (PPMS), Transportation Management Services Solution (TMSS) and SmartPay systems remain reliable, scalable, and available amidst frequent releases.
B. Manage and maintain all current system interfaces and integration for all internal and external connections.
C. Maintain multiple lower environments and production environments with VPCaaS supported deployment, monitoring features for PPMS and the FCS environment for TMSS and SmartPay model described in the FAS-IT Playbook.

D. Work with the Government to mature the DevSecOps capabilities and adopt recommendations from the GSA's DevSecOps guide.
E. Maintain and provide documentation such as an Operational Runbooks and Maintenance Guide of systems requirements, configuration, and engineering to the Government as directed by the Government.
F. Provide support for requests to test new software or hardware.
G. Stay abreast of new technologies and collaborate with GSA IT to review and evaluate new tools and technologies for approval and adoption into the TMSS, SmartPay and PPMS landscape.
H. Collaborate with GSA IT to improve the cataloging, publishing, and security of the PPMS, TMSS, SmartPay which leverage the FCS-provided infrastructure
I. Perform various tests including but not limited to unit testing, browser/functional testing, integration testing, regression testing, system testing, performance testing, load testing, stress testing, sanity testing, smoke testing, vulnerability testing, penetration testing and user acceptance testing. For each type of testing performed, develop, and maintain Test suites and Test Automation suites for all fixes and releases.
J. Maintain the release composition to include count of bug fixes, count of defects, count of enhancements and count of new features deployed via the release for each of the releases deployed to production.
K. Coordinate closely with the Government on the proposed use of automated testing tools under the TO.
L. Follow a disciplined IT Infrastructure Library (ITIL) process to ensure all changes, problems, and incidents are tracked in Jira (Issue & Project Tracking Software) from identification to closure and the backlog of such items, are reviewed regularly, prioritized for implementation, and maintained at optimal levels at all times.
M. Maintain the up-to-date patch and release cadence via a Release Management Plan to ensure full compliance with GSA security policies and auditing requirements for all the software services, products and libraries used within the PPMS / TMSS / SmartPay systems.
N. Prepare and provide PPMS / TMSS / SmartPay end-users with training about new features and capabilities. Maintain training documentations and related artifacts. In addition, provide ad hoc training when requested and approved by the Government.
O. Manage and maintain the current implementation of the DAV environment within PPMS (Redshift and Tableau) and TMSS / SmartPay's custom BIRT, until they are replaced with FCS-D reporting tools/services (MySQL, Redshift, Databricks).
P. Collaborate with the Government to develop a strategy to achieve PPMS / TMSS / SmartPay's historical data for storage and compliance to GSA security and audit requirements.
Q. Maintain PPMS, TMSS and SmartPay user guides, videos, and related artifacts.
R. Perform Root Cause Analysis (RCA) on PPMS, TMSS and SmartPay production site discrepancies and provide documentation on corrective and preventive actions taken as requested by the Government.
S. Review and improve the current monitoring levels to build robust observability mechanisms and ensure all aspects of the application and infrastructure are effectively monitored and optimal alerting mechanisms are implemented. Develop and maintain a

dashboard to provide real-time and transparent view into the pulse of the PPMS / TMSS / SmartPay system's health, with respect to application monitoring.

T. Identify, define, and create the policies, standards, and processes for Cloud-native data management of the structured, semi, and unstructured data.
U. Collaborate with GSA and develop User Activity Traceability Dashboard to understand user interactions with the PPMS, TMSS, SmartPay system and develop actionable insights to further improve and optimize the end UI/UX.
V. Adhere to GSA Records Retention Schedule Policy. The contractor shall create, maintain, and update the anticipated work products as described in Section J, Attachment X.

IV. Government Estimate

The Government currently estimates the total amount of this requirement to be in excess of $22,205,104.00 over a one-year base period and four, one-year options.

V. Questionnaires

Complete the questionnaire as outlined below:

a. Responses shall be submitted electronically by email only to AAS Contracting Officer Luis Nieves (luis.nieves@gsa.gov) and AAS Contract Specialist David Crawford (david.crawford@gsa.gov). Use the attached questionnaire to provide the requested information (i.e., no substitutions, additions, or deletions).
b. All responses shall maintain one-inch margins, 12-point Times New Roman font, and are single spaced.
c. All information submitted shall be UNCLASSIFIED.
d. Responses shall be submitted no later than 4PM Eastern Time on February 19, 2026.
e. Send questions to to AAS Contracting Officer Luis Nieves (luis.nieves@gsa.gov) and AAS Contract Specialist David Crawford (david.crawford@gsa.gov)
