RFQ 1797912 for DTMO Passport Enterprise Infrastructure Support

Questions and Answers

Question 1: Based on the PWS there are some enclosures which are referenced, however these enclosures aren't uploaded to the GSA portal. How do we obtain these enclosures?

Response 1: The RFQ document contains all Enclosures

Enclosure 1 – PWS
Enclosure 2 – Quote Preparation and Submission Instructions
Enclosure 3 – Evaluation Factors, Criteria, & Ratings
Enclosure 4 – Priced CLIN Structure

Question 2: Can you please provide the # of FTEs currently supporting this effort?

Response 2: It is up to each Quoter to determine the required number of personnel to meet the workload requirements of the PWS.

Question 3: Will the agency consider extending this solicitation date due to the missing documents, as this is causing industry a delay in putting together a response.

Response 3: The solicitation due date will remain the same as all enclosures were included.

Question 4: 1. Reference: GSA RFQ1797912 Paragraph 1.0, Page 1. "This requirement is 100% set aside for active and eligible 8(a) firms on the 8(a) STARS III GSA contract." Our understanding is this requirement is open to all businesses on 8a STARS III, regardless of SBA 8(a) status. Please confirm.

Response 4: This requirement is being solicited on 8(a) STARS III, which only consist of 8(a) vendors. This is a set-aside for active and eligible 8(a) firms on the 8(a) STARS III GSA contract only.

Question 5: Reference: GSA RFQ1797912 ENCLOSURE 4, Priced CLIN Structure, page 70. For evaluation purposes, please provide a plug number or NTE for the ODC CLINS (X005).

Response 5: The ODC CLINs are Firm-Fixed Price and should be determined by each Quoter. The PWS has been updated to include an Appendix which lists the ODC's required for this effort.

Question 6: Reference: GSA RFQ1797912 Paragraph 5 "Follow On Requirement," page 2. Please provide the historical staffing on the incumbent contract, including Full Time Equivalents (FTEs) by labor category.

Response 6: It is up to each Quoter to determine the required staffing and number of FTEs to meet the workload requirements of the PWS.

Question 7: Reference: GSA RFQ1797912 Paragraph 5 "Follow On Requirement," page 2. Is the anticipated level of effort expected to remain consistent with the incumbent contract?

Response 7: It is up to each Quoter to determine the required level of effort to meet the workload requirements of the PWS.

Question 8: Reference: GSA RFQ1797912 ENCLOSURE 1 Paragraph 11.0 PLACE OF PERFORMANCE, page 56. "The DTMO is a telework-ready organization. Personnel will be required to work from their home, from the contractor's facility, or from other vendor designated locations." Is the current contract being performed remotely?

Response 8: 98% of work under the current contract is being performed remotely by contractor staff. All work under GSA RFQ1797912 PWS will be performed remotely by contractor staff.

Question 9: Reference: GSA RFQ1797912 ENCLOSURE 2 Paragraph 5.0.c "VOLUME III, Factor 2, Past Performance," page 64. "For each reference the quoter shall include […] prime contractor or joint venture partner (if applicable)". To clarify, does "prime contractor or joint venture partner" refer to the company who performed the project being used as a past performance example?

Response 9: Correct.

Question 10: Reference: GSA RFQ1797912 ENCLOSURE 2 Paragraph 5.0.c "VOLUME III, Factor 2, Past Performance," page 64. "For each reference the quoter shall include […] the cage and UEI of the prime or first-tier subcontractor or joint venture". To clarify, does "prime or first-tier subcontractor or joint venture" refer to the company who performed the project being used as a past performance example?

Response 10: Correct. Prime or first-tier subcontractor or joint venture refers to the company who performed the project being used as a past performance example.

Question 11: Reference: GSA RFQ1797912 ENCLOSURE 2 Paragraph 5.0.a "VOLUME I - Business Information," page 63. Our understanding is that the FAR and DFARS provisions required under (1) refer to those within the RFP and are separate from the Representations and Certifications under (7), which can be fulfilled by current Reps & Certs on SAM.gov. Please confirm.

Response 11: Correct.

Question 12: Reference: GSA RFQ1797912 ENCLOSURE 2 Paragraph 5.0.b(3): "Element C, Staffing Plan," page 64. "The Staffing Plan shall demonstrate how the quoter supports its technical approach by providing a Staffing Organization Chart which clearly identifies all

proposed positions, the company reporting structure…". Please clarify what is meant by "company reporting structure."

Response 12: "company reporting structure." = Company 'Chain of Command' with supporting roles such as the Financial or Security Leads.

Question 13: Reference: GSA RFQ1797912 ENCLOSURE 2 Paragraph 5.0.b(3): "Element C, Staffing Plan," page 64. "Additionally, the Staffing Plan must articulate how the quoter will appropriately staff to meet these tasks on day one and throughout the duration of the contract to include adherence to personnel requirements in Sections 4.0 and 9.0 of the Performance Work Statement". Is this meant to refer to PWS 8.0 (SECURITY), which deals with personnel security and training requirements, rather than 9.0 (CYBERSECURITY)?

Response 13: PWS 8.0 are the requirements an Offeror needs to satisfy for assigned project staff to receive a DoW credential/CAC and conduct work on the contract. PWS Section 9.0 is the work tasks the Offeror will either perform as part of their duties, or ensure compliance with as part of system access policies. ATO and related cybersecurity work is stated in PWS sections 4.3.2 and 9.0. Offerors need to ensure they are appropriately staffed to provide cybersecurity support to DTMO, which is a critical element within the PEIS scope of work.

Question 14: Reference: GSA RFQ1797912 ENCLOSURE 2 PWS Paragraph 5.0 Deliverables, page 41. "Initial Transition In Plan – 4.7.1 – Due with the proposal". Where in the Technical Proposal should the Initial Transition-In Plan go? And is it part of the 35 page limit?

Response 14: Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services.

Question 15: Reference: GSA RFQ1797912 Enclosure 2 Paragraph 5.0.e., page 65. Recommend the CUI statement be included in just the footer (or either the header OR footer) to better allow Offerors to include company and solicitation information in the header.

Response 15: Regulations require the CUI marking to be placed on both the top and bottom of every page.

Question 16: Reference: GSA RFQ1797912 Enclosure 2 Paragraph 5.0.e., page 65. How are these requirements to be applied to Excel pages?

Response 16: The same as any Word or PDF file. If there are multiple tabs in the Excel document, the CUI markings stated in Enclosure 2 Paragraph 5.0 e (a) and (c) shall be included at the top and bottom of each tab. The language in Enclosure 2 Paragraph 5.0 e (b) shall be included on the first tab only in the right corner, above the footer.

Question 17: PWS Paragraph 4.4 – Application Development. The PWS indicates DTMO maintains approximately 25+ custom applications and anticipates up to two new applications annually. Can the Government provide additional information regarding the approximate size or complexity of these applications (for example, enterprise systems versus smaller utility applications) to assist vendors in estimating development and sustainment effort?

Response 17: Most applications are mid/small sized utility tools to support different travel programs.

Question 18: 4.4.1.1 – Application Development (Public Facing Website Support). The PWS references support for the DTMO public-facing website and a web content management system (WCMS). Can the Government identify the WCMS platform currently used or planned so vendors can ensure appropriate technical alignment?

Response 18: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology.

Question 19: 11.0 – Place of Performance. The PWS indicates that personnel may work from home, the contractor's facility, or other vendor-designated locations. Can the Government clarify whether any positions require routine onsite presence at a Government facility, and if so, what locations and approximate frequency should vendors anticipate?

Response 19: No contractor positions will require routine space in a Government facility. 'Routine space' being defined as 'one day or more per week'. It is anticipated that staff local to the National Capital Region will access the Mark Center facility in order to be issued a CAC, or pick up or drop off DoW equipment.

Question 20: Volume II – Technical Approach. For Volume II, Technical Approach, does the Government prefer that vendors organize their responses directly by PWS task areas (4.1 through 4.7), or is an alternative structure acceptable provided that all PWS requirements are clearly addressed with traceability?

Response 20: The Government will leave it up to vendors to best organize their proposal. Proposals should be easy to navigate and task statement references should be used for ease of reference.

Question 21: 4.6.11 – Key Personnel. The PWS defines several Key Personnel positions and minimum qualifications. Should vendors submit resumes for proposed Key Personnel with the proposal submission, or will resumes only be required after award or when personnel replacements are proposed?

Response 21: Vendors need to demonstrate that Key Personnel have the required skillsets and experience as listed under task statement 4.6.11. The Government will leave it up to individual vendors to best determine how they want to present this information.

Question 22: Volume III – Past Performance. The RFQ requires vendors to submit no more than three relevant past performance references performed within the last three years. Can the Government clarify whether relevant experience from commercial or state/local government projects is acceptable, or if past performance references must be limited to federal contracts?

Response 22: Past performance references can be from commercial, state/local government, and federal government as long as it is a relevant experience.

Question 23: Volume IV – Pricing Information. The RFQ requires submission of a completed CLIN pricing schedule along with a breakdown of labor mix, fully burdened labor rates, and hours for the period of performance. Should vendors structure the labor categories strictly aligned with their GSA 8(a) STARS III labor categories, or are vendor-defined labor categories acceptable provided they map to the proposed services?

Response 23: Quoters should use labor categories strictly aligned with their GSA 8(a) STAR III labor categories.

Question 24: 4.6.11 – Key Personnel. The PWS references Tier 3 and Tier 5 background investigations for certain roles. Can the Government confirm whether a Facility Clearance (FCL) is required for the prime contractor or any subcontractors to perform this work?

Response 24: No FCL is required.

Question 25: 4.4 – Application Development. Can the Government confirm whether DTMO systems are currently hosted in Oracle Cloud Infrastructure (OCI), another FedRAMP-authorized cloud environment, or a hybrid environment?

Response 25: DTMO systems are currently hosted in Oracle Cloud Infrastructure (OCI).

Question 26: 4.4 – Application Development. Can the Government identify the current DevSecOps toolchain used for DTMO application development and sustainment (for example CI/CD pipeline tools, source code repositories, and security scanning tools)?

Response 26: The Government maintains & employs an established DevSecOps process supporting development and deployment activities using tools such as Fortify and Sonatype for code scanning and ServiceNow for configuration change management. GitLab is utilized for source code repository.

Question 27: Reference: RFQ Enclosure 2, Volume IV Instructions, page 65; Enclosure 4, Pricing Schedule. For proposal pricing and labor mix calculations, would the Government please clarify what constitutes one Full-Time Equivalent (FTE) for this solicitation? Specifically, should offerors assume 1920 hours or 1912 hours as the annual baseline for one FTE for pricing and level of effort purposes?

Additionally, will the Government advise the total annual labor hours anticipated for this effort?

Response 28: One Full-Time Equivalent (FTE) is considered 1920 hours. It is up to each Quoter to determine the required number of labor hours to meet the workload requirements of the PWS.

Question 29: Reference: RFQ Enclosure 1, PWS 5.0 Deliverables, page 42. The Deliverables table shows that a Quality Control plan is due prior to award and annual updates. Will the Government advise if a Quality Control Plan is due with the proposal submission, and if so, where/how it should be provided?

Response 29: The Government is revising the RFQ to state the Quality Control Plan should be provided 10 days after contract award.

Question 30: Reference: RFQ Enclosure 1 PWS 4.6.11 (pg 39), 4.7.1, and Enclosure 2, Volume II/C Instructions. The PWS Section 4.7.1 specifies a two-month transition-in period, and Section 4.6.11 describes key personnel coverage requirements. Does the Government expect full staff (including all key personnel) to be in place and supporting requirements throughout the transition-in period, or only upon full cutover at the end of transition?

Response 30: The Government expects Key Personnel to be identified either in the vendor proposal or shortly after award. The vendor should staff up during transition to ensure knowledge transfer and operational control across the entirety of the PWS is covered for Day One operations (i.e. post transition).

Question 31: Reference: PWS 8.7 Information Technology (IT) Level Investigation Requirements, page 45-46. The solicitation and PWS specify that all work to be performed under this contract is UNCLASSIFIED and that contractor personnel must obtain appropriate background investigations (Tier 3 or Tier 5) for access to DoD networks, systems, and Government Furnished Equipment. For positions designated as "Privileged – High Risk" (PWS 8.7.5), the requirement is a Tier 5 investigation for IT security reasons, not access to classified information.
Will the Government please confirm that a national security clearance (such as Secret or Top Secret (TS/SCI)) is not required for any personnel supporting this contract?

Response 31: A national security clearance is not required for any personnel supporting this contract.

Question 32: Reference: PWS 4.5, page 37-38; Enclosure 4, CLIN 0005. For CLIN 0005 (Software, IT Services Purchasing Support as ODCs), should offerors include any estimated software or license renewal costs as part of the firm-fixed price, or will these ODC purchases be priced separately/reimbursed at cost as directed by the Government post-award?

If ODC costs are to be proposed, can the Government provide estimated quantities or preferred products?

Response 32: The Government revised the PWS to include a list of software currently in use with the number of future licenses required for pricing.

Question 33: 5.0 Deliverables. Page 41. The PWS Deliverables table states an "Initial Transition In Plan" is due with the proposal. However, Enclosure 2 and 3 do not reference a transition in plan. Please confirm where this plan must be included in the quote submission (which Volume and section/attachment). Also please confirm whether it counts toward the Volume II 35-page limit.

Response 33: Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services.

Question 34: 5.0 Deliverables. Page 41. The PWS Deliverables table lists the "Quality Control Plan" as prior to award. Please confirm whether the Quality Control Plan must be submitted with the proposal or whether it is required after selection but before award. If it must be submitted with the quote, please confirm where it must be included (which Volume and section/attachment) and whether it counts toward page limits.

Response 34: The RFQ has been amended to state the Quality Control Plan should be provided 10 days after contract award.

Question 35: Priced CLIN Structure. Page 70. Enclosure 4 includes a priced Transition-in period. The PWS requires an "Initial Transition in Plan" due with the proposal. Please confirm the required content expectations for the transition-in plan submission and where it must be placed within the quote package (Volume and section/attachment).

Response 35: Quoters should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ and PWS have been amended to provide the Initial Transition-In plan be provided 5 days after contract award.

Question 36: Enclosure 3 (Evaluation criteria). Page 66-67. Enclosure 3 does not identify the Initial Transition in Plan or Quality Control Plan as evaluated items under Factor 1. Please confirm whether omission of these items from the quote package is considered a compliance issue, or whether they are post-award deliverables that will not be evaluated during source selection.

Response 36: Quoters should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ and PWS have been amended to provide the Initial Transition-In plan be provided 5 days after contract award and to state the Quality Control Plan should be provided 10 days after contract award.

Question 37: VOLUME II: Factor 1, Technical. Page 64. Enclosure 2 states that Volume II must include a Table of Contents (TOC) and Glossary "with hyperlinks." Please confirm whether hyperlinks are required in the Glossary itself (for example, linked terms that jump to the first use or relevant section), or if the requirement is satisfied by providing a hyperlinked TOC and a standard non-hyperlinked Glossary.

Response 37: Hyperlinks for the TOC is all that is required.

Question 38: PWS. Section 4.6.11. Page 39. 1st paragraph states: "The following are the Key Personnel for this contract and the minimum qualifications that they must possess:" However in the list of positions, it specifically calls out the Program Manager as a key person, but none of the others. Please clarify what positions are key.

Response 38: All positions listed in Section 4.6.11 are considered Key Personnel. The PWS at Section 4.6.11 has been revised to clarify.

Question 39: RFQ Enclosure 4. Page 70. Would the Government please provide the historical annual level of effort for incumbent contract.

Response 39: It is up to each Quoter to determine the required annual level of effort to meet the workload requirements of the PWS.

Question 40: VOLUME III, Factor 2, Past Performance. Page 65. Are the Letters of Commitment that accompany subcontractor past performance included in the page count or are they to be submitted as attachments to Volume III Factor 2?

Response 40: Letters of Commitment that accompany subcontractor past performance should be submitted as attachments to Volume III Factor 2 and are not included in the 35 page count limit.

Question 41: GSA RFQ1797912 Paragraph(s) (3) Element C, Staffing Plan, Page(s) 64. Would the Government please confirm that Key Personnel resumes and letters of commitment are required for submission with the proposal?

Response 41: Letters of Commitment and Resumes are not required for Element C, Staffing Plan, with the proposal.

Question 42: GSA RFQ1797912 Paragraph(s) (3) Element C, Staffing Plan, Page(s) 64. Would the Government please confirm that resumes and letters of commitment should be submitted as an appendix to Volume II and are not included in the 35 page limit?

Response 42: Letters of Commitment and Resumes are not required for Element C, Staffing Plan, with the proposal.

Question 43: GSA RFQ1797912 Paragraph(s) 1, Page(s) 40. Program Manager Requirements - Would the Government please consider reducing the requirement to 6 years of IT Program Management if the candidate brings 2+ years of DHRA IT specific experience?

Response 43: 8 years is the minimum specified requirement by the government for the PM position.

Question 44: GSA RFQ1797912 Paragraph(s) 5, Page(s) 40. Applications Database Administrator - Would the Government please consider 10+ years of Oracle experience as a substitute for the Bachelor's degree requirement?

Response 44: Per the RFQ, either 1) a Bachelor's degree or 2) a Oracle 19c or greater cert or a Microsoft SQL Server Admin cert will meet the education requirement or 3) 5 years of equivalent senior-level experience in Oracle, SQL Server, and administration will meet the requirement.

Question 45: GSA RFQ1797912 Paragraph(s) 4.5, Page(s) 37, Paragraph(s) n/a, Page(s) 70-74. The PWS Section 4.5 and the corresponding CLIN X005 for Software/IT Services Purchasing (ODCs) are listed as Firm-Fixed-Price (FFP). Could the Government please confirm that it is the intent to have contractors bid these costs as FFP, rather than on a cost-reimbursable basis?

Response 45: The Government confirms it is the intent to have contractors bid these costs as FFP. The PWS was revised to include a material list of the technologies currently in use within Passport and the expected license quantity at Appendix A.

Question 46: PWS Section 4.4 – Application Development. Can the Government provide an inventory of the approximately 25+ DTMO applications referenced in Section 4.4, including application function, hosting architecture, and support tier requirements?

Response 46: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .NET technology. The current user volume for this platform is approximately 6 million.

Question 47: PWS Section 4.4 – DevSecOps Framework. Does the Government currently maintain an established DevSecOps pipeline supporting DTMO Passport development activities, and if so, which tools are currently used for source control, CI/CD, code scanning, and deployment?

Response 47: The Government does maintain & employ an established DevSecOps process supporting development and deployment activities using tools such as Fortify and Sonatype for code scanning and ServiceNow for configuration change management. GitLab is utilized for source code repository.

Question 48: PWS Section 3.0 / 4.0 – Enterprise Infrastructure. Can the Government provide additional details on the DTMO Oracle Cloud Infrastructure (OCI) environment, including the number of environments (e.g., Dev/Test/Prod), compute instances, and OCI compartments supporting the Passport platform?

Response 48: There are (3) environments in the DTMO Oracle Cloud Infrastructure, Dev, UAT, and PROD. There are 36 computing instances supporting the Passport platform.

Question 49: PWS Section 4.2 – Database Administration. How many Oracle and Microsoft SQL Server databases are currently supported within the DTMO Enterprise Infrastructure environment?

Response 49: There are (3) Oracle and (3) Microsoft SQL database servers within the environment.

Question 50: PWS Section 4.3 / 9.0 – Cybersecurity Services. What is the current RMF authorization status of the DTMO Passport system (e.g., ATO, Interim ATO, or in authorization process)?

Response 50: DTMO Passport ATO-C; Authorization Termination Date: 12-May-2027

Question 51: PWS Section 4.1 / 4.6 – Program Management & Operations. Can the Government provide historical operational metrics for the environment (e.g., annual ticket volume, change requests, or enhancement requests) to support pricing assumptions under the Firm-Fixed-Price contract structure?

Response 51: Average ticket volume combined for trouble tickets and change requests are roughly 15 a month.

Question 52: PWS Section 4.7 – Transition of Contract Services. What transition period duration does the Government anticipate between the incumbent contractor and the incoming contractor?

Response 52: Per paragraph 4.71 of the PWS and Enclosure 4 of the RFP, CLIN 0008, transition period between the incumbent contractor and the incoming contractor is 2 months.

Question 53: PWS Section 4.7 – Transition. Will the Government facilitate knowledge transfer activities with the incumbent contractor during the transition phase?

Response 53: Yes, the Government will facilitate/provide/host opportunities for the vendors to engage in knowledge transfer sessions/activities via teams calls, face-to-face.

Question 54: RFQ Section – Technical Volume / Staffing Plan. Can the Government provide the approximate number of FTEs currently supporting the incumbent contract?

Response 54: It is up to each Quoter to determine the required number of FTE's to meet the workload requirements of the PWS.

Question 55: PWS Section 9.0 – Cybersecurity. Which cybersecurity tools are currently used within the DTMO environment for vulnerability management, monitoring, and compliance reporting (e.g., ACAS, Splunk, eMASS, Tenable)?

Response 55: ACAS, Sonatype, Fortify, Splunk, and eMASS

Question 56: Reference: GSA RFQ1797912 Paragraph(s) Pricing Volume Instructions. Does the Government require offerors to utilize a specific pricing template or CLIN structure for submission of the Pricing Volume, or may offerors submit their own pricing format consistent with the Firm-Fixed-Price contract structure?

Response 56: Quoters must submit a completed Schedule (CLIN Structure) at Enclosure 4. For the requirement to provide a breakdown of the labor mix, quoters may use their own format. Be sure to include the markings required in Enclosure 2 Paragraph 5.0 (e).

Question 57: Reference: GSA RFQ1797912 Paragraph(s) PWS Section 4.5 – Software / IT Services Purchasing Support. Although travel is not anticipated under this requirement, can the Government clarify whether any Other Direct Costs (ODCs), such as software licensing or hardware purchases, should be included within the Firm-Fixed-Price quote, or if separate CLINs will be established for any potential ODC items?

Response 57: ODCs shall be included within the Firm-Fixed Price quote. Per Enclosure 4, Priced CLIN Structure, ODC's will be Firm-Fixed-Price and will be captured in CLINs 0005, 1005, 2005, 3005, and 4005. The PWS has been updated to include an Appendix which lists the ODC's required for this effort.

Question 58: GSA RFQ1797912 Paragraph(s) 8.4, Page(s) 44. Regarding Personnel, are employees required to have a security clearance? If so, could the Government indicate what level of clearance is required?

Response 58: A clearance is not required for any personnel for this requirement.

Question 59: GSA RFQ1797912 Paragraph(s) 3.0, Page(s) 30. Can the Government clarify if there are any significant changes in planned scope that may impact historic staffing levels?

Response 59: The RFQ PWS is smaller in scope then the current PWS being performed by the incumbent vender.

Question 60: GSA RFQ1797912 Paragraph(s) 4.4, Page(s) 35. Can the Government provide details on the relative size and complexity of the 25+ applications? Number of small, medium, or large apps? This will assist in estimating ongoing support requirements.

Response 60: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .NET technology. The current user volume for this platform is approximately 6 million. Most applications are mid/small sized utility tools to support different travel programs.

Question 61: GSA RFQ1797912 Paragraph(s) 4.1, 4.2, Page(s) 31-32. Can the Government provide metrics on the volume of trouble tickets processed in support of the PaaS? Can the Government provide metrics on the volume of change requests processed in support of the PaaS?

Response 61: Average ticket volume for trouble tickets are roughly 15 a month. PaaS is a service DTMO receives from DMDC, change requests for PaaS are outside the scope of PEIS.

Question 62: GSA RFQ1797912 Paragraph(s) 4.4, Page(s) 35. Can the Government provide metrics on the volume of trouble tickets processed in support of 25+ Applications? Can the Government provide metrics on the volume of change requests processed in support of the 25+ Applications?

Response 62: Average ticket volume combined for trouble tickets and change requests are roughly 15 a month.

Question 63: Reference: GSA RFQ1797912 Paragraph(s) PWS Section 4.3.1 (Page 11) & 4.3.5.8 , Page(s) 13. The PWS notes that DTMO currently maintains two ATOs and one ATC , but also mentions maintaining two Privacy Impact Assessments (PIAs) and one SORN. In Section 9.1.1 (Page 20), the table lists "DTMO-Oracle Cloud Gen2" and "DTMO Passport Cloud". To ensure an accurate Level of Effort (LOE) for Cybersecurity SME support, could the Government confirm the total number of RMF packages the contractor is responsible for managing simultaneously?

Response 63: The contractor would be responsible for supporting (2) RMF packages.

Question 64: Reference: GSA RFQ1797912 Paragraph(s) PWS Section 4.4 (Page 13) & 16.0 PRS, Page(s) 29. The PWS estimates "up to two new applications each year" and sustainment for 25+ custom applications. However, the Performance Requirement Summary (PRS) for "Web and Software Development" requires "100% compliance with DoD mandated secure applications development standards". Given the Firm-Fixed-Price (FFP) nature of this task order, will the Government provide a prioritized backlog of the 25+ applications to help offerors determine the required developer headcount?

Response 64: Typically, there are 6-10 applications in active development at any given time. Prioritization is based on a multitude of factors (congressional mandates, per diem rate changes, etc), and the Government uses Scrum schedules to queue applications based on requirements.

Question 65:
Reference: GSA RFQ1797912 Paragraph(s) PWS Section 4.4 , Page(s) 1. To ensure that the proposed Staffing Plan (Element C) provides adequate coverage for the maintenance of 25+ custom applications and the anticipated development of up to two new applications annually, can the Government provide the current full-time equivalent (FTE) headcount of developers performing these tasks under the incumbent contract? Providing this historical baseline will assist offerors in proposing a right-sized technical solution that minimizes risk to the DTMO mission during the transition period. What is the approximate size of the existing codebase (lines of code or number of repositories) across the 25+ custom applications?

Response 65: It is up to each Quoter to determine the number of FTE's to meet the workload requirements of the PWS

Question 66: Reference: GSA RFQ1797912 Paragraph(s) PWS Section 4.5.1 and 18, Page(s) 14 and 32. Section 4.5.1 indicates the contractor will provide support for purchasing COTS software license renewals, while Section 18.0 states these licenses shall be registered to and become property of the Government. Are these ODC purchases intended to be handled as a "pass-through" cost, and if so, will the Government provide a Not-to-Exceed (NTE) amount for CLINs 0005, 1005, 2005, 3005, and 4005 to ensure all quoters are evaluated on a level playing field?

Response 66: CLINs 0005, 1005, 2005, 3005, and 4005 will be firm-fixed-price. The PWS was revised to include a material list of the technologies currently in use within Passport and the expected license quantity at Appendix A.

Question 67: Reference: GSA RFQ1797912 Paragraph(s) PWS Section 18.7 (Page 32) & Section 4.4, Page(s) 13. Section 18.7 indicates that DTMO is working to move this requirement under an "Enterprise Solution," potentially a Digital Services Center, during the performance of this acquisition. To better align our Technical Approach with this future state, can the Government clarify if there is a preferred technology stack or shared service architecture (e.g., a specific Digital Services Center) targeted for this migration? Furthermore, if the timing of this move remains unknown, would the Government be open to the inclusion of a "Surge Support" CLIN or labor-hour provision to manage the concurrent sustainment of legacy applications while supporting migration activities?

Response 67: The PWS has been revised to include a material list of the technologies currently in use within Passport and the expected license quantity.

Question 68: Reference: GSA RFQ1797912 Paragraph(s) Enclosure 3, Section c (Factor 3), Page(s) 69. The RFQ states that the 52.217-8 evaluation will be 50% of option period 4. Should quoters assume identical rates across option periods, or is escalation acceptable?

Response 68: For the 52.217-8 option, the Government will apply 50% of the proposed option period 4 prices for each Quoter for evaluation purposes. Quoters may apply escalation to Option periods 1 – 4.

Question 69: Reference: GSA RFQ1797912 Paragraph(s) PWS 4.1.2 , Page(s) 31. What is the approximate number of end users of the DTMO Passport website and applications? What is the typical monthly ticket volume across Priority 1, 2, and 3 categories?

Response 69: The current user volume for this platform is approximately 6 million. Average ticket volume is roughly 20 a month.

Question 70: Reference: GSA RFQ1797912 Paragraph(s) PWS 4.1, Page(s) 31. Can the Government provide an inventory of the GOTS and COTS applications currently supported and hosting environments (on-prem vs. cloud)? The PWS references "approximately 25+ custom applications."

Response 70: COTS – Jira, MOVEit Automation, MOVEit Transfer, EFM - Verint's Enterprise Feedback Management, Tableau Server. DTMO Passport has 25 GOTS applications using PHP, APEX, and .NET technology.

Question 71: Reference: GSA RFQ1797912 Paragraph(s) Quote Preparation and Submission Instructions 5.0.b(2) Element C, Page(s) 64. Can the Government clarify its definition of "new personnel"? Should this be interpreted as personnel not currently employed by the incumbent on this contract, or as individuals not currently supporting DTMO?

Response 71: The staffing plan instructions have been updated.

Question 72: Reference: GSA RFQ1797912 Paragraph(s) Quote Preparation and Submission Instructions 5.0.b(2) Element C, Page(s) 64. If key personnel are considered "new," and non-incumbent offerors must use page count to explain "how these personnel will be hired and trained to support the effort," can the government confirm that the incumbent will also need to provide the same level of justification and be evaluated similarly?

Response 72: The staffing plan instructions have been updated. All offerors will be required to provide staffing information to properly demonstrate the requirements of this element. Each offeror will be evaluated in accordance with the evaluation criteria.

Question 73: Reference: GSA RFQ1797912 Paragraph(s) Quote Preparation and Submission Instructions 5.0.b(2) Element C, Page(s) 64. Can the government please define day one? Is that date of contract award or after the two month transition-in phase?

Response 74: The staffing plan instructions have been updated.

Question 74: Reference: GSA RFQ1797912 Paragraph(s) Quote Preparation and Submission Instructions 5.0.b(2) Element C, Page(s) 46. Could the Government confirm the required BI/clearance level for contract personnel, specifically, whether it requires a Public Trust along with a Secret-level background investigation?

Response 74: Public Trust at the Tier III level. Cost of background investigation will be born, controlled, and held by the government.

Question 75: Enclosure 1, Sections 4.1, 4.2, 4.4. The PWS references multiple technology areas including Oracle Enterprise Database (19c or higher), Microsoft SQL (2014 or higher), Red Hat Enterprise Linux, Apache, Tomcat, Splunk, Oracle B2C, Oracle Apex, Java, HTML5, PHP, and approximately 25+ custom applications. Can the Government provide a comprehensive inventory or count of the servers, databases, and applications currently in the DTMO Enterprise Infrastructure to allow quoters to adequately size their staffing approach?

Response 75: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .NET technology. The current user volume for this platform is approximately 6 million. Most applications are mid/small sized utility tools to support different travel programs. The are (3) environments in the DTMO Oracle Cloud Infrastructure,

Dev, UAT, and PROD. There are 36 compute instances supporting the Passport platform. There are (3) Oracle and (3) Microsoft SQL database servers within the environment.

Question 76: Enclosure 1, Section 4.1.1. This section requires support for applications and security tools. To ensure a proactive and resilient security posture, can the Government provide the current (products) solution used for the web application firewall (WAF) solution in place to protect mission critical applications?

Response 76: Web application firewall solutions are maintained by the Platform-as-a-Service host. This is outside of the PEIS scope.

Question 77: Enclosure 1, Section 4.1.3. There is reference to maintaining technical documents. Does the government use SharePoint to store these technical documents (e.g., network diagrams, SOPs, Ports/Protocols list, etc.), and will the Awardee have access to this site?

Response 77: Currently, reference and technical data is stored on the organization's shared drive and the awardee will have access.

Question 78: Enclosure 1, Section 4.1.7. For Incident Management, does DTMO have their own instance of ServiceNow? How are tickets currently managed -- is there a centralized service desk that takes the initial ticket, or does this team handle all Tiers (Tier 0, 1, 2, 3)?

Response 78: DTMO utilizes the ServiceNow instance of the host provider to manage tickets and track incidents.

Question 79: Enclosure 1, Sections 4.2.1. PWS Section 4.2.1 requires database administration support for Oracle (version 19c or higher) and Microsoft SQL (version 2014 or higher). Can the Government confirm the current number of production, development, and test database instances for each platform and the approximate combined data volume across all environments?

Response 79: There are (3) Oracle and (3) Microsoft SQL database servers within the environment.
PROD: SQL Server – 657.7 GB; Oracle – 38.64 TB
UAT: SQL Server – 660.98 GB; Oracle – 10.10 TB
DEV: SQL Server – 71.97 GB; Oracle – 10.79 TB

Question 80: Enclosure 1, Section 4.2.4. Please provide more detail on the COOP requirement. For example, number of applications requiring COOP coverage; COOP Strategy (hot/hot - hot/warm - hot/cold); geographical separation requirements; data synchronization (Sync/Async), etc.

Response 80: COOP requirement and strategy is maintained by Cloud Service Provider, utilizing a geographical separation approach.

Question 81: Enclosure 1, Section 4.3.2. Are there any planned CSSP Vulnerability Assessments, CORA, or DoD IG audits planned for the first year of the contract?

Response 81: There are no cyber related audits planned.

Question 82: Enclosure 1, Sections 4.4. Section 4.4 states the DTMO has approximately 25+ custom applications and anticipates up to two new applications each year. Can the Government provide a general characterization of the complexity of these applications (e.g., number of users, integrations, lines of code ranges) to enable accurate development and sustainment staffing estimates?

Response 82: Most applications are mid/small sized utility tools to support different travel programs.

Question 83: Enclosure 1, Section 4.4. Can the Government provide the current application development and maintenance backlog, including all open tickets, enhancement requests, and known defects, with their associated complexity level (simple/moderate/complex) and priority designation (Priority 1–4 or equivalent), as of the date of this RFQ?

Response 83: Rough order of magnitude is 500 covering all categories asked by this question.

Question 84: Enclosure 1, Section 4.4. Can the Government provide three years of historical ticket volume data (FY2023–FY2025) for the DTMO application portfolio, including the number of incidents, service requests, development tasks, and defect fixes completed and released per year, average resolution time by priority, and any periods of significant workload surge?

Response 84: From March 2023 to March 2026, rough order of volume covering all categories in this question is roughly 1000.

Question 85: Enclosure 1, Section 4.4.4.5. Formatting note: Para 4.4.4.5 appears to be misnumbered and should be 4.4.1.5.

Response 85: Correction has been made.

Question 86: Enclosure 1, Section 4.6.5. In fairness to competition and remove the favoritism to the incumbent contractor – please advise the number of FTEs currently supporting this effort.

Response 86: It is up to each Quoter to determine the required number of FTEs to meet the workload requirements of the PWS

Question 87: Enclosure 1, Section 4.6.5. In fairness to competition and remove the favoritism to the incumbent contractor – please advise the current labor category mix supporting this current effort.

Response 87: It is up to each Quoter to determine the required labor category mix to meet the workload requirements of the PWS

Question 88: Enclosure 1, Section 4.6.5. Are there any current vacancies

Response 88: It is up to each Quoter to determine the required number of FTEs and labor mix to meet the workload requirements of the PWS.

Question 89: Enclosure 1, Section 4.6.5. If there are current vacancies, how long have the vacancies been open?

Response 89: N/A based on answer to question 88.

Question 90: Enclosure 1, Sections 4.7.2. This section requires a formal Transition-Out plan and support, could the Government please clarify how Offerors are to price this effort since no specific CLIN is provided in Enclosure 4?

Response 90: Offeror should price this out as a standard deliverable due 90 days prior to end of contract. It should be a normal work product.

Question 91: Enclosure 1, Section 5.0. The Deliverables table in Section 5.0 requires the Initial Transition-In Plan to be submitted with the proposal. Will the Government allow the Initial Transition-In Plan to be included as an Appendix outside of the 35 page limit?

Response 91: Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services

Question 92: Enclosure 1, Section 5.0. The Deliverables table in Section 5.0 requires the Initial Transition-In Plan to be submitted with the proposal. If the Initial Transition-In Plan is to be included in Volume II Technical, will the Government increase the page limit to 40?

Response 92: Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services. Page count to remain at 35.

Question 93: Enclosure 1, Section 5.0. The Deliverables table in Section 5.0 requires the Initial Transition-In Plan to be submitted with the proposal and lists a Quality Control Plan as due 'Prior to award and annual update.' Can the Government confirm if a description of the QCP approach within the Technical Volume is sufficient for evaluation purposes?

Response 93: Offerors should discuss overall approach to Quality Control in the Technical Volume within Element A, Technical Approach. The RFQ has been amended to state the Quality Control Plan should be provided 10 days after contract award. Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The

PWS has been modified to provide the Initial Transition-In plan be provided 5 days after contract award.

Question 94: Enclosure 1, Section 5.0. The Deliverables table in Section 5.0 requires an 'initial' Quality Control Plan as due 'Prior to award and annual update.' Can the Government confirm whether the QCP can be an unlimited page Appendix with Volume II?

Response 94: The RFQ has been amended to state the Quality Control Plan should be provided 10 days after contract award.

Question 95: Enclosure 1, Section 5.0. If both the initial Transition-In Plan and the Quality Control Plan are to be included in Volume II, can the Government increase the page count to 45 pages to allow 5 pages for each plan?

Response 95: No, page count to remain at 35. Offerors should discuss overall approach to QC in the Technical Volume. The RFQ has been amended to reflect this under Element A, Technical Approach. Additionally, the PWS has been revised to state the Quality Control Plan should be provided 10 days after contract award. Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The PWS was modified to require the Initial Transition-In plan be provided 5 days after contract award.

Question 96: Enclosure 1, DBA 8.7.5. The privilege categories listed suggest both a System DBA and an Application DBA as potentially separate T5 positions. Can the Government clarify its intent and confirm its intent for Offerors to provide?

Response 96: PEIS contract only requires application DBA to support the 25+ GOTS applications.

Question 97: Enclosure 1, 8.2 Government Furnished Equipment (GFE). Can the Government provide an estimated number of laptops and other data processing devices (by type), planned for issue to the Contractor by the Government?

Response 97: One laptop will be issued to each supporting contractor team member. Docking stations can be requested.

Question 98: Table, Section 9.1.1. Will the DTMO-Oracle Cloud Gen2 ATO renewal currently in-process be completed prior to the contract start date of 16 May 2026, or should quoters assume the incoming contractor will be responsible for completing the renewal as part of Base Period performance under CLIN 0003?"

Response 98: DTMO-Oracle Cloud Gen2 ATO renewal is complete.

Question 99: Enclosure 2, Section 4.2. Please confirm Volumes I through III can be submitted in Adobe PDF.

Response 99: Yes, Volumes I through III can be submitted in Adobe PDF.

Question 100: Enclosure 2, 5.0 (a). Per the instructions for Volume 1, "(4) If subcontractor experience is submitted for consideration as part of the Past Performance, the submission shall include a signed commitment by the offer and subcontractor certifying that if a contract is awarded resulting from the quote, the parties commit to joint performance as quoted. If the signed commitment is not fully executed by both parties and provided with the Past Performance Volume, subcontractor past performance references will not be evaluated or considered." Please confirm the Signed Subcontractor Commitment agreement should be included in Volume I Business Information.

Response 100: No, the Signed Subcontract Commitment agreement should be included in Volume III, Past Performance Volume.

Question 101: Enclosure 2, 5.0 (a). Per the instructions for Volume 1, "(4) If subcontractor experience is submitted for consideration as part of the Past Performance, the submission shall include a signed commitment by the offer and subcontractor certifying that if a contract is awarded resulting from the quote, the parties commit to joint performance as quoted. If the signed commitment is not fully executed by both parties and provided with the Past Performance Volume, subcontractor past performance references will not be evaluated or considered." Please confirm for this requirement in Volume 1, a statement saying that the signed commitment is included with the Past Performance Volume (Volume III) will satisfy this requirement.

Response 101: See Response to Question 100.

Question 102: Enclosure 2, 5.0 (a). Per the instructions, "(8) An affirmation from an authorized representative of the quoter stating the quoter's small business status for this NAICS code (518210) under their applicable GSA 8(a) STARS III GWAC contract." Will the Government clarify what documentation or statement will satisfy this requirement?

Response 102: Within Volume I, a statement stating, for example, "The undersigned as an Authorized Representative, affirms [Insert Vender name]'s small business status for NAICS code 518210 under it's applicable GSA 8(a) STARS III GWAC contract" will suffice.

Question 103: Enclosure 2, 5.0 (c). The instructions state, "Affiliate companies, sister companies, teaming arrangements, joint venture agreement, etc. will be considered provided sufficient documentation including an adequate narrative discussing the meaningful relationship between the parties is included in the Past Performance Volume. Documentation includes a copy of the documented arrangement such as documented affiliation, a copy of the teaming agreement, a copy of the joint venture agreement, etc." Please clarify this does not apply for subcontractors.

Response 103: It does not apply for subcontractors. However, as mentioned in Enclosure 2, 5.0 (c), if subcontractor experience is submitted for consideration as part of the Past Performance, the submission shall include a signed commitment by the offer and subcontractor certifying that if a contract is awarded resulting from the quote, the parties commit to joint performance as quoted.

Question 104: Enclosure 2, 5.0 (c). Can the Government confirm a meaningful relationship between parties includes a major subcontractor for example defining a major subcontractor with a minimum 20% workshare?

Response 104: There is no percentage requirement for subcontractor experience being used. If subcontractor experience is provided as part of the past performance references, it will be given weight relative to the percentage of effort being provided by that particular subcontractor in the offer submitted. This language has been added to the RFQ in Amendment 1.

Question 105: Enclosure 2, 5.0 (c). "The instructions state: ""b. 1st page, bottom right corner (above footer):
Controlled by: DHRA and [Company Name]
Controlled by: DHRA AMD and [Company Name]
CUI Category: SSEL
Distribution/Dissemination Controls: FEDONLY
POC: Constance Reedus, 703-606-6414 and [Company POC Name, Phone Number]""

Please confirm this information can go on the Cover Page/Title Page of our response (which will not have a footer)"

Response 105: To clarify, this was stated at Enclosure 2, 5.0 (e), not 5.0 (c). The language can go on the Cover Page/Title Page of the response; however, the CUI and Source Selection Information markings must be included as a header and footer of each quotation page. This includes the Cover Page/Title Page.

Question 106: Enclosure 2, 5.0 (d). Please confirm the format (Excel spreadsheet, Word, or PDF) Volume IV Factor 3, Price, Schedule/CLIN Structure should be submitted in.

Response 106: Quoters must complete the CLIN Structure table in Enclosure 4. In addition, quoters must provide a breakdown of the pricing to include the information listed in Enclosure 2, 5.0 (d) (1), (2), and (3), which can be in Excel, Word, or PDF.

Question 107: Enclosure 2, 5.0 (d). Please confirm the format (Excel spreadsheet, Word, or PDF) Volume IV Factor 3, Price, 'breakdown of the pricing' should be submitted in.

Response 107: The breakdown of the pricing can be Excel spreadsheet, Word, or PDF. In addition, quoters must fill in the CLIN Structure table in Enclosure 4.

Question 108: Enclosure 2, 5.0 (d). Please confirm if the Price Schedule and Price Breakdown submissions are separate documents or combined.

Response 108: They are separate documents.

Question 109: Enclosure 3, 3.0 (a). According to the Evaluation Criteria for Factor 1, "The quoter's technical capability will be evaluated to assess how well the quoter demonstrated an understanding of the PWS requirements." Please clarify the Government seeks an approach to

addressing PWS Section 4.0 Requirements and Section 5.0 Deliverables (and not all PWS Sections 1.0 - 18.0).

Response 109: While a Quoter will need to meet all requirements in the 18 Sections of the PWS, the Quoter specifically should focus their attention on Sections 4.0, 5.0, 8.0, 9.0, 12.0, and 16.0 in their narrative for Technical Approach.

Question 110: Enclosure 4. Will the Government please confirm that the correct RFQ number for this solicitation is 1797912, as the header of Enclosure 4 incorrectly lists RFQ 1792850?

Response 110: The RFQ number for this requirement is 1797912. The RFQ has been corrected.

Question 111: Enclosure 4. Please clarify in CLIN 4007 CAF, that the remarks in the AMOUNT section should read, "Unit Price of all Option Period 4 CLINS ", not "Unit Price of all Option Period 3 CLINS"

Response 111: CLIN 4007 CAF in Enclosure 4 should read “Unit Price of all Option Period 4 CLINS. The RFQ was amended to make correction.

Question 112: Enclosure 4. For the Firm-Fixed-Price ODC support CLINs (x005), should the monthly price include only the labor for purchasing support, or should it also include an estimated amount for the actual software license costs, and if so, could the Government provide historical spending data for these licenses?

Response 112: The contractor is expected to fund the actual license costs within the CLIN X005 FFP unit price. The PWS was revised to provide a list of applications and expected license. quantity.

Question 113: Enclosure 4. Does CLIN x005 cover only the contractor's labor for coordinating COTS software license renewals per PWS Section 4.5, or is the contractor also expected to fund the actual license costs within the CLIN 0005 FFP unit price?

Response 113: The contractor is expected to fund the actual license costs within the CLIN X005 FFP unit price. The PWS was revised to provide a list of applications and expected license. quantity.

Question 114: Can the Government provide a high-level architecture diagram of the DTMO Passport Enterprise Infrastructure environment, including major application components, databases, hosting platforms, and external integrations? Reference: GSA RFQ1797912 Paragraph(s) 4.1.3, 9.4.3.1, Page(s) 31-32, 52.

Response 114: This information is proprietary government FOUO and cannot be shared with the public. The supporting documents will be shared with the awarded contractor during the transition-in period.

Question 115: What hosting model is currently used for the environment (on-premises, cloud, or hybrid)? Reference: GSA RFQ1797912 Paragraph(s) 1.0, 2.0, 4.1.8, Page(s) 30, 32.

Response 115: Oracle Service Cloud

Question 116: If cloud services are used, which cloud provider(s) host the environment? Reference: GSA RFQ1797912 Paragraph(s) 1.0, 2.0, 9.5.1-9.5.2, Page(s) 30, 53.

Response 116: Oracle Service Cloud

Question 117: Please provide the number of applications currently supported under the DTMO Passport Enterprise Infrastructure and identify any mission-critical applications requiring high availability. Reference: GSA RFQ1797912 Paragraph(s) 4.1.2, 4.1.7, 4.4, 9.4.3.1, Page(s) 31-32, 35-36, 52.

Response 117: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology.

Question 118: How many production, staging, and development environments currently exist for the Passport Enterprise Infrastructure applications? Reference: GSA RFQ1797912 Paragraph(s) 4.2.1, 4.4.1, 9.4.2-9.4.3.1, Page(s) 33, 36, 52.

Response 118: Three environments – Development, User Acceptance, and Production.

Question 119: What is the approximate size of the primary databases and the expected annual growth rate? Reference: GSA RFQ1797912 Paragraph(s) 4.2.2-4.2.3, Page(s) 33.

Response 119: PROD: SQL Server – 657.7 GB; Oracle – 38.64 TB
UAT: SQL Server – 660.98 GB; Oracle – 10.10 TB
DEV: SQL Server – 71.97 GB; Oracle – 10.79 TB

Question 120: What Authorization to Operate (ATO) level currently applies to the Passport Enterprise Infrastructure environment? Reference: GSA RFQ1797912 Paragraph(s) 4.3.1, 9.1.1, Page(s) 33, 51.

Response 120: DTMO Passport ATO-C; Authorization Termination Date: 12-May-2027

Question 121: What development methodology is currently used for application enhancements (e.g., Agile, hybrid Agile, waterfall)? Reference: GSA RFQ1797912 Paragraph(s) 4.4, 4.4.1, 4.4.7, Page(s) 35-37.

Response 121: Agile and hybrid agile.

Question 122: Are CI/CD pipelines currently implemented, and if so, what tools are used? Reference: GSA RFQ1797912 Paragraph(s) 4.4, 4.4.4, 4.4.5, 4.4.7, 4.6.8, Page(s) 35-37, 39.

Response 122: The Government does maintain & employ an established DevSecOps process supporting development and deployment activities using tools such as Fortify and Sonatype for code scanning and ServiceNow for configuration change management. GitLab is utilized for source code repository.

Question 123: Can the Government provide historical information regarding software licensing or IT service purchases that have been procured as Other Direct Costs (ODCs) under the current contract? Reference: GSA RFQ1797912 Paragraph(s) 4.5, 4.5.1-4.5.2, Page(s) 37-38.

Response 123: The PWS was revised to provide a list of technologies and expected license quantity at Appendix A.

Question 124: Will the Government provide existing operational documentation, system inventories, and architecture documentation during the transition period? Reference: GSA RFQ1797912 Paragraph(s) 4.1.3, 4.4.4.5, 4.7.1, Page(s) 31-32, 36, 40.

Response 124: The supporting documents will be shared with the awarded contractor during the transition-in period.

Question 125: Can the Government provide historical workload metrics such as average monthly incidents, service requests, change requests, and development tickets? Reference: GSA RFQ1797912 Paragraph(s) 4.1.7, 4.6.4, 4.6.6, 4.6.8, Page(s) 32, 38-39.

Response 125: Average ticket volume combined for trouble tickets and change requests are roughly 15 a month.

Question 126: What security clearance levels are required for contractor personnel supporting this effort? Reference: GSA RFQ1797912 Paragraph(s) 8.1-8.1.3, 8.7-8.7.6, 8.10, Page(s) 43-46, 48.

Response 126: No security clearance is required for contractor personnel supporting this effort. Requirement is for a Public Trust at the Tier III level. Cost of background investigation will be born, controlled, and held by the government.

Question 127: Will contractor personnel require access to DoD networks such as NIPRNet or other restricted environments? Reference: GSA RFQ1797912 Paragraph(s) 4.3.3, 8.1, 8.7, 8.14, Page(s) 34, 43, 45, 49.

Response 127: Yes, access to NIPRNet and other privileged environments will be required and those requests will be worked jointly with the government for fulfillment based on job duties.

Question 128: Please provide the current contract value and approximate number of personnel currently supporting the DTMO Passport Enterprise Infrastructure. Reference: GSA RFQ1797912 Paragraph(s) 5, 4.6.11, Page(s) 2, 39-40.
Note: the RFQ identifies the incumbent contract number and contractor, but does not state the current contract value or current staffing count. GSA RFQ DSSC DTMO PEIS_26 Feb_F…

Response 128: The current contract value is $15,932,281.71 (to include a 4-month extension using FAR 52.217-8). It is up to each Quoter to determine the required number of personnel to meet the workload requirements of the PWS.

Question 129: Please clarify which infrastructure components are Government Furnished and managed by DMDC or JSP versus those the contractor is responsible for administering or maintaining, including servers, databases, middleware, storage, and network configuration. Reference: GSA RFQ1797912 Paragraph(s) 2.0, 4.1.2, 4.2.3-4.2.4, 4.3.2, 10.0, Page(s) 30, 31, 33-34, 56.

Response 129: All hardware and infrastructure components are government furnished and are maintained by DMDC. The contractor will be responsible for administering and maintaining the application stack and application database. The PWS was revised to provide a list of technologies and expected license quantity provided for Passport applications at Appendix A.

Question 130: Please provide an inventory of the DTMO Passport Enterprise Infrastructure applications, including hosting environment, user population, technology stack, and identification of any mission critical applications. Reference: GSA RFQ1797912 Paragraph(s) 1.0, 2.0, 4.0, 4.1.2, 4.4, 9.4.3.1, Page(s) 30-31, 35-36, 52.

Response 130: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology. The current user volume for this platform is approximately 6 million.

Question 131: Please identify the current development and DevSecOps toolchain used for the DTMO Passport environment, including source control, CI/CD pipeline, artifact repositories, security scanning tools, and test automation tools. Reference: GSA RFQ1797912 Paragraph(s) 4.0, 4.3.4, 4.4, 4.4.4-4.4.7, 4.6.8, Page(s) 30-31, 34, 35-39.

Response 131: The Government does maintain & employ an established DevSecOps process supporting development and deployment activities using tools such as Fortify and Sonatype for code scanning and ServiceNow for configuration change management. GitLab is utilized for source code repository.

Question 132: Please provide historical operational metrics for the DTMO Passport environment, including average monthly ticket volume and incident categories. Reference: GSA RFQ1797912 Paragraph(s) 4.1.7, 4.6.6-4.6.8, Page(s) 32, 39.

Response 132: Average ticket volume combined for trouble tickets and change requests are roughly 15 a month.

Question 133: Please confirm whether all DTMO Passport systems and applications are currently covered by active ATOs or ATCs, or whether any systems are operating under interim or other provisional authorization status. Reference: GSA RFQ1797912 Paragraph(s) 4.3.1, 9.1.1, 9.3.3, 9.5.2, Page(s) 33, 51, 53.

Response 133: All PEIS systems are currently covered by an active ATO.

Question 134: Please confirm whether the incumbent contractor will be required to support structured knowledge transfer during the two-month transition-in period and whether DTMO maintains existing system documentation, runbooks, architecture diagrams, or a knowledge management repository that will be made available to the incoming contractor. Reference: GSA RFQ1797912 Paragraph(s) 4.1.3, 4.4.4.5, 4.7.1, Page(s) 31-32, 36, 40.

Response 134: Incumbent contractor will be required to support newly awarded contractor during transition-in period. All supporting documents will be provided to the new contactor during the same period.

Question 135: Please confirm whether the work will be performed fully remote, hybrid, or on-site and identify the primary duty location. Reference: GSA RFQ1797912 Paragraph(s) 11.0, 8.2, Page(s) 56, 44.

Response 135: The work will be performed fully remote.

Question 136: GSA RFQ1797912 Paragraph(s) n/a, Page(s) 70-74. The government will often offer a plug number so that all companies bid ODCs at the same value since there are unknown costs associated with the purchasing of HW and SW. Will the Govt consider issuing a plug number for CLIN X0005 pricing?

Response 136: The PWS was revised to provide a list of applications and expected license quantity at Appendix A.

Question 137: PWS Section 3.0 Scope, 4.6.11 (Key Personnel)., Page 30,39. In addition to key personnel specified at RFQ 4.6.11, please clarify the anticipated number of Full-Time Equivalent (FTE) personnel required and whether the Government has any specific labor categories or skill mix that it expects for successful contract performance.

Response 137: It is up to each Quoter to determine the required number of FTEs, labor categories and skill mix to meet the workload requirements of the PWS.

Question 138: RFQ Section 1 (Follow-On Requirement), Page 2. Will the Government provide historical staffing information from the incumbent contract – for example, the number of FTEs or total labor hours currently utilized to support the DTMO Passport Enterprise Infrastructure Support services – to help offerors accurately gauge the level of effort needed for this contract?

Response 138: It is up to each Quoter to determine the required number of FTEs, labor categories and skill mix to meet the workload requirements of the PWS.

Question 139: RFQ Section 1 (Follow-On Requirement), Page 2. Is any change in Level of Effort expected from the incumbent contract?

Response 139: The RFQ PWS scope is smaller than the current contract PWS.

Question 140: PWS Section 4.1 (Application Administration) Page31. Are there current technical reference materials – for example, network architecture diagrams, system configuration baselines, system inventories, or existing SOPs for the DTMO environment – that the Government can share? If such documents cannot be provided to offerors at this stage, will they be made available to the awarded contractor during the transition-in period? Access to or insight into these existing materials would greatly assist in understanding the present state of the DTMO Enterprise Infrastructure and planning a smooth transition and technical approach.

Response 140: The supporting documents will be shared with the awarded contractor during the transition-in period.

Question 141: PWS Section 4.4 (Application Development) Page 35. To help estimate the level of effort, please clarify the historical and anticipated volume of application development and maintenance requests, as well as ticket type (e.g., change request) and low/medium/high effort.

Response 141: Typically, 1-2 new applications may be developed each calendar year. Additionally, change requests are approved for implementation based on team capacity

Question 142: PWS Section 4.4 (Application Development) Page 35. Approximately how many end-users use these applications? Are users primarily internal to DTMO or spread across other DoD organizations/external stakeholders?

Response 142: Response 142: DTMO Passport has approximately 6 million registered users across DoW, Federal Government, and the public.

Question 143: Incumbent Staffing. Please provide the current incumbent staffing level (FTE count and labor categories) supporting contract H9821021F0060.

Response 143: It is up to each Quoter to determine the required number of FTEs and labor categories to meet the workload requirements of the PWS.

Question 144: Work Location. Please confirm whether the services are expected to be performed:

- Fully on-site
- Hybrid
- Remote

If on-site work is required, please identify the primary duty location(s).

Response 144: Remote

Question 145: Security Clearance. Please confirm the minimum clearance or background investigation level required for contractor personnel (e.g., Secret, Public Trust, CAC eligibility).

Response 145: Public Trust at the Tier III level. Cost of background investigation will be born, controlled, and held by the government.

Question 146: Infrastructure Environment. Please clarify the hosting environment supporting the DTMO Passport Enterprise Infrastructure, including whether systems are:

- On-premise government data centers
- Cloud hosted (AWS, Azure, DoD cloud, etc.)
- Hybrid architecture.

Response 146: Oracle Service Cloud

Question 147: System Scale. Please provide the approximate number of systems/servers/environments currently supported under this contract (production, development, test).

Response 147: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology. The are (3) environments in the DTMO Oracle Cloud Infrastructure, Dev, UAT, and PROD. There are 36 compute instances supporting the Passport platform.

Question 148: Transition Period. Please confirm whether the Government anticipates a transition-in period from the incumbent contractor and the expected duration.

Response 148: PWS task statement 4.7.1 states a transition-in period of two (2) months.

Question 149: Service Management Tools. Please identify the current IT Service Management (ITSM) platform used for ticketing and operational support (e.g., ServiceNow, Remedy).

Response 149: ServiceNow and Atlassian JIRA

Question 150: Deliverables. Please confirm the required recurring deliverables, such as:

- Monthly operational reports
- Service level performance reports
- cybersecurity compliance reporting.

Response 150: See Section 5.0, DELIVERABLES, for the expected recurring deliverables. NOTE: Cybersecurity compliance can have expected system required deliverables as part of normal work flow. Those may/may not be accounted for in Section 5.0.

Question 151: Service Level Agreements. Please confirm whether specific SLAs or system availability requirements apply to the Passport Enterprise Infrastructure environment.

Response 151: DTMO has SLAs with our hosting providers. The contractor is expected to work with our IT hosting partners to restore system availability as soon as possible.

Question 152: PWS 3.0 / 4.0. “Contractor shall manage the DTMO EI in its current and future state”. To ensure accurate sizing, can the Government provide a current architecture diagram or environment overview showing all systems, servers, and applications within scope of the DTMO Enterprise Infrastructure?

Response 152: This information is proprietary government FOUO and cannot be shared with the public. The supporting documents will be shared with the awarded contractor during the transition-in period.

Question 153: PWS 4.4. “DTMO has approximately 25+ custom applications requiring maintenance, updating, or recoding”. Can the Government confirm the exact number of GOTS applications currently in inventory, their technology stack, and their general state of health (e.g., how many are actively maintained vs. in need of significant rework)?

Response 153: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology. 6-10 applications are in active development at any one time.

Question 154: PWS 4.4. “DTMO anticipates up to two new applications each year”. Are the anticipated new applications expected to be net-new builds, or are they primarily modernization efforts of existing applications? If new, what is the typical size and complexity of a new application development effort at DTMO?

Response 154: The expectation is to build brand new applications based on departmental need. Most applications are mid/small sized utility tools.

Question 155: PWS 4.1.1. “Support GOTS and COTS applications across Windows, Linux, and Unix”. Can the Government provide a full inventory of the COTS and GOTS applications currently supported, including the operating systems they run on, to allow for accurate staffing and skillset planning?

Response 155: COTS – Jira, MOVEit Automation, MOVEit Transfer, EFM - Verint's Enterprise Feedback Management, Tableau Server. DTMO Passport has 25 GOTS applications using PHP, APEX, and .NET technology.

Question 156: PWS 4.1.8. “Contractor shall have the capability to support SaaS, PaaS, and cloud platforms”. Beyond Oracle Cloud Infrastructure (OCI), are there any other cloud platforms (e.g., AWS, Azure) currently in use or anticipated within the DTMO environment during the period of performance?

Response 156: There is no other cloud platforms anticipated during the period of performance.

Question 157: PWS 4.2.1. “Database administration for Oracle 19c or higher and Microsoft SQL 2014 or higher”. How many database instances are currently in scope across Oracle and SQL Server environments? Are any databases currently running on versions below 19c (Oracle) or 2014 (SQL) that will require upgrade as part of this contract?

Response 157: There are (3) Oracle and (3) Microsoft SQL database servers within the environment. Oracle DBs are running 19c and SQL is running version 2019.

Question 158: PWS 4.3.2. "Contractor shall create and manage POA&Ms". To accurately scope the cybersecurity workload, can the Government provide information on how many open POA&Ms currently exist across all in-scope systems, and what is the general breakdown by severity (Critical, High, Medium, Low)?

Response 158: Currently there are 1 Medium and 4 Low POAMs.

Question 159: PWS 4.3.3 / 4.3.5.4. "IAVM compliance patching; remediation timelines by severity". What is the current IAVM compliance posture? Are there outstanding IAVM findings that will transfer to the incoming contractor at award? If so, approximately how many and at what severity levels?

Response 159: Cyber findings are discovered on a routine basis, however within the DTMO Passport Enterprise there is a robust cyber program that remediates findings within the prescribed timelines. During the transition period, as part of knowledge transfer and situational awareness, the selected Quoter will be included in cyber related meetings. Any remaining open IAVMs will transfer upon operational control post transition.

Question 160: PWS 4.4. "Application Development: Utilize ServiceNow or any other approved Ticket Management System in the future for software development and task tracking purposes". What ticketing systems is currently being utilized and will the vendor need to manage the transition in the future?

Response 160: ServiceNow and Atlassian JIRA. Vendor may need to support data migration between different JIRA instances.

Question 161: PWS 4.4.1.1. "Contractor to support public-facing DTMO website using a web content management system (WCMS)". What WCMS platform is currently in use for the public-facing DTMO website? Is a migration to a different WCMS anticipated during the period of performance?

Response 161: There is no migration anticipated during the period of performance.

Question 162: PWS 4.4.3. "Technology Refresh". There is a strong coleroation between technology refresh, licenses, and governance approval of the technology through architectural review boards? Is the government expectation the vendor manages the activities as apart of this effort to provide?

Response 162: Yes, the Government expects the vendor to manage this process in coordination with the host provider's governance procedures.

Question 163: PWS 9.4.1. "Contractor shall perform S-ISSO responsibilities at the system/application level". How many systems or applications require S-ISSO support? Is one S-ISSO expected to cover all systems, or does the Government anticipate a need for multiple S-ISSOs given the system count?

Response 163: There are 2 RMF boundaries and DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .NET technology. There are 36 compute instances supporting the Passport platform.

Question 164: PWS 9.4.2 / 9.4.3. "Contractor shall prepare RMF packages and maintain authorization processes within eMASS". What is the current state of the eMASS packages for each in-scope system? Are the System Security Plans (SSPs) current and complete, or will the incoming contractor be expected to perform significant remediation or rebuilding of eMASS artifacts?

Response 164: DTMO Passport has an ATD of May 2027, the DTMO Oracle Service Cloud has an ATD of Feb 2029. All associated artifacts are currently updated and eMASS is well populated.

Question 165: PWS 9.8.5. "Contractor shall perform code scans using tools such as Fortify and Sonatype". Are Fortify Software Security Center and Sonatype Government Furnished Equipment/Information (GFE/GFI), or is the contractor expected to procure and fund these tools independently? If GFE, will licenses be transferred at contract award?

Response 165: Any needed GFE and licenses to cyber tools will be provided by the Government.

Question 166: PWS 4.6.11. "Cybersecurity SME must hold cloud certifications (MCSE, AWS, Red Hat OpenStack, or equivalent)". Can the Government clarify whether both certifications (Oracle 19c and MCSA) are required simultaneously, or is one sufficient with demonstrated experience?

Response 166: Possession of one of the certifications stated in the PWS 4.6.11 Cybersecurity SME should suffice..

Question 167: RFQ Section 5, Volume II, Element C. "Staffing Plan must identify all proposed positions, hours per position, and if full or part time". Can the Government share the current staffing level (number of FTEs by role) under the incumbent contract? This would help ensure our proposed staffing is appropriately scaled and not overbuilt or underbuilt relative to the actual workload.

Response 167: It is up to each Quoter to determine the required number of personnel to meet the workload requirements of the PWS.

Question 168: PWS 8.7.5.2. "Personnel requiring privileged access must have T5 or T5R, or T3/T3R under technical review of a T5/T5R individual". How many contractor positions are

anticipated to require Tier 5 investigations (privileged access)? This information could significantly affect recruiting timelines and is needed to inform our transition plan.

Response 168: None at Tier 5. Requirement is for Public Trust at the Tier III level. Cost of background investigation will be born, controlled, and held by the government.

Question 169: PWS 4.7.1 / CLIN 0008. "Transition-in is priced as a separate 2-month CLIN (CLIN 0008); the remaining base period CLINs are priced at 10 months". During the 2-month transition-in period, is the contractor expected to be in full performance of all PWS tasks concurrently, or is the expectation a phased assumption of duties as knowledge transfer occurs? This affects how we price both CLIN 0008 and the base period CLINs.

Response 169: The transition period is the time period the Offeror should use to acquire staff, train, conduct knowledge transfer, acquire GFE and Gov't system access, so that they CAN ASSUME all tasks on Day One of the Base Year Period of Execution. The incumbent vendor remains responsible for all tasks during the transition period overlap of contracts.

Question 170: Enclosure 4, CLINs 0005, and 1005-4005. "Software, IT Services Purchasing Support as Other Direct Costs (ODCs)". The PWS does not provide a historical or estimated spend on ODC purchases (software license renewals, etc.). Can the Government provide the approximate annual ODC spend under the current contract to allow for accurate FFP pricing of this CLIN?

Response 170: The PWS was revised to include a material list of the technologies currently in use within Passport and the expected license quantity at Appendix A.

Question 171: Enclosure 4, CLINs 0005, and 1005-4006. "Software, IT Services Purchasing Support as Other Direct Costs (ODCs)". Will the contractor need to work with agencies such as GSA to conduct transfers of funds to pay for the licenses. What type of licenses will be considered for purchasing, cybersecurity, desktop, etc. and what are the current number of licenses that will need to be managed.

Response 171: The PWS was revised to include a material list of the technologies currently in use within Passport and the expected license quantity at Appendix A. The selected Quoter is expected to procure the current technologies for use by DTMO. Currently these technologies are procured by the incumbent vendor via third party resellers.

Question 172: Enclosure 4, CLINs 0005, and 1005-4006. "Software, IT Services Purchasing Support as Other Direct Costs (ODCs)". Will the vendor need to be able to identify alternative licenses to the government that could provide substantial cost savings over existing licenses?

Response 172: The PWS was revised to include a material list of the technologies currently in use within Passport and the expected license quantity at Appendix A. The government could move to more cost-effective technologies assuming any technology roadmap blockers are resolved and the technology approved for use within the hosting environment.

Question 173: RFQ Section 1. "FFP task order; funds not presently available". Given that funds are not presently available and this is a follow-on requirement with an incumbent contract ending 15 July 2026, can the Government confirm an anticipated award date to allow offerors to appropriately plan staffing and transition timelines?

Response 173: The anticipated award date is 15 May 2026.

Question 174: PWS 5.0, Deliverable Table. "Initial Transition In Plan is due with the proposal". Can the Transition-In Plan submitted with the proposal be a high-level draft and the final plan to include a WBS with activities and dates provided after award? Is this plan included in the 35-page limit of the Technical Volume?

Response 174: Quoters should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services.

Question 175: PWS 4.4. "DTMO has approximately 25+ custom applications requiring maintenance, updating, or recoding". How many production, staging, and development applications are currently supported?

Response 175: DTMO Passport is hosted in the Oracle Cloud environment, with 25 GOTS applications using PHP, APEX, and .Net technology. The are (3) environments in the DTMO Oracle Cloud Infrastructure, Dev, UAT, and PROD.

Question 176: PWS 4.2.1. "Database administration for Oracle 19c or higher and Microsoft SQL 2014 or higher". What is the total size (TB) of Oracle and SQL databases, and expected annual growth?

Response 176:
PROD: SQL Server – 657.7 GB; Oracle – 38.64 TB
UAT: SQL Server – 660.98 GB; Oracle – 10.10 TB
DEV: SQL Server – 71.97 GB; Oracle – 10.79 TB

Question 177: PWS 4.2.1. "Database administration for Oracle 19c or higher and Microsoft SQL 2014 or higher". How many external data sources feed the DTMO Travel Data Repository?

Response 177: There are currently 38 external data sources feeding the DTMO Travel Data Repository.

Question 178: PWS 4.2.1. "Database administration for Oracle 19c or higher and Microsoft SQL 2014 or higher". What is the daily and monthly data ingestion volume?

Response 178: Between 26-27GB per month.

Question 179: PWS 4.2.1. "Database administration for Oracle 19c or higher and Microsoft SQL 2014 or higher". How many database clusters, replicas, and DR environments exist?

Response 179: This information is proprietary government FOUO and cannot be shared with the public. The supporting documents will be shared with the awarded contractor during the transition-in period.

Question 180: PWS 16.2. "Testing and QA". How many ACAS scans are conducted monthly and annually?

Response 180: 3 ACAS scans are conducted weekly.

Question 181: RFQ Section 5, Volume II, Element C. "Staffing Plan must identify all proposed positions, hours per position, and if full or part time". Do the 25+ custom applications included APIs if not, how many are currently active, and how many are mission-critical, are there any plans for modernization?

Response 181: All 25 GOTS applications are active on DTMO Passport. There are a couple of APIs in place. There is no immediate plan of modernization.

Question 182: PWS 4.4. "Application Development: Utilize ServiceNow or any other approved Ticket Management System in the future for software development and task tracking purposes". What historical ticket volume (monthly average) exists for incidents and service requests?

Response 182: Average tickets for all items mentioned in this question are roughly 35 a month. Actual ticket data will be shared with the awarded contractor during the transition-in period.

Question 183: What is the current contract value for Kaimetrix, LLc?

Response 183: The current contract value is $15,932,281.71 (to include a 4-month extension using FAR 52.217-8).

Question 184: RFQ Section 5, Volume II, Element C. "Staffing Plan must identify all proposed positions, hours per position, and if full or part time". Will the government please provide a pricing template so as to simplify the government evaluation of vendors proposed bid prices as well as any assumptions about the transition and base year levels of effort?

Response 184: It is up to each Quoter to determine the required number of personnel to meet the workload requirements of the PWS. Pricing should be submitted in accordance with RFQ Enclosure 2 (d) Volume IV: Factor 3, Price.

Question 185: RFQ Section 5, Volume II, Element C. "Staffing Plan must identify all proposed positions, hours per position, and if full or part time". As this work is remote and not on sight, is there ever any need for the members of the team to come into the Alexandria location? Are we to assume if there is ever a need that the personnel should at a minimum be within a commutable distance to the Alexandria?

Response 185: All work will be performed remotely. DHRA is a fully telework capable agency, and no space is being provided in the Mark Center for staff. However, Offeror staff local to the National Capital Region (NCR) can use the Mark Center CAC Office for badging, and DTMO can arrange for local GFE pickup. Outside of these two events, little to no attendance should be expected during the contract PoP within the Mark Center.

Question 186: PWS Section 4.6.11. Section 4.6.11 lists six different labor categories (LCATs) as key personnel (KP). Would the Government please confirm that offerors should include just one KP candidate per LCAT listed in Section 4.6.11? If we are to provide more than one KP candidate per LCAT, please give offerors a breakdown of how many KPs are required per LCAT.

Response 186: It is up to each Quoter to determine the required number of personnel, to include KP, to meet the workload requirements of the PWS.

Question 187: PWS Sections 4.7.1 and 5. Instructions say that the Initial Transition-In Plan is due with the proposal. Since a full Transition Plan could take up to 10-15 pages, would the Government consider moving the Transition-In Plan to be outside of the Volume II page count? If not, would the Government consider permitting offerors to submit in the proposal a Draft Plan, with just the most important items addressed to allow more pages for the technical approach response?

Response 187: Offerors should discuss in the Technical Approach their approach to the transition of services during the transition period. The RFQ has been amended to provide the Initial Transition-In plan be provided 5 days after contract award. Additionally, Element A, Technical Approach was revised to incorporate quality control throughout the life of the contract, as well as how the Quoter intends to provide transition support services

Question 188: PWS Sections 4.7.2 and 5. PWS Section 4.7.2 instructs offerors to provide a Transition-Out Plan with their proposal. However, the Deliverables Table in PWS Section 5 says that the Transition-Out Plan is required 90 days prior to the end of the contract. Would the Government please confirm that the actual Transition-Out Plan is due after contract award IAW PWS 5.0, and only a high-level summary of transition-out activities/strategy is required to be submitted with the proposal? If a more detailed Transition-Out Plan is required to be submitted with the proposal, please confirm that it is outside of the Volume II page count.

Response 188: Both PWS Task Statement 4.7.2 and Section 5.0 state the Transition Out Plan shall be provided to the government 90 days from end of contract. The RFQ has been amended to include a discussion in Volume II: Factor 1, Technical/Element A, Technical Approach, on an overview of how the Quoter plans to address quality control and transition support services.

Question 189: Enclosure 2, 1.2. Instructions tell offerors to submit proposals via the GSA eBuy portal. Would the Government please confirm that eBuy is a CUI-authorized portal, since the proposal documents are all to be marked CUI?

Response 189: Yes, GSA eBuy is a portal authorized to handle CUI.

Question 190: Enclosure 2, 5.a.(4) and 5.c, paragraph 3. Instructions for both Volume I, Subsection 4, and Volume III, paragraph 3, tell offerors to submit a signed commitment letter and teaming agreement in Volume III for any subcontractor-provided Past Performance references. Does the Government want these documents to be included in both Volume I and Volume III -- or just in Volume III?

Response 190: These documents should be included in Volume III.

Question 191: Enclosure 2, 5.a.(1) and 5.a.(7). Instructions for paragraph (1) include FAR and DFARS provisions requiring completion, and paragraph (7) includes representations and certifications. Are these the same requirement? If not, where would the Government like offerors to include fill-in clauses?

Response 191: These are two separate requirements and both should be submitted in Volume 1 – Business Information. Enclosure 2, 5.a.(1) refers to the fill-in FAR and DFARS provisions listed in the RFQ. Enclosure 2, 5.a. (7) refers to the Representations and Certifications listed in SAM.gov.

Question 192: Enclosure 2, 5.b.(3). Would the Government please provide the most recent historical level of effort for this contract?

Response 192: It is up to each Quoter to determine the required level of effort to meet the workload requirements of the PWS.

Question 193: Enclosure 2, 5.b.(3). Would the Government please provide a breakdown of the number of FTEs per labor category?

Response 193: It is up to each Quoter to determine the required number of FTEs to meet the workload requirements of the PWS.

Question 194: Enclosure 2, 5.b.(1). Are offerors expected to address our approach to performing the five items listed in paragraph 5.b.(1)? Or are these the "objectives" to which offerors are required to provide our "assessment"?

Response 194: Yes, to addressing approach.

Question 195: Enclosure 2, 5.b and 5.e. The first paragraph of Section 5.b instructs offerors to include "page footers that separately identify each document within this volume using this format: “Document name – Page # of # Pages." However, Section 5.e gives specific instructions that the information to be included in the header and footer is the CUI notice and Sources Selection disclaimer. Could the Government please confirm that offerors are to use the instructions in Section 5.e and NOT include company name, page number, solicitation number, volume name/number, customer name, and project/program name, as is typically required in

proposals? If the Government requires those elements, please expand the top/bottom margins and extend the page count to compensate for the lost narrative space.

Response 195: Quoters are to use the instructions given in Section 5.b. and 5.e of this RFQ.

Question 196: Enclosure 2, 5.b.(1) and Enclosure 3, 3.a.(1). Instructions say that offerors must "describe and demonstrate the quoter's understanding of the requirement by explaining the quoter's assessment of the objectives," and the evaluation criteria say quoter must demonstrate an "...understanding of the requirements, assessment of the objectives...." Could the Government please clarify what objectives offerors should be addressing in our proposal? Or are offerors just to show their understanding of the PWS task areas?

Response 196: The Offeror shall demonstrate their understanding of the PWS technical requirements, particularly the objectives stated in Element A in 5.b.(1), via their narrative in Volume II (Technical). In addition, Elements B and C also need narrative in order to fully satisfy PWS coverage.

Question 197: Enclosure 2, 5.c, paragraph 3. Would the Government please confirm that both a signed Commitment Letter as well as a fully executed teaming agreement are required to be submitted in Volume III if an offeror is submitting a subcontractor PP experience reference?

Response 197: Both documents should be included in Volume III.

Question 198: Enclosure 2, 5.d. Would the Government please confirm that offerors are only expected to provide one Excel document addressing all required elements in Volume IV, Factor 3, Price (i.e., with no pricing narrative document required)?

Response 198: Quoters are to complete the CLIN Structure Schedule in Enclosure 4 as well as provide a separate document (which can be Excel, Word, or PDF) to include all information set forth in Enclosure 2, 5.0 (d) (1), (2), and (3).

Question 199: 4.6.11. Requirements for the Cybersecurity SME, Applications Adminstrator for Windows, and Applications Database Administrator all include Microsoft certifications that have been retired and can no longer be obtained. Would the Government please update the requirements to specify current valid technical certifications for these key positions?

Response 199: For a senior Applications DBA managing Oracle and Microsoft SQL Server databases in the cloud, the requirement should be the Oracle Certified Professional, Database Administration, the Microsoft Certified: Azure Database Administrator Associate, and the Microsoft Certified: Azure Administrator Associate, or a minimum of five years of equivalent senior-level experience in Oracle, SQL Server, and cloud platform administration. Similarly, for a senior administrator managing Windows and Linux systems in the cloud, the qualification should be the Red Hat Certified Engineer and the Microsoft Certified: Azure Administrator Associate, or a minimum of five years of equivalent senior-level experience in Linux, Windows, and cloud infrastructure management. This approach ensures candidates are highly qualified

through either a validated certification path or demonstrated long-term expertise. Language in Section 4.6.11 of the PWS has been revised in the amended RFQ.

Questions 200: 4.6.11/Applications Administrator for Windows. "Would the Government clarify if the substitution for a Bachelor's degree is the MCSA certification (see prior question regarding expired certification requirements) plus the years of relevant experience? Or, are the years of experience a separate requirement and not part of the substitution?

Response 200: To clarify the requirements for the Applications Administrator for Windows, the Government will accept any one of the following qualifications. The paths are separate and not dependent on each other.

- A Bachelor's degree in a relevant technical field.
- A current, relevant technical certification. As the MCSA has been retired, the modern equivalent is the Microsoft Certified: Azure Administrator Associate certification or Windows Server Hybrid Administrator Associate.
- At least 5 years of current experience in the field.

Language in Section 4.6.11 of the PWS has been revised in the amended RFQ.

Question 201: 4.6.11/Applications Administrator for Linux. "Would the Government clarify if the substitution for a Bachelor's degree is the Red Hat Linux certification plus 5 years of experience? Or, are the years of experience a separate requirement and not part of the substitution?

Response 201: To clarify the requirements for the Applications Administrator for Linux, the Government will accept any one of the following qualifications. The paths are separate and not dependent on each other.

- A Bachelor's degree in a relevant technical field or
- A current, relevant technical certification, such as the Red Hat Certified Engineer (RHCE) and a minimum of five years of demonstrated, equivalent experience in a role focused on Linux and application administration.

Language in Section 4.6.11 of the PWS has been revised in the amended RFQ.

Question 202: 4.6.11/Applications Database Administrator. "Would the Government clarify if the substitution for a Bachelor's degree is the Oracle 19c or above certification AND MCSA (see prior question regarding expired certification requirements) plus 5 years of experience? Or, are the MCSA and years of experience separate requirements that are not part of the substitution?

Response 202: Yes the correct substitution for a Bachelor's degree is the appropriate level certification (based on role) plus the years of experience stated in the PWS.
