Part 1
General Information

1.0 General:
This is a non-personal service(s) contract under which the personnel rendering the service(s) are not subject, either by the contract's terms or by the manner of its administration, to the supervision and control usually prevailing in relationships between the Government and its employees.

1.1 Description of Services/Introduction:
This is a non-personal services contract to provide support services for Information Technology (IT), IT logistics, IS Services; to configure IT in accordance with (IAW) Department of Defense (DOD) Secure Recommendation Guides (SRGs), Secure Technical Implementation Guides (STIGs) and Cybersecurity support to the West Desert Test Center (WDTC). The contractor shall operate IAW DOD, US Army and WDTC Security Policies and Plans, Document IAW DOD, US Army and WDTC Configuration Control Board (CCB) requirements. Test, troubleshoot and maintain IS operations for DPG/WDTC. Monitor IS and IT implementation, configuration, and cybersecurity requirements. Maintain and troubleshoot problem issues across the various I.T. equipment utilized under this contract and within WDTC place of performance. The contractor shall provide all qualified personnel, equipment, tools, materials, supervision, management, and other items/services not otherwise provided to perform these requirements.

1.2 Background:
WDTC is DOD's foremost test organization supporting DOD, non-DOD, and commercial materiel developers by testing chemical and biological defense systems. As such, WDTC is not a material, item, or system developer. Rather, it provides crucial test support to such developers who are ATEC's primary customers. This contract support is devoted primarily to support WDTC as they conduct tests, operate and maintain the range, facilities, and equipment necessary to perform testing for their customers.

1.2.1 Installation Information
Dugway Proving Ground (DPG) is a Major Range and Test Facility Base(MRTFB), with a primary mission to provide developmental and production testing to support the nation's chemical and biological defense programs. DPG West Desert Test Center (WDTC) features physical and human resources that create an exceedingly diverse test facility that meets a broad spectrum of continually evolving test and evaluation requirements. The WDTC facilities, test fixtures, and equipment were designed and built specifically for Dugway's mission with the technology and procedures having been developed by WDTC scientists, engineers, chemists, microbiologists, and technicians. The remote installation covers more than 800,000 acres and is located approximately 75 miles southwest of Salt Lake City (SLC), Utah

and 40 highway miles over a mountain pass from the nearest town with services (Tooele, Utah). WDTC provides flexible, responsive, innovative set of test capabilities, assets, and services providing test and test support services for authorized customers.

1.2.2 Information regarding the location in Paragraph 1.2 above can be found at the following website:

https://www.dpg.army.mil

1.2.3 The contractor shall fully comply with local military installation, city, county, state, and federal laws, regulations, and/or ordinances pertinent to performance of the contractual services required under this contract.

1.2.4 The contractor and employees shall observe all rules and regulations issued by the Installation Commanding Officer pertaining but not limited to fire, safety, sanitation, severe weather, admission to the installation, conduct of operations, etc.

1.2.5 Accident Reporting. The contractor shall report all accidents resulting in injury, death, or property damage in accordance with (IAW) the regulations of the organization/military installation at their designated performance locations.

1.2.6 Fraud, Waste, and Abuse. The contractor shall be responsible for maintaining proper conduct and good discipline within contractor occupied work area(s). Contractor personnel shall be encouraged to be alert to and report suspected situations of fraud, waste, and abuse, or other intentionally dishonest conduct against the Government to the Contracting Officer's Representative (COR).

1.3 Scope: The Contractor shall provide non-personal service(s). This is a non-personal services contract to provide Information Technology (IT), IT logistics, and cybersecurity support to the West Desert Test Center (WDTC). The contractor shall provide Cybersecurity Support, Infrastructure/Boundary Protection Operations/Network Management, Directory & Authentication Services, Storage & Virtualization Services, Operations Support, and test support. The contractor shall provide all qualified personnel, equipment, tools, materials, supervision, management, transportation and other items/services not otherwise provided to perform these requirements, except for those items specified in Part 3 Government Property and Services. The Contractor shall perform to the standards and acceptable quality levels identified in this PWS and associated contract documents.

1.3.1 Summary. As set forth in FAR 7.5, the contractor shall not perform inherently governmental functions. The Government will not exercise any supervision or control over the contract personnel performing services herein. All personnel engaged in performing the services under this contract (i.e., direct labor and subcontracted labor) shall be accountable solely to the contractor who, in turn is responsible to the Government. Any effort reflected in this PWS may be identified during contract performance for higher priority, different performance locations, and varied level of intensity. The Government will provide to the contractor's leaders all workforce prioritization requirements, which may include intermittent/infrequent and fluctuating efforts for IT, IT-associated services, and

direct test support. The contractor shall be capable of meeting these requirements by means of increasing, decreasing, or relocating personnel, equipment, and materials at various locations in the continental United States (CONUS).

1.4 Objectives: The following items will identify the basic service if this contract.

1.4.1 To accomplish this contract, the WDTC contractor will:

a. Deliver value-added products and services to its customers;
b. Identify and optimize the process and capabilities essential to providing quality and timely products and services;
c. Provide, develop, sustain, and integrate people, technological capabilities, and procedures; and,
d. Identify, secure, and allocate resources necessary to meet ATEC's mission requirement through efficient, flexible and responsive management.

1.4.2 To successfully support WDTC's mission, WDTC requires the ability to rapidly move, store, and retrieve data from a wide variety of sources and locations in a highly reliable and secure manner. WDTC requires a high level of technical expertise, flexibility, and depth of professional and technical expertise in order to meet its mission goals and objectives. A technical staff capable of modifying and operating sophisticated information management systems in a timely and cost-efficient manner is required to meet the needs of WDTC.

1.5 General Information:

1.5.1 Quality Control Plan (QCP): The contractor shall develop and maintain an effective Quality Control Plan ***(CDRL 0002-****(A.001))*, within 60 days of contract award, to ensure services are performed IAW this PWS. The contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The contractor's QC program is the means by which the contractor is assured that the work complies with the requirements of this contract.
The Contractor shall develop and maintain a QCP to ensure services are performed in accordance with (IAW) this PWS. The Contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The Contractor's QCP is the means by which it assures that the work provided complies with the requirements of the contract.

The Contractor's Proposed QCP shall be submitted to the Contracting Officer (KO) through the Contracting Officer's Representative (COR) for review within ten (10) days after date of contract award

The Government will review and either notify the Contractor in writing of acceptance of the plan or return their comments to the Contractor within 10 days. If the Government has provided comments, the Contractor shall then have 10 days to submit a Final QCP. After receipt of the Final QCP, the Contractor may receive the Contracting Officer's acceptance in writing. Any proposed changes to the accepted QCP are required to be resubmitted for acceptance by the Contracting Officer no later than 10 days prior to the anticipated change and before

implementation by the Contractor. The timeline noted above will apply for review and acceptance for proposed changes. At a minimum, the QCP must include and answer the following to be acceptable:

(a) A chart showing the organizational structure and lines of authority, the names, qualifications, duties, responsibilities, and classification of each member of the Contractor's Quality Control Team;

(b) How the Contractor will monitor work to ensure performance complies with all deliverables (etc. timelines, deadlines, and goals);

(c) How the Contractor will monitor work to ensure performance complies with all specifications and requirements of the contract, including the contract's clauses;

(d) How the Contractor will monitor and ensure staff qualifications remain current and valid including Department of Defense (DoD) Contractor Personnel Office (DOCPER) processes/approvals throughout contract performance;

(e) How the Contractor will ensure all keys issued will remain controlled items (Paragraph 1.7 Key Control);

(f) How the Contractor will inventory and track maintenance of all Government Provided Equipment / Materials;

(g) How the Contractor will identify, investigate, and correct any non-conforming performance and prevent similar deficiencies in the future; and

(h) How the Contractor will file and save all Quality Control related documents for the life of the contract plus 5 years.

1.5.1.1 An Analysis of Quality Control and Timeliness of Submittals (i.e. deliverables) shall be provided to the COR within 30 days upon completion of each option period or Task Order A.002

1.5.1.2 The Contractor shall inform the COR of issues or potential issues that might affect the performance within 10 working hours of identifying those issues. Verbal reports shall be followed up by written reports within 2 days. A.003

1.5.2 Quality Assurance (QA):

The Government will evaluate the contractor's performance IAW the Quality Assurance Surveillance Plan (QASP) (A.007) and the Standards and Acceptable Quality Level Spreadsheet (A.004).
This plan is primarily focused on what the Government must do to ensure that the Contractor has performed IAW the performance standards. It defines how the performance

standards will be applied, the frequency of surveillance, the minimum acceptable defect rate(s) and the acceptable quality levels (performance thresholds).

1.5.3 Recognized Holidays: The following provides information on recognized holidays for the purpose of the PWS. If submittal of any documentation (e.g. deliverables, submittals, etc.) deadlines fall on a holiday, the closest work day prior to the holiday will apply as the deadline for submittal.

1.5.3.1 U.S. Holidays: Work **shall not** be performed on U.S. federally recognized holidays occurring during the normal workweek unless otherwise directed by the Contracting Officer. When a US holiday occurs on a Friday or Saturday the holiday is observed on the preceding Thursday. If the holiday falls on a Sunday it will be observed on the following Monday.

New Year's Day January 1st
Presidents Day 3rd Monday in February
Juneteenth June 19th
Labor Day 1st Monday in September
Veteran's Day November 11th
Christmas Day December 25th
M. L. King Memorial Day 3rd Monday in Jan
Memorial Day last Monday in May
Independence Day July 4th
Columbus Day 2nd Monday in October
Thanksgiving Day 4th Thursday in November

1.5.4 Operating Hours: The Government facility office hours, facility operating hours, and the Contractor support hour requirements often coincide, however, they may differ. Please refer to the following.

1.5.4.1 Government Facility Office Hours: Unless indicated below, contractor operations will be Monday through Thursday from 7:00 a.m. to 5:30 p.m. (Mountain Time (MT), except U.S. Holidays identified in paragraph 1.5.3.1 above or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government directed facility closings. Core staff operations will be on Monday through Thursday from 7:00 a.m. to 5:30 p.m. (MT), excluding federal holidays. The Government will approve the contractor's start/end times schedule to ensure minimum and maximum coverage. All changes to this schedule must be approved by the Government.

1.5.4.2 Government Installation Operating Hours: While access to the installation is 24/7/365, the facilities within are open only during normal Government Facility Office Hours as stated in 1.5.4.1 above.

1.5.4.2.1 Installation Closures: The contractor shall adhere to curtailing operations of the Government which includes any time when the Government is in a non-operational status for events including, but not limited to, emergency situations, inclement weather, power curtailments, furlough, shutdowns, organization events, and planned training days. The contractor workforce shall adhere to the Government curtailment or closure schedule and any costs associated with the contractor workforce during non-operational status shall not be charged to the Government. However, some contractor employees may be required to work during those periods and/or may be required to report to an alternate work site. These contractor employees will be identified by the Government. The Contracting Officer will

notify the contractor of the dates of curtailment and closure and of any contractor employees required to work during such events and whether telework may be an option. Additionally, the Contracting Officer may direct the contractor to view local television/radio stations for announcement or updates on any such delays or closures.

1.5.4.3 Contractor Support Hours: The Contractor shall provide support between the hours of Monday through Thursday from 7:00 a.m. to 5:30 p.m. (Mountain Time (MT), except U.S. Holidays identified in paragraph 1.5.3.1 above or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government directed facility closings. The Contractor shall maintain an adequate workforce at all times, for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. When hiring personnel, the Contractor shall keep in mind that the stability and continuity of the workforce is essential.

1.5.4.3.1 Contractor Work Plan: The Contractor shall prepare and maintain a Work Plan. The plan, as a minimum, shall identify regularly scheduled work (to include location, work to be completed, timeline, etc.) The Contractor's proposed Work Plan shall be submitted to the Contracting Officer via the COR for review within twenty (20) days after date of contract award A.005 The Government will review and either accept or return their comments to the Contractor within ten (10) days. The Contractor shall then have four (4) days to submit a Final Work Plan. Any proposed change to the accepted Final Work Plan is required to be resubmitted via the COR for review and acceptance by the Contracting Officer at a minimum thirty (30) days prior to implementation. The timeline noted above shall apply for review and acceptance for proposed changes.

1.5.4.3.2 Alternate Work Schedules (AWS) with Regular Day Off (RDO). To ensure compliance with Section 778.105 of Interpretative Bulletin, 29 CFR (CFR) Part 778, the contractor's base pay-week shall not exceed 40 hours; therefore, the start and end time of the pay week shall be adjusted accordingly. The contractor shall work the schedules IAW the paragraphs below.

1.5.4.4 WDTC civilian personnel currently works an AWS/compressed of four (10) hour days (Monday-Thursday). In a two-week pay period, the work schedule is depicted below:

Option 1:

	M	T	W	T	F	S	S
Week 1	10	10	10	10	Off	Off	Off
Week 2	10	10	10	10	Off	Off	Off

1.5.4.5 The Government has the option to temporarily or permanently change the hours and days of operation, or require additional shifts.

1.5.4.6 Contractors shall not work overtime on a Time and Materials (T&M) basis unless the COR/ACOR concurs with the necessity prior to it being worked. The contractor shall submit overtime requests one (1) week in advance if at all possible. In certain situations, as determined by the Government, overtime for T&M may be required with as little as a one-

hour advance notice. Last-minute overtime requirements will be handled on a case-by-case basis.

1.5.4.7 All overtime for contractor personnel will be authorized by the KO. The contractor shall submit overtime requests one (1) week in advance if at all possible. Upon KO approval, all overtime requests will be sent to the COR/ACOR. In certain situations, as determined by the Government, overtime may be required with as little as a one-hour advance notice. Last-minute overtime requirements will be handled on a case-by-case basis.

To accomplish mission requirements, the contractor may be required to provide services/technical expertise outside of normal duty hours, to include but not limited to, tests, repair of equipment failures, and/or documentation generation, which may include weekends, holidays, and at other times specified by the Government. Support may run sequentially or concurrently, day or night, extended workdays, weekend, shift, or in any combination.

1.5.4.8 The contractor is not required to perform work on Federal holidays, unless authorized by the Government. Federal holidays are listed in the following website https://www.opm.gov/policydata-oversight/pay-leave/pay-administration/fact-sheets/holidays-work-schedules-and-pay Federal holidays are also listed in section 1.5.3.1 of this PWS

1.5.4.9 Telework. For purposes of this contract, "telework" is defined as a work arrangement in which contractor personnel perform contract requirements at an alternative duty location. No diminishment of contract performance is allowed as a result of telework. Individual employee eligibility for situational telework should be determined on a case-by-case basis by the contractor.

"Situational telework" is telework performed on an occasional, one-time, or ad hoc basis. Contractors in positions not typically eligible for telework may be able to telework on a situational basis when feasible. Situational telework includes:

(a) Pandemic Health Crisis. Contractors may be asked to utilize situational telework to prevent the spread of disease, viruses, or other health risks.

(b) Weather/Safety/Unplanned Closure or Event. When adverse weather is anticipated or the organization/installation is closed, situational telework may be authorized.
(c) Other case-by-case situations where a contractor is temporarily unable to physically report to the normal duty station but are capable of performing their normal contract requirements from their telework location. This will be managed by the Contractor PM and reported to the Contractor Officer's Representative (COR) and the Technical Point of Contact (TPOC).

The KO is authorized to enable Contractor employees to telecommute (telework) and/or remote work upon coordination with the COR and subject to approval of telework implementation by the respective contracting office/staff element management team. Telework agreements shall be documented with the Contractor and signed by the Contractor employee

and the COR. The Contractor shall have written policy guidance established and provide adequate oversight of work products to ensure contract compliance while teleworking. Contractor employees shall have an approved telework agreement signed and coordinate with the COR prior to commencing telework. Telework arrangements on individual task orders shall commence with COR concurrence under the following:

• Teleworking on the part of the company is voluntary.

• Teleworking shall not result in an increase in contract price.

• Any equipment provided by the Government for telework purposes will be treated as GFP (See Attachments 1 – GFP List 1). After award, the contractor may be given the GFP listing with the serial number, make and model of all GFP that has been issued to incumbent employees.

1.5.4.9.1 Telework Plan. The contractor shall submit a telework plan to the COR and KO for approval before any situational telework is authorized. The Plan should address the following:

(a) Contract positions eligible for situational telework.

(b) Controls to ensure contract requirements are being met (e.g., performance-based requirements/metrics, mechanisms to address performance issues, etc.)

(c) Information security measures to ensure protection of information accessible from telework locations, including measures to protect work records from unauthorized disclosure.

(d) Compatibility and availability of telework enhancing office tools (e.g., Microsoft Teams, teleconference, etc.).

(e) Parameters of telework (e.g., maximum number of days/week for telework, mechanisms for ensuring face-to-face meetings when necessary, etc.).

(f) Any additional conditions relevant to contract performance under this contract.

1.5.5 Training:

1.5.5.1 The contractor shall develop a training program to ensure contractor personnel are trained to accomplish the requirements of this PWS. Mandatory training for contractor employees is identified within the section1.24 below. The contractor shall maintain records of all scheduled and completed training, which will be available for periodic inspections by the Government.

1.5.5.2 The Government will only reimburse the contractor one time for training in new technologies or unique skills that are required to perform a task of this PWS and not for employees' advancement. Duplication of training costs shall be considered an unallowable cost in accordance with FAR 31.201-6, Accounting for Unallowable Costs. Additionally, IAW

DoD Directive 8140.01, DOD 8570.01-M, and AR 25-2, IT personnel shall achieve the required baseline certification prior to contract award and obtain computing environment (CE) certification within 6 months of appointment to IT functions. All travel, training, and per diem requirements that are to be reimbursed to the contractor must be pre- approved by the KO (Contract Officer) and the COR/ACOR within 20 workdays prior to commencement of training/travel. Any retraining needed due to contract employee departure will be at the contractor's expense. In addition, copies of training certificates shall be available upon request by the COR/ACOR as proof of training completion prior to reimbursement, as required.

1.5.5.3 The contractor shall cross-train employees through on-the-job-training during duty hours. On the effective date of the contract, the contractor shall provide a list depicting names of the primary and alternate for each functional area.

1.5.6 Industry Certifications.

1.5.6.1 INFORMATION ASSURANCE CONTRACTOR TRAINING AND CERTIFICATION (JAN 2008)

1.5.6.1.1 The Contractor shall ensure that personnel accessing information systems have the proper and current information assurance certification to perform information assurance functions IAW DoD 8570.01-M , Information Assurance Workforce Improvement Program and the new DoDD 8140.03 Cyberspace Workforce Qualification & Management Program. The Contractor shall meet the applicable information assurance certification as well as new cyber work force qualifications & management requirements, including:

DoD-approved information assurance workforce and/or cyberspace workforce qualification & management certifications appropriate for each category and level as listed in the current version of DoD 8570.01-M and appropriate operating system certification for information assurance; as well as DoDD 8140.03 cyberspace workforce qualification & management technical positions as required currently by DoD 8570.01-M being superseded by DoDD 8140.

The Contractor shall provide information system authorization and information assurance support. Contributions to system authorization and information assurance support include but are not limited to: leading the creation of A&A packages, system security plans, Plan of Actions and Milestones (POAMs), privacy assessments, data categorizations, and ATO artifacts. The Contractor shall collaborate directly with Enterprise and Research Information Systems Security resources to deliver quality artifacts aligned with the Risk Management Framework and industry best practices mapping documented security requirements to both planned and realized security controls. The Contractor shall deliver an information assurance wellness plan identifying missing artifacts and gaps in content within existing artifacts targeting the remediation and improvement of the lab's adherence to binding directives, regulations, and the Risk Management Framework. The Government shall review the wellness plan, provide feedback, and prioritize initiatives for artifact remediation. The Contractor shall remediate system authorizations and information assurance artifacts in alignment with the agreed upon IA wellness plan.

1.5.6.1.2 Upon request by the Government, the Contractor shall provide documentation supporting the information assurance certification status of personnel performing information assurance functions.

1.5.6.1.3 Contractor personnel who do not have proper and current certifications shall be denied access to DoD information systems for the purpose of performing information assurance functions.

1.5.6.2 Cybersecurity/Information Technology (IT) Certification. Per DoD 8140.01, DoD 8570.01-M, and AR 25-2, contractor employees, (to include new employees), supporting cybersecurity/IT functions shall be appropriately baseline certified prior to beginning work on the contract. Appropriate CE certifications must also be achieved if performing duties requiring CE certifications IAW DoD 8570.01-M. The COR/ACOR/TM will ensure all contractor personnel are certified IAW DOD and DA regulations. The DOD organization receiving services may provide additional training on local or system procedures.

1.5.6.3 Cybersecurity Training and Certification. For acquisitions that include cybersecurity functional services for DoD information systems, or that require any appropriately cleared contractor personnel to access a DoD information system to perform contract duties, the requiring activity is responsible for providing to the KO all necessary cybersecurity requirements, including the appropriate DoD-approved contract clauses, system access requirements, and any required personnel security clearances and information assurance (IA) certification levels.

1.5.6.3.1 Verification of all contractor employees and associated subcontractor employees completing the DoD Cyber Awareness Challenge Training (formerly Information Assurance Awareness Training) before issuance of network access, and annually thereafter. IAW DoD 8140.01, DoDD 8570.01 and AR25-2, all contractor personnel supporting Cybersecurity functions shall complete appropriate training within specified timelines and attain and maintain the required Information Technology (IT) and cybersecurity training certifications.

1.5.6.3.2 A list of information assurance functional responsibilities for DOD information systems by category (e.g., technical or management) and level (e.g., computing environment, network environment, or enclave); and

1.5.6.3.3 The information assurance training, certification, certification maintenance, and continuing education or sustainment training required for the information assurance functional responsibilities.

1.5.6.3.4 After contract award, the requiring activity is responsible for ensuring that the certifications and certification status of all contractor personnel performing information assurance functions as described in DOD 8570.01-M, Information Assurance Workforce Improvement Program, as well as DoD 8140.01 are in compliance with the manual and are identified, documented, and tracked.

1.5.6.3.5 The responsibilities specified in this section apply to all DOD information assurance duties supported by a contractor, whether performed full-time or part-time as additional or

embedded duties, and when using a DOD contract, or a contract or agreement administered by another agency (e.g., under an interagency agreement).

1.5.6.3.6 See PGI 239.7102-3 for guidance on documenting and tracking certification status of contractor personnel, and for additional information regarding the requirements of DOD 8570.01-M & DoD 8140.01

1.5.7 Place of Performance. The work to be performed under this contract will be performed at the Government facilities located at Dugway ,Utah.

1.6 Security Requirements: The following information is provided on security related matters.

1.6.1 The contractor shall comply with the requirements identified in Contract Security Classification Specification (DD Form 254) (Attachment 3).

1.6.1.1 The contractor shall possess a Secret (S) facility clearance as prescribed by DD Form 254.

1.6.1.2 All contractor employees shall be required to have a Tier 3 (T3)/ Tier 3R (T3R) or higher level investigation completed and possess a minimum of a SECRET clearance. Contractor personnel shall not report to work until, at a minimum, an interim SECRET clearance is granted. All IT contractor personnel who administer classified systems and/or networks or are designated by the government as having critical- or special-sensitive duties,, shall possess a favorable Tier 5 (T5) / Tier 5R (T5R) and shall be SCI eligible. Contractor personnel who hold a clearance may require access to Restricted Data (RD), Critical Nuclear Weapon Design Information (CNWDI), Foreign Government Information (FGI), Formally Restricted Data (FRD), Alternative or Compensatory Control Measures (ACCM) and North Atlantic Treaty (NATO) Information. Contractor personnel may be required to be indoctrinated into SCI to provide support inside an ATEC Sensitive Compartmented Information Facility (SCIF). Additional details on SCI work are contained in the SCI Addendum to the DD Form 254. Contractor personnel, whose security clearances are suspended, shall not be permitted to work under this contract until their security clearance is reinstated.

1.6.1.3 The contractor shall submit a visit authorization request for all contractor employees performing on this contract in the Dugway Proving Grounds Visitor Control Center located at dpgvcc@army.mil . The request will be sent through the COR utilizing the current visitor request provided by the DPGVCC. This *DATA IS REQUIRED BY THE PRIVACY ACT OF 1974 Authority: Department of Defense Manual 1000.13, AR 190-13 Principal Purpose: Information is required in order to conduct a check of the NCIC-III and the TSDB on non DOD-affiliated visitors in order to determine if the person requesting unescorted access presents a potential threat to the good order, discipline, or health and safety on the installation. Routine Uses: This document will be used for informational purposes and deleted after processing. Disclosure: Disclosure of the information is voluntary. However, failure to disclose or providing false information could result in being denied access to the installation.

1.6.1.4 All contractor personnel requiring access to the LAN and other IT systems shall be required to have a favorable T3/T3R or higher level investigation completed, the cybersecurity training completion must be recorded in the Army Training and Certification Tracking System (ATCTS) (https://at us.army.mil) database, and Acceptable Use Policy (AUP) must be signed. In accordance with AR 25-2, contractor personnel without a security clearance shall not have access to IT systems.

1.6.1.5 Contractor personnel who have not received the required security clearance shall not be granted access to classified information nor allowed to perform classified work.

1.6.1.6 All contractor employees shall be registered in the Defense Enrollment Eligibility Reporting (DEERS) System. Once the registration is completed, contractor employees requiring computer access shall be required to apply for a Common Access Card (CAC) using the Mission Partner Identity, Credentialing, and Access Management (MP-ICAM) at the following web address: https://mpartnerspnrweb.dmdc.osd.mil/mpartnerspnrweb/app/ . Once that is completed, the COR/ACOR will enter the required information in Mission Partner Identity, Credentialing, and Access Management (MP-ICAM) and then the contractor employee can report to the local badging office to be issued a CAC

1.6.1.7 Approximately 10% of help desk employees shall support Special Access Programs (SAP). The contractor shall ensure that investigative requirements for personnel supporting SAPs are submitted IAW the contract and AR 380-381. Personnel supporting SAPs shall be subject to random counter-intelligence polygraph examinations. Employees who refuse to sign an agreement to undergo a polygraph examination cannot access SAP information. The costs for travel and examination will be reimbursed to the contractor under the cost category entitled ODCs.

1.6.1.8 Contractor personnel granted a TS clearance or access to SAP information shall make a verbal attestation and execute an Attestation Statement IAW memorandums from the Secretary of Defense, dated February 5, 1999, and the Office of the Assistant Secretary of Defense, dated February 9, 1999. The Government security personnel will witness the execution of the oral and written attestations and maintain the Attestation Statements for contractor personnel.

1.6.1.9 The contractor shall request the appropriate personnel security investigation based upon the position sensitivity IAW DoD 5200.02. The investigations must be favorably completed prior to employees being permitted access to information systems and being placed in an IT position. In accordance with AR 25-1, all employees requesting access to the automated information systems shall sign an AUP. The contractor shall prepare a list identifying the position sensitivity designations and submit to the designated Government Information Systems Security Manager (ISSM) and the Government Security Manager during transition-in.

1.6.1.10 The contractor shall monitor all adverse information on contractor personnel, such as security violations, arrests, and bankruptcy. The contractor shall inform the Government Security Manager of any denials, suspensions, or revocation of security clearances.

Employees may be denied access to restricted areas (RA) or denied access to classified information.

1.6.1.11 Upon entry on the installation, all vehicles and personnel are subject to search and seizure of contraband and/or unauthorized Government property IAW AR 190-5 and AR 190-13. All contractor personnel will comply with the requirements of the installation for entry, exit, and internal control of personnel, materials, and vehicles.

1.6.1.12 Government Identification Badges. The contractor shall reference section 1.6.7 for CAC issuance as identification badges to be utilized while on installation. Contractor employees shall yield the CAC to the COR upon termination or permanent leave of the contractor.

1.6.1.13 Foreign nationals/immigrant aliens are not authorized to work on this contract. However, when foreign nationals/immigrant aliens visiting any Army installation or entering designated buildings, the contractor shall comply with AR 380-10 and alert the Government Foreign Disclosure Officer to gain approval prior to the visit. Additionally, all SCIFs are totally off limits to foreign nationals/immigrant aliens.

1.6.1.14 The contractor shall be responsible for safeguarding all Government information and property provided for contractor use. The contractor shall safeguard information and materials designated as classified, sensitive but unclassified, Controlled Unclassified Information (CUI), For Official Use Only(FOUO), OPSEC sensitive, Personally Identifiable Information(PII), and Privacy Act Information IAW applicable directives. Where contractor personnel have access to any Government system, they will not disclose any information to any person or entity without explicit authority to do so.

1.6.1.15 The Government may task the contractor, in writing, to design, develop, maintain, or operate a system of records on individuals that must be operated in conformance with the Privacy Act of 1974 (5 USC 552a) and OMB Circular No. A-108. The Government will identify these technical requirements to the contractor, as needed.

1.6.1.16 Proprietary Data Exclusions.

1.6.1.16.1 Contract performance may require the contractor to access data and information proprietary to a Government agency, another Government contractor, or of such a nature that its dissemination or use other than as specified by this contract, or applicable contract, would be adverse to the interests of the Government or others. Neither the contractor, nor contractor personnel, shall divulge nor release data or information developed or obtained during contract performance, except to authorize Government personnel, or upon written approval of the KO. The contractor shall not use, disclose, or reproduce such data, which bears a restrictive legend, except as authorized.

1.6.1.16.2 For the purpose of this requirement, proprietary data does not include data which is a) known to the receiving party at the time of disclosure, b) in the public domain, or c) disclosed to the contractor from another source.

1.6.1.17 The contractor shall immediately report the loss or possible compromise of classified information or material to the Government Security Manager IAW DODM 5200.01-V3, AR 380-5, and ATEC Reg 380-5/ATC Reg 380-5/OTC Policy Memo G6- 2, Cybersecurity for WDT

1.6.1.18 If required and not identified in Section 1.14, the contractor shall develop and implement a Government approved security education program to ensure contractor personnel understand and are familiar with security requirements.

1.6.1.19 Physical Security. The Government will provide access control guidance to the contractor within 30 calendar days following award. From this guidance, the contractor shall develop internal processes and procedures IAW DOD 5220.22-M and local procedures and guidance. This Contractor Access/Property Control Plan shall be provided to the KO within 60 calendar days after award for review and approval ***(CDRL A001)***. The plan shall describe and discuss in detail the contractor's requirements and practices for the protection of all Government-furnished property, how inventories will be conducted, and how equipment located in facilities will be protected.

1.6.1.20 All materials produced by the contractor, which will be disseminated outside of WDTC, will be subject to a review by designated Government OPSEC and Security personnel prior to release. This includes all written (hard copy) and electronic materials produced, such as organizational press releases and marketing materials.

1.6.1.21 No news release (including photographs and films, public announcements, denial or confirmation of same) on any part of the subject matter of this contract or any phase of any program shall be made without the prior written approval of the WDTC Public Affairs Officer (PAO).

1.6.1.22 Disclosure of information regarding operations and services of the activity to persons not entitled to receive it or failure to safeguard any classified information that may come to the contractor (or any persons under the contractor's control) in connection with contract performance, will subject the contractor, contractor's agent, or employees, to criminal liability under 18 USC, 793 and 798. Neither the contractor nor the contractor's employees shall disclose or cause to be disseminated any information concerning the operations of the activity which could result in or increase the likelihood of the possibility of a breach of the activity's security or interrupt the continuity of its operations. The contractor shall direct all inquiries, comments, or complaints to the KO arising from matters observed, experienced, or learned as a result of or in connection with the performance of this contract.

1.6.1.23 The contractor shall not use any information processing equipment in its possession for the purpose of processing or transmitting classified information without the written permission of the KO.

1.6.1.24 Cybersecurity

1.6.1.24.1 The contractor shall adhere to cybersecurity policies and procedures for each assigned task and area of responsibility.

1.6.1.24.2 The contractor shall support cybersecurity efforts to achieve and maintain an appropriate level of confidentiality, integrity, authentication, non-repudiation, and availability that reflects a balance among the importance and sensitivity of the information and information assets, documented threats and vulnerabilities, the trustworthiness of users and interconnecting systems, the impact of impairment or destruction to the DOD information system, and cost-effectiveness. By way of example, this may include producing and maintaining network diagrams, hardware and software lists for networks and standalone units, user lists, participating in scheduled system security evaluations, audits and reviews, etc.

1.6.1.24.3 All contractor employees must be registered in the ATCTS prior to accessing any Government information system. To obtain access, all required initial training shall be completed and then annually thereafter or as directed by the Government.

1.6.1.24.4 The contractor shall assure all products and solutions developed and administered are compliant with DOD and Army cybersecurity guidelines

1.6.1.24.5 The contractor shall ensure that all personnel, processes, and solutions adhere to all cybersecurity requirements for federal, DOD and Army IT IAW current policies, procedures, and statutes, including, but not limited to: The Clinger-Cohen Act; The National Security Act; National Security Telecommunications and Information Systems Security Policy No. 11; Federal Information Processing Standards; DODI 8500.01; DODD 8570.01; DOD 8570.01-M; DODI 8510.01, DoDD 8140.01; Security Technical and Implementation Guides; AR 25-1; AR 25-2; etc.

1.6.1.25 The contractor shall have access as needed to Government facilities IAW AR 190-51 and other local regulations. The contractor shall develop and implement procedures to ensure that metal and electronic keys received from the Government are accountable, controlled, and safeguarded IAW regulations above. The contractor shall:

1.6.1.25.1 Receive a marked set of keys to facilities and equipment from the Government.

1.6.1.25.2 Be responsible for keys provided to the contractor by the Government. The contractor shall establish and implement methods of ensuring that keys used for facility access issued to the contractor by the Government are not lost or misplaced and are not used by unauthorized persons. Keys issued to the contractor by the Government shall not be duplicated unless approved by the COR/ACOR.

1.6.1.25.3 Report any occurrence of duplicated, misplaced, or lost keys to the COR/ACOR within one duty day after discovery of occurrence and submit a written report to the KO/COR/ACOR by close of business (COB) the next duty day. The written report shall provide complete details relating to the duplicated, misplaced, or lost key.

1.6.1.25.4 Re-key or replace the affected lock or locks IAW the Government's direction. The contractor shall reimburse the Government for the replacement of locks or re-keying and all GFP lost or stolen as a result of keys being duplicated, misplaced, or lost by contractor personnel.

1.6.1.25.5 Prohibit the use of keys issued by the Government by any persons other than the contractor's designated employees. It is also the responsibility of the contractor to prohibit the opening of locked areas by contractor employees to persons other than those who are specifically authorized in the performance of assigned work areas.

1.6.1.26 Anti-terrorism and OPSEC contract requirements.

1.6.1.27 Access, General Protection, and Security Policy and Procedures. This standard language text is for contractor employees with an area of performance within an Army-controlled installation, facility, or area. Contractor primes and associated subcontractor employees shall comply with applicable installation, facility, and area commander installation and/or facility access and local security policies and procedures (provided by Government representative). The contractor shall also provide all information required for background checks to meet installation access requirements to be accomplished by installation Provost Marshal Office, Director of Emergency Services, or Security Office. Contractor workforce must comply with all personal identity verification requirements as directed by DOD, Headquarters Department of the Army (HQDA), and/or local policy. In addition to the changes otherwise authorized by the changes clause of this contract, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in contractor security matters or processes.

1.6.1.28 The contractor shall comply with WDTC's OPSEC Plan which will be provided to the contractor within the 60 calendar day transition-in period. The contractor shall identify an individual as the OPSEC Coordinator within the 60 calendar day transition-in period who shall be OPSEC Level II certified per AR 530-1.

1.6.2 Security Program. Contractor personnel performing work under this contract must have a S- Secret at time of the proposal submission, and must maintain the level of security required for the life of the contract. The security requirements are IAW with the DoD Contract Security Classification Specification (DD Form 254), which is currently accessible at the following link: http://www.dtic.mil/whs/directives/forms/eforms/dd0254.pdf

1.6.2.1 Personnel Security Clearance Requirements Contractor personnel performing work under this contract must have an active personnel security clearance at the S- Secret level in the Defense Information System for Security (DISS) at time of the proposal submission, and must maintain the level of security required for the life of the contract. The security requirements are IAW the DoD Contract Security Classification Specification DD Form 254. The Contractor shall ensure that Contractor employees and subcontractor employees performing services under this contract comply with FAR 52.204-2 Security Requirements when the employee has access to information classified "Confidential," "Secret," or "Top Secret." The Contractor shall ensure the employee complies with the DoD Security Agreement

(DD Form 441), and the NISPOM rule at 32 Code of Federal Regulation (CFR) Part 117, effective 24 Feb 2021. The NISPOM is the National Industrial Security Program Operating Manual to which contractors must implement and comply.

1.6.3 Installation Access. Access to U.S. installations, buildings and controlled areas is limited to personnel who meet security criteria and are authorized. Failure to submit required information/data and obtain required documentation or clearances will be grounds for denying access to U.S. installations, buildings and controlled areas. The Contractor shall ensure that any subcontractors used in performance of this contract complies with these requirements and that all employees, of both the Contractor and any subcontractor utilized by the Contractor, are made aware of and comply with these requirements.

The Contractor shall be aware of and comply with the requirements associated with Installation Access Control. The Government is not liable for any costs associated with performance delays due solely to a firm's failure to comply with Installation Access Control System (IACS) processing requirements.

The Contractor shall return installation passes to the issuing IACS office when the contract is completed or when a Contractor employee no longer requires access.

The Contractor shall immediately report suspicious activities to security personnel.

1.6.3.1 Installation Pass Log. The Contractor shall provide the Contracting Officer, via the COR, an Initial Installation Pass Log within three (3) calendar days after contract award A.006. The log must at a minimum contain the following information: Name, Badge number, Phone, area & reason for visit, Sponsor name and information. The log shall be updated as employees are added or removed. The Updated Installation Pass Log shall be current and available at any time upon request by the Government and submitted to the COR within five (5) days after any changes to the log A.008.

1.6.3.2 Individual Termination or Expiration of Employment. The Contractor shall collect the installation access passes the same day employment of an individual has expired or has been terminated and shall return them to the issuing office *within 2 days. A.009*

1.6.3.3 Contract Termination or Cancellation. Upon termination or cancellation of this contract, the Contractor shall collect all outstanding installation access passes and return them to the issuing office within 5 days. A.011

1.6.3.4 Common Access Cards (CAC) and CAC Log. The Contractor shall provide the following information: Last, First and Middle Names, government issued personal identifier (e.g. Social Security Number, Federal Identification Number, or Tax Identification Number), date of birth, primary email address (this email address will be used to contact the individual) and any other necessary information required to obtain a CAC or installation access card, to the COR within 2 days after award. A.012 The Contractor shall ensure safeguarding of Personally Identifiable Information (PII) and comply with requirements under 1.25.5.

Government issued access badges shall not be worn outside designated facilities where visible to the general public.

The Contractor shall provide a CAC log within the first 30 calendar days after contract award and within five (5) days after changes have been made A.012 (unless circumstances require otherwise and as directed by the Contracting Officer). The COR will provide format and content for the log during the post award meeting. Note - CACs are Government property and must be accounted for.

1.6.4 Background Checks. The contractor shall also provide all information required for background checks to meet installation access requirements to be accomplished by installation Provost Marshal Office, Director of Emergency Services, or Security Office. Contractor workforce must comply with all personal identity verification requirements as directed by DOD, Headquarters Department of the Army (HQDA), and/or local policy. In addition to the changes otherwise authorized by the changes clause of this contract, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in contractor security matters or processes.

1.6.4.1 U.S. Citizen. The Requiring Activity Manager will determine the extent of background checks required. The Contractor employee may begin performance of the contract after receiving a favorable local background check. The Contractor agrees to replace the employee should results of the background check, if required, be unfavorable as determined by the Requiring Activity Manager. The Contractor's replacement of the employee with the unfavorable background check shall be within a timeframe provided by the Requiring Activity Manager. The Contractor shall also replace employees whose background check, during their tenure of employment, renders them with an unfavorable local or stateside background check, as determined by the Requiring Activity Manager. The Contractor shall forward a copy to the Contracting Officer via the COR and the Requiring Activity Manager of each favorable background check within 1 day of receipt by the Contractor, identifying such with the appropriate contract number A.013 The Contractor shall forward a copy to the Contracting Officer via the COR and the Requiring Activity Manager of each unfavorable background check within 2 days of receipt by the Contractor, identifying such with the appropriate contract number A.014 When the Government awards a non-personal services contract directly to an individual, the failure of the individual to provide a favorable background check would be grounds for termination.

1.6.4.2 Local Nationals and Third Country Nationals. As a minimum prior to beginning performance, Contractors employing local national and third country nationals shall furnish the Contracting Officer via the COR and the Requiring Activity Manager current documents required for working on a US installation, no later than no later than five (5) days after contract award. A.015 Forwarding correspondence from the Contractors shall identify the associated contract number.

1.6.5 Physical Security. The Contractor shall safeguard all Government equipment, information, and property provided for Contractor use. Contractor personnel shall adhere to facility security policies and restrictions. At the close of each work period, Government

facilities, equipment, and materials shall be secured IAW the Army Physical Security Program (AR 190-13).

1.6.6 Operations Security (OPSEC) Requirements. Anti-terrorism and OPSEC contract requirements. The contractor must complete ATEC/local OPSEC training initially upon start of work and again annually. The Contractor may also possibly be required to complete additional OPSEC requirements, as directed by DOD. Initial OPSEC training may be provided to the contractor by the ATEC OPSEC officer or other security personnel within 30 days of start of work. Annual training is included in the Security Education and Awareness Training (SETA) and is tracked via ATEC Tracking Training Module (ATTM).

1.6.6.1 The contractor shall comply with WDTC's OPSEC Plan which will be provided to the contractor within the 60 calendar day transition-in period. The contractor shall identify an individual as the OPSEC Coordinator within the 60 calendar day transition-in period who shall be OPSEC Level II certified per AR 530-1.

1.7 Key Control. The Contractor shall establish and implement methods of making sure all keys issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. NOTE: All references to keys include key cards. No keys issued to the Contractor by the Government shall be duplicated. The Contractor shall develop procedures covering key control that shall be included in the Contractor's Security Plan A.016 and the Quality Control Plan. Such procedures shall include turn-in of any issued keys by personnel who no longer require access to locked areas. The Contractor shall immediately report any incidents of lost or duplicate keys to the Contracting Officer. In the event keys, other than master keys, are lost or duplicated, the Contractor shall, upon direction of the Contracting Officer, re-key or replace the affected lock or locks; however, the Government, at its option, may replace the affected lock or locks or perform re-keying. When the replacement of locks or re-keying is performed by the Government, the total cost of re-keying or the replacement of the lock or locks shall be deducted from payment due to the Contractor. In the event a master key is lost or duplicated, all locks and keys for that system shall be replaced by the Government and the total cost deducted from the payment due to the Contractor. The Contractor shall prohibit the use of Government issued keys by any persons other than the Contractor's employees. The Contractor shall prohibit the opening of locked areas by Contractor employees to permit entrance of persons other than Contractor employees engaged in the performance of assigned work in those areas, or personnel authorized entrance by the Contracting Officer. The Contractor shall establish and implement methods of ensuring that all lock combinations are not revealed to unauthorized persons. The Contractor shall ensure that lock combinations are changed when personnel having access to the combinations no longer have a need to know such combinations. These procedures shall be included in the Quality Control Plan.

1.7.1 The contractor shall have access as needed to Government facilities IAW AR 190-51 and other local regulations. The contractor shall develop and implement procedures to ensure that metal and electronic keys received from the Government are accountable, controlled, and safeguarded IAW regulations above. The contractor shall:

1.7.1.1 Receive a marked set of keys to facilities and equipment from the Government.

1.7.1.2 Be responsible for keys provided to the contractor by the Government. The contractor shall establish and implement methods of ensuring that keys used for facility access issued to the contractor by the Government are not lost or misplaced and are not used by unauthorized persons. Keys issued to the contractor by the Government shall not be duplicated unless approved by the COR/ACOR.

1.7.1.3 Report any occurrence of duplicated, misplaced, or lost keys to the COR/ACOR within one duty day after discovery of occurrence and submit a written report to the KO/COR/ACOR by close of business (COB) the next duty day. The written report shall provide complete details relating to the duplicated, misplaced, or lost key.

1.7.1.4 Re-key or replace the affected lock or locks IAW the Government's direction. The contractor shall reimburse the Government for the replacement of locks or re-keying and all GFP lost or stolen as a result of keys being duplicated, misplaced, or lost by contractor personnel.

1.7.1.5 Prohibit the use of keys issued by the Government by any persons other than the contractor's designated employees. It is also the responsibility of the contractor to prohibit the opening of locked areas by contractor employees to persons other than those who are specifically authorized in the performance of assigned work areas.

1.8 CONTRACTOR MANAGEMENT AND ADMINISTRATION

1.8.1 The contractor shall provide personnel with the necessary skills to perform the required support and services of this PWS. The contractor shall ensure that all personnel employed against this effort are properly trained and meet the minimum qualifications in Attachment 6 - Position Qualifications for their job position prior to employment. Personnel performing work are not considered employees of the Government.

1.8.2 The Contractor shall maintain records of training, qualifications, and applicable certification or licenses as required and shall ensure that the employees remain fully qualified. The Contractor shall provide records, when requested, to the COR for evaluation in compliance with this PWS.

1.8.3 The Contractor shall perform Program Management and provide an on-site Program Manager (PM). The PM shall be the central point of contact with the Government for performance of all work under this Contract Agreement. The Contractor shall notify the COR) when the PM is absent and designate an acting alternate PM. The PM and any individuals designated to act in that capacity shall have full authority to bind the contractor for prompt action on matters pertaining to execution of the Contract Agreement to the Contracting Officer (KO) and COR. In addition, on-site management must be available 24 hours to respond to any Government concern or situation. The on-site management's responsibility includes coordinating work schedules, travel requirements, reporting, accountability, conduct, and performance of Contractor personnel.

1.8.4 Direct and DPG Overhead Charges. The Reimbursable Labor Rate (RLR) is an ATEC Commanding General initiative that specifies an 70/30% direct labor RLR goal for ATEC and DPG requirements to sustain affordability. In working to that goal, ATEC contracts shall include mechanisms to support attainment to the RLR goal. Accordingly, cost measures, cost expectations, and putting cost performance requirements in the contract ensures that the contractor is held accountable for managing their workforce in an affordable and lean way. ATEC cannot afford to keep contractors on staff if they are not being fully work loaded and the RLR is a direct correlation to the affordability level that DPG can pay for. US Army and ATEC funds are realigning. DPG must ensure it is operating within the realignment and ensure it as an efficient contractor workforce – with the proper right sized contract. To assist ATEC's management and 70/30% reimbursement goal attainment, the Contractor shall provide, starting 90 days after award and quarterly thereafter, a quarterly Reimbursable Labor Report identifying the cost codes, labor hours and labor categories billed to date ***(see CDRL A008)***

1.8.5 The contractor shall be in compliance with all Army, federal, state, local, ATEC and WDTC regulations, policies, and procedures. Compliance shall be required where services are provided under this contract, as they apply to the following: IT, cybersecurity, information security, operational security (OPSEC), physical security, personnel security, public affairs, and foreign disclosure and contact.

1.9 Post Award Conference/Periodic Progress/Performance Evaluation Meetings. The Contractor shall attend any post award conference convened by the contracting activity or contract administration office in accordance with FAR Subpart 42.5. The Contracting Officer, COR, and other Government personnel, as appropriate, may meet periodically (and at least quarterly) with the Contractor to review the Contractor's performance. At these meetings the Contracting Officer will apprise the Contractor of how the Government views the Contractor's performance and the Contractor shall apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the Government.

1.9.1 The Contractor shall attend, participate in, and furnish input to scheduled and unscheduled meetings, conferences, and briefings that relate to the functions and services herein as required by the Government to provide effective communication and impart necessary information. The Contract Manager or designated representative shall attend meetings as requested by the Government. Meeting attendees shall at times include Contractor managerial, supervisory, and other personnel knowledgeable of the subject matter. Meetings may start or end outside of regular duty hours.

1.9.2 Performance Evaluation Meetings. A contractor-designated representative shall meet with the COR at least once every two (2) weeks during the first quarter of the contract to discuss performance. Thereafter, the COR will schedule meetings as determined necessary. These meetings shall be attended by the appropriate personnel, during duty hours, and at no additional cost to the Government. The contractor shall provide for receipt and coordination of this contract, rapid resolution of questions and other issues associated with this contract,

continuous maintenance and repair of instrumentation and equipment, coordination and accomplishment of administrative and logistical support service, and continuity in the knowledge and application of safety, security, environmental, health, and operating regulations. The contractor shall meet workload demands, when ordered by the KO through a contract, which will vary depending on workload.

1.10 Contracting Officer's Representative (COR): Refer to Part 2 of this PWS for the definition of a COR. As determined by the Contracting Officer, a COR will be appointed and identified by letter of designation, a copy of which will be provided to the Contractor by the Contracting Officer. The designation letter states the responsibilities and limitations of the COR, especially with regard to changes in cost or price, estimates, or changes in delivery dates. The COR is not authorized to change any of the terms and conditions of the resulting order. The COR monitors all technical aspects of the contract and assists in contract administration. The COR is not authorized to obligate the Government. If the work is not written in the contract, the COR is not authorized to request new work. The COR is authorized to perform the following functions: assure that the Contractor performs the technical requirements of the contract, perform inspections necessary in connection with contract performance, maintain written and oral communications with the Contractor concerning technical aspects of the contract, issue written interpretations of technical requirements, including Government drawings, designs, specifications, monitor Contractor's performance and notifies both the Contracting Officer and Contractor of any deficiencies, coordinate availability of Government property, and coordinate site entry of Contractor personnel.

1.11 Key Personnel: Key personnel are those contractor personnel considered to be essential to the successful performance of the requirements. This includes certain skilled/experienced professional and/or technical personnel as designated by the Government. Key personnel for this contract are the Program/Contract Manager (PM). Unless otherwise approved by the WDTC Chief Information Officer (CIO), the PM shall be physically present at DPG, UT during normal duty hours and perform overall management of the contract. The Program Manager shall ensure that all work on this contract complies with contract terms and conditions. Key personnel shall be current full time employees and shall provide statements of qualifications. The Contractor shall provide a Program/Contract Manager who shall be responsible for the performance of the work. The name of this person and an Alternate Program/Contract Manager, who shall act for the Contractor when the Program/Contract Manager is absent, along with a Curriculum Vitae (CV) for each of these individuals, shall be provided in writing to the Contracting Officer no later than five (5) days after contract award A.017. The Contract Manager and Alternate Contract Manager shall have full authority to act for the Contractor on all contract matters relating to daily operation of this contract. The Contract Manager or Alternate Contract Manager shall be available between 0700-17:30MST, M-Th. Qualifications for all key personnel are listed below:

a. Contract Manager and Alternate Contract Manager: The CV provided by the Contract Manager and Alternate Contract Manager must demonstrate successful completion of 24 semester hours in mathematical, engineering, and quantitative analysis courses; 15 or more years cost analysis experience; and familiarity with Defense Department Data Sources (e.g. cost and software data reporting, Earned Value Management (EVM), etc. or must

demonstrate a minimum of 5 years' experience within the past 10, working as a Program Manager.

b. Quality Control Manager: The Quality Control Manager must demonstrate a minimum of 5 years' experience, within the past 10, working as a Quality Control Manager.

c. Systems Administrator: The Systems Administrator must demonstrate a minimum of 5 years' experience, within the past 10, working as a Systems Administrator.

d. Special Qualifications: The Contractor shall ensure all employees possess and maintain current Information Assurance Technician (IAT) Level I professional certification during the execution of this contract.

1.11.1 Key personnel positions shall not be vacant longer than 45 calendar days, unless the KO grants an extension.

1.11.2 Personnel. At a minimum, all contractor personnel shall have high school diploma or equivalent. All contractor personnel shall be able to speak, read, write, and understand English proficiently and be a U.S. citizen. All contractor personnel must be proficient in the use of computers and software required to perform work (e.g., Microsoft Office software). Also, on contract start date, all personnel shall possess the required training, certification(s), and experience IAW Attachment 6 – Position Qualifications.

1.11.2.1 Prior to starting the process to backfill for a vacated position, creating a new position, or increasing labor support, the contractor shall provide the following information to the KO and COR to ensure that the additional support is necessary to support the PWS requirements and that sufficient space is available at the Government site:

1. Contract Number/Contractor Name;
2. Contract Period of Performance and current year of performance;
3. Labor category and level;
4. Number of employees to be hired and hourly rate;
5. Relevant PWS Task Area(s) employee will support;
6. Description of duties;
7. If backfill, name of employee who departed and date position was vacated; If new contractor position or additional labor support, identify begin and end date of new requirement (NOTE: the begin date is needed but the end date can be indefinite.);
8. If new contractor position or additional labor support, identify if additional space at Government facility will be required;
9. If new contractor position or additional labor support, identify if a contract modification has or will be executed to support the additional support;
10. If no contract modification will be executed, explain why additional personnel are required above that identified in the contract as awarded; and Government technical POC name and phone number (if other than relevant COR).

1.11.2.2 In emergency situations and cases of adverse action where five (5) calendar days' notice is not possible, the contractor shall submit the change in writing to the COR not later than 24 hours after the change is implemented.

1.11.2.3 Contractor personnel shall practice high standards of personal hygiene and maintain a clean, neat appearance while on duty. Additionally, contractor personnel shall comply with the dress code applicable for the facility and location being supported.

1.11.2.4 The contractor shall manage its workforce to ensure that excessive turnover does not interfere with mission requirements. The contractor shall track and analyze hiring and termination trends as well as the number of personnel employed by labor category, by location, and by cost center. The contractor shall ensure that all vacancies for non-key personnel are filled within 45 calendar days of notification of the requirement. Any issues outside of the contractor's control that may delay bringing individuals on board past the 45-calendar day requirement, such as backlog at Defense Security Services, shall be brought to the COR's attention one week prior to the 45 calendar-day expiration date.

1.11.2.5 The contractor shall ensure that all contractor employees return all Government identification/security badges and permits issued by the Government at the completion of their employment. All Government identification/security badges shall be returned to the Government on the employee's last day of employment with the Government. If departure is after normal business hours, the contractor Facility Security Officer will collect the badges on the last day of employment and turn the badge(s) into the Government Security Manager the next workday. Keys will be returned to the issuing key custodian prior to the employee departing the installation. In addition, contractor personnel briefed on Special Access Programs (SAPs) shall contact Government Security personnel to complete a termination briefing prior to termination of employment. The contractor shall develop in/out-processing procedures and checklists to be used by all contractor employees and shall be completely filled in and signed by designated individuals below on the first and last days of employment. The contractor shall develop an employment/installation clearance procedure and checklist to ensure that an employee has turned in all Government identification/security badges, Government property, and keys before leaving employment on the installation and access to the local area network (LAN)/email has been cancelled. At a minimum, the in/out-processing checklist will contain signature blocks for these Government employees: COR/ACOR; Technical Monitors (TMs); WDTC Security Manager; and the designated IT LAN representative; to ensure contractor employees have cleared all aspects of employment at the various locations. Contractor personnel shall not begin or end employment without a completed and signed checklist.

1.12 <u>Identification of Contractor Employees</u>:
All contractor personnel shall be required to identify themselves as such to avoid creating an impression that they are Government employees. All Contractor personnel attending meetings, answering Government telephones, and working in other situations where their Contractor status is not obvious to third parties must identify themselves, to include proper marking of signature blocks in correspondence, to avoid creating an impression in the minds of members of the public that they are Government officials. Contractor personnel shall also

ensure all documents or reports produced by contractors are suitably marked as contractor products or that contractor participation is appropriately disclosed.

1.12.1 Contractor workspace (staging site, on-site office, desk or work area, etc.) shall contain a sign signifying the space is occupied by Contractor employee(s) to ensure that Government employees and the public know that they are not Government employees. The proposed sign shall be submitted to the Contracting Officer via the COR for review and acceptance (10) calendar days after contract award A.018 Workspace sign location shall be coordinated with the COR. Contractor employees shall identify themselves by name and company affiliation when answering the telephone, presenting briefings, conducting or attending meetings, and seminars. All Contractor correspondence (written, facsimile, and email display) shall include their company name. Requirements for Contractor vehicles is addressed under Part 4 paragraph 4.4.

1.12.2 Contractor Identification Badges(if required by contractor): Contractor personnel shall be easily identifiable through the display of badges IAW Contractor Identification (AE Reg. 27-715). The Contractor (to include subcontractors) shall provide each of their employees an easily readable identification badge. The badge must include the employee's name, the contractor's company name, the functional area of assignment, and a recent color photograph of the employee. Companies with U.S. Government contracts will require their employees to wear these badges visibly when performing work at Government workplaces unless this would be impractical because of mission or safety considerations. The Contractor shall collect all ID Badges upon completion of the contract or termination of employee. A listing of issued ID cards shall be furnished to the Contracting Officer prior to the contract performance date and updated as needed to reflect Contractor personnel changes. A.019

1.13 Contractor Travel & Temporary Duty:

1.13.1 Travel to other Government facilities or other contractor facilities within CONUS may be required. All travel requirements (including plans, agenda, itinerary, or dates) shall be pre-approved by the Government (subject to local policy procedures), and is on a strictly cost reimbursable basis. The contractor shall have personnel available and ready to travel on the required date. Contractor will be authorized travel expenses consistent with the provisions of FAR 31.205-46 (Travel Costs) and the limitation of funds clause and shall be reimbursed under the cost category entitled ODCs in Section B of the contract.

1.13.2 The contractor shall be capable of supporting temporary efforts at locations other than those identified within this PWS without drawing from personnel supporting the mission. The contractor shall have the capability to support remote efforts using personnel resources in that area.

1.13.3 Travel Time Compensation. Exempt and non-exempt employees covered by the Fair Labor Standards Act are described in 5 CFR 551. Contractor employees who travel outside of their normal duty hours shall be paid wages for travel hours under certain circumstances as described in 5 CFR 551.422. The Contractor may be required to travel {insert travel locations this may include specific locations CONUS and/or OCONUS} during the performance of this contract to attend meetings, conferences, and training. The Contractor

may be required to travel to off-site training locations and to ship training aids to these locations in support of this PWS. The Contractor may be authorized travel expenses at rates no higher than the substantive provisions of the Joint Travel Regulation (JTR), IAW FAR Part 31.205-46, and the limitation of funds specified in this contract. All travel requires Government (KO & COR) approval and authorization 7 days prior to scheduled travel.

1.14 Other Direct Costs (ODCs): This category includes travel (outlined in 1.13), printing and shipping expenses associated with training activities and visits to Contractor facilities. Inclusion of ODCs in this PWS must be preapproved by the Contracting Officer.

1.14.1 The contractor shall occasionally purchase items to perform the requirements of this contract items that are IT related. To purchase items pertinent to fulfilling direct requirements on this contract, the contractor shall obtain, at a minimum, the following pre-approvals IAW the schedule below:

Cost of Item(s)	Approval Authorities
$1-$1,000	Contractor Approval
$1,000-$2,500	COR/ACOR
>$2,500	KO

The Government will not reimburse the contractor for any items purchased that have not been pre-approved by the aforementioned Government personnel.

1.14.2 Within 15 days after receipt of the item(s), the contractor shall forward documentation (supplier's invoice for the item(s) and the Government-provided form) to the COR/ACOR as to the basis of the expenditure and evidence of receipt before submitting the request for payment for the item(s). Contractor invoices submitted against contracts shall be accompanied by a copy of the supplier's invoices for the items and services above.

1.15 Accounting for Direct & Indirect Charges:

1.15.1 WDTC complies with the National Defense Authorization Act; WDTC charges only direct costs to DOD test customers and commercial customers who have a DOD contract that provides for Government-furnished testing. Direct costs are those that support a specific program. Indirect costs do not directly support a specific program and may support multiple programs. The current WDTC system for financial accounting is the General Fund Enterprise Business System.

1.15.2 Labor that directly supports a specific program will be charged to the Work Breakdown Structure (WBS) for that customer program. An example of direct labor includes developing software for a specific test program. It is only appropriate for supervisors to charge projects when their time is dedicated to a specific test program and is not general in nature. Labor that does not directly support a specific test program will be charged to the appropriate indirect WBS. When overtime is required to support a specific test program, in

which that labor cost is direct, should be charged to the customer WBS, even though the service may be indirect during normal duty hours.

1.15.3 Non-labor. Material, supplies, and services that are consumed in support of a specific customer test program are considered direct costs and should be charged to the customer WBS. Equipment purchases, facility upgrades, and other purchases that exceed what would normally be consumed during testing may be considered direct but will require specific justification to be approved for purchase with DOD test customer funds. Purchase requests for such items must follow the procedures below using the Government-provided form. Any costs that are not directly in support of a specific test program are indirect and should not be charged to DOD test customers.

1.16 Data Rights: The Government has unlimited rights to all documents and materials produced under this contract. All documents and materials, to include the source codes of software, produced under this contract shall be Government owned and are the property of the Government with all rights and privileges of ownership and copyright belonging exclusively to the Government. These documents and materials may not be used or sold by the Contractor without written permission from the Contracting Officer. All materials supplied to the Government shall be the sole property of the Government and may not be used for any other purpose. This right does not abrogate any other Government rights.

1.16.1 Any software code and/or applications, in whole or in part, that were developed in performance of this contract will become and remain the property of the U.S. Government with unlimited data rights. Written products created, generated, produced, or required to be delivered under this contract for the Government shall not contain any contractor restrictive markings. Unlimited data rights are defined as: "The rights of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so. The Government acquires unlimited rights in the following data except for copyrighted works:

1. Data first produced in the performance of a contract (except to the extent the data constitute minor modifications to data that are limited rights data or restricted computer software).
2. Form, fit, and function data delivered under contract.
3. Data (except as may be included with restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under a contract.
4. All other data delivered under the contract other than limited rights data or restricted computer software"

1.16.2 All software developed by the contractor for the Government shall adhere to the code review standards defined in the Defense Information Systems Agency's (DISA) Control Correlation Identifiers (CCIs), Security Requirements Guides (SRGs) and Security

Technical and Implementation Guides (STIGS) as applicable to the writing of software code, its compilation and linkage into executable software programs.

1.17 Files: The contractor shall maintain complete and accurate files of documentation, records, and reports required under this contract. The contractor shall not allow access to the files by any Government agency, non-Government agency, or individual unless specifically authorized by the KO. Files shall be made available to the KO or designated representative upon request. All files shall be digitized in readable form, indexed, saved to Government-approved portable media, and become the property of the Government. These files shall be turned over to the KO at the completion of this contract.

1.18 Non-Disclosure Requirements: Performance under this contract may require the Contractor to access data and information proprietary to a Government agency, another Government Contractor, or of such nature that its dissemination or use other than as specified in this work statement would be adverse to the interests of the Government or others. The Contractor and Contractor personnel, shall not divulge or release data or information developed, or obtained under performance of this PWS, except to authorized Government personnel or upon written approval of the Contracting Officer. The Contractor shall not use, disclose, or reproduce proprietary data, which bears a restrictive legend, other than as specified in this PWS. All documentation showing individual names or other personal information shall be controlled and protected under the provisions of the Privacy Act of 1974, Public Law 93-579, 5 United States Code (U.S.C.) Section 552a.

1.19 Protection of Government and Contract Information: Per Public Use Notice of Limitations stated by Defense imagery Management operations Center and contained at www.dimoc.mil/resources/limitations/ , the Contractor shall not cite any information (e.g., contract information, pictures, locations, etc.) obtained through this contract on any hard copy or digital marketing tools to include its company website.

1.20 Non-Disclosure Statements: The Contractor shall provide signed non-disclosure agreements to the Government no later than 2 days A.020. prior to commencement of work for any applicable tasks/requirements under the contract. Disclosure of information by Contractor personnel may result in removal of Contractor personnel from performance under this contract.

1.21 Organizational Conflict of Interest (OCI): Contractor and subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent OCI as defined in FAR Subpart 9.5. The Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential OCI and shall promptly submit a plan to the Contracting Officer to avoid or mitigate any such OCI A.021. The Contractor's OCI Mitigation Plan will be determined to be acceptable solely at the discretion of the Contracting Officer. In the event the Contracting Officer unilaterally determines that any such OCI cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other

remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the OCI.

1.21.1 The contractor, to include the prime and all subcontractors, shall remain OCI- free during the entire duration of the contract IAW Title 10, USC Section 2399, and Federal Acquisition Regulation (FAR), Subpart 9.5.

1.21.2 In the event that the prime or a subcontractor intends to or becomes involved in development of DOD systems under eventual WDTC test and evaluation (T&E) oversight as part of its Title 10 responsibilities, the contractor shall provide written notification to the COR within three (3) workdays of the potential OCI issue. The contractor shall not begin or continue performance once the contractor becomes aware of a 10 USC Section 2399 violation or any other OCI situation without the Contracting Officer's (KO) approval. The contractor shall own the burden to monitor, report, and resolve any Title 10, USC Section 2399, violations and all potential OCI issues that arise during the performance of this contract.

1.21.3 The KO will analyze all potential OCIs and determine if an actual OCI exists and whether an actual OCI can be mitigated. The KO will provide the rationale for OCI determination and request a mitigation plan when the OCI is of a type that can be mitigated. The KO will evaluate the mitigation plan and either approve or disapprove the mitigation plan.

1.21.4 The contractor shall not employ off-duty Government personnel who represent the KO or who perform contract surveillance, nor any other person who is an employee of the U.S. Government or DOD, either military or civilian, if such employment would create a conflict of interest or be contrary to the policies contained in Section I clauses of contract regarding conflicts of interest. The contractor shall not employ any person who is an employee of the Department of the Army (DA), military or civilian, to perform work under this effort without first obtaining approvals required by DOD 5500.7-R and implementing Army regulations. In no event shall such personnel be used in a supervisory capacity in the performance of this contract. In addition, the contractor shall not employ any person who is a family member of either current contractor employees or current ATEC employees (either military or civilian) without first providing personnel qualifications, supervisory chain, and proposed employment duration to the KO for review and concurrence.

1.22 <u>Phase In /Phase Out Period/Transition:</u> To minimize decreases in productivity and to prevent possible negative impacts on additional services, the Contractor shall have personnel on board, during the sixty (60) day, phase in/ phase out periods. During the phase in period, the Contractor shall become familiar with performance requirements in order to commence full performance of services on the contract start date.

1.22.1 TRANSITION PLANS (Phase-In and Phase-out Periods)
The Contractor shall develop procedures for phasing in Contractor performance to the level prescribed and within the time allowed under the terms of this PWS. The contractor shall establish and implement a plan for an orderly phase-out of the Contractor operations at the

termination of this Contract Agreement. The Contractor's phase-out procedures shall not disrupt or adversely impact the day-to-day conduct of Government business. The contractor shall plan for the transfer of work control, delineating the method for processing and assigning tasks during the transition-in/transition-out periods.

1.22.2 Phase-In Period. Within 10 days of contract award, the contractor will submit a phase in plan to the KO and COR. The Phase-In will begin upon notification of contract award and it will be no longer than sixty (60) calendar days in duration. Part one (1) is a two-day orientation for the contractor's top management, key personnel and working leaders to ensure that the contractor is familiar with the working environment and equipment used in performance of the contract requirements. The orientation will also include a range control briefing at ATC to include clearance procedures, range control signals, procedures regarding unexploded ordnance, and communication requirements. Part two (2) will continue until the end of the 60-day period, during which the contractor shall perform all functions required to successfully transition in. During this period, the Government will provide access to all applicable governing directives, brief on the technical requirements, provide a tour of the facilities, explain procedures for day-to-day operations, and conduct a joint inventory of GFP. Additionally, 10 calendar days prior to the start of performance, the contractor shall submit to the Government, in writing, the names, addresses, and the home, cell, and office telephone numbers of the key personnel to perform work under this contract.

1.22.3 Phase-out Period. The phase-out period shall be completed within sixty (60) calendar days after the end of the contract. During phase-out, the contractor shall permit the designated employees of the succeeding contractor to observe any and all functions, procedures, and operations. The contractor shall complete ongoing work and otherwise prepare for an orderly transition to the successor. The contractor shall assemble all working papers in an orderly and logical manner and deliver them to the successor (such as drawings, charts, diagrams, notes on work performed, as well as any information of an administrative nature that the successor may require). The contractor shall not defer any requirements for the purpose of avoiding responsibility or transferring such responsibility to the succeeding contractor. The contractor shall fully cooperate with his or her successor and the Government so as not to interfere with their work or duties.

1.23 <u>Environmental Compliance:</u> The following provides information on Environmental Compliance.

1.23.1 Environmental Compliance Plan and Program. The contractor shall adhere to Army regulations, environmental regulations, standard published practices for operations, safety regulations, maintenance of equipment, and range operating procedures.

1.23.2 Hazardous Materials Reporting:
During the course of contract performance, the contractor may be required to occasionally deal with hazardous materials. All such requirements shall be handled IAW all federal, state, and local laws, statutes and regulations. Any adverse incident shall be brought immediately to the attention of the COR. The contractor shall complete a Hazardous Material Report

(CDRL A003) ***as necessary*** IAW appropriate procedures with a copy furnished to the COR and the PBO for that location.

1.24 Safety:
The contractor shall take proper safety and health precautions to protect the work, the employees, the public, and the property of others. The contractor shall develop and implement a safety program for contractor employees in compliance with regulations at all site(s), installation(s), state and federal laws, Occupational Safety and Health Act (OSHA), etc. The contractor shall submit the **Safety Program Plan** (**CDRL A009**) to the Government for approval 30 days after award of the contract. Revisions shall be submitted 10 days prior to the effective date of the change. The following provides information pertaining to Safety and Accident Prevention in which the contractor shall:

1.24.1 Participate fully in any safety or accident prevention program of any Government installation that the contractor employees may be required to enter. This includes all required safety training.

1.24.2 Exercise care and caution commensurate with the dangers or hazards of the work being performed with due consideration of physical surroundings, equipment, facilities, personnel, and other factors involved.

1.24.3 Report immediately to the authorized representative with notification to the COR/ACOR, all accidents or property damage involving the contractor or its employees, which occur on a Government installation or other premises under the direct control of the Government.

1.24.4 Safety Laws and Regulations. The Contractor shall comply with FAR 52.236-13, Accident Prevention (November 1991), The Contractor shall comply with all OSHA, State, U.S. Army, U.S. Army Dugway Proving Ground, and other applicable industry safety standards. The National Environmental Policy Act (NEPA) which requires all branches of government to consider the environmental impact of any major federal action. As a Major Range Test Facility Base under the U.S. Army Test and Evaluation Command (ATEC), Dugway Proving Ground in Utah adheres to stringent environmental policies.

1.24.4.1 The Department of Transportation (DOT) Hazardous Materials Regulations (HMR) found in Title 49 of the Code of Federal Regulations (49 CFR) & Joint Regulation (AR 700-143): This regulation establishes a uniform policy for the packaging of hazardous materials across the DoD, including the Army DA Pam 385-40 for reporting. The Directorate of Public Works' (DPW) Environmental Programs Division is the primary entity responsible for managing hazardous materials and ensuring environmental compliance on the installation. Any reporting shall be directed to the this division.

1.25 Mandatory Training: The following provides information on training requirements:

1.25.1 Anti-Terrorism (AT) Level I Training: All Contractor employees, including subcontractor employees, who are employed under the contract, shall complete AT Level I

Training upon initial start of work A.024 after contract start date or effective date of incorporation of this requirement into the contract, whichever applies, or 30 days of employment of new personnel. Contractor personnel travelling overseas shall complete area of responsibility (AOR) specific AT awareness training for U.S. based Contractor employees and associated subcontractor employees. The Contractor shall submit certificates of completion A.025 for each affected Contractor employee and subcontractor employee to the COR (or to the Contracting Officer, if a COR is not assigned) within 14 days after completion of this training by all employees and subcontractor personnel. AT Level I awareness training is available at https://jkodirect.jten.mil. Contractor personnel shall complete refresher training A.026 every twelve (12) months except AOR specific AT Level I training which shall be completed as required by local AT policies

If training cannot be conducted on the website, the Contractor shall coordinate with the COR who will contact the local AT Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the AT Officer. Verification of the training shall be provided to the COR within 10 days after completion of the training A.027

1.25.2 OPSEC Training: All Contractor employees, including subcontractors, shall complete Level I OPSEC training within 30 days of employment under this contract A.028 Verification of the training shall be provided to the COR within 14 days after completion of the training A.029 OPSEC Level I training is available at http://www.cdse.edu/catalog/elearning/GS130.html. Contractor personnel must complete refresher training every 12 month A.030. Verification of the training shall be provided to the COR within 10 days after completion of the training A.031.

If training cannot be conducted on the website, the Contractor shall coordinate with the COR, who will contact the local OPSEC Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the OPSEC Officer. Verification of the training shall be provided to the COR within 10 days after completion of the training A.032

1.25.3 iWATCH Training: The Contractor and all associated subcontractors shall brief all employees on the local iWATCH program (training standards provided by the requiring activity ATO). This locally developed training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. This training shall be completed upon intial start of work after the contract is awarded and within 30 days after new employees commence contract performance, with the results reported to the COR within 10 days after the contract is awarded and within 30 days after new employees commence contract performance A.033 Verification of the training shall be provided to the COR within 10 days after completion of the training A.034 Training slides can be found on the Army OneSource we site: http://www.myarmyonesource.com/familyprogramsandservices/iwatchprogram/default.aspx

1.25.4 Information Assurance (IA) Training

1.25.4.1 All Contractor employees, including subcontractors, requiring access to Government information systems shall complete the DoD IA Cyber Awareness Training within 30 days A.035 after contract start date or effective date of incorporation of this requirement into the contract, whichever applies, or 30 days after employment of new personnel. Verification of the training shall be provided to the COR within 14 days after completion of the training A.036

1.25.4.2 All Contractor employees, including subcontractors, working information technology (IT)/IA functions shall comply with DoD and Army training requirements per Information Assurance Training Certification and Workforce Management DoD Directive (DoDD) 8570.01, Information Assurance Workforce Improvement Program DoD 8570.01-M, and Information Assurance AR 25-2 within thirty (30) calendar days of employment. Training is available at https://ia.signal.army.mil/DoDIAA/default.asp .

1.25.4.3 All Contractor employees, including subcontractors, performing services under this contract with access to a Government information system must be registered in the Army Training Certification Tracking System (ATCTS), the web address is **Army's Training and Certification Tracking System** https://atcts.army.mil/iastar/index.php (requires CAC to access. Verification of registration shall be provided to the COR within 10 days after registration. A037. Contractor personnel must complete refresher training every twelve (12) months A.*038*. Verification of the training shall be provided to the COR within 5 days after completion of the training A.039

1.25.5 Personally Identifiable Information (PII): Contractor employees, including subcontractors, performing services under this contract with access to PII and Government information shall complete "Identifying and Safeguarding PII" within 30 calendar days of employment. Contractor personnel shall complete refresher training every twelve (12) months from initial completion. The Contractor shall provide the COR a copy of the training certificates for its employees no later than five (5) days after completion A.040 Training is available at http://iatraining.disa.mil/eta/piiv2/launchPage.html

1.26 RESERVED

1.27 Notice to Proceed: In the event that a notice to proceed is required the notice will be provided as indicated below.

The effective date of contract will constitute the date of notice to proceed

1.28 RESERVED

1.29 Technical Coordination:

1.29.1 Performance of work under this contract shall be in compliance with the contract and any approved documents associated with this contract.

1.29.2 All technical coordination shall be within the general scope of this contract. Technical coordination shall not result in any action that:

1. Constitutes an assignment of additional work outside contract;
2. Causes an increase in the total estimated cost, the resource limits approved by the KO in the approved Implementation Plan, or the time required for contract performance;
3. Changes in any of the expressed terms, conditions, or specifications of this contract; or
4. Interferes with the contractor's right to perform the terms and conditions of this contract.

1.30 RESERVED

1.31 Interface with Government Operations:
Performance of work by contractor personnel under the terms of this contract shall not interfere with regularly scheduled operational activities.

1.32 Business Relations:
The contractor shall successfully integrate and coordinate all activity needed to execute the requirement. The contractor shall ensure timeliness, completeness, and quality of test services as well as problem identification and resolution. The contractor shall provide timely identification of issues related to the contract or contract personnel, corrective action plans for contract-related deficiencies, and contract proposal submittals. The contractor shall seek to ensure customer satisfaction and professional and ethical behavior of all contractor personnel.

1.33 Internal Controls:
The contractor shall safeguard Government resources IAW AR 11-2 and shall complete all required documentation, including DA and site-specific checklists at each location.

1.34 Inspector General Inquiries:
The contractor shall provide inspection, audits, surveys and requests for information, as necessary. The contractor shall provide access to Government facilities for the purposes of reviewing, inspecting and evaluating the Contractor's property management plan(s), systems, procedures, records, and supporting documentation that pertains to GFP. This access includes all site locations and, with the Contractor's consent, all subcontractor premises. The contractor shall provide, without prior notice, supporting documentation as needed for Army Audit Readiness and other audits, in accordance with FAR 52.245-1(g).

1.35 ELECTRONIC INVOICING:
The contractor is required to submit requests for payment (invoicing) through the Wide Area Workflow (WAWF) electronic invoicing application. Instructions for registering and submitting electronic invoices using WAWF can be found at https://piee.eb.mil. Web-based training on the procedures to use WAWF can be found at https://pieetraining.eb.mil/wbt/.

PART 2
DEFINITIONS & ACRONYMS

2. Definitions and Acronyms

2.1 Definitions: Although not inclusive of every term used within this PWS, the following provides a list of definitions used throughout this PWS and commonly used in the acquisition field.

2.1.1 Accreditation. The official certification that a model, simulation, or federation of modeling and simulation to include software or systems and its associated data is acceptable (both credible and suitable) for use for a specific purpose.

2.1.2 Alternate Contracting Officer's Representative (ACOR). An employee of the U.S. Government appointed by a duly warranted KO to survey, inspect, and administer certain aspects of the contract in support of or absence of the primary COR. Such appointments shall be made in writing and provided to the contractor and shall state the scope of authority and limitations.

2.1.3 *Contractor-Acquired Property*. Property acquired, fabricated, or otherwise provided by the contractor for performing a contract and to which the Government has title.

2.1.4 Clock Hour. Based on the hours on a clock because some standards require same day service instead of waiting until the next business day.

2.1.5 Contractor. A supplier or vendor having a contract to provide specific supplies or service to the Government. The term used in this contract refers to the prime and its subcontractors.

2.1.6 Contractor-acquired Property - means property acquired, fabricated, or otherwise provided by the Contractor for performing a contract and to which the Government has title.

2.1.7 Contracting Officer (KO). A person with who has been duly appointed to negotiate, award, manage/administer, change, and terminate contracts. A KO is the only individual who can legally bind the Government; this authority is not delegable or transferrable under the law. The KO reviews, analyzes, and makes determinations regarding all contractual matters under their authority.

2.1.8 Contracting Officer's Representative (COR). An employee of the Government appointed by a duly warranted KO to survey, inspect, and administer certain aspects of the contract. Such appointments shall be made in writing, provided to the contractor, and shall state the scope of authority and limitations. As defined in DFARS 202.101, means an individual designated and authorized in writing by

the Contracting Officer to perform specific technical or administrative functions. DoD Instruction (DoDI) 5000.72, Part II Definitions states the following when defining a COR: “Defined in subpart 202.101 of Reference (f). Any individual delegated responsibilities pursuant to subpart 1.602-2 of Reference (e), regardless of local terminology, must be certified in accordance with this instruction. For example, local terminology can be COR, Contracting Officer’s technical representative, technical point of contact, technical representative, alternate COR, administrative COR, assistant COR, line item manager, task order manager, quality assurance personnel, quality assurance evaluator, or COR management.” In addition, Army Regulation 70-13, Chapter 2, paragraph 2-2g, states, in part, the following when providing other surveillance support personnel to assist the COR when needed, “…These other surveillance support personnel may serve as on-site representatives of the COR in performance of actual contract surveillance if they meet all COR requirements and have been appointed by the Contracting Officer as alternate CORs.”

2.1.9 Day – means, unless otherwise specified, a calendar day.

2.1.10 Defective Service. A service output that does not meet the standard of performance associated with the contract and/or Performance Requirements Summary (PRS)

2.1.11 Deliverable. An end item (tangible item of supply) or a service (measurable but intangible) that is required to be delivered (or performed) under the contract for which the contractor has incurred cost to deliver. Deliverables may include shifts of work performance, reports, participation in meetings, etc.

2.1.12 Government-furnished Property. Property in the possession of, or directly acquired by, the Government and subsequently furnished to the contractor for performance of a contract. As reflected in FAR 52.245-1, Government-furnished Property “means property in the possession of, or directly acquired by, the Government and subsequently furnished to the Contractor for performance of a contract. Government-furnished property includes, but is not limited to, spares and property furnished for repair, maintenance, overhaul, or modification. Government-furnished property also includes contractor-acquired property if the contractor-acquired property is a deliverable under a cost contract when accepted by the Government for continued use under the contract

2.1.13 Government Property - means all property owned or leased by the Government.Government property includes both Government-furnishedand Contractor-acquired property. Government property includes material, equipment, special tooling, special test equipment, and real property. Government property does not include intellectual property and software.

2.1.14 High Level Objective (HLO) – means a key overarching result-based objective for a project necessary to achieve the project’s vision. HLOs are similar to Level 2 in

a Work Breakdown Structure. Each HLO may contain several statements to flesh out the areas necessary to meet the objective.

2.1.15 Incidental property. Government property that is used by the contractor within the location remains accountable to the Government. Items considered to be incidental to the place of performance include, for example, office space, desks, chairs, telephones, computers, and fax machines

2.1.16 Other Direct Costs (ODC). This includes travel, materials, equipment, supplies, and overtime not otherwise covered in the contract. The contractor shall obtain pre-approval from the Government before any of these costs are incurred.

2.1.17 Physical Security – means that part of security concerned with physical measures designed to safeguard personnel; to prevent unauthorized access to equipment, installations, material, and documents; and to safeguard against espionage, sabotage, damage, and theft.

2.1.18 Property Administrator - means an authorized representative of the Contracting Officer appointed in accordance with agency procedures, responsible for administering the contract requirements and obligations relating to Government property in the possession of a Contractor.

2.1.19 Quality Assurance (QA). The process the Government uses to verify that services being performed by the contractor are performed IAW acceptable standards. Government contract quality assurance means the various functions, including, inspection, performed by the Government to determine whether a Contractor has fulfilled the contract obligations pertaining to quality and quantity.

2.1.20 Quality Assurance Surveillance Plan (QASP). means the key Government-developed surveillance process document, and is applied to Performance-Based Service Contracting (PBSC). An organized written document specifying the surveillance methodology to be used by the Government for surveillance of contractor performance.The QASP is used for managing Contractor performance assessment by ensuring that systematic quality assurance methods validate that Contractor quality control efforts are timely, effective, and are delivering the results specified in the contract or task order. The QASP directly corresponds to the performance objectives and standards (i.e., quality, quantity, timeliness) specified in the Performance Work Statement (PWS). It provides specific details on how the Government will survey, observe, test, sample, evaluate, and document Contractor performance results to determine if the Contractor has met the required standards for each objective in the PWS. The QASP, with very few if any exceptions, is an internal to Government document.

2.1.21 Quality Control (QC) All necessary measures taken by the contractor to

assure that the quality of an end product or service meets contract requirements

2.1.22 Statement – means the specific results-based activities required to satisfy HLOs. A statement contains a result, the context of the statement, and the required action(s). Statements focus on “what” is to be accomplished; however they are not prescriptive in describing “how” the outcome is to be achieved. Each HLO may have several statements to flesh out the areas necessary to meet the objective. Statements are similar to Level 3 in a Work Breakdown Structure.

2.1.23 Subcontractor. means one that enters into a contract with a prime Contractor. The Government does not have privity of contract with the subcontractor.

2.1.24

2.1.25 Technical Monitor. An employee of the Government who provides technical clarification to contractor employees.

2.1.26 Workday. The number of hours per day the contractor provides services IAW this contract.

2.1.27 Work Week. Defined as Monday through Thursday, unless specified otherwise by this contract.

2.2 Acronyms: Although not inclusive of every term used within this PWS, or that may be included in an acquisition, the following provides a list of acronyms commonly used in the acquisition field.

ACOR	Alternate Contracting Officer’s Representative
ADSS	ATEC Decision Support System
AE	Army in Europe
AEC	Army Evaluation Center
AFARS	Army Federal Acquisition Regulation Supplement
AHA	Activity Hazard Analysis
AL	Alabama
AOR	Area of Responsibility
APG	Aberdeen Proving Ground
APGR	Aberdeen Proving Ground Regulation
APSR	Accountable Property System of Record

PART 3
GOVERNMENT PROPERTY (GP) AND SERVICES

3. Government Property and Services:
For all issued GP for this contract, the Contractor shall submit a Property Management Plan to the Contracting Officer and the Property Administrator via the COR within 30 days after date of contract award A.041 The plan shall address the requirements as listed in 3.1

3.1 Services: The Government will provide training. Most of the Government-furnished training can be found online in the ATEC Training Tracker Module (ATTM), ATCTS, other designated internet locations, or may be face-to-face. The COR or other designated Government representative will provide the source and location of the training. The contractor shall designate a primary and alternate POC to upload completion certificates in the designated Government system for each affected contractor employee and subcontractor employee. The required Government-furnished training is identified below and is subject to change at any time.

3.1.1 DOD Cyber Awareness Challenge. All prime and subcontractor employees with pending access to Government information systems shall be registered in ATCTS at commencement of services and shall successfully complete the DOD Cyber Awareness Challenge training prior to access to information systems and then annually thereafter IAW DODD 8570.01, DOD 8570.01-M, DoDD 8140 and AR 25-2.

3.1.2 Antiterrorism (AT) Level I. All prime and subcontractor employees requiring access to Army installations, facilities, and controlled access areas shall complete AT Level I awareness training within 30 calendar days after contract start date and shall be completed annually

thereafter. AT Level l awareness training is available in ATTM. The contractor shall submit certificates of completion for each affected contractor employee and subcontractor employee to the COR or to the contracting officer, if a COR is not assigned, within 5 calendar days after completion of training by all employees and subcontractor personnel.

3.1.3 iWATCH. All prime and subcontractor employees shall complete training (training standards provided by the requiring activity Antiterrorism Officer (ATO)). This locally developed training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. This training shall be completed within 30 calendar days of contract award and within 30 calendar days of new employees commencing performance, with the results reported to the COR no later than 30 calendar days after contract award.

3.1.4 OPSEC. Referencing AR 530-1, all prime and subcontractor employees shall complete Level 1 OPSEC training within 30 calendar days of their reporting for duty and then annually thereafter. The Government will provide supplemental training/guidance if required.

3.1.5 Threat Awareness and Reporting Program (TARP). All prime and subcontractor employees shall complete the annual TARP training. For all contractors with security clearances. Per AR 381-12 Threat Awareness and Reporting Program (TARP), contractor employees must receive annual TARP training by a counterintelligence special agent or other trainer as specified in 2-4b.

3.2 WORK AREAS

3.2.1 The contractor shall clean assigned areas to include cubicles, break rooms, storage rooms, office space, etc. , and keep assigned areas free of debris and safety hazards.

3.2.2 The contractor shall take adequate precautions to prevent fire hazards, odors, chemical spills in Government facilities. Routine daily housekeeping of contractor workspaces is the responsibility of the contractor. As required, the contractor shall empty trash cans into Government-provided dumpsters. The contractor shall maintain a clean and clear area surrounding Government-provided dumpsters.

3.3 Facilities: The Government will provide necessary workspace, desk space for the Contractor employee to provide the support outlined in the PWS to include desk space, storage rooms, etc. The contractor shall observe clause FAR 52.237-2 in earnest as well as 29 CFR 1910 & 29 CFR 1960. The contractor shall take adequate precautions to prevent fire hazards, odors and chemical spills in Government facilities. Routine daily housekeeping of contractor workspaces is the responsibility of the contractor. Furthermore, the contractor shall clean assigned areas to include cubicles, break rooms, storage rooms, office space, etc., and keep assigned areas free of debris and safety hazards.

3.4 Utilities: The Contractor shall instruct employees in utilities conservation practices. The Contractor shall operate under conditions that preclude the waste of utilities, which include turning off the water faucets or valves, light switches, etc. after using the required amount to accomplish tasks requiring the use of the utilities.

3.4 ACCOUNTABILITY OF GOVERNMENT-FURNISHED PROPERTY/ITEMS:

3.4.1 The contractor shall develop a Property Control Plan IAW FAR Part 45 and FAR 52.245. The Contractor Access/Property Control Plan shall be submitted thirty (30) days after full contract performance and shall detail contractor activities concerning GFP control in the following areas: Property Management; Physical Inventories; Reports; Consumption; Utilization; Maintenance; Subcontractor Control; Disposition; and Contract Close-out as pertinent.

3.4.1.1 The contractor shall include within its property control plan, a process for the accountability and management of all GFP. Contractors in possession of classified or Controlled Cryptographic Item (CCI) shall dispose of the classified contractor inventory in accordance with applicable security guides and regulations as directed by the KO. Contractor GFP identified as inherently dangerous to public health or safety shall not be disposed of unless rendered innocuous or until adequate safeguards are provided.

3.4.1.2 The contractor shall conduct annual inventories and complete required documentation IAW DOD 4161.2M ***(CDRL A004)***. The Property Inventory Report shall be submitted 30 workdays after contract award and annually thereafter after the completion of the annual inventory, and shall provide current information on all GFP accounted for by the contractor. As soon as the GFP is no longer required, it shall be promptly turned in IAW the approved Property Control Plan. The contractor is responsible for inventory, tracking and input information into GFP module of PIEE for all GFP/GFE issued to contractor employees

3.4.1.3 The contractor shall establish and maintain an acceptable property management system. Failure to maintain an acceptable property management system, as defined in DFARS 252.245-7003, may result in disapproval of the system by the Contracting Officer and/or withholding payments.

3.4.2 The Government requiring activity and the contractor shall conduct a joint physical inventory of GFP within two weeks after the contract effective date.

3.4.2.1 The contractor is required to perform a joint Government/contractor inspection of all GFP. This inspection is intended to establish a mutual agreement as to the condition of GFP provided to the contractor for use in performance under this contract. The contractor and the Government representative(s) shall jointly determine the working order and condition of all equipment and document their findings. Rejection of GFP by the contractor shall not relieve the contractor of responsibility in performance of this contract. The contractor shall not use property provided by the Government for any purpose other than the performance of this contract.

3.4.2.2 The contractor shall sign a property listing for all equipment provided by the Government. Items of equipment missing or not in working order shall be recorded and the COR shall be notified in writing.

3.4.3 The contractor shall conduct an automated annual inspection for all GFP and Contractor Acquired Property (CAP). The annual GFP and CAP inspection shall be completed and submitted annually ***(CDRL A004)***, 90 calendar days prior to end of each option POP.

3.4.4 The Government reserves the right to furnish parts, supplies, materials, and equipment when deemed to be in the best interest of the Government.

3.4.5 The contractor shall manage GFP in accordance with FAR Part 45 and all related clauses. The contractor shall be liable for shortages, loss, damages, or destruction of Government property IAW with the Financial Liability Investigation. Within 15 calendar days of discovering the item is missing, damaged, or destroyed, the contractor shall appoint a POC who is responsible for completing the required documentation IAW ***CDRL A005***.

3.4.6 The contractor shall tag, label, or mark GFP items identified in the contract as serially managed items (as required by DFARS 252.245-7001). The contractor is not required to tag, label, or mark GFP previously tagged, labeled, or marked.

3.4.7 The contractor shall establish a program to assess cases of property damage/loss to determine if the damages were caused by employee negligence. If employee negligence is determined, the contractor shall take appropriate corrective action.

3.4.8 CAP will also be UID marked and registered IAW DFARS 252.211-7003. Contractors shall be required to identify the Government's unit acquisition cost for all deliverable end items to which unique identification applies. If CAP items are subsequently delivered to the Government under terms of the contract, via a contract line identification number(CLIN), then the requirements imposed on the contractor for both DFARS 252.211-7003 (not listed in the current contract) and 252.211.7007 apply to both GFP and CAP.

3.4.9 At the completion of this contract, the contractor and Government requiring activity shall conduct a joint inventory. The contractor shall be held liable for damaged government property IAW FAR 52.245-1.

3.4.10 If any GFP is expended or consumed, or if the useful life of the property has terminated, the contractor shall not be held accountable for the GFP. The Government and the contractor agree that expending, consuming or terminating the useful life of any GFP shall not be considered a decrease for purposes of equitable adjustment.

3.4.11 The contractor shall not use property provided by the Government for any purpose other than in the performance of the contract IAW FAR 52.245-9. Exception being, the allowable personal and/or non-job related provisions as set forth in current Acceptable Computer Use Policies.

3.5 GOVERNMENT VEHICLES AND EQUIPMENT OPERATIONS:

3.5.1 Operation. DOD contractor employees assigned to operate Government owned or Government leased equipment in the performance of their contract will be in compliance with the licensing requirements of the State and local motor vehicle laws and certified, by the contractor and at the contractor's expense, as being fully qualified to operate the equipment which they are assigned. The contractor must document all operator qualifications and provide this documentation (commercial drivers' license (CDL), if required, equipment dependent) to the COR prior to the contract employee engaging in equipment operation. Contract employees must also complete a commercially available defensive driving course, e.g., National Safety Council web based, and provide documentation of such to the administrative contracting officer

3.5.2 Preventive Maintenance

3.5.2.1 For all MHE/vehicles used by contractor personnel, the contractor shall perform preventive maintenance checks and services according to military or commercial technical manuals and make emergency repairs to equipment as required. The contractor shall adhere to Army regulations, environmental regulations, standard published practices for operations, safety regulations, maintenance of equipment, and range operating procedures.

3.5.3 Pre-operational Checks and Trip Tickets. The contractor shall perform pre-operational checks and services and ensure the Mobile Equipment Utilization Record (trip ticket) has been completed prior to operation of Government vehicles and equipment IAW AR 58-1.

3.5.4 Certifications. Contractor personnel shall possess a current state driver's license prior to operation of any MHEs/vehicles. Contractor employees assigned to operate either Government-owned or leased equipment in the performance of their contract shall be certified by the contractor and at the contractor's expense, as being fully qualified to operate the vehicle/equipment to which they are assigned. Additionally, contractor employees shall complete any safety courses or training mandated by the Government prior to operating any MHEs/vehicles.

3.5.5 Vehicles and Equipment Available for Contractor Use. Vehicles and equipment owned, leased, or on loan to an ATEC organization may be available for mission-related use by the contractor, subject to coordination with the controlling authority. Availability of shared vehicles and equipment is contingent on testing priorities, maintenance downtime, and compliance with AR 58-1. The contractor must carry insurance to cover employees while using Government-provided, leased, or loaned vehicles/equipment. DOD contractor employees assigned to operate Government owned or Government leased equipment in the performance of their contract will be in compliance with the licensing requirements of the State and local motor vehicle laws and certified, by the contractor and at the contractor's expense, as being fully qualified to operate the equipment which they are assigned. The contractor must document A042 all operator qualifications and provide this documentation (commercial drivers' license (CDL), if required, equipment dependent) to

the COR prior to the contract employee engaging in equipment operation. Contract employees must also complete a commercially available defensive driving course, e.g., National Safety Council web based, and provide documentation of such to the administrative contracting officer

3.5.6 Equipment: The Government will provide those items listed on the GFP list 1 & 2 attached. Any equipment provided by the Government for telework purposes will be treated as GFP (See Attachments 1 & 2 – GFP List 1 & 2). After award, the contractor may be given the GFP listing with the serial number, make and model of all GFP that has been issued to incumbent employees.

3.6 Vehicle Registration:

All operators of motor vehicles entering DPG or other military installations designated as a performance location, shall have a valid state driver's license and shall comply with military installation vehicle registration requirements as applicable. A valid state driver's license, registration, and insurance shall be current during the time the vehicle is in use on military installations. Contractor personnel shall return visitor passes, when applicable, to the issuing visitor office immediately upon conclusion of the conduct of business authorized on the installation. In the event installation decals are issued, contractor personnel shall comply with installation regulations pertaining to the return or destruction of registration decals after termination or completion of work, when state license is no longer valid, and upon sale of vehicle.

3.6.1 Contractor-owned vehicles used in the performance of services on military installations shall bear the contractor's company name/logo on both front doors or otherwise be clearly marked as commercial contractor vehicles. No unmarked vehicles are authorized to be on a Government work site without express prior authorization.

PART 4
CONTRACTOR FURNISHED ITEMS AND SERVICES

4. Contractor Furnished Property and Services

4.1 GENERAL

The contractor shall furnish all necessary supplies, parts, materials, tools, support equipment, labor, and vehicles required to perform all operations required by this contract, except for those items or services specifically stated as Government- furnished.

4.2 CONTRACTOR-FURNISHED FACILITIES/OFFICE SPACE

At this time, the contractor is not required to provide facilities/office space on this contract. If facilities/office space is required at a later date, the KO will provide the contractor with written authorization.

4.3 CONTRACTOR-FURNISHED ITEMS

The contractor shall provide all property not specifically identified as Government-Furnished Property, but which are necessary to perform the requirements of this contract. If contractor-furnished property is required, the items shall be compatible with Government systems.

4.3.1 The Contractor shall, at its own expense, provide all materials and expendable supplies required for contract management/administration. For contractor personnel performing the contracted services on-site, the Government will make Government-Furnished Property (GFP) and Government-Furnished Materials (GFM) available as required for contract performance.

4.3.2 Use of Government-Furnished Items. All Government-Furnished Property and Materials are provided for the sole and exclusive purpose of contract performance. The Contractor shall ensure its employees use such items only for official duties required by this contract and not for personal or any other business purposes. All Government-Furnished Property shall be governed by the provisions of Federal Acquisition Regulation (FAR) 52.245-1, Government Property, as incorporated elsewhere in this contract.

4.4 CONTRACTOR-FURNISHED SERVICES

4.4.1 Shipment of Government Property. In connection with the contractor's shipment of property acquired for the Government's account by the contractor, or property furnished by the Government to the contractor for use in the performance of the contract, the contractor will submit an original and three (3) copies of DD Form 1659, Government Bill(s) of Lading/Export Traffic Release, to the COR or authorized representative for property matters. The request for shipment of Government property will be made after the contractor has received the applicable shipping instructions from the COR, Property Representative or shipping vendor. Contractors shall use the most cost-effective means for shipping items.

4.5 Personal / Contractor Owned Property:

The contractor shall ensure that personal/contractor-owned property brought on DPG, is clearly marked as such to preclude misidentification as Government property. Additionally, the contractor shall ensure that personal/contractor- owned property meets safety specifications as set forth by OSHA, the U.S. Army, and other local agencies. The contractor shall ensure that all personal/contractor-owned property is removed from DPG at the end of the performance period. Lastly, all personal computer/IT equipment cannot be connected to Government network with the exception of government provided guest network or cellular hot spots.

PART 5
SPECIFIC TASKS

5. SPECIFIC TASKS

5.1 GENERAL
The contractor shall perform the specific requirements described below in the performance of this contract and provide reports IAW with all CDRLs. Qualifications for the labor categories to perform these requirements are provided in Attachment 6 – Position Qualifications.

5.2 INFORMATION TECHNOLOGY SUPPORT
This IT support includes both classified and unclassified system applications and networks. The contractor shall provide the following:

5.2.1 Customer Support (CS). The contractor shall provide IT CS at WDTC, and possibly at other locations on the range when specified by the Government. The CS center will operate IAW established standards and operating procedures.

5.2.1.1 Help Desk. For Government-owned equipment and networks, the contractor shall:

5.2.1.1.1 Resolve customer questions and problems concerning Information Technology (IT) automation systems, software and/or hardware problems associated with, and responsible for logging trouble tickets/work orders. Responsible for diagnosing and resolving problems in response to customer reported incidents by researching, evaluating, implementing fixes and providing feedback on one-time and problematic trends/patterns with customer support requirements. Responsible for developing and maintaining problem tracking and resolutions databases; installing, configuring, troubleshooting, and maintaining hardware and software. Responsible for ensuring the rigorous application of cybersecurity policies, principles, and practices in the delivery of customer support services. Determines the exact nature of problems (e.g., routine, non-routine, user error, faulty data lines, equipment malfunctions, software malfunctions, etc.); provides users with solutions to problems. Collects information from callers to be used in the troubleshooting and restoration of network and application services. Enters information collected into an automated trouble ticket system. Develops, coordinates, and assists in the installation, configuration, utilization, and operation of IT equipment. Assists in the review of functional user justifications and requirements for new or additional IT capabilities in either hardware or software solutions.

5.2.1.1.2 Provide technical assistance to customers to minimize disruptions of computer operations. Contractor shall receive and accept phone calls, walk-ins, or computer generated service requests/incidents. Contractor is responsible for testing and analyzing computer hardware and software malfunctions, understanding and distinguishing between various types of equipment, software, type of network connectivity and their LAN malfunctions and adjusting equipment configurations to resolve problems. The contractor is responsible for maintaining a complete status of trouble calls for reference and reporting purposes. Contractor is responsible for deploying IT hardware such as, but not limited to, desktop computers, laptops, tablets, monitors and printers. Contractor shall provide software installation and removal to

include imaging of computer systems with latest approved operating system image. Performs backup and restore of user data as required during system replacement. Assists in the completion of special projects such as operating system upgrades, life cycle replacements, mass deployments of IT hardware, etc. The contractor is responsible for reporting and monitoring warranty work; identifying hardware failures and ensuring that repairs are accomplished when under vendor warranty. Coordinates and schedules warranty repairs, monitors and verifies repair actions, and reports completed warranty repairs. Proactively interacts with users to ensure proper operation of computer systems, hardware, and software. Contractor shall install and maintain hardware devices supporting a broad range of information systems employing multiple network and local operating systems and software.

5.2.1.1.3 Independently lead and manage the entire contractor Helpdesk Team on a day-to-day basis with minimum Government oversight. The contractor Helpdesk Team is responsible for meeting the specific needs of WDTC customers by ensuring their needs are met in a timely manner and in accordance with Government service level agreements. Maintains complete status of trouble tickets/calls for reference and reporting purposes to the Government upon request. The contractor shall keep the Helpdesk Team fully staffed to minimize the backlog of unworked trouble tickets.

5.2.1.1.4 Track and document all requests for assistance daily from customers via phone, in person, or electronic means using a Government-provided tracking system. The contractor shall maintain documentation and metrics for all requests which will be monitored weekly by the Government.

5.2.1.1.5 Respond to, determine action to be taken, and take appropriate action to resolve customer problems dealing with hardware, software, and communications or escalate problems to a higher level IT representative IAW each organization's IT policy or test mission requirement. The Very Important Persons (VIP) list will be provided by the COR on contract start date.

5.2.1.1.6 Provide feedback, updates and status to users on their requests for assistance IAW local procedures as directed by the Government

5.2.1.1.7 Provide configuration and user support for all Government-approved operating systems including, but not limited to, Microsoft, Linux, UNIX, Macintosh, Apple iOS, Android OS etc.

5.2.1.1.8 Provide technical assistance for leading edge hardware and software as it becomes available.

5.2.1.1.9 The contractor shall reset PINs on CACs. The contractor shall assist in the process of obtaining Alternate Smart Card Logon (ASCL) tokens used for administrative rights to computers for System Administrators on DREN.

5.2.1.1.10 Provide hard drive recovery services.

5.2.1.1.11 Provide printer and print server support to include troubleshooting and maintenance.

5.2.1.1.12 Assist in developing, maintaining, and updating IT documents for use by help desk personnel to expedite problem resolution. The Government will approve all updates and/or modifications before implementation.

5.2.1.1.13 Assist in developing, maintaining, and updating end-user guides. The Government will approve all updates and/or modifications before implementation.

5.2.1.1.14 The contractor shall provide Wireless Device support. Support shall include but not be limited to device setup, user training and software repairs (if possible) of Apple and Android devices, configure, and document all wireless technology required to meet the business needs of the organization, as well as any future technology. Support further includes troubleshooting and submittal of help/trouble tickets to outside entities concerning user accounts/devices. Record and track all cellular devices for which work is performed for asset management using contractor or Government-provided tools to maintain and update status information for accuracy and use: such as description of device by serial number, description of the action/work performed; and estimated time of work for completion of task.

5.2.1.1.15 The contractor shall provide on-site Organizational Inspection Program (OIP) support. The Government will provide the schedule and request support in advance for each instance.

5.2.1.1.16 Maintain property accountability of property received by the help desk, IAW procedures established in AR 735-5 and AR 710-2.

5.2.1.2 Maintenance, repair, and restoration services. The contractor shall:

5.2.1.2.1 Maintain and repair all hardware, software, and communications identified by the Government as critical to network operations, providing a network availability of 99.9% of the time during duty hours per each quarter, unless specifically accepted by the Government.

5.2.1.2.2 Perform restoration services for all hardware, software, and communications identified as critical by the Government. Response time to restoration services requirements during core staff operations is within 15 minutes; response time to restoration service requirements outside core staff operations is two (2) clock hours or less, unless specifically identified by the Government.

5.2.1.2.3 Perform restoration services of all non-critical IT associated with this contract and other property identified by the Government, within a period of three (3) workdays of problem notification by the Government.

5.2.1.2.4 Perform preventative maintenance for all hardware, software, and communications identified as critical by the Government during other than core staff operations, unless specifically identified by the Government.

5.2.1.3 Warranties. The contractor shall manage warranties on property identified by the Government. The contractor shall provide the warranty records in the form of the Maintenance/Warranty Report (CDRL A006) to the Government. The contractor shall identify warranty and maintenance requirements, notify the COR and Government Lead 60 days prior to their expiration dates, and execute the maintenance purchase upon receipt of Government review and approval. The contractor shall inform the Government of difficulties encountered in the management of warranties. The contractor shall repair warranty items without recourse to the warranty if:

5.2.1.3.1 The failure or defect results from contractor abuse or from improper or inadequate contractor maintenance, as determined by the Government.

5.2.1.3.2 The Government authorizes such repair.

5.2.1.3.3 The contractor shall comply with standard Army execution and warranty claim action reporting programs as defined in AR 700-139 and DA Pamphlet 750-8.

5.2.1.3.4 The contractor shall inform the COR in writing of all warranty actions.

5.2.1.4 Standard Software Baseline Configuration. The contractor shall be responsible for configuring all Information Technology Resources (ITRs) with the standard configuration baseline unless otherwise indicated by the Government. This contractor shall maintain a standard configuration baseline in accordance with Army policy and will include site specific enhancements. The contractor shall employ baselines as required to ensure the latest system configurations contain all necessary changes, updates, and end user software requirements IAW Army policy.

5.2.1.5 The contractor shall manage the accountability of the software-licensing program. Ensure software compliance and license management as well as warranty tracking such that all production hardware and software is always within the original manufacturer's equipment warranty or under vendor support maintenance agreement, as well as recording and tracking license distributions to ensure compliance.

5.2.1.6 Project Management Services. The contractor shall organize, document, and participate in WDTC IT projects for project management services, to include planning, purchasing, executing, and maintaining IT hardware and software, as directed by designated Government representatives and WDTC CIO.

5.2.1.7 Acceptable Use Policy (AUP). The contractor shall enforce the organization's AUP for all civilian, military, and contractor personnel when using Government information systems as defined by the Government.

5.2.1.8 The Contractor shall manage A/V Services for standard conference rooms and VTC rooms, where requirements shall include but are not limited to:

1. Provide Tier 2 support for standard conference rooms and VTC rooms to include problem identification, system troubleshooting and repair, maintaining spare parts, making repairs, escorting service providers, and coordinating equipment repairs.
2. Provide subject matter expertise to develop requirements for VTC system upgrades and implement the authorized upgrades.
3. Work with WDTC employees to provide support for meeting room setups.
4. Support web collaboration meetings as an alternative to in-person meetings or program reviews.
5. Provide end user training on the Audio/Visual and collaboration applications in WDTC's VTC rooms.

5.2.1.9 Conference Room and office Audio/Visual (AV) and Meeting Support. The contractor shall provide AV and meeting support for DPG ATEC facilities. This includes, but is not limited to, projectors, microphones, VTC/SVTC, Microsoft Teams, AV controllers, the setup and management of the basic operating system, hardware installation, system configuration, controller software, call accounting system, audio and video connections, and usage reports. The contractor shall:

5.2.1.9.1 Provide user instructions for Audiovisual (AV)/Teams/VTC/SVTC systems to operate and maintain the associated components and endpoints.

5.2.1.9.2 Maintenance and cybersecurity compliance for all AV/Teams/VTC/SVTC components in accordance with Army and organizational policy (DISA Security Technical Implementation Guides (STIGs) mandated software patches) of all WDTC AV/Teams/VTC/SVTC endpoints. Troubleshoot and repair AV/Teams/VTC/SVTC systems to ensure proper operation.

5.2.1.9.3 Provide remediation of all AV/Teams/VTC/SVTC components following release of vulnerability notifications, within the mandated compliance window.

5.2.1.9.4 Provide outage reports immediately to the Government upon identification and immediately upon resolution. (CDRL A007).

5.2.1.9.5 Identify AV and video teleconferencing improvements and solutions to meet Government needs for advanced and new technology solutions, to include any new hardware or software, any new release of existing software, any hardware upgrade, etc. , that will increase the efficiency, economy, or cybersecurity posture of the conference room facilities or equipment. The contractor shall identify specific quantity and cost of replacing/upgrading equipment as changes in technology occur to the Government.

5.2.1.9.6 Manage day-to-day AV/Teams/VTC/SVTC operations which includes audio, video and presentation support across facilities designated by WDT Responsible for VTC gateway and teleconference bridges and troubleshooting of the entire VTC system and its individual components.

5.2.1.9.7 Meeting, Conference and Training support. The contractor shall provide design for network layout and reconfigure meeting rooms per event requirements. This includes integration, operation, setup and tear down of event equipment. Also includes AV/Teams/VTC/SVTC equipment and network connections for required data and/or video streams.

5.2.2 Enterprise Systems and Network Operations (ESNO).

5.2.2.1 Network Operations Management. WDTC managed networks are comprised of the Defense Research Engineering Network (DREN), Secret DREN (SDREN) Test Enclaves, standalone systems and networks. The contractor shall:

5.2.2.1.1 Proactively monitor current network operations and deploy changes in accordance with local policy;
5.2.2.1.2 Provide resource usage oversight.

5.2.2.1.3 To accomplish these duties the contractor is responsible for configuring and managing Software Defined Access, Digital Network Architecture, Identity Services Engine, TCP/IP, firewalls, routing, VLANs, VRF's, general network troubleshooting and managing a production environment efficiently using utilities such as: (1) automated install; (2) automated build and deployment; (3) automated configuration management; (4) enterprise monitoring systems and; (4) configuration and management of network performance monitoring tools.

5.2.2.2 Network Improvement Management. The contractor shall be responsible for assisting the Government in improving network configuration, capacity, performance and management. The contractor shall participate in change management processes, problem solving, capacity planning and deployments of equipment and software to the network. The contractor is responsible for supporting remote access services, intranet services, internet access, network communications infrastructure (e.g. hubs, switches, routers), dedicated long-haul circuits, web and application proxies, firewalls, intrusion detection, virtual private network (VPN) configuration and communication, firewall management and maintenance; server administration; server installation, repair, maintenance, and upgrades; system back-ups and restores; applications system administration; disaster recovery planning and execution; and cabling systems installation, maintenance, and upgrades as well as and file and print services. The contractor may be required to lay wiring/cable above and below ground, in conduits and manholes, to support and improve network operations.

5.2.3 Cybersecurity Operations

5.2.3.1 Cybersecurity Scan and Patch Management. The contractor shall perform remote and hands-on security scans of WDTC computer systems and provide security related technical guidance from DISA Security Technical Implementation Guides (STIGs) and other miscellaneous security related technical configuration information/documentation. The contractor shall perform this by evaluating technical risks and understanding how changes in system configuration and/or network architecture affect a system's security posture and risk profile. The contractor shall patch WDTC computer systems to include: Servers, Workstations,

Network devices in accordance with established WDTC guidelines, policies, and procedures. The contractor shall maintain tracking of action items, create a cohesive running Plan of Action and Milestones (POAM) for contractor management and execution in addition to government oversight.

5.2.3.2 Cybersecurity Planning and Policy Management. The contractor is responsible for developing and interpreting cybersecurity plans, policies, and procedures (in areas to include but not limited to configuration management, contingency / disaster preparation, incident response, account management, access control, media control, etc.), providing incident response, reviewing audit logs, performing security assessments and inspections, conducting risk management,

5.2.3.3 Cybersecurity Auditing. The contractor shall perform static and dynamic software code analysis, apply threat modeling to WDTC computer systems and networks, and perform software and hardware risk and vulnerability assessments.

5.2.4 Network Configuration Management

5.2.4.1 The contractor shall provide configuration management services on all hardware, software, and communication items.

5.2.4.2 The contractor shall configure and operate a centrally managed network consisting of Government-furnished communication circuits, communication equipment, network software, and certain diagnostic equipment. The contractor shall, as a minimum, diagnose problems on the network, ensure timely resolution of problems, monitor the network for connectivity to LANs/Wide Area Networks (WANs), maintain all network system software configurations, etc.

5.2.4.3 Increased Efficiency. When requested by the Government, the contractor shall identify and research any new hardware or software and assess feasibility of any new release of existing software, any hardware upgrade, etc. , that will increase efficiency or economy. The contractor shall identify specific quantity and cost of replacing/upgrading equipment.

5.2.4.4 Network Issues. The contractor shall provide support of network operations so that any outage is identified, resolved, and immediately reported to the Government.

5.2.4.5 Network Computing Facilities. The contractor shall assist the Government with the design, development, implementation, operation, and maintenance of network computing facilities consisting of network fileservers, workstations, virtual servers, dedicated long-haul circuits, routers, switches and proxies, firewalls, intrusion detection systems, VPN configurations and communications, and both internet/intranet gateways. Network support includes various applications, platforms, workstations, laptops, printers, and other network-connected peripheral equipment.

5.2.5 General IT Support Operations. The contractor shall provide local unique network services and support for servers, software, and customer problem evaluation and resolution. The contractor shall:

5.2.5.1 Systems Maintenance. Perform system maintenance to include the following:

5.2.5.1.1 Provide work status using the Government tracking systems and update the ticketing system

5.2.5.1.2 Monitor and diagnose network problems and present solutions to the Government

5.2.5.1.3 Maintain archival and backup data

5.2.5.1.4 Perform routine checks on uninterrupted power systems (UPS) and system security

5.2.5.1.5 Test and Evaluation (T&E) new hardware and software with minimum downtime to the Government

5.2.5.1.6 Build and maintain servers and maintain software list

5.2.5.1.7 Operate and maintain all network equipment

5.2.5.1.8 Maintain user account management; and

5.2.5.1.9 Manage Personal Electronic Device (PED) configuration

5.2.5.2 Transport Media. Support offsite, backup media, to and from designated storage facilities once a week and as required during an emergency situation.

5.2.5.3 Network Operations Requirements. Perform network operations requirements, such as physical and/or remote operational checks of file servers, communication links, and back-up of server disks at all required locations. When providing these services, the contractor shall provide all required coordination, advice and liaison services necessary for execution.

5.2.5.4. Network Rack(s). The contractor shall provide daily routine checks on Network/Server racks. The contractor shall monitor the serviceability of the racks, to include operational checks on air filters, airflow, cable management, and notify the government immediately upon any critical faults that result in the failure of the rack system. Routine checks include daily temperature measurements including high temperatures, high/low humidity, visual checks for condensation, loss of airflow, clogged filters, and immediately reporting any deficiencies that may cause the network racks to fail. Examples of deficiencies are the ambient temperature being above 99 degrees in the network racks. The contractor shall alert the Government when monitoring alerts indicate any of the following

1. Temperature approaches over 99 degrees.
2. Humidity approaches over 60 percent or when condensation occurs within the rack.
3. Alarms and events indicate a loss of airflow, EC Fan Fault, Clogged Filters, Hrs. Exceeded, Call Water under Floor, and Call Service exists.
4. Any alarms will be investigated and addressed within 1 hr. during any regular

business hours and/ or remotely if outside business hours within 4 hours.

5.2.5.5 Media Library. Operate and maintain a media library to house all media, to include such items as magnetic tapes, disks, cartridge disks, and optical disks. A catalog of the media archived shall be published and updated on a monthly basis. Upon notification from the Government, the contractor shall restore data to meet the availability requirements of the system network or application.

5.3 **SOFTWARE DEVELOPMENT AND SOFTWARE SUPPORT ACTIVITY**

5.3.1 The Software Development and Software Support Activity includes requirements gathering, research, development, operations and maintenance support of WDTC management systems and web applications on private unclassified, classified, Internet and Intranet deployed systems. These systems consist of COTS, GOTS, or a combination of both systems incorporating custom code solutions. The software development activity includes the implementation and management of an agile software development process to achieve predictable and repeatable results across the portfolio of WDTC applications. The contractor shall:

5.3.1.1 Provide guidance, implementation and maintenance in support of the chosen development process for all applications as assigned, including government approved software development standards and procedures. Software development methods shall allow for continuous integration.

5.3.1.2 Provide or assist in requirements gathering. The contractor shall be responsible for providing analytical support for management systems being developed or modified. To ensure that new systems or changes to existing systems are consistent with plans for the future, the contractor shall be actively involved in all system planning and design reviews requested by the government.

5.3.1.3 Provide IT Studies. The contractor may perform feasibility studies, analysis, plan development, problem-solving, and report preparation for WDTC requirements. IT studies may include development/evaluation of prototypes and recommending technology solutions to meet these requirements.

5.3.1.4 Provide guidance and assistance in forecasting and planning approach for future development, staging, and alternate site resource requirements based on known mission requirements as directed.

5.3.1.5 Provide the appropriate security controls against published cybersecurity policies and standards to all ATEC-owned applications, networks, and enclaves in support of certification and authorization requirements.

5.3.1.6 Provide software development for new and existing applications. The software development activity provides delivery of business, T&E, and instrumentation applications containing financial, personnel, and sensitive information capability. The development activity

shall be performed both locally on individual development environments and within a protected development lab network. The contractor shall deliver Software Documentation (CDRL A009) monthly that is generated in the process of developing new applications and/or modifying existing applications. Software developers are expected to work onsite, unless the COR identifies extenuating circumstances where telework or working from an alternate location may be authorized. The specific activities include, but are not limited to, the following: requirements refinement; architecture/system design; development; secure coding using static and dynamic analysis tools; compliance with cybersecurity regulations and applicable STIGs; code review and implementation; comprehensive software testing to include functional, regression and user acceptance testing; test plan creation/management; deployment; and data maintenance. Software developers will develop software using Government-approved software languages, technologies and toolsets, including, but not limited to: .Net, Java, PhP, C#, C++, C, Visual Basic, Visual basic net, HTML, JavaScript, ColdFusion, JQuery, Visual Studio, Eclipse, SQL, and other emerging languages and platforms. Software developers are expected to adhere to the approved development process within the framework of a strict change management construct incorporating elements of CMMI and RMF. The contractor shall apply secure coding best practices to remediate or mitigate all software weaknesses identified using static and dynamic code analysis tools.

5.3.1.7 Provide documentation on all development tasks that are complete, accurate, and accepted by government proponents.

5.3.1.8 Use a ticketing System. The contractor shall use a Government-provided ticketing system to thoroughly document work in progress through completion. The contractor shall document and provide software discrepancies to the Government within two (2) work hours. The contractor shall provide routine status updates to the Government at a Government-specified frequency, such as a WAR (Weekly Activity Report) and/or weekly in-person meetings

5.3.1.9 Use source code management. The contractor shall use and maintain a WDTC-approved source code management system for source code version control, bug and defect tracking, task management, work item tracking, continuous integration, release management, and deployment management.

5.3.1.10 Adhere to secure coding standards. The contractor shall use an ATEC-approved suite of tools for secure coding including, but not limited to: static code analysis, dynamic code analysis, vulnerability reporting, threat modeling, and vulnerability remediation auditing functions. The contractor shall ensure that all pre-existing and new effort coded solutions are free of CAT I and CAT II vulnerabilities and/or are audited and approved by Government-designated cybersecurity personnel prior to deployment in production environments.

5.3.1.11 Provide user documentation. Create, update, and keep current programming and user documentation for all WDTC applications/systems, as tasked. When Government-directed modifications are made to a system, the contractor shall be responsible for documenting the prescribed changes and updating all system documentation. The contractor shall notify system users of any changes and be responsible for development and distribution of user

documentation, help files, system administration guides, backup and recovery plans, and any other related technical documentation, as required for each management system.

5.3.2 Customer Assistance. The contractor shall assist customers in the functional and technical understanding and use of the WDTC applications/systems. The contractor shall resolve problems referred from the contractor-managed Help Desk, however policy questions shall be referred to the Government for resolution. The contractor shall document software discrepancies. The contractor shall also be responsible for taking corrective actions. In cases where the corrective action is beyond the authority of the software development team, recommendations shall be made to the appropriate Government manager.

5.3.3 Training Classes. The contractor shall provide applications/system training. The Government will provide appropriate classroom space and computers. The contractor shall be responsible for coordinating and scheduling the facilities. Sustainment training for applications/systems shall be conducted on a recurring basis, with class frequency recommended by the contractor and approved by the Government or at the discretion and direction by the Government as applications/systems, policies and/or processes are updated/changed. The contractor shall cover functional content in the class, not only technical execution of the software.

5.3.4 Provide ATEC Legacy Application Support. The Contractor shall provide Legacy (Application) Support. The Contractor shall assume responsibility of the current, Government-owned systems and end user environment, which shall include WDTC infrastructure and services. Requirements for supporting the current environment shall include management and maintenance of the existing infrastructure and ensure legacy systems interoperate and work seamlessly with Contractor-provided services. The contractor shall provide support as required on all legacy applications, to include the aforementioned technologies and toolsets and including:

5.3.4.1 Microsoft Visual Basic for Applications Code Support in existing Microsoft office solutions (Excel, Word, PowerPoint, Access).

5.3.4.2 Power Apps data platform. Support, develop and maintain existing Microsoft Power Apps, (Power BI, Power Apps, Power Automate).

5.3.4.3 Microsoft Project. The contractor shall develop tools, code and solutions in Microsoft Project to satisfy user requirements in support of WDTC's enterprise project management module (PMM).

5.3.4.4 Microsoft Access. The contractor shall support and code legacy Microsoft Access applications and standalone solutions.

5.3.5 SharePoint Portal & SharePoint Solutions

5.3.5.1 Provide Application Testing. The contractor shall ensure that application and solution testing is conducted per Government-approved test plans for IT solutions. These test plans

may include, but are not limited to, functional testing, regression testing, positive and negative testing, and fuzz testing. Testing shall be completed prior to deployment to a production environment as approved by the Government.

5.3.6 Maintain and develop Dugway Proving Ground and WDTC intranet (internal) websites and update as needed using a government provided intranet portal or web development technology. The contractor shall coordinate with departmental content owners and subject matter experts for timely and complete content updates IAW DOD policy.

5.3.7 Maintain WDTC public-facing Internet, IAW DOD policy and Army public publishing standards to include the following: gather requirements from users; obtain PAO approval; publish content; maintain a change log with approval notes for content changes; and mitigate all vulnerabilities.

5.3.8 DevSecOps (Development, Security, and Operations). The contractor shall ensure close cooperation between software developers, network engineers, and quality assurance and cybersecurity personnel to rapidly develop, test, refine, and implement secure, sustainable customer-facing applications as well as automated solutions for IT operations tasks. DevSecOps is a philosophy for improved IT service delivery, which emphasizes teamwork, frequent communication, and working across functional lines, tightly integrating three traditionally separate groups: developers, operations/infrastructure, and security. DevSecOps also emphasizes use of technology and tooling, which helps the integrated team operate efficiently and evolve applications quickly and reliably. These tools help engineers independently accomplish tasks (for example, deploying code or provisioning infrastructure) that normally would have required help from other teams. The contractor shall support automated software source control, build and deployment strategies for continuous integration and continuous deployment of applications/systems software, standardized test artifacts, and documentation according to current industry-accepted best-practices. The contractor shall support development in both Government data centers and commercial cloud environments (including but not limited to milCloud, Amazon Web Services, and Microsoft Azure).

5.3.10 Intermittent Surge. The contractor may provide intermittent surge requirements in support of software development on either an intermediate or permanent basis in support of WDTC and on an intermediate basis to other DOD activities in support of test, evaluation and experimentation missions. The specific performance requirements, duration and location will be identified in each specific tasking.

5.3.11 Systems Administration Support. The contractor shall:

5.3.11.1 Administrator the configuration of all WDTC software systems that support all WDTC’s Enterprise applications and Management Information Systems (MIS).

5.3.11.2 Maintain, troubleshoot, configure, patch and upgrade Windows, Linux and Unix operating systems, including virtual machines (VM) instances and their VM environment administration.

5.3.11.3 Perform operating system event and performance monitoring, resolve issues associated with system configuration management, resource sharing computer network connectivity and throughput.

5.3.11.4 Resolve operating system security issues, identity management issues and conform to records retention and destruction policies as set by the Government policy.

5.3.11.5 Maintain and configure disk configurations, hardware and software RAID 1-N configurations, perform migration, backup and recovery using industry standard scripting languages such as bash, PowerShell, python, ruby, or pearl.

5.3.11.6 Be responsible for performance tuning, capacity planning and bottleneck resolution, administration of Microsoft, Linux and Unix servers, building and maintaining high-availability, clustered and scalable systems, advanced web technologies ASP.NET pipeline, load balancing, etc.

5.3.11.7 Be responsible for management of the WDTC production environment using industry standard utilities such as automated install, automated build and deployment, automated configuration management, enterprise monitoring systems, server virtualization, load balancing, web and application servers, server operating systems and middleware, server configuration and installation, performance and network monitoring tools, operating systems upgrades and migrations. Responsible for troubleshooting hardware and software problems and providing issue resolution.

5.3.11.8 Manage the WDTC environment within the Army cloud, ensuring connectivity to the ATEC DM data mesh. Administration of user accounts, DMs and the cloud-based software environment.

5.3.12 Maintain server hardware, applications, and operating systems.

5.3.12.1 Perform imaging of servers and workstations for the purpose of, but not limited to, initial configuration; capturing data prior to performing upgrades; making changes; installing patches and fixes; and migrating data.

5.3.12.2 Manage and administer Storage Area Network (SAN), file application, and database servers as directed by Government.

5.3.12.3 Schedule and execute installation of upgrades, patches and firmware.

5.3.12.4 Maintain systems IAW established policies and procedures.

5.3.12.5 Use database management tools to ensure data integrity.

5.3.12.6 Diagnose and correct server and workstation performance degradation.

5.3.12.7 Test and deploy Government-approved software using Government-approved tools.

5.3.12.8 Manage requests by users to connect and/or install systems, peripherals, and software IAW local policy.

5.3.12.9 Diagnose and resolve software issues.

5.3.12.10 Support and possibly lead research and proof-of-concept efforts.

5.3.12.11 Perform equipment maintenance IAW manufacturer recommendations and as directed by the Government.

5.3.12.12 Support DOD and Army-approved IT certification and authorization process, procedures, and document creation.

5.3.12.13 Perform user account maintenance for new users, existing users, and terminated users.

5.3.12.14 Ensure data/media recoverability by supporting a schedule of system backups and database archive operations using Government approved tools.

5.3.12.15 Continually monitor data integrity and fault-free efficiency of all WDTC IT systems. The contractor shall notify the Government POC within two (2) work hours if any database discrepancies are noted. In addition, the contractor shall monitor the results of all database update processes.

5.3.12.16 The contractor shall provide database administration and system administration on all designated systems. The contractor shall:

5.3.12.16.1 Support current database software, including, but not limited to, MS-SQL, My-SQL Database Management, Oracle, etc.

5.3.12.16.2 Manage the storage of data on storage devices and monitor usage of devices utilizing various Government-approved software utilities.

5.3.12.16.3 Implement measures to maintain and improve system performance.

5.3.13 Cybersecurity Risk Management Framework Authorization Management.

5.3.13.1 The contractor shall support the ISSM-O in the creation and maintenance of all required policies, procedures, diagrams, hardware/software listings, and all other necessary artifacts required to obtain and maintain ATOs for at least two WDTC system authorizations.

5.3.13.2 Provide support to the WDTC ISSM-O, as required, in drafting and reviewing approval packages for all ATEC systems present in eMASS.

5.3.13.3 LAN/System Management. The contractor shall perform all compliance activities in support of all ATEC HQ systems to include, but not limited to: Incident Response, Vulnerability Scanning/Audits, STIG compliance checking, Configuration Management, Host Based Security Solution/Endpoint Security Solution, Network Access Control, POA&M creation.

5.3.13.4 Secure Code and Application Review. The contractor shall:

5.3.13.5 Perform static and dynamic code analysis of developer created code using government defined tools and validate developer comments related to false positives and mitigations/remediates related to all code analysis. Additionally, provide recommendations for mitigations/remediation to software developers to correct vulnerabilities while maintaining functionality.

55.3.13.6 Develop threat models to assist developers with identifying mitigations/remediation.

5.3.13.7 Cybersecurity Assessment Team. The contractor shall participate on the Cybersecurity Assessment Team to assess systems and network security for WDTC open networks, standalone information systems, closed restricted networks, and, as part of the Organizational Inspection Program. The contractor shall perform assessments and provide evidence to support a certifier's recommendation based on impact and severity to determine operational risk. Contractor will assess all assigned hardware and software, prior to installation on the production network, in an isolated environment utilizing all applicable STIGs, ATEC HQ mandated assessment tools, and NIST 800-53 controls to determine the operational risk installation of the component will pose to the organization. The contractor shall prepare validation artifacts to support the scorecard and test results, and base findings on DoD, Army, ARCYBER, NETCOM, ATEC, or other applicable standard, to include laws, regulations, policies, [etc.] and any other sources of threat/vulnerability information available (e.g. open source, vendor specific, general knowledge, etc.)

5.3.13.8 Workforce In-Processing/Training and Certification Management. The contractor shall do a compliance review along with approval or rejection of requests for all ATEC HQ account creation, modification, and deletion requests. The contractor shall manage and audit all ATEC user accounts within the Army mandated training and certification tool.

5.3.13.9 Cybersecurity Hygiene Reporting. The contractor shall provide the government with the ATEC HQ asset, user, and compliance data required for completion of the ATEC HQ portion of the DOD Cybersecurity Hygiene Scorecard utilizing the Army mandated reporting portal.

5.3.13.10 Removable Media Management. The contractor shall manage the issuance, distribution, and tracking of all removable media being used at WDT Data logs will be collected from all users issued removable media.

5.3.13.11 Official Tasking Responses. The contractor shall Support the Government action officer, as required, in response to guidance/tasks on OPORDs/Fragmentary Orders/Directives to include, but are not limited to, the following:

5.3.13.12 Track and execute cybersecurity taskers. Taskers require coordination with WDTC and ATEC HQ Subject Matter Experts (SMEs).

5.3.13.13 Conduct research and report on results.

5.3.13.14 Perform analysis and provide detailed responses.

5.3.13.15 Perform risk assessments.

5.3.13.16 Surge Support. The contractor shall, as required, support the planning, execution, administration, and maintenance of WDTC cybersecurity initiatives.

5.3.13.17 Cybersecurity Status Report. The contractor shall submit a monthly Cybersecurity Status report (CDRL A010) documenting all relevant information pertaining to the status of any ongoing cybersecurity activities detailed in paragraph 5.3.12.16.4 through 5.3.13.5 of this PWS.

5.3.14 Official Taskers

5.3.14.1 Response to Official Taskers. Support the Government action officer in response to guidance/tasks on OPORDs/Fragmentary Orders/Directives to include, but are not limited to, the following:

5.3.14.2 Track and execute taskers. Taskers require coordination with Subject Matter Experts (SMEs) at ATEC HQ and at all ATEC activities.

5.3.14.3 Conduct research and report on results.

5.3.14.4 Perform analysis and provide detailed responses

5.3.14.5 Review internal and ATEC-wide processes and procedures for potential process improvements.

5.4 Logistics

5.4.1 The contractor shall provide supply support service operations to include: Property Accountability, Supply Room Issue/Inventory, Annual Bulk Buy, and Logistics Support for hand receipt holders. The Government will provide all equipment to perform the requirements on this contract.

5.4.2 Contractor shall assist in the preparation and coordination of annual IT bulk buy and other IT related purchase requirements. The contractor shall assist government personnel in developing and maintaining acquisition related documents and supporting materials to facilitate

the bulk buy to include Chess estimates, ITAS waivers, exemption memos, ETP memos (Exception to Order Size Policy and Non-Standard Configuration) and supporting documents.

5.4.2 Except for special projects, post closures or late openings the contractor hours of operation will be Monday thru Thursday between 0700 to 1730 (MST).

5.4.3 Property Accountability. The Contractor shall maintain hand receipt and property accountability records as defined in applicable regulations, directives and local procedures. The Contractor shall maintain accountability of non-expendable items in a Government provided property accountability system (PAS). The contractor shall process issues, lateral transfers, turn-ins and asset adjustments. Review and print hand receipt inventories, hand receipt reviews and sensitive inventories as required. Identify material and correctly catalog items to be picked up on hand receipt. The contractor shall assist customers with property accountability issues; this may involve research using various methods. The contractor shall maintain document registers and all supporting files. The contractor shall review, verify and process all procurements, assigning appropriate document number. The contractor shall monitor the Logistics Center email account and disperse information as appropriate to applicable personnel. The contractor shall perform required inventories and implement causative research and adjustment documents when required. The contractor shall use a Government provided property accountability system (PAS).

5.4.4 Upon the receipt of expendable or durable property at the CRP, the contractor shall: a) verify the received quantity and the requested quantity, b) the item description is correct, c) complete a quality check for deficiencies, and d) process the receiving paperwork IAW with the local receiving procedures. If there is any damage the PBO must be notified immediately. The contractor shall process the receiving report of the equipment IAW the local procedures. The contractor shall update the Government Ordering Official’s tracking system within two (2) working days of delivery.

5.4.5 The contractor shall perform daily housekeeping duties to maintain a safe and organized work environment free of debris, trash and other hazards at all times. Additionally, the contractor shall perform warehousing & distribution duties as it applies specifically to items with the scope of contract as necessary

5.4.6 The contractor shall maintain all receiving documents for non-expendable and expendable/durable orders for reference and reconciliation.

5.4.7 Shipments. The Contractor shall process shipments as defined in AR 710-2, 735-5 and DA PAM 710-2-1 and local procedures, working with the mailroom personnel to schedule the shipment for the customer. The contractor shall ensure shipments are in compliance with all required regulations, prepare shipment paperwork for material being shipped. The contractor shall identify priority shipments and expedite, maintain and reconcile document register for shipments.

5.4.8 Turn-Ins. The Contractor shall process turn-ins as defined in AR 710-2, 735-5 and DA PAM 710-2-1 and local procedures or instructions.

5.4.8.1 The contractor shall help the hand receipt holders prepare paperwork and then pick up items for turn-in to be processed through the PBO. The contractor shall dispose of any durable property for the hand receipt holders IAW local policies and procedures.

5.4.8.2 The contractor shall maintain a log of all hard drives removed from any computer like device on a localized form. The contractor will destroy and ensure proper disposal of the hard drives in accordance with Army security regulations and local guidance set by the Government.

5.4.8.3 The contractor shall ensure any batteries removed from devices or turned in are properly stored for no more than thirty (30) from the date of receipt. The contractor will dispose of all batteries in accordance with local policies and procedures.

5.4.9 Storage of Material. The contractor shall maintain storage areas for equipment and material being maintained for WDTC support. Safeguard all supplies, equipment, materials, and/or furniture with appropriate storage supplies. The contractor shall notify the PBO immediately of any damages or deteriorated materiel upon discovery. The contractor shall keep a log of items stored in the respective Logistic warehouse locations. The contractor shall issue material to customers at the direction of the Government or IAW approved distribution plans.

5.5 **TRAINING** The contractor shall be responsible for coordinating and scheduling Government facilities and classroom space. The contractor shall:

5.5.1 Create, organize, and conduct training and educational programs for information systems or end-user personnel on hardware, software, or other technology topics. The Government will provide resources required to deliver the training.
5.5.2 Provide customer training, as needed, when significant modifications are made to existing management systems.

5.5.3 Progress and Labor Reporting. The contractor shall:

5.5.3.1 Provide a monthly technical status that details the technical accomplishments for the reporting period, any known issues that could affect future performance of contract requirements and risk mitigation (CDRL A011). The report shall consist of the following: status of contract (cost, schedule, performance); action item status; status of Government-furnished property (GFP); listing of CDRL status; meetings attended; summary of minutes from meetings and trip report summary.

5.5.3.2 Electronically submit all monthly invoices by the 15th workday for the preceding month in WAWF. The invoice shall include up-to-date and current information for the prime and all subcontractors.

5.5.3.3 Provide an electronic weekly labor report to the COR separated by each location for the preceding week for the prime and all subcontractors by COB Tuesday.

5.5.4 Accounting for Contract Services. The Office of the Assistant Secretary of the Army (Manpower & Reserve Affairs) operates and maintains a secure Army data collection site where the contractor shall report all contractor manpower (including subcontractor manpower) required for performance of this contract. The contractor shall completely fill in all the information in the proper format used in the Contractor Manpower Reporting Application (CMRA) at the following web address: https://www.sam.gov. The required information includes:

1. Contracting Office, KO, COR/ACOR, and TM;
2. Contract number, including task and delivery order number;
3. Beginning and ending dates covered by reporting period;
4. Contractor name, address, phone number, email address, identity of contractor employee entering data;
5. Estimated direct labor hours (including subcontractors);
6. Estimated direct labor dollars paid this reporting period (including subcontractors);
7. Total payments (including subcontractors);
8. Predominant Federal Service Code (FSC) reflecting services provided by contractor (and separate predominant FSC for each subcontractor if different);
9. Locations where contractor and subcontractors perform the work (specified by zip code in the United States and nearest city, country, when in an overseas location, using standardized nomenclature provided on website);
10. Presence of deployment or contingency contract language, and,
11. Number of contractor and subcontractor employees deployed in theater this reporting period (by country).
12. Reporting period will be the period of performance not to exceed 12 months ending 30 September of each Government fiscal year and must be reported by 31 December of each calendar year.

5.6 Service Contract Reporting

5.6.1 System for Award Management (SAM) Service Contract Report (SCR): The Contractor shall report ALL Contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract for the WDTC DSD ITSS contract via a secure data collection site. The Contractor is required to completely fill in all required data fields through the following web address: www.sam.gov. Reporting inputs will be for the labor executed during the period of performance during each Government FY, which runs from October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk by clicking “View Assistance for SAM.gov” which is located at the top of the SAM.gov website. From there, you can the select “Contact Our Service Desk” which will allow you to contact SAM.gov directly. If contract period of performance ends prior to September 30, the Contractor has 30 calendar days from end date of the contract to complete the SAM SCR requirement.

Steps for Submitting a Service Contract Report (SCR)

1. Go to www.sam.gov and log in.

2. Select Entity Registrations and then select Service Contract Reporting.
3. SAM displays your entities which have service contracts and meet the reporting criteria. Select View by entity to see the service contracts for each entity.
4. Next, select Add for the service contract against which you want to create a Service Contract Report. Each service contract which meets the FAR Subpart 4.1703 reporting thresholds is displayed.
5. You will be taken to the Complete Service Contract Report page. SAM displays the contract details and allows you to report. You are required to enter the following information:
    - **Total Amount Invoiced:** Total dollar amount invoiced for services performed during the previous Government fiscal year under the contract (this amount should include the prime and any subcontract amount).
    - **Prime Contractor Hours Expended:** Prime contractor direct labor hours expended on the services performed during the previous Government fiscal year. The amount you enter is automatically divided by 2,080 hours to calculate a Full Time Employee (FTE) equivalent, displayed under the Prime Contractor Hours Expended as Prime Contractor FTEs.
6. Report any required Tier 1 subcontractor information by selecting the Add Tier 1 Subcontract Information button.
7. When you are ready to submit the report, select Submit. This saves your report and returns you to the Select Service Contract page where you can create other SCRs or edit an existing SCR.

Steps for Editing a Submitted Report

1. Follow steps 1-4 above. Any previously submitted SCR will have a View/Edit button instead of an Add button.
2. Select View/Edit. You will be able to view the current SCR, edit available fields, and resubmit the record. You can also delete previously entered information altogether.

STD: All information provided by the Contractor shall be accurate, complete, and not exceed suspense dates noted in corresponding paragraph above.
