0. Introduction

A. Description of Services

The Contractor will furnish all necessary personnel, materials, and services to provide IT Service Desk Support Services for the U.S. Consumer Product Safety Commission (CPSC). The Contractor will provide Tier 1 through Tier 2 support services (*See Appendix B*).

B. Contract Type

This procurement is a firm-fixed price performance based task order.

C. Period of Performance

Base year: 7/1/2026 – 6/30/2027.
Option year 1: 7/1/2027– 6/30/2028.
Option year 2: 7/1/2028 – 6/30/2029.
Option year 3: 7/1/2029 – 6/30/2030.
Option year 4: 7/1/2030 – 6/30/2031

D. Place of Performance

The Service Desk staff will work physically at the CPSC headquarters (Bethesda, Maryland) and the National Product Testing and Evaluation Center (Rockville, Maryland). Occasionally the contractor staff may be required to work during normal business hours at the CPSC warehouse facility (Gaithersburg, Maryland). The warehouse work infrequently occurs and is of short duration. Historically one staff person has been onsite daily at the National Product Testing and Evaluation Center (Rockville, Maryland) as a permanent duty station while the other contractor staff are located at the CPSC headquarters (Bethesda, Maryland).

Contractor will adhere to CPSC safety standards during the execution of this contract.

1. Background U.S. Consumer Product Safety Commission

The U.S. Consumer Product Safety Commission (CPSC) is charged with protecting the public from unreasonable risks of serious injury or death from thousands of types of consumer products under the Commission's jurisdiction. The CPSC is committed to protecting consumers and families from products that pose a fire, electrical, chemical, or mechanical hazard or can injure children. The CPSC's work to ensure the safety of consumer products - such as toys, cribs, power tools, cigarette lighters, and household chemicals - contributed significantly to the 30 percent decline in the rate of deaths and injuries associated with consumer products over the past 30 years.

CPSC works to reduce the risk of injuries and deaths from consumer products The CPSC's Office of Information and Technology (EXIT) is charged with ensuring the Commission and its staff have all necessary IT tools and infrastructure required to execute their mission and related duties. The CPSC Division of Technology Services (ITTS) supports staff at CPSC headquarters (Bethesda, Maryland), the National Product Testing and Evaluation Center (Rockville, Maryland), a warehouse facility

(Gaithersburg, Maryland), and remote, teleworking staff across the country. Currently, Tier 1 and Tier 2 support is handled by a mix of contractor and government employees. All infrastructure, network operations, cybersecurity, solutions delivery, and project management Tier 3 operations are currently supported by government employees.

Currently, CPSC Office of Information & Technology Services (EXIT) contracts for Tier 1 (directly fielding incoming customer communications and forward-facing engagement with the customer) and Tier 2 (desk-side and remote support) desktop support. Current Help Desk operations provide support for approximately 600 user devices, (300 at Headquarters, 100at Rockville laboratory and Gaithersburg warehouse, 135 field users outside DC Metro area, & about 65 remote contractors), 2550 network printers, 18 copiers. In addition, government furnished personal printers and mobile devices (iOS) are also supported., 5 personal printers, and mobile devices (iPhones). Of the total users 40 are identified as VIPs across CPSC. Technologies that the ITTS Help Desk supports include, but is not limited to, commercial off-the-shelf applications and hardware (i.e., Microsoft Office suites M365, Adobe Acrobat etc, Microsoft Intune, Windows 11, Dell desktops and laptops, Windows Server 2016/2022 SQL Server 2012/2016, and SUSE Linux. Ivanti Service Manager software and related products serve as the current IT service ticketing system. Microsoft Teams Voice is implemented at CPSC to allow phone calls on landlines and mobile devices directly within the Teams app.

CPSC intends to continue operations and maintenance (O&M) support for the Ivanti Service Manager ticketing system, as well as make future enhancements to the current instance.

2. Description of Work Scope

The Contractor will provide the following Tier 1 and Tier 2 IT operations support services including but not limited to:

- desktop image management
- network account management
- telecommunications and collaboration systems management
- desktop application deployment
- user provisioning
- desktop encryption and device control
- user profile management
- Asset Management/Device Refresh/Delivery
- Microsoft 365 (e.g, Outlook; Teams; OneDrive; Entra; Copilot; Sharepoint, etc.)_

The Contractor will provide and/or facilitate training, documentation, and knowledge transfer about CPSC's IT systems, policies, processes, and procedures.

2.1 The goals and objectives that CPSC expects to achieve are:

- Improve capabilities to respond to customer support requests – incident and service requests
- Adapt wherever practicable ITIL framework, HDI and other industry best practices in a phased, evolutionary manner

- Provide expert level IT operational support for CPSC staff and contractors in defined Tier 1 and Tier 2 service areas
- Configure and implement changes to the ITSM HEAT platform to meet Service Level Agreements in a phased, evolutionary manner

2.2 The contractor will provide Tier 1 and Tier 2 level support for CPSC staff and contractors using the Ivanti ITSM (HEAT) software, Teams Voice, and direct forward-facing interactions with the CPSC customers.

2.3 The contractor will provide escalation paths to CPSC's existing Tier 3 support utilizing the ITSM tool's enabled Incident Management process which may be enhanced.

2.4 Tier 1 and Tier 2 level support will include operational support, customer support, and troubleshooting (break-fix support) for the following:

2.4.1 Desktop Systems Administration (Tier 1 and Tier 2)

- Application Administration
- Communications Management
- Configuration Management
- Connectivity Management
- Desktop Automation Management
- Desktop Image Management
- Specialized Software as required
- Desktop Software Management
- Hardware Management
- Incident Response
- Print Management
- Software License Management
- User Profile Management

2.4.2 Systems Administration (Tier 1 and Tier 2)

- Access Management
- Account Management
- Password Management
- Printing Management
- Remote Access Management

2.4.3 Mobile Device Management (Tier 1 and Tier 2)

- Communications Management
- Configuration Management
- Enterprise Mobility Management
- Hardware Management
- Incident Response
- Systems Administration

2.4.4 User Provisioning (Tier 1 and Tier 2)

- Employee/Contractor Departure

- Employee/Contractor Move
- Employee/Contractor On-Boarding

3. Description of Work Types

3.1 Task Order Management

The contractor will develop and follow a Task Order Management Plan that includes technical approach, organizational resources and management controls to be employed to meet the cost, performance and schedule requirements throughout task order execution. The Contractor will ensure their staff includes the appropriate number of resources and skills for each task and the subsequent administrative responsibilities.

3.2 Kick off Briefing

The Contractor will participate in a kick-off meeting within five (5) business days of contract award to exchange information and review the immediate activities necessary to successfully continue IT Operations Support at CPSC as indicated on the Contractor's accepted proposal. The meeting will include the Contractor's key personnel as well as selected Federal IT staff.

The Contractor will:

1. Address any questions about and confirm the activities/requirements of this task
2. Confirm the roles and responsibilities of the staff involved and organizations
3. Establish points of contact with the staff involved and organizations
4. Identify dependencies and the critical path for execution and continuation of the IT Operations Support activities
5. Confirm the schedule for completion of the continuation tasks (including confirmation of deliverables and due dates)
6. Identify any risks/issues/concerns related to completion of the continuation tasks
7. Review and identify any government-furnished equipment, material, or information required to complete the work under this contract.

3.3 Desktop Systems Administration

The Contractor will perform specific tasks including those listed at Section 2.4.1 (above) and will administer, test, and troubleshoot the following:

1. Hardware and software requests from CPSC staff and contractors
2. Installation and configuration of desktop software and operating systems
3. Desktop and web browser access and connectivity with CPSC business applications, including web-based, local, and network
4. Hard drive encryption system, servers, and processes
5. Network access and connectivity, including remote connections.
6. Perform Tier 1 Troubleshooting of printers and related issues.
7. Remediating malware and viruses in coordination with the Computer Security Incident Response Team
8. MS Teams to support video conferencing, and phone integration with MS Teams.

3.4 Systems Administration

The Contractor will perform specific tasks including those listed at Section 2.4.2 (above) and will administer, test, and troubleshoot the following:

1. Passwords for network (Active Directory and eDirectory), iPhones, and CPSC business applications (including but not limited to FedTalent Training System and Commission Information Systems) accounts

3.5 Mobile Device Management

Mobile Device Management at CPSC includes not only cellular telephones (e.g. iPhones), but also secure (encrypted) hard drives, USB thumb drives, and Box. CPSC is currently using Microsoft Intune as an enterprise mobility management system.

The Contractor will perform specific tasks including those listed at Section 2.4.3 (above) and will administer, test, and troubleshoot the following:

1. Knowledge Services Network
2. Tablets
3. Encrypted portable hard drives and encrypted USB thumb drives
4. iPhone -
5. Mobile broadband modem (MiFi).

3.6 User Provisioning

The Contractor will perform specific tasks including those listed at Section 2.4.4 (above) and will administer, test, and troubleshoot the following:

1. Management of computer equipment
2. User account creation, activation, suspension, and deletion
3. Coordination of related EXIT activities.

3.7 Ivanti Service Manager (ITSM) Platform

Incident or service requests are received by phone, email, walk-in customers, or input to the Self-Service Portal utilizing the Ivanti Service Manager (ITSM) ticketing tool. The contractor will use the Government provided service ticketing tool, ITSM (HEAT) (currently version: - 2023.4.0.2024061901 @ 6/7/2025

The limitations of the Ivanti Service Manager (ITSM) ticketing tool as currently used at CPSC are as follows:

- Service Request/Catalogue management processes not fully implemented; scheduled for FY26
- Category, Type, Item designations for Incidents need to be rationalized and configured
- Additional Service Level Agreements need to be enabled and built out in a phased approach
- Integration with the Asset Management System (Using Ivanti Asset Manager)

The contractor will perform the following:

- Log all incident, problem and service request tickets and track these using the Ivanti Service Manager (ITSM) tool.
- Be responsible for the overall operation of the ticketing system.

3.8 Asset Management

The contractor will perform the following:

1. Maintain equipment inventory when relocating and/or installing new or existing equipment using the CPSC Property Management System (PMS). The PMS is a locally developed application using the Ivanti Asset Management system that ultimately will be fully integrated with the existing Ivanti Service Manager (ITSM) tool. Not excluding any other Service desk solution used within CPSC.
2. The contractor will assist with asset tagging of property as needed.

3.9 User Training – Basic

The contractor will provide basic, introductory training for new CPSC staff and contractors. The contractor will provide basic, introductory training for new technologies, software, and processes implemented by EXIT at CPSC. This training is not intended to be in-depth, advanced training about commercial-off-the-shelf (COTS) or customized solutions.

At a minimum, the following training will be provided for technologies, services, user interfaces, directives, products, applications, policies, processes, and procedures implemented by CPSC that have a direct customer interface (e.g., new software on end user computers or a new wireless network, not a network router or server monitoring software):

- New User
- Initial implementation
- Implementation of a change
- Identification of user knowledge shortfall/gap (e.g., as a result of a Service Desk call or user-invoked systems failure)
- User “Tips & Tricks”, job aid, and handouts with design based on industry best practices.

3.10 Customer Service Delivery

Customer Service and Professional Behavior

The contractor will:

- Present a professional, businesslike image to customers that includes grooming, appropriate dress, and proper cleanliness of work area.
- Exercise discretion in the personal use of electronics so that such use will not interfere with a welcoming approachable demeanor with the Customer. Service Desk staff are encouraged

to make personal phone calls during breaks and lunch. A government furnished cell phone may be provided to facilitate communication for purposes of this task order.

- Demonstrate empathy and exercise patience while communicating with the user in-person, verbally, and in written communications. Ensure clear and upbeat tone when recording the Service Desk status greeting in the Cisco Unified Messaging system.
- Empower users by instructing how to use self-service options when available, including request service sites, managing their own tickets, and searching the knowledge base.
- Close a ticket only after verifying with the user that the incident or request has been resolved to their satisfaction. Provide meaningful responses and solutions verbally and in written form.
- Collaborate with other service providers, including other contractor employees, to provide supportive, customer service focused experience to the customer whenever possible. This behavior may include obtaining ticket status, providing new details in the ticket, or sharing information with the user.
- Assist the government with developing continual service improvements to identify and implement improvements to IT services that support CPSC.

3.11 Prior Notice & No-Prior Notice Events

1) **Prior Notice Events**

The Contractor will shut down IT resources as part of facility closure in the event of emergency situations where the Government has prior notice. The Contractor will assist the local ITTS Government employees, Government Task Monitor(s), or take the lead to accomplish the following as appropriate:

a) Shut down computers; move them out of harm's way if possible (e.g. away from windows, place plastic covers over equipment, etc.).
b) Power down equipment as instructed.
c) Disconnect IT equipment from walls.
d) Label connections removed.
e) Power off non-essential equipment.
f) Cover all equipment with plastic sheeting.
g) Attend and report at local Emergency Planning meetings.
h) Ensure equipment is always secure.
i) Re-installing equipment once the event has ended and as directed by the Government Task Monitor or COR.

2) **No-Prior Notice Events**

The Contractor will take actions to respond and mitigate the impact of no-prior notice emergencies (e.g., tornados, earthquakes, terrorist acts etc.) by assisting the CPSC Government employees, Government Task Monitor(s), COR, or take the lead, to accomplish the following as appropriate:

a) Function as local POC for response and recovery actions.
b) Gather information on the impact of the event.

c) Gain access to facility to and assess damage to the facility and the IT resources and service desk area.
d) Ensure equipment is always secure
e) Accept and process emergency and recovery phone calls and emails from CPSC customers and staff.
f) Re-installing equipment once the event has ended and as directed by the Government Task Monitor or COR.

3.12 Status Reporting

Biweekly. The Contractor's Help Desk team lead will meet biweekly with the COR, the ITTS Director and/or designees(s), and other selected Federal IT staff to discuss the weekly reported status and related issues.

Monthly. The Contractor will meet monthly with the COR, the ITTS Director and/or designees(s), and other selected Federal IT staff to provide a written report and oral discussions about the activities and standards being met under this task order, including the following:

- Accomplishments
- Documentation efforts
- Task risks & issues
- Project management
- Problem management
- Training sessions and feedback
- Support and service level issues
- Quality control
- Communications management

The Contractor will deliver this monthly status report to and hold a meeting with the COR no later than the fourth business day following the last day of the month being reported.

The monthly reports will include but are not limited to:

- <u>Monthly ticket volume resolved by contractor employee</u>
  - First Contact Resolution
  - Performance Metrics
  - Average agent incident talk time
  - Monthly ticket volume created by contractor employee
  - ACD calls answered in total and by contractor employee
  - ACD utilization percentage by contractor employee
  - Spikes and/or reductions in volume are annotated with reasons, if known
  - Quality Assurance
  - Service Level Response
  - Service Level Resolution
  - Knowledge Management
  - Knowledge Base submissions created and modified by contractor employee, including the total amount and the KB reference number of each.
  - Tool Usage
  - Number of remotely managed sessions
  - Duration of remotely managed sessions
- <u>Communication</u>
  - Customer feedback regarding contractor employees or the service desk in general

- Summary of meetings or actions between the contractor supervisor and other service providers
- Potential areas of improvement

- Workforce Management
  - Adherence to work schedule by contractor employee
  - Recruiting/Releasing activity
  - Awards or Certifications Earned
  - Employee development accomplishments

Reporting requirements, both weekly and monthly, may be adjusted in the future and the Contractor will comply with any Government recommended and mutually agreed upon changes. Furthermore, if the Contractor's Help Desk team lead unavailable due to vacation leave or short duration illness the reporting requirement is adjusted to allow report submission no later than three calendar days after the manager's return to duty.

3.13 Standard Operating Procedures

The Contractor will be responsible for ensuring that all standard operating procedure (SOP) documentation is made available to all CPSC users on an as-needed basis (such as via CPSC's SharePoint environment). The Contractor will include the following four (4) activities within this Standard Operating Procedures responsibility:

[1] Review, update, and maintain existing documented ITTS policies, processes, procedures, systems, and software, including interviews with appropriate subject matter experts to determine continued need, current practices, and future plans

[2] Identify and draft existing but undocumented ITTS policies, processes, procedures, systems, and software, including interviews with appropriate subject matter experts to determine and document current and future needs and practices

[3] Identify and draft new ITTS policies, processes, procedures, systems, and software, including interviews with appropriate subject matter experts to determine and document current and future needs and practices.

[4] Coordinate the review and approval process for new and updated documentation.

3.14 Automatic Call Distribution

The Service Desk operator will provide feedback for ACD configuration. At a minimum the following metrics will be configured within the ACD:

1. Time to answer Service Desk Incident/Service Request call: Call answered by agent within thirty seconds from first ring to agent. (Does not include HD greeting message play time.)
2. Time to answer Service Desk voice mail call: Number of voicemails left on the Service Desk phone line that are responded to in less than 30 minutes.

3. Service Desk Ticket-to-Call Ratio (TCR): The ratio of ACD calls received, to the number of incident tickets created or updated.
4. Abandon call Ratio (ACR): The ratio of calls that are abandoned after in queue for 30 seconds.

3.15 Service Level Agreement (SLA)

Appendix A includes the required Service Levels, which are based on Key Performance Indicators. The contractor will implement processes, controls and reporting necessary to either meet or exceed these Service Levels.

The contractor will track the performance against the service level agreements (SLA's) using the Ivanti ITSM (HEAT) tool.

The Government reserves the right to change, add and/or remove service levels to extend those changes that produce meaningful information to the Government, and its review of contract performance. All service level changes will be executed through a contract modification.

The Contractor will be accountable for all SLA's in this PWS. All applicable SLA exclusions such as system outages, maintenance, and Heat ITSM tool limitations will define instances or characteristics outside the control of the Contractor that may, if not excluded, affect compliance with SLAs.

Exclusions that are not explicitly documented in the PWS must be approved in writing by the COR.

The contractor will either meet or exceed the performance requirements. All SLAs will be discussed at the monthly Performance meetings. The contractor's SLA administration will incorporate industry standards and best practices.

4. Key Personnel

The Contractor will be responsible for employing qualified personnel to perform the service required by this contract

The Contractor will have the personnel, organization, and administrative control necessary to ensure that the services are completed satisfactorily.

The Contractor's personnel must have demonstrated experiences, referencing the required skills for successfully completing these services. All personnel must be fully trained and ready for the services for which they are performing and possess excellent verbal and written communication skills.

The Contractor will ensure that each Service Desk specialist including the senior analyst obtains/maintains their HDI Service Center Certified Analyst certification within 6 months of the contract effective date and remain current. Failure of a staff person to earn or retain the certificate will require that a replacement staff person be found.

Contractor will ensure any potential employee has or can qualify for a Public Trust security clearance. The Contractor will meet with the Government COR and any other CPSC staff within five business days of contract award to discuss the contract and to ensure mutual understanding of

operating procedures and the services to be performed. The Contractor will, at that time submit a completed CPSC Form 306/115, Questionnaire for Personnel Identification Verification (PIV), for each contractor employee authorized to perform services under the contract, including proposed substitute employees.

The contractor will provide fully trained, competent staff that are able to make knowledgeable computer support decisions.

At a minimum staff will have work experience directly related to Service Desk support customer service.

The Contractor will also be required to have an ongoing employee training program and be responsible for Contractor employees acquiring the knowledge and skills necessary to support new technology.

The Contractor's staff will be capable of speaking clearly, in grammatically correct English and be easily understood by the customers. The contractor staff must have excellent listening and analytical skills.

Written responses to customers from Contractor staff will be clear, accurate, concise and responsive.

Contractor personnel will have experience supporting the following:

- Microsoft Windows 11 or higher
- Microsoft Office suite 2013, 365 or higher including Access, Excel, Teams, PowerPoint, Project, Visio, and Word
- Adobe Acrobat 11 or higher
- Microsoft Active Directory, Group Policy, WSUS
- Azure Cloud
- Dell desktops and laptops
- Hardware/Software Installation and support
- ITSM HEAT ticketing system or similar product
- Desktop Management Software/ Remote desktop Software
- Symantec Device Control
- VPN Access (Checkpoint or other Manufacturer) Terminal Services
- Novell Products – i.e. Secure Login, iPrint, iManager
- HP & Xerox LaserJet Network printers Administration support
- Xerox Multifunctional color copiers
- Desktop InkJet/Laser Printers
- Projects and Tasks
- Microsoft InTune support
- Pharos Print application/system maintenance
- MS Teams, Zoom, and GoToMeeting support

4.1 Staffing Plan and Requirements

The COR will provide written approval before any employee is assigned to perform duties under this contract. The basis for approval is that the contractor certifies that its personnel meets the requirements. The Contractor will have key personnel employed and available for duty before the Contractor can begin contract performance. Any subsequent changes to key personnel must meet these criteria and be approved in writing by the COR. The following are considered key personnel for the contract. The Contractor may use other titles. Contractor personnel will remain up-to-date on Service Desk procedures and support technologies. The contractor will provide qualified personnel (with the necessary expertise and certifications such as ITIL Foundation, CompTIA A+, HDI, etc.) to provide the Service Desk operational support services described herein.

CPSC estimates the following staff types (position and number) to fulfill this PWS:

Labor Category

Service Desk Manager (1)

Help Desk Specialist – Intermediate (2)

Help Desk Specialist – Senior (2)

Subject Matter Expert – Ivanti (1): Part Time

The Performance Work Statement (PWS) overall goal is to provide CPSC with IT service support personnel and technology capable of meeting the requirements found within this document at *Section 2 – Description of Work Scope* and *Section 3 – Description of Work Types*.

The contractor will submit to the COR, A Staffing Roster listing the names of each employee working on the Contract and including for each employee, as a minimum, the following information: the Contract Number, Contractor Name, Employee Primary User ID, Employee Last Name, Employee First name, Work Location, primary work duties, primary work responsibilities, Office Number, Phone Number, Primary Project Number, and Secondary Project Number.
The Contractor will notify the COR of any additions, deletions, or changes within one working day after the change(s).

The Contractor will develop a staff vacancy plan that will document how they will rapidly fill any vacancies within thirty business days.

At a minimum the vacancy plan will address the following:

[1] A temporary solution to mitigate manning shortfalls until the vacancy can be permanently filled within the thirty-business day time-period. The thirty business day time period will begin when the vacancy first occurred and notification to the COR will occur as soon as possible thereafter.

[2] Augmentation of staff due to planned vacations, sick days, training, and emergencies.

[3] Support coverage will consist of four (5) full-time equivalent (FTE) help desk contractors supporting CPSC HQ in Bethesda, MD and CPSC National Product Testing and Evaluation Center in Rockville, MD. The help desk contractors will work at either or both locations depending on service needs at each location. The staff may be rotated between locations and duty hours as required to provide help desk services meeting contract terms. The team can adjust schedules to provide proper coverage due to call volume, project work, and maximize coverage during core hours. The staff core business hours may consist of:

1 FTE working 7:00am – 3:30pm.

1 FTE working 7:30am – 4:00pm.

1 FTE working 8:00am – 4:30pm.

1 FTE working 8:30am – 5:00pm.

1 FTE working 12pm – 8:00pm.

[6] Staffing must not drop below five (5) full-time equivalent (FTE) staff at CPSC HQ in Bethesda, MD and at National Product Testing and Evaluation Center, Rockville, MD for more than ten (10) consecutive business days. The COR will be notified immediately as soon as a temporary absence (e.g., illness, vacation, training) or permanent vacancy (e.g., dismissal, resignation, transfer) occurs.

Any proposed changes to personnel will be equally or more qualified than the personnel they are replacing.

Contractors will identify potential candidates, perform interviews and background checks to ensure that candidates can pass the Government's on-boarding security vetting process, negotiate salaries, and hire the right personnel and staff the service desk within thirty business days of the vacancy notification to the COR.

4.2 Service Desk support hours

Contractor will:

- Provide service desk support to the CPSC during the core business hours of 7:00 AM to 8:00 PM (Eastern Time zone) Monday through Friday at CPSC headquarters (Bethesda, Maryland) and the National Product Testing and Evaluation Center (Rockville, Maryland). Such service desk support will be provided daily on-site at CPSC headquarters during the core business hours. On-site service desk support at the National Product Testing and Evaluation Center (Rockville, Maryland) may be provided only on designated days and during specific hours as required by service demands at that location. At other times the service desk at CPSC headquarters will manage the service incidents arising at the National Product Testing and Evaluation Center (Rockville, Maryland).
- After hours support from 5pm – 8pm

- No service desk support will be provided on the following listed federal holidays, and any other days designated as federal holidays and days that the federal government is considered closed:
  - New Year's Day (January 1).
  - Birthday of Martin Luther King, Jr. (Third Monday in January).
  - Washington's Birthday (Third Monday in February).
  - Memorial Day (Last Monday in May).
  - Independence Day (July 4).
  - Labor Day (First Monday in September).
  - Columbus Day (Second Monday in October).
  - Veterans Day (November 11).
  - Thanksgiving Day (Fourth Thursday in November).
  - Christmas Day (December 25).
  - Inauguration Day (if applicable).
  - Juneteenth National Independence Day (June 19).

If a holiday falls on a Saturday, the preceding Friday will be treated as a holiday. If a holiday falls on a Sunday, the following Monday will be treated as a holiday

4.3 Inclement Weather, Office Closure & Teleworking

Contractor will:

- Implement a plan for ad-hoc teleworking in the event of inclement weather in accordance with CPSC's current teleworking policy and OPM's (Office of Personnel Management) guidance.
- Implement a pandemic response plan.
- Manage ad-hoc teleworking by the Service Desk Team lead.
- Receive approval by the COR as soon as possible for all teleworking requests.
- When the Federal OPM or the CPSC has announced an "Office Closure" status government offices are closed due to weather or safety reasons. When an "Office Closure" operating status is in effect the Contractor staff must telework for the full business day using assigned GFE laptops issued to each staff person at the time of their onboarding at CPSC. CPSC work proceeds in these circumstances even though the CPSC headquarters (Bethesda, Maryland) and the National Product Testing and Evaluation Center (Rockville, Maryland) buildings are closed and employees are not present. Telework ready Federal employees will be teleworking.
- Implement a plan for full-time teleworking during an event that CPSC announces the closing of CPSC headquarters (Bethesda and/or Rockville, MD locations) and all CPSC telework ready employees will be teleworking.
- Announcements on the status of Government operations in the Washington, DC, area will be available at http://www.opm.gov/policy-data-oversight/snow-dismissal-procedures/currentstatus . Recorded messages on the operating status will also be provided by OPM's Office of Communications on (202) 606-1900.

4.4 Minimum Staffing Requirements:

The PWS overall goal is to provide CPSC with IT service support personnel and technology capable of meeting the requirements found within this document at *Section 2 – Description of Work Scope* and *Section 3 – Description of Work Types.* The guidelines for Help Desk personnel experience, certifications, degrees and skills to meet this overall goal follow in Sections 4.4.1 through 4.4.4 (inclusive).

The Contractor will sufficiently staff the service desk to perform the required service desk tasks specified by the government. The contractor will ensure service desk support and operational mission requirements. Failure to fill any staffing shortfalls within thirty business days of the vacancy may result in an equitable adjustment. CPSC may calculate the deduction retroactive to day one of the vacancy, excluding the days for CPSC conditional approval process, starting on the day of receipt and concluding on the day conditional approval is granted.

4.4.1 Help Desk Specialist:

Will have a minimum of 2 years' experience and provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email and personnel requests for technical support. Documents, tracks, and monitors the problem to ensure a timely resolution.

4.4.2 Help Desk Support Services Specialist - Intermediate:

Will have a minimum of 4 years' experience working in Help Desk operations and requires at least a 2-year college degree in Information Technology or equivalent.

Under general supervision, provides, Tier 2 support to end users for either PC, server, or mainframe applications or hardware. Handles problems that the Tier 1 help desk support is unable to resolve. May interact with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems. Maintains currency and high level of technical skill in field of expertise. Escalates more complex problems to senior level.

4.4.3 Help Desk Support Services Specialist - Senior:

Will have a minimum of 6 years' experience working in Service Desk operations and will have a bachelor's degree in Management or an IT discipline.

Under general direction, provides Tier 2 support to end users for either PC, server, or mainframe –

applications and hardware. Handles problems that the Tier 1 help desk support is unable to resolve. May interact with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems. Maintains currency and highest level of technical skill in field of expertise.

4.4.4 Service Desk Manager:

Will have 6-8 years' experience managing programs and Service Desks and will have a bachelor's degree in Management or an IT discipline.

Has overall responsibility for Service Desk operations associated with the identification, prioritization and resolution of reported incidents. Ensures that all phases of help desk support are properly coordinated, monitored, logged, tracked and resolved appropriately. May maintain responsibility for development, maintenance and integrity of help desk software.

The Service Desk Manager will be the Contractor's authorized point of contact with the COR. The Service Desk Manager will be responsible for formulating and enforcing work standards, assigning schedules, reviewing work discrepancies, and communicating policies, purposes, and goals of the organization to subordinates. The Service Desk Manager is responsible for the overall contract performance. The Service Desk Manager serves as the manager of all contractor personnel assigned to any individual tasks and all contractor functions performed under this task order and serves as the authorized interface with government personnel on technical and program issues.

The Service Desk Manager is responsible for all phases of contract management, workflow, and resource management including: formulating and reviewing strategic plans; subcontractor management; supervising personnel and communicating policies, purposes, and goals of the organization to personnel; developing and managing efforts relative to implementing new CPSC systems and infrastructure updates.

The Service Desk Manager is responsible for the quality of the project(s) and the task deliverables, timeliness, minimizing problems, risk assessment, and reviewing work discrepancies. The Service Desk Manager manages staffing, budget, prioritization, and other personnel matters. The Service Desk Manager may serve as technical lead for the project. The Service Desk Manager prepares and maintains the project schedule, budget and status reports. Oversees all work and takes corrective action as necessary to ensure project success. Provides overall administration and prompt invoicing. The Service Desk Manager will coordinate the Service Desk contractor support and be the liaison to the federal government's COR and operations leadership. This role will provide reporting and management capabilities to support service desk mission effectiveness.

4.4.5 Subject Matter Expert – Ivanti

Labor Category

Subject Matter Expert – Ivanti

Part-time "Ivanti Certified Expert" - Subject Matter Expert (SME)

Qualifications and experience:

Fully Certified Ivanti Expert experienced in using Ivanti suite of engineering tools and software packages to test, debug, patch, and troubleshoot.

Responsibilities:

The Ivanti SME will maintain, troubleshoot, upgrade, modify, patch, and customize software for the CPSC Property Management System, Ivanti IT Security, IT Service Management, IT Asset Management, Ivanti Voice, Xtraction, and Unified Endpoint Management. This includes both on-prem and Cloud based product support.

The Ivanti SME will work an average of 20 hours a week, or 40 hours in a pay period at the discretion of the COR, not to exceed 700 hours per year.

Additionally, week-end work and after hour support may be required for patching, system updates, and troubleshooting. The workload and priorities of the SME will be agreed upon with the contractor and COR.

4.5 Supervision of Staffing

The Contractor will be responsible for the satisfactory supervision of its employees at all times. Satisfactory supervision includes verifying attendance at all positions and upholding the work requirements of all personnel assigned under the contract. The Contractor will provide the COR with the names of all staff prior to the commencement of services.

4.5.1 Staff Performance

The contractor will ensure that all contractor personnel assigned perform in a satisfactory manner acceptable to CPSC. Personnel whose performance is not satisfactory will be removed and replaced by the contractor. The contractor will ensure all replacement personnel have the requisite experience, skill, training and certifications.

4.5.2 Conduct

Contractor personnel will be easily recognized as contractor employees by properly always displaying a Security Identification Badge (CPSC PIV card) while on Government premises. When

Contractor personnel attend meetings, answer phones, and work in other situations where their status is not obvious to third parties, they must identify themselves as such to avoid creating the impression that they are government employees.

When performing work at a government facility, the contractor will be responsible for maintaining satisfactory standards of employee competency, conduct, appearance, and integrity. The contractor is also responsible for ensuring that its employees and those of its subcontractor(s) do not jeopardize the security and the privacy of Government employees, its clientele, and the contents and property of the federal building(s). Each contractor employee is expected to adhere to standards of behavior that reflect credit on themselves, their employer, and the Federal Government.

The contractor will be responsible for taking such disciplinary action, including suspension without pay or removal from the worksite, with respect to its employees, as may be necessary to enforce those standards. Where applicable, the contractor must expressly incorporate the requirements of this clause into subcontract(s). The requirements must be applicable to all subcontractor employees who may perform recurring services or work at the federal building and grounds pursuant to this task order.

5. Transition Plan – Incumbent and Successor Contractor(s)

Transition to Successor Contractor(s) at the end of contract terms –

Contract transition from the CPSC incumbent contractor (incumbent for the purpose of these requirements) to successor contractor(s) may involve either: (a) the incumbent CPSC contractor performing as a contractor for one or more successor contracts; or (b) the incumbent CPSC contractor transitioning all or a portion of the PWS work scope and work types to a successor contractor(s).

CPSC estimates that the outgoing transition period from the incumbent will be a maximum of 30 calendar days when transitioning all or a portion of the PWS work scope and work types to a successor contractor(s). During this transition period the incumbent Contractor will sufficiently staff the service desk to perform the required service desk tasks specified by the government. The contractor will ensure service desk support and operational mission requirements.

<u>The incumbent will during this transition period</u>:

1. Provide management, direction, administration, quality assurance, and leadership for all outgoing transition activities.

2. Assess the current state of the Service Desk operations to ensure the incumbent contractor team is appropriately staffed with the right skills to support outgoing transition activities.

3. Provide an Outgoing Transition Plan that is synchronized with the successor contractor-developed Incoming Transition Plan(s), with schedules of activities and milestones including times involving

parallel operations, incoming and outgoing contractor and/or CPSC personnel responsibilities, and risk mitigations. Provide the Outgoing Transition Plan to the COR of the incumbent (outgoing) CPSC Service Desk contract for review no less than 45-days prior to the end of the incumbent's contract Period of Performance.

4. Implement the Outgoing Transition Plan upon request of the CPSC.

5. Conduct regular weekly transition status meetings to report progress, issues, and planned resolutions during the transition.

6. Collaborate with the successor contractor(s) during a transition-out period to perform all required activities and maintain acceptable performance.

7. Facilitate enabling all required and authorized CPSC system accesses, accounts, etc. to the successor contractor(s) to ensure that there will be no disruption in the ability of the team to continue activities.

8. Transfer system documentation from the incumbent(s) to the successor, identify gaps in standard operation procedures, and provide any available requested documentation prior to the end of the transition period.

9. Transfer configuration management and operations management information for the HEAT ITSM platform and all Service Desk processes, functions and procedures from the incumbent(s) to the successor. This transfer will include complete documentation of those Service Desk processes, functions and procedures.

10. Transfer licensing and warranty information for all CPSC-owned IT assets from the incumbent to the successor(s). The Contractor will ensure that licenses and warranties for all CPSC-owned IT assets are registered to CPSC, not a contractor.

11. Transfer all CPSC-owned application and database software tools, documentation, and training materials from the incumbent to the successor(s).

12. Transfer responsibilities for CPSC-owned IT assets, including but not limited to: application software, data sets, scripts, configurations, logs, files, and folders, at all locations from the incumbent to the successor contractor(s), per the Outgoing Transition Plan.

13. Transfer archives of software and data from the incumbent to the successor(s) for applications and users will be preserved after termination. No loss in software version history, knowledge base entries and articles, incident records, problem records, service request records, processes, lessons learned, project history, physical inventory records, job aid documents and FAQs created by or maintained by the incumbent will occur.

14. Attend and respond to CPSC questions during an operational readiness review conducted by the successor contractor(s) when outgoing transition activities are complete to assist CPSC in determining that the incumbent contractor is no longer required for transition purposes.

15. During transition ensure that there will be no service interruption to the Service Desk operations.

16. Maintain staffing level as described in Section 4.4 Minimum Staffing Requirements to provide all the above listed transition services and to provide ongoing Service Desk operations and service delivery during the transition period. The incumbent Contractor will sufficiently staff the service desk

to perform the required service desk tasks specified by the government. The Contractor will ensure service desk support and operational mission requirements.

--- End ---

APPENDIX A – Service Performance Levels (Provided Separately)

1.	**Performance Objective : 1**
2.	**Category:** Availability
3.	**Service Level:** Percentage of time that the Service Desk staff is available during normal working hours
4.	**Target Service Level:** 90%
5.	**Service Level Target measurement:** Availability (%) = (I00%) – Unavailability (%) where Unavailability is defined as days without all team members.
6.	**Service Level Target measurement tool:** Metric taken from ACD reports and Daily Staff Availability report.
7.	**Frequency of Service Level Reporting***:* Inspected daily, Reported weekly and monthly.
8.	**Measurement of Service Activity:** Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when both the ACD tool and HEAT are operational.
9.	**Service Delivery Scale:** Standard

1.	**Performance Objective : 2**
2.	**Category:** Availability
3.	**Service Level:** Average length of time a customer is waiting in hold queue before reaching a Service Desk representative
4.	**Target Service Level:** 90%
5.	**Service Level Target measurement:** Call answered within 30 seconds after entering phone call hold queue following recorded greeting message and customer's menu choice selection.
6.	**Service Level Target measurement tool:** Metric taken from ACD reports
7.	**Frequency of Service Level Reporting***:* Reported by ACD for every call, Inspected weekly and monthly.
8.	**Measurement of Service Activity:** Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when ACD tool is operational.
9.	**Service Delivery Scale:** Standard

1.	**Performance Objective : 3**
2.	**Category:** Service Response
3.	**Service Level:** Response time for a received Service Desk Incident or Service Request Email.
4.	**Target Service Level:** Response time is < 15 Minutes for 90% of received Incident/Service request emails
5.	**Service Level Target Measurement:** Measured by the difference between the create time of the ticket auto-generation by the HEAT ITSM ticketing system and first assigned time for that ticket.
6.	**Service Level Target Measurement Tool:** Metric taken from HEAT ITSM tool.
7.	**Frequency of Service Level Reporting***:* Collected Daily; Inspected Weekly & Monthly.
8.	**Measurement of Service Activity:** Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT ITSM tool is operational.
9.	**Service Delivery Scale:** Standard

1.	**Performance Objective : 4**
2.	**Category:** Customer Service
3.	**Service Level:** First contact resolution of Service Desk incident.
4.	**Target Service Level:** 70% First Contact Resolution after ticket creation.
5.	**Service Level Target Measurement:** First Contact Resolution (FCR) is the successful diagnosis and correction of an Incident or correct answering of a question during the Service Desk Agent's First Contact with an End-User in response to a Call. o This metric is calculated as follows: Net FCR = Number of contacts resolved initially ÷ (All incoming contacts – Contacts that cannot be resolved at Tier 1) x 100. o Includes only contact where Source is Phone in HEAT o Includes only contact where Type is Issue/Error/Alert o Excludes warm transfers to any other team members or support groups o This metric is calculated as follows: (The number of incidents that were successfully resolved during initial contact within a specific date range ÷ The total number of calls taken within the same date range) x 100.
6.	**Service Level Target Measurement Tool:** HEAT ITSM platform for the number of first contact ticket closures and the ACD tool for the total number of calls answered.
7.	**Frequency of Service Level Reporting***:* Collected Daily; Inspected Weekly & Monthly
8.	**Measurement of Service Activity:** Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays.
9.	**Service Delivery Scale:** Standard

1. Performance Objective : 5
2. Category: Response
3. Service Level: Time to answer Service Desk voicemail call.
4. Target Service Level: 90% of voicemails left on the Service Desk phone line are responded to in less than 30 Minutes
5. Service Level Target Measurement: Time interval calculation = (The date & time the ticket was created) – (The date & time that the voicemail was left).
6. Service Level Target Measurement Tool: The HEAT ITSM platform for the ticket creation time stamp and the ACD tool for the voice mail time stamp.
7. Frequency of Service Level Reporting*:* Collected Daily; Inspected Weekly & Monthly
8. Measurement of Service Activity: Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT and ACD tools are operational.
9. Service Delivery Scale: Standard

1. Performance Objective: 6
2. Category: Customer Service
3. Service Level: Time to respond and resolve VIP incident
4. Target Service Level: 95% of VIP Incident tickets meet the response <=30 min. & resolution <=1 hour.
5. Service Level Target Measurement: Calculation = [(Incident ticket open time - Incident ticket resolve time) - pending status (clock stopped) time]. Tickets are only to be put in a pending status when its resolution is being held up by external factors such as: e.g. awaiting parts, awaiting more information from the user and awaiting direction from a party external to the contract (COR). o Where Source is Phone, Email and Walk-In o Where Type is Issue\Error\Alert or Service Request o Where Team is Help Desk o Ticket must have a journal entry supporting VIP was responded to o Ticket must have a journal entry supporting pending status o Tickets associated with replies, forwards, or new hires, will be excluded
6. Service Level Target Measurement Tool: HEAT ITSM tool.
7. Frequency of Service Level Reporting*:* Collected daily. Inspected weekly and monthly
8. Measurement of Service Activity: Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT is operational. *Excellent:* Response and resolution calculations were met 95% - 100% of the time. *Acceptable*: Response and resolution calculations were met 90% - 94% of the time. *Marginal:* Response and resolution calculations were met 85% - 93% of the time. *Unacceptable:* Response and resolution calculations were met 0% - 84% of the time.
9. Service Delivery Scale: Standard

1. Performance Objective : 7
2. Category: Customer Service
3. Service Level: End-User Satisfaction Rating - Customer Satisfaction
4. Target Service Level: "Customer Service Survey" measures End User responses to Service Desk customer satisfaction survey. ● 60% of all closed HEAT Incident tickets have survey sent to End User within 48 hours of closing ticket. ● 75% of returned surveys indicate "Exceptional" on the service delivery scale.
5. Service Level Target Measurement: (Reported rating) 5 = Excellent Customer Service 4 = Very Good Customer Service 3 = Good Customer Service 2 = Fair Customer Service 1 = Poor Customer Service
6. Service Level Target Measurement Tool: Tool selection to be agreed by Vendor and CPSC among the following available tools -- HEAT Survey Notification, quality checks on HEAT Incident Resolutions, Survey Monkey tool, or Qualtrics tool.
7. Frequency of Service Level Reporting*:* Collected Daily; Reported Monthly and Annually
8. Measurement of Service Activity: Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT and other tools are operational.
9. Service Delivery Scale: 1) Exceptional Average customer satisfaction rating of 4 or better 2) Acceptable Average customer satisfaction rating of 3 3) Unacceptable Average customer satisfaction rating of 2 or below

1. Performance Objective: 8
2. Category: Performance
3. Service Level: Ticket-to-call ratio (TCR)
4. **Target Service Level:** Incident and Service Request Tickets created => 0.95 TCR
5. **Service Level Target Measurement:** Summation of the Number of incident tickets created or updated ('Tickets') and Number of service request tickets created or updated ('Tickets') all divided by the total number of ACD calls received. TCR = [(Incident Tickets + Service Request Tickets) ÷ Total ACD Calls received] o Where 'Tickets' must be Type 'Phone' within HEAT
6. Service Level Target Measurement Tool: HEAT ITSM platform and ACD system.
7. Frequency of Service Level Reporting*:* Reported weekly, monthly, and annually
8. Measurement of Service Activity: Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT and other tools are operational.
9. Service Delivery Scale: Standard

1.	**Performance Objective: 9**
2.	**Category:** Customer Service
3.	**Service Level:** Abandoned call rate (ACR)
4.	**Target Service Level:** Abandoned call rate less than 5%
5.	**Service Level Target Measurement:** Metrics for both abandoned calls ('AC'), and total calls ('TC') placed is taken directly from ACD reports. Only include callers that were in Hold Queue for greater than 30 seconds before hanging up. ● ACR % = (AC / TC) X 100
6.	**Service Level Target Measurement Tool:** ACD system
7.	**Frequency of Service Level Reporting***:* Reported weekly, monthly, and annually
8.	**Measurement of Service Activity:** Measured during the period 7:00am-7:00pm EST, Monday to Friday, excluding Federal holidays, when HEAT and other tools are operational.
9.	**Service Delivery Scale:** Standard

--- End ---

APPENDIX B – Glossary

Abandon call ratio
The percentage of abandoned calls compared to the total number of calls received.

Abandoned call
A call where the caller hangs up before an analyst answers.

Asset
Anything that contributes to the delivery of an IT service such as financial capital, people, hardware, software, network and communication components, and information.

Asset management
The process responsible for tracking and reporting on the value and ownership of assets throughout their lifecycle.

Automatic call distribution (ACD)
Technology that answers a call and routes, or distributes, it to the next available analyst. If all analysts are busy, the ACD places the call in a queue

Best practice
A proven way of completing a task to produce a near optimum result.

Customer
A person who buys products or services.

Customer satisfaction
The difference between how a customer perceives he or she was treated and how the customer expects to be treated.

Customer service
Services that ensure customers receive maximum value for the products or services they purchase.

Customer support
Services that help a customer understand and benefit from a product's capabilities by answering questions, solving problems, and providing training.

Certification
A document awarded to a person who has demonstrated that he or she has certain skills and knowledge about a particular topic or area.

CompTIA A+
A certification that measures a technician's knowledge of hardware and operating system technologies and concepts, along with topics such as security, safety and environmental issues, and communication and professionalism.

Commercial-off-the-shelf (COTS)
Personal computer software products that are developed and distributed commercially.

Customer satisfaction survey
A series of questions that ask customers to provide their perception of the support services being offered.

Escalation (or escalate)
To raise an incident from a specific service support Level (or Tier) to another, such as from Level One to Level Two (or Tier 1 to Tier 2), to dedicate new or additional resources to the incident.

Help desk
The Help Desk primary goal is to help quickly resolve end users immediate needs and technical issues and incidents.

Information
Data that are organized in a meaningful way.

Information Technology Infrastructure Library (ITIL)
A set of global best practices for IT service management.

Incident
An unplanned interruption to an IT service *or* reduction in the quality of an IT service *or* a failure of a Configuration Item that has not yet impacted an IT service (for example failure of one disk from a mirror set).

IT service management (ITSM)
A discipline for managing IT services that focuses on the quality of those services and the relationship that the IT organization has with its customers. The intent is to maximize value delivery to the customers in alignment with their mission, strategic, and business (or regulatory) goals.

Installations, moves, adds, and changes (IMACs)
Activities that include moving equipment, installing and configuring new systems, and upgrading existing systems; also known as moves, adds, and changes (MACs).

Knowledge management
The process responsible for gathering, storing, and sharing information and knowledge within an organization.

Key performance indicator (KPI)
A key metric used to manage a process.

Level One (*see Tier 1*)
The initial point of contact for customers when they have an incident or service request.

Level Two (*see Tier 2*)
The person or group that resolves incidents that are beyond the scope or authority (such as system access rights or permissions) of Level One (i.e., Tier 1).

Level Three (*see Tier 3*)
The person or group that resolves complex incidents that are beyond the scope of Level Two (i.e., Tier 2). Examples of Level Three (i.e., Tier 3) support level capability include system administrators, database administrators, network engineers and those technical staff/managers having advanced access rights and technical knowledge.

Metrics
Performance measures.

Major incident
An incident that is causing significant business impact.

Office of Information Technology and Technical Services (ITTS)

Performance work statement (PWS)

Problem
The cause of one or more incidents

Procedure
A step-by-step, detailed set of instructions that describes how to perform the tasks in a process.

Process
A collection of interrelated work activities that take a set of specific inputs and produce a set of specific outputs that are of value to a customer.

Policy
A formal document that describes the intentions and expectations of management.

Priority
The category that defines the relative importance of an incident and is based on the event's impact and urgency.

Program
An approach used to manage one or more interdependent projects.

Project
A temporary endeavor undertaken to complete a unique product, service, or result.

Project management
The process of planning and managing a project.

Project plan
A summary document that describes a project, its objectives, and how the objectives are to be achieved.

Project scope
A description of the work to be done.

Quality
A characteristic that measures how well products or services meet customer requirements. A measure of how well services meet customer expectations.

Question
A customer request for instruction on how to use a product, such as "How do I...?"

Queue
A line; can be used to refer to a list of calls, tickets, or e-mail messages waiting to be processed.

Requirement
Something that is necessary or essential.

Resolution percent
The percentage of incidents an analyst resolves compared to the total number of incidents that analyst handled during a given period of time.

Response time
The length of time a customer waits for a reply to a fax, e-mail, or Web-based request.

Self-service
In the context of a multi-level support model, customers solving incidents on their own.

Service desk
A single point of contact within a company for managing customer incidents and service requests. Also known as Help Desk or Customer Service Desk or IT Service Desk.

Service Level Agreement (SLA)
A written document that spells out the services the service desk will provide to the customer, the customer's responsibilities, and how service performance is measured.

Service request
As defined by ITIL, a request for information or advice, access to an IT service, or a standard change.

Standard operating procedure (SOP)
A document that contains an agreed, repeatable way of doing something.

Subject matter expert (SME)
A person who has a high level of experience or knowledge about a particular subject.

Support
Services that enable the continued use of a system once it is released for distribution.

System integration
Linking together different computer systems and applications physically or functionally.

Technical support
A wide range of services that enable people and companies to continuously use the computing technology they acquired or developed.

Technology
The tools and systems people use to do their work.

Tier 1
Basic help desk resolution and service desk delivery. Support for basic customer issues such as solving usage issues and fulfilling service desk requests that need IT involvement. Issues are entered into the help desk service management tool (currently the HEAT tool) as incident records. If no solution is available, Tier 1 personnel escalate incidents to a higher Tier (generally to Tier 2). Lower level technical personnel of Tier 1 are trained to solve known problems and to fulfill service requests by following scripts.

Tier 2
In-depth technical support. Experienced and knowledgeable technicians assess incidents and provide solutions for those incidents that cannot be handed by Tier 1. Tier 2 support personnel have deep knowledge of the product or service, but are not necessarily the engineers or programmers who designed and created the product. If no solution is available, Tier 2 support escalates the incident to Tier 3.

Tier 3
Expert product and service support. Access to the highest technical resources available for problem resolution or new feature creation. Tier 3 specialists attempt to duplicate problems and define root causes, using product designs, code, or specifications. Once a cause is identified, the IT service organization decides whether or not to create a new fix, depending on what caused the problem. New fixes are documented for use by Tier 1 and Tier 2 personnel. Tier 3 specialists are generally the most highly skilled product and network specialists, and may include the creators, chief architects, or engineers who created the product or service. Examples of this support level capability include system administrators, database administrators, network engineers and those technical staff/managers having advanced access rights and technical knowledge.

Trend analysis
A methodical way of determining and, when possible, forecasting service trends.

Technologies
Enable the creation and enhancement of tools.

Tool
A product or device that automates or facilitates a person's work.

Virtual Desktop Infrastructure (VDI)
Virtualization technology that hosts a desktop operating system on a centralized server in a data center

Voice mail
An automated form of taking messages from callers.

--- End ---

LC1A CONTRACTOR'S NOTE

The COR – Pleshette Mattison; pmattison@cpsc.gov; or (301) 504-7113.

Deliveries and/or shipments shall not be left at the Loading Dock. All deliveries shall be considered "inside deliveries" to the appropriate room at the Consumer Product Safety Commission (CPSC) and in accordance with the instructions below. When scheduling deliveries the purchase order number shall always be referenced and all packages shall clearly display the Purchase Order Number on the outside of the cartons and/or packages, to include the packing slip.

ATTENTION GOVERNMENT VENDOR

A. DELIVERY INSTRUCTIONS:

1. DELIVERY INSTRUCTIONS FOR LARGE OR HEAVY ITEMS:

If the shipment or item being delivered requires use of a loading dock, advance notification is required. The contractor shall contact the Shipping and Receiving Coordinator at 301-892-0586 or David John (301) 504-7331 forty-eight (48) hours in advance of the date the items are to arrive to schedule use of the loading dock.

LOADING DOCK HOURS OF OPERATION:

9:00 am to 11:00 am or 1:30 pm to 4:00 pm
Monday through Friday (except holidays)

Please notify contact person if there is a change in the delivery date. For changes, delays, or assistance please contact CPSC as follows:

Facilities Management Support Services (301) 504-7091 and

The COR as noted in the award document.

Upon arrival, the driver should contact the CPSC Guard, 301-504-7721, at the loading dock to obtain assistance in using freight elevators and to gain access to CPSC security areas.

2. DELIVERY INSTRUCTION FOR SMALL ITEMS

When delivering or shipping small items, the contractor and/or carrier service shall report to the 4th floor lobby, North Tower, 4330 East West Highway, to sign in with the CPSC guard. Upon completion of signing in, the contractor shall deliver all shipments to the Mail Room, Room 410. After delivery, delivery personnel shall promptly depart the building.

MAIL ROOM HOURS OF OPERATION:
Monday through Friday (except holidays) – 7:30 am to 5:00 pm

B. BILLING INSTRUCTIONS

Pursuant to the Prompt Payment Act (P.L. 97-177) and the Prompt Payment Act Amendments of 1988 (P.L. 100-496) all Federal agencies are required to pay their bills on time, pay interest penalties when payments are made late, and to take discounts only when payments are made within the discount period. To assure compliance with the Act, vouchers and/or invoices shall be submitted through the Invoice Processing Platform (IPP). At a minimum, each invoice document submitted through IPP shall include the documentation required in the contract.

ELECTRONIC INVOICING AND PAYMENT REQUIREMENTS

Invoice Processing Platform (IPP) is a secure web-based electronic invoicing and payment information service available to all Federal agencies and their supplier by the U.S. Treasury's Bureau of Fiscal Service. IPP allows Federal agencies and their suppliers to exchange electronic purchase orders, blanket POs, invoices, and payment information in one easy to access web portal. This service is free of charge to government agencies and their suppliers, including services and support.

(a) Definitions. As used in this clause-
(1)"Payment request" means a bill, voucher, invoice, or request for contract financing payment with associated supporting documentation. The payment request must comply with the requirements identified in FAR 32.905(b), "Payment documentation and process" and the applicable Payment clause included in this contract.

(b) The Contractor shall submit payment requests electronically using the Invoice Processing Platform (IPP). Information regarding IPP is available on the Internet at www.ipp.gov. Assistance with enrollment can be obtained by contacting the IPP Production Helpdesk via email ippgroup@stls.frb.org or phone (866)973-3131.

PAYMENT AND INVOICE QUESTIONS

For payment and invoice questions, contact the Accounts Payable Branch at (304) 480-8000 option 7 or via email at AccountsPayable@fiscal.treasury.gov.

Customer Service inquiries may be directed to Nancy Kneisler at NKneisler@cpsc.gov.

OVERPAYMENTS

Accounts Receivable Conversion of Check Payments to EFT: If the Contractor sends the Government a check to remedy duplicate contract financing or an overpayment by the government, it will be converted into an electronic funds transfer (EFT). This means the Government will copy the check and use the account information on it to electronically debit the Contractor's account for the amount of the check. The debit from the Contractor's account will usually occur within 24 hours and will be shown on the regular account statement.

The Contractor will not receive the original check back. The Government will destroy the Contractor's original check, but will keep a copy of it. If the EFT cannot be processed for technical reasons, the Contractor authorizes the Government to process the copy in place of the original check.

C. INSPECTION & ACCEPTANCE PERIOD

Unless otherwise stated in the Statement of Work or Description, the Commission will ordinarily inspect all materials/services within seven (7) business days after the date of receipt. The CPSC representative responsible for inspecting the materials/services will transmit disapproval, if appropriate, to the contractor and the Contracting Officer. If other inspection information is provided in the Statement of Work or Description, it is controlling.

D. NO AUTOMATIC RENEWALS

If any license or service tied to periodic payment is provided under this agreement (e.g., annual software maintenance or annual lease term), such license or service shall not renew automatically upon expiration of its current term without prior express consent by an authorized Government representative.

(End of Clause)

LC 9 Key Personnel

a. The following individual(s), listed by name and title, have been identified as key personnel for performance under this contract:
[ ]

b. The personnel specified above and/or in the schedule of the contract are considered to be essential to the work being performed hereunder. If these individuals are unavailable for assignment for work under the contract, or it is anticipated that their level of involvement will be significantly different from the negotiated level, the Contractor shall immediately notify the Contracting Officer and shall submit justifications (including proposed substitutions) in sufficient detail to permit evaluation of the impact on the program. The Contracting Officer shall review, and may ratify in writing, such substitutions. Prior to substitution of key personnel, the Contractor shall obtain the written consent of the Contracting Officer.

(End of Clause)

LC 21A Disclosure of Information - Limits on Publication

a. The Contractor shall submit to the Commission any report, manuscript or other document containing the results of work performed under this contract, before such document is published or otherwise disclosed to the public, to assure compliance with Section 6(b) of the Consumer Product Safety Act (15 U.S.C. Section 2055(b)), Commission regulations (16 C.F.R. Part 1101), and a Commission directive (Order 1450.2). These provisions restrict disclosure by Commission Contractors of information that (1) permits the public to identify particular consumer products or

(2) reflects on the safety of a class of consumer products. Prior submission allows the Commission staff to review the Contractor's information and comply with the applicable restrictions. CPSC should be advised of the Contractor's desire to submit or publish an abstract or a report as soon as practical.

b. Any publication of, or publicity pertaining to, the Contractor's document shall include the following statement: "This project has been funded with federal funds from the United States Consumer Product Safety Commission under contract number 613206[_____]. The content of this publication does not necessarily reflect the views of the Commission, nor does mention of trade names, commercial products, or organizations imply endorsement by the Commission."

(End of Clause)

LC 24 Public Statements and Nondisclosure of any Data Developed Under this Contract

a. The Contractor agrees that it and its employees will not disclose any data obtained or developed under this contract to third parties without the consent of the U. S. Consumer Product Safety Commission Contracting Officer Representative (COR).

b. The Contractor shall obtain an agreement of non-disclosure from each employee who will work on this contract or have access to data obtained or developed under this contract.

c. The Contractor shall not externally publish information related to this contract without the approval of the Contracting Officer's Representative (COR). For example, press releases and announcements would require the approval of the COR.

(End of Clause)

LC 30 Security and Personal Identity Verification Procedures

The performance of this contract requires contractor employees to have access to CPSC facilities and/or systems. In accordance with Homeland Security Presidential Directive-12 (HSPD-12), all such employees must comply with agency personal identity verification (PIV) procedures. Contractor employees who do not already possess a current PIV Card acceptable to the agency shall be required to provide personal background information, undergo a background investigation (NACI or other OPM-required or approved investigation), including an FBI National Criminal History Fingerprint Check prior to being permitted access to any such facility or system. CPSC may accept PIV issued by another Federal Government agency but shall not be required to do so. No contractor employee will be permitted access to a CPSC facility or system without approval under the PIV process.

b. Contracted employees must meet the following citizenship requirements:

1. A United States (U.S.) citizen; or,

2. A national of the United States (see 8. U.S.C. 1408); or,

3. An alien lawfully admitted into the United States for permanent residence as evidenced by an alien Registration Receipt Card form I-151

c. Within five (5) days after contract award, the Contractor shall provide a list of contracted personnel, including full name, social security number, and place (city and state) and date of birth to the designated Contracting Officer's Representative (COR). This information will be used to determine whether personnel have had a recent Federal background investigation and whether or not further investigation is required.

d. For each contractor employee subject to the requirements of this clause and not in possession of a current PIV Card acceptable to CPSC, the Contractor shall submit the following properly-completed forms: Electronic Standard Form (SF) 85 or 85-P, "Questionnaire for Non-sensitive Positions," SF 87 Fingerprint Chart, Optional Form (OF) 306, and a current resume. The SF-85 is available from the Office of Personnel Management's (OPM) secure website. The CPSC Office of Human Resources will provide the COR with the other forms that are not obtainable via the internet.

e. The Contractor shall complete the electronic security form and deliver the other completed forms indicated in paragraph d above to the COR within five (5) days of written notification from the COR of those contractor employees requiring background investigations.

f. Upon completion of the investigation, the COR will notify the Contractor in writing of all investigation determinations. If any contractor employees are determined to be unsuitable to be given access to CPSC, the Contractor shall immediately provide identical information regarding replacement employees. The Contractor is responsible for providing suitable candidates and fulfilling staffing requirements under the contract so that there is no break in service. This approval process applies to contract start up and any required replacement personnel. Failure to prequalify potential replacement personnel will not serve as an excuse for failure to provide performance. Non performance due to failure to provide suitable contractor employees may result in a Termination for Cause or Default.

g. CPSC will issue a PIV Card to each on-site contractor employee who is to be given access to CPSC facilities and systems. The employee will not be given access prior to issuance of a PIV Card. CPSC may revoke a PIV card at any time if an investigation or subsequent investigation reveals that the personnel are unsuitable.

h. PIV Cards shall identify individuals as contractor employees. Contractor employees shall display their PIV Cards on their persons at all times while working in a CPSC facility, and shall present cards for inspection upon request by CPSC officials or security personnel. The contractor shall be responsible for all PIV Cards issued to the contractor's employees and shall immediately notify the COR if any PIV card(s) cannot be accounted for.

i. CPSC shall have and exercise full and complete control over granting, denying, withholding, and terminating access of contractor employees to CPSC facilities and systems. The COR will notify the Contractor immediately when CPSC has determined that an employee is unsuitable or

unfit to be permitted access. The Contractor shall immediately notify such employee that he/she no longer has access, shall remove the employee and shall provide a suitable replacement in accordance with contract requirements and the requirements of this clause.

j. By execution of this contract, the Contractor certifies that none of the employees working under this contract have been convicted of a felony, a crime of violence, or a misdemeanor involving moral turpitude, such as a conviction of larceny within the last five (5) years. During contract performance the contractor shall immediately notify CPSC if one of its employees working under this contract has been convicted of a felony, a crime of violence, or a misdemeanor involving moral turpitude, such as a conviction of larceny within the last five years.

k. The Government reserves the right to have removed from service any Contractor employee for any of the following:

1. Conviction of a felony, a crime of violence, or a misdemeanor involving moral turpitude, such as a conviction of larceny within the last five (5) years.

2. Falsification of information entered on security screening forms or other documents submitted to the Government.

3. Improper conduct during performance of the contract, including criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct or other conduct prejudicial to the Government regardless of whether the conduct is directly related to the contract.

4. Any behavior judged to be a threat to personnel or property.

l. The COR shall be responsible for proper separation of contracted employees at the Consumer Product Safety Commission. The COR shall ensure that each contractor employee completes CPSC's official out processing procedures. The contracted employee shall report to the CPSC Facilities Security Specialist to obtain a Contractor Employee Accountability and Clearance Record. This record shall be completed as part of the official out-processing procedures and returned along with the PIV Card, key fobs, keys and any other previously issued material.

m. Contractor employees shall comply with applicable Federal and CPSC statutes, regulations, policies and procedures governing the security of the facilities and system(s) to which the contractor's employees have access.

n. Failure on the part of the Contractor to comply with the terms of this clause may result in termination of this contract for cause or default.

o. The contractor shall incorporate this clause in all subcontracts.

(End of Clause)

Additionally FAR clause 52.204-9 Personal Identity Verification of Contractor Personnel has been incorporated by reference.

LC 31 Restrictions on Use of Information

a. If the Contractor, in the performance of this contract, obtains access to information such as CPSC plans, reports, studies, data protected by the Privacy Act of 1974 (5 U.S.C. 552a), or personal identifying information which has not been released or otherwise made public, the Contractor agrees that without prior written approval of the Contracting Officer it shall not: (a) release or disclose such information, (b) discuss or use such information for any private purpose, (c) share this information with any other party, or (d) submit an unsolicited proposal based on such information. These restrictions will remain in place unless such information is made available to the public by the Government.

b. In addition, the Contractor agrees that to the extent it collects data on behalf of CPSC, or is given access to, proprietary data, data protected by the Privacy Act of 1974, or other confidential or privileged technical, business, financial, or personal identifying information during performance of this contract, that it shall not disclose such data. The contractor will keep the information secure, protect such data to prevent loss or dissemination, and treat such information in accordance with any restrictions imposed on such information.

(End of Clause)

LC 32 Standards of Conduct

1. Government contractors must conduct themselves with the highest degree of integrity and honesty. Contractors shall have standards of conduct and internal control systems that:
a. Are suitable to the size of the company and the extent of their involvement in Government contracting,
b. Promote such standards,
c. Facilitate timely discovery and disclosure of improper conduct in connection with Government contracts, and
d. Ensure corrective measures are promptly instituted and carried out.
e. The contractor must comply with CPSC, Federal, State, and local guidelines with regards to working on-site. This may include providing its employees with face masks, gloves, disinfectant, etc. as required
by CPSC.

2. By submitting a proposal in response to this solicitation and under award of any resultant contract, the Contractor agrees to employ standards of conduct and internal control systems, which shall include, but are not necessarily limited to the following.
The Contractor shall provide, for all employees:
a. A written code of business ethics and conduct and an ethics training program
b. Periodic reviews of company business practices, procedures, policies, and internal controls for compliance with standards of conduct and the special requirements of Government contracting;
c. A mechanism, such as a hotline, by which employees may report suspected instances of improper conduct, and instructions that encourage employees to make such reports;
d. Internal and/or external audits, as appropriate;
e. Disciplinary action for improper conduct;

f. Timely reporting to appropriate Government officials of any suspected or possible violation of law in connection with Government contracts or any other irregularities in connection with such contracts; and
g. Full cooperation with any Government agencies responsible for either investigation or corrective actions.
h. A copy of the written code of ethics and information regarding the above shall be made available to the Government upon request.

(End of Clause)

LC 33 Contractor Personnel

A clear distinction is made between Government and Contractor personnel. No employer-employee relationship will occur between government employees and contractor employees. Contractor employees must report directly to their company (employer) and will not report to Government personnel.

(End of Clause)

LC 37 Security and Privacy

(a) Agency rules of conduct that the Contractor and the Contractor's employees shall be required to follow:

In performing its duties related to management, operation, and/or access of systems containing personally identifiable information (PII) under this contract, the Contractor, its employees and subcontractors shall comply with all applicable privacy and security requirements and rules of conduct as specified by the following:

1. Contractor employees must comply with agency personal identity verification (PIV) requirements in order to logically access Government systems.

2. System access granted under this contract is only for work required to perform official duties specified in the contract. The performance of any unrelated and/or unauthorized activity is prohibited.

3. Access to Government information systems (where applicable) will only be for the period stated in the contract. Thereafter, all accounts, passwords, and access associated with the contract will be terminated.

4. Disclosure of any system account information or system passwords to any unauthorized party is prohibited.

5. Exhibiting or divulging the content of any record or report to any person except in the performance of official duties specified in the contract is prohibited.

6. Using any data accessed with a Government system account for unauthorized purposes is prohibited.

7. No official record, report, database, or copy thereof, may be removed from Government premises or Government systems without prior written permission.

8. Contractor employees are prohibited from modifying, altering, or otherwise changing any Government system component or configuration except in the performance of official duties specified in the contract. Contractor employees are prohibited from issuing any system command or running any software, scripts, or programs on Government systems without prior authorization.

9. Contractor employees must not disclose sensitive or personal privacy-related information to any unauthorized party.

10. Contractor must notify the Government Contracting Officer and Contracting Officer Representative (COR) immediately upon the termination of any Contractor or subcontractor employee so that system accounts, remote access, or other forms of system access can be terminated.

11. The use of Contractor-owned laptops or other portable media storage devices to process, transmit, or store PII is prohibited under this contract [unless the Contractor is authorized to access Government systems through the agency's virtual desktop infrastructure environment].

12. The Contractor must notify the Government Contracting Officer, Contracting Officer Representative (COR), the agency's Information Systems Security Officer (ISSO), and the Chief Privacy Officer (CPO) immediately upon the discovery—or suspected discovery—of any type of security incident, malicious activity, or privacy breach affecting or that might potentially affect the Government's network, specific systems, or Government-owned information in any form or format.

13. Contractor employees with access to Government systems must agree to agency Rules of Behavior and shall complete annual security and privacy awareness trainings and any role-based security and privacy trainings necessary, as determined by CPSC's Office of Information Technology (EXIT).

14. Contractors must comply with EXIT's Change Control Process (CCP), Solution Development Life Cycle (SDCL) and Security & Privacy processes.

15. Contractor shall make changes to CPSC infrastructure only if approved through EXIT's CCP.

16. Contractor shall not utilize any software or application that the US government has deemed unsafe or a threat to national security. If use of such software is required to fulfill the obligations of the contract, an exemption from CPSC's Information Security Office must be obtained prior to use of said software.

17. Contractor shall provide a self-attestation that they are following NIST's Secure Software Development Framework and provide a Software Bill of Materials (SBOM) in accordance with OMB M-22-18.

(b) A list of the anticipated threats and hazards that the Contractor must guard against.

The Contractor must use reasonable measures to guard against the following threats and hazards:

1. Unauthorized disclosure or use of sensitive system information—including system architecture, system configuration, system accounts, and system passwords.

2. Unauthorized disclosure or use of the contents of any information obtained from Government systems—including system records, system reports, or databases.

3. Unauthorized modification or alteration of any Government system component or configuration.

4. Unauthorized circumvention, avoidance, or deception of any Government security system, measure, or control.

5. Unauthorized installation and/or use of hardware, software, firmware, portable media storage, or mobile devices on Government systems.

6. Unauthorized use of Government systems—including hardware, software, system accounts, Internet access, and email accounts—for activity which is not required to perform official duties under this contract.

(c) A description of the safeguards that the Contractor must specifically provide.

1. The Contractor shall limit access to any information related to this contract to those employees and subcontractors who require the information in order to perform their official duties under this contract.

2. The Contractor, Contractor employees, and subcontractors must physically secure PII when not in use and/or under the control of an authorized individual, and when in transit to prevent unauthorized access or loss.

3. When PII is no longer needed or required to be retained under applicable Government records retention policies, it must be destroyed through means that will make the PII irretrievable. The Contractor must provide a certificate of destruction when PII is destroyed.

4. The Contractor shall only use PII obtained under the contract for purposes of the contract and shall not collect or use such information for any other purpose without the prior written approval of the Contracting Officer.

5. At expiration or termination of this contract, the Contractor shall turn over to the Government, all PII obtained under the contract that is in its possession.

6. In the event of any actual or suspected breach of PII, the Contractor shall immediately report the breach to the Contracting Officer, the Contracting Officer's Representative (COR), the agency's Information Systems Security Officer (ISSO), and the Chief Privacy Officer (CPO).

7. In the event that a PII breach occurs as a result of the violation of a term of this contract by the Contractor or its employees, the Contractor shall, as directed by the Contracting Officer and at no cost to the Government, take timely action to correct or mitigate the violation, which may include providing notification and/or other identity protection services to affected persons for a period of at least 24 months from discovery of the breach. The Contractor should follow the Commission's Privacy Breach Response Policy and Plan during the investigation and remediation of any potential privacy breaches. All notifications and offers of services to potentially affected persons must be reviewed and approved by the Commission's Breach Response Team before sending. If the Government elects to provide and/or procure notification or identity protection services in response to a breach, the Contractor shall be responsible for reimbursing the Government for those expenses. The Contractor shall incorporate the substance of this clause, its terms and requirements in all subcontracts under this contract, and require written subcontractor acknowledgement of same. Violation by a subcontractor of any provision set forth in this clause will be attributed to the Contractor.

(d) Requirements for a program of Government inspection during performance of the contract that will ensure the continued efficacy and efficiency of safeguards and the discovery and countering of new threats and hazards.

Work to be performed under this contract requires the design, development, operation, or disposal of a Federally-controlled information system containing personally identifiable information or handling personally identifiable information. To the extent required to carry out a program of inspection to safeguard against threats and hazards to the security, integrity, and confidentiality of personally identifiable information, the Contractor shall permit the Government access to, and information regarding, the Contractor's facilities, installations, technical capabilities, operations, documentation, records, and databases, when requested by the Government, as part of its responsibility to ensure compliance with privacy and security requirements. The Contractor shall otherwise cooperate with the Government in assuring compliance with such requirements. Government access shall include independent validation testing of controls, system penetration testing by the Government, Federal Information Security Management Act data reviews, and access by agency Inspectors General for its reviews.

Definitions.

"Personally Identifiable Information" (PII) means information that can be used to distinguish or trace an individual's identity, such as his or her name, social security number, or biometric records, that alone, or when combined with other personal or identifying information that is linked or linkable to a specific individual, such as date and place of birth or mother's maiden name. Please see the CPSC Privacy Breach Response Policy and Plan for additional examples of PII.

"Privacy Breach" means the loss of control, compromise, unauthorized disclosure, unauthorized acquisition, or any similar occurrence where (1) a person other than an authorized user accesses or potentially accesses PII or (2) an authorized user accesses or potentially accesses PII for an other than authorized purpose.

"Security Incident" means an occurrence that (1) actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information or an information system; or (2) constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies.

(End of clause)

LC 38 Ending Illegal Discrimination and Restoring Merit-Based Opportunity

Contractor/Grantee agrees that compliance in all respects with all applicable Federal anti-discrimination laws is material to the government's payment decisions for purposes of section 3729(b)(4) of title 31, United States Code.

Contractor/Grantee certifies that it does not operate any programs promoting DEI that violate any applicable Federal anti-discrimination laws.

(End of clause)

52.204-19 Incorporation by Reference of Representations and Certifications.

As prescribed in 4.1202(b), insert the following clause.

Incorporation by Reference of Representations and Certifications (Dec 2014)

The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

(End of clause)

52.217-8 Option to Extend Services. (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days.

(End of clause)

52.217-9 Option to Extend the Term of Contract (Mar 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 5 days prior to expiration of the contract; provided that the Government gives the

contractor a preliminary written notice of its intent to extend at least 10 days before the contract expires. The preliminary notice does not commit the Government to an extension
(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.
(c) The total duration of this contract, including the exercise of any options under this clause, shall not to exceed three years.

(End of clause)

ADDITIONAL INFORMATION TO QUOTERS

This is a best value procurement. The award price or cost will not necessarily be the lowest, but will be sufficiently more advantageous to the Government than the lowest offer to justify the payment of additional amounts based on the evaluation criteria described in this section. The winning Quoter cannot take exception to any of the clauses or provisions in the quotation.

The Government reserves the right to award without discussion.

System for Award Management (SAM) is mandatory to be eligible for this award. The successful Quoter must have an active SAM registration at the time of award. The purpose of registration must read "All Awards".

All quote packages that are submitted in response to this RFQ will be at the expense of the contractor.

FORMAT AND INFORMATION FOR SUBMITTING A QUOTE:

Please submit your quotation as THREE SEPARATE ATTACHMENTS IN AN EMAIL:

VOLUME 1: TECHNICAL PROPOSAL

The technical proposal should clearly and fully demonstrate the Quoter's capabilities, knowledge, understanding and experience regarding the technical requirements described below. Failure to respond explicitly to each of the categories and/or subcategories listed below may result in the Quoter's Quote submittal being deemed technically unacceptable.

Sub Factors. The Quoter must address the following technical sub-factors:

Sub-factor A - Staffing: Roles and responsibilities of Service Desk operations with respect to Tier I and Tier II support; minimum requirements for service desk staff; vacancy plan; on-site supervision of staff; and performance assessment of on-site service desk coverage from 7:00am to 8:00pm. Staffing will be at the National Product Testing and Evaluation Center (Rockville, Maryland) and at CPSC Headquarters (Bethesda, Maryland).

The Contractor will propose additional service desk hours; the solution will include onsite service desk coverage from 5:00pm to 8:00pm; coverage activities; and performance assessments. Staffing will be at the National Product Testing and Evaluation Center (Rockville,

Maryland), at CPSC Headquarters (Bethesda, Maryland).

Roles and responsibilities of the Ivanti Subject Matter Expert as well as qualifications and availability and ability to support the various Ivanti products including the monitoring and reporting of performance.

Sub-factor B - Incident Response: Service level agreements, trend analysis, metrics, dashboard reporting to EXIT management, and status reports.

Sub-factor C - Administration: Supporting out-going/transition plan for incoming vendor; project management; knowledge management; documentation to include policies, processes, and procedures; task order management; quality assurance.

Sub-factor D - Technical Capabilities: Integration of Ivanti ISM, Voice, Xtraction, Asset Manger (including Property Management), EndPoint Discovery and Manager, and the development of a software usage and license inventory and compliance and other Ivanti related products. Support for VPN as well as Citrix XenDesktop in a VDI environment, Azure Cloud. Support COTS hardware. Software support to include Windows operating software for workstations, server, and account level management. Provide iOS platform support with XenMobile and Microsoft Intune. Operations and Maintenance (O&M) support of the currently installed MS Teams phone system or any other VOIP telephone system replacement across all CPSC location sites in Rockville, Bethesda and Gaithersburg (warehouse).

Sub-factor E - Functional Area Support: Capability to support the following functional areas: Custom computer programming services, Computer systems design services, Cybersecurity, Network operations, and Telecommunications.

Sub-factor F - Customer Service: Capability to support the following service activities: customer engagement, customer training, and continual service improvement.

Sub-factor G -Transformation and Innovation: Describe the strategy to be implemented to improve business processes that will meet the demands of current and planned technology at CPSC.

VOLUME 2: EXPERIENCE AND PAST PERFORMANCE

Other than CPSC, the Quoter will submit three (3) contracts/task orders with the Federal Government or commercial customers that demonstrate recent and relevant past performance. Recent is defined as within the last three years. Relevant is defined as work similar in complexity and magnitude of the work described in this Performance Work Statement.

Include the following information: Project title
Description of the project and why you deem this reference relevant to this effort Contract and/or task order number
Contract amount and type of contract
Government Agency/Organization/Name of Company

COTR's/COR's/ or Point of Contact name, email, address, and phone number Contracting Officer's name, email, address, and phone number
Current status, e.g., completed and/or if in progress, start and estimated completion dates

The Government may also consider information obtained through other sources. Past performance information will be utilized to determine the quality of the contractor's past performance as it relates to the probability of success of the required effort.

The Quoter will provide information that clearly demonstrates the quality of the work performed. Please include the scope of work, objectives, problems encountered/how they were resolved, and final outcome(s).

VOLUME 3: PRICING PROPOSAL

Your price quote will be a separate volume from your technical quote. The price quote is to be submitted as a FIRM FIXED PRICE for the services throughout the Performance Work Statement on a monthly basis.

The Quoter will provide a breakdown for the price which will include pricing for each position(s) broken out via hourly rate(s). Each hourly rate is a fully loaded labor rate (including, but not limited to, applicable direct and indirect costs such as compensation, fringe benefits, insurance, social security, overhead, general and administrative expenses, and profit.)

EVALUATION PROCESS:

The government will award a contract resulting from this quotation to the responsible Quoter whose quote conforms to the request for quote and which will be the most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate the prospective contractor:

Factor 1 - Technical Proposal (includes sub-factors A, B, C, D, E, F, G).
Factor 2 - Experience and Past Performance
Factor 3 - Price

Relative Importance of Factors:
Factor 1 - Technical Proposal (includes sub-factors A, B, C, D, E, F, G) is "significantly more important" than Factors 2 and 3
Factor 2 - Experience and Past Performance is "more important" than Factor 3.
Factor 3 - Price is considered to be less important than Factors 1 and 2.

The technical evaluation sub-factors (includes sub-factors A, B, C, D, E, F, G) are considered to be comparatively equal to one another.

“Significantly more important” is defined as two times greater in value than “more important”, whereas "more important" is greater in value than any lesser criteria.

PRICE WILL BE EVALUATED SEPARATELY FROM THE TECHNICAL SUB-FACTORS AND PAST PERFORMANCE.

Price will be evaluated for price reasonableness through cost and price analysis techniques.

Pricing will not be scored.

PAST PERFORMANCE WILL BE EVALUATED AS FOLLOWS:

The evaluation of Past Performance will not be adjectival rated as above. Evaluation of past performance will be based on the following:

a. Neutral- No record of relevant past performance.

b. High Risk- Equates to a low probability of success. Verification of Past Performance shows that offerors have consistently not met work schedules and other obligations, have defaulted on at least one contract within the past three (3) years, or have chronically failed to meet contract terms.

c. Medium Risk- Equates to a reasonable expectation of success. Verification of Past Performance shows that offeror occasionally has not met work schedules or other obligations, on occasion has been unable to provide requested services, or met contract terms with only a few reported failures, and has not defaulted on any contract within the past three (3) years.

d. Low Risk- Equates to a substantial probability of success. Verification of Past Performance shows that offeror consistently meets work schedules, provides specified services, meet contract terms without failure, and has not been defaulted on any contract within the past three (3) years.

Written proposals will be evaluated by technical evaluators. Proposals will be adjectively evaluated and placed into one of the following categories: Outstanding, Acceptable, and Susceptible to being made acceptable, or Unacceptable.

The definitions for these categories are as follows:
Outstanding - A unique approach which satisfies all of the Government's requirements with extensive detail to indicate how the approach is innovative and not only feasible but desirable, and which is well supported by experience and quantifiable evidence that it will be successful. A quotation which offers significant advantages to the Government in meeting all requirements.

Acceptable - An approach which satisfies all of the Government's requirements with adequate detail to indicate the feasibility of the approach and an understanding of the Government's need.

Susceptible to being made acceptable - An approach which, as initially proposed, cannot be rated acceptable because of minor errors or omissions which are capable of being corrected without a major rewrite or revision of the proposal. This proposal does not clearly meet the Government's requirements. (Quoters will only be given an opportunity to correct this rating if the Government

enters into negotiations. Otherwise, such proposals will be determined to be unacceptable. Therefore, Quoters are encouraged to provide complete and thorough explanatory technical proposals with their initial submission.)

Unacceptable - The proposal fails to meet or to address the technical factors of the solicitation, contains major errors, omissions, or deficiencies, or indicates a lack of understanding of the Government's need. The proposed approach is based on unproven techniques or is inadequately supported with evidence that it will be successful, or the approach cannot be expected to meet the Government's requirements without a major rewrite or revision of the proposal.

The Contracting Officer's determination for technical acceptability will be based only on the technical evaluation from technical evaluators. Negotiations may be conducted if the Contracting Officer deems it appropriate.
