TASK ORDER REQUEST (TOR)

47QFEA26Q0007 AMENDMENT 03

Operations and Maintenance Support (O&M)
&
Minor Development, Modernization and Enhancement (Minor DM&E)
Personal Property Management System (PPMS),
Transportation Management Services Solution (TMSS) and SmartPay (PTS)

in support of:

GSA Office of the Chief Information Officer (OCIO)
Acquisition IT Services
Personal Property and Travel & Transportation Management Systems Division

Issued to:
All contractors under the General Services Administration (GSA) *8(a) Streamlined Technology Acquisition Resource for Services (STARS) III* Governmentwide Acquisition Contract (GWAC)

Conducted under Federal Acquisition Regulation (FAR) Subpart 16.5 (GSA Class Deviation RFO-2025-16)

Issued by:

GSA Assisted Acquisition Services (AAS) *Civilian*

Date*: 05/11/2026*

Controlled by AAS Contracting Officer *Luis Nieves: luis.nieves@gsa.gov*

SECTION B – SUPPLIES OR SERVICES AND PRICES

B.1 GENERAL

The work shall be performed in accordance with all Sections of this Task Order (TO) and the offeror's General Services Administration (GSA) *8(a) STARS III* Master Contract, under which the resulting TO will be placed.

An acronym listing to support this Task Order Request (TOR) is included in **Section J, Attachment B.**

B.2 CONTRACT ACCESS FEE (CAF)

The General Services Administration's (GSA) operating costs associated with the management and administration of this contract are recovered through a CAF. In accordance with the *8(a) STARS III* Master Contract, the CAF shall be 0.75 percent of the total TO value with a cap of $100,000 per year per order (when order is in excess of $13.3M per order year). This TO shall have a separate Contract Line Item Number (CLIN) to cover this access fee, and this CAF shall be obligated at TO Award (TOA).

B.3 ORDER TYPE

This Task Order (TO) is a Time and Material (T&M) type order with Not-to-Exceed (NTE) Contract Line Item Numbers (CLINs).

The contractor shall perform the effort required by this TO on a T&M, *mandatory & optional* basis for:

a. T&M Mandatory CLINs:

X001 PPMS Sales - O&M
X003 PPMS U&D - O&M
X008 TMSS - O&M
X010 SmartPay - O&M

b. T&M Optional CLINs:

X002 PPMS Sales - DME
X004 PPMS U&D - DMEc
X005 PPMS U&D - COVS ACT - O&M
X006 PPMS U&D - COVS ACT - DME
X007 SoftwareLicenses
X009 TMSS- DME
X011 SmartPay - DME
X012 Transition (Base Period only)
X013 Surge Support

c. T&M CAF CLIN (no GSA Fee):

X014 CAF

B.4 SERVICES AND PRICES

CAF	Contract Access Fee
CLIN	Contract Line Item Number
FFP	Firm-Fixed-Price
LH	Labor-Hour
NTE	Not-to-Exceed
ODC	Other Direct Cost
QTY	Quantity
T&M	Time-and-Materials

SECTION B – SUPPLIES OR SERVICES AND PRICES

B.4.1 SECTION B TABLES; BASE AND OPTION PERIODS. (See Attachment R for pricing)

BASE PERIOD: 8/27/2026-8/26/2027

CLIN	Description	QTY	Unit	Total T&M

	Total			

GRAND TOTAL ALL CLINs: **$** _____

B.4.2 INDIRECT/MATERIAL HANDLING RATE

Material and material handling costs will be paid as provided in FAR 52.232-7(b) "Payments under Time-and-Materials and Labor-Hour Contracts". Material overhead will not be authorized

if the costs normally included in that overhead (purchasing staff or other material handling costs) are being directly charged to this contract/task order.

B.4.3 DIRECT LABOR RATES

Labor categories proposed shall be mapped to existing (8a)STARS III categories.

B.4.4 TIME-AND-MATERIALS (T&M)/LABOR-HOUR (LH) LABOR MIX AND LEVEL OF EFFORT

It is estimated that the total cost to the Government for the performance of this TO shall not exceed the NTE ceiling price set forth in B.4, Services and Prices. The labor mix and level of effort specified in the contractor's proposal and incorporated into this TO are for estimation purposes. The contractor may reallocate, with prior written approval of the Assisted Acquisition Services (AAS) Contracting Officer (CO), the number of hours by labor category, within each labor CLIN as needed to effectively manage the Program, provided the total funded labor cost and total hours are not exceeded. The reallocation of hours across CLINs also requires approval in advance by the AAS CO. Any additional labor categories not originally proposed or increases to total hours or increases to ceilings required during performance must be approved by the AAS CO and added to the TO by modification.

B.4.5 INCREMENTAL FUNDING LIMITATION OF GOVERNMENT'S OBLIGATION

LH and T&M CLINs, listed under B.3 and B.4.1, will be incrementally funded and awarded with available funding. Additional incremental funding for these CLINs may be allotted and available for payment by the Government as the funds become available. The estimated period of performance covered by the allotments for the mandatory CLINs is from award through end of this task order, unless otherwise noted in Section B. The TO may be modified to add funds incrementally over the performance period of this TO. These allotments constitute the estimated cost for the purpose of Federal Acquisition Regulation (FAR) Clause 52.232-22, Limitation of Funds (Apr 1984) (Deviation Nov 2025), which applies to this TO on a CLIN-by-CLIN basis. The contractor shall not exceed the obligated/funded amount on the task, and shall notify the contracting officer when 75% of obligated/funded amount has been invoiced for/expended.

B.4.6 INCREMENTAL FUNDING TABLE FOR LH AND/OR T&M

The Incremental Funding Table is a separate Excel spreadsheet. It must be completed at award and included in the awarded TO as an Attachment in Section J. See detailed instructions in the Excel spreadsheet. The Incremental Funding Table Excel spreadsheet is available in Section J.1, Attachment C.

B.5 TRANSITION TO ALTERNATE CONTRACT TYPE

Over the course of performance, circumstances may make different contract types more appropriate for certain CLINs or Tasks than used at TO award. When it is appropriate to do so, the Government intends to transition cost-reimbursement, T&M, or LH contract-type

requirements to a more favorable contract type; such as Firm Fixed Price(FFP) that transfers the risk to the contractor in accordance with FAR 16.102(c) (GSA Class Deviation RFO-2025-16.

C.1 BACKGROUND

The Office of Acquisition IT Services provides information technology (IT) support for FAS and other portfolios within GSA. The applications developed and maintained by the Acquisition IT Services organization are used by business portfolios within GSA, customer agencies, the vendor community, the general public and businesses. For each and every business line, the applications are essential to daily operations, future growth, and meeting organizational goals.

FAS leverages the buying power of the Federal Government to acquire the best value for both the taxpayers and Federal customers. FAS is organized as follows:

- Management and Program Support
    - Office of the Commissioner
    - Office of Customer & Stakeholder Engagement
    - Office of Enterprise Strategy Management
    - Office of Policy and Compliance
    - Office of Systems Management
- Categories
    - Office of General Supplies & Services Categories
    - Office of Information Technology Category
    - Office of Professional Services & Human Capital Categories
    - Office of Travel, Transportation, & Logistics Categories
- Services
    - Office of Assisted Acquisition Services
    - Technology Transformation Services

The Office of Business Applications IT Services within GSA IT, is organized as follows: follows:

- Acquisition IT Services Division
    - E-Commerce Systems Division
    - Contract Lifecycle Systems Division
    - Market Research & Digital Exp. Services Division
    - Assisted Acquisition Systems Division
- Acquisition Managed Services Division
    - Fleet Management Division
    - IAE Systems Division
    - Personal Property And Travel & Transportation Systems Division.

FAS organizations and their stakeholders are the primary users and program offices for the application portfolios that require support under this TO.

C.1.1 PURPOSE

The purpose of this Task Order (TO) is to support the General Services Administration (GSA) Office of the Chief Information Officer (OCIO), Acquisition IT Services organization, by providing services that support the operation, maintenance, and minor enhancements, moderate new functionality features and improvements without changing the direction/scope of the System. GSA requires support to operate its portfolio of the Personal Property Management System (PPMS), Transportation Management Services Solution (TMSS) and the SmartPay applications supported by this task order. Under the PPMS application we have 3 main sub-application streams 1. ppms.gov 2. gsaauctions.gov and 3. coputersforlearning.gov supports business units Utilization and Donation (U&D), sales and Computers For Learning (CFL). This primarily supports the Federal Acquisition Service (FAS). SmartPay comprises SmartPay Data Warehouse, SmartPay program website, SmartPay training and the Section 889 compliance check application.

C.1.2 AGENCY MISSION

GSA's mission is to deliver the best customer experience and value in real estate, acquisition, and technology services to the Federal Government and the American people.

Through implementing its mission, GSA aspires to achieve four strategic goals:

1) Save taxpayer money through better management of Federal real estate.
2) Establish GSA as the premier provider of efficient and effective acquisition solutions across the Government.
3) Improve the way Federal agencies buy, build, and use technology.
4) Design and deliver expanded shared services within GSA and across the Government to improve performance and save taxpayer money

C.2 SCOPE

This Performance Work Statement (PWS) outlines the objectives for acquisition and program support, focusing on Operations and Maintenance (O&M), including bug fixes, and application enhancements. This support is crucial as GSA transitions from a systems-based to a product-based development organization, adopting a DevSecOps methodology.

The contract specifically provides O&M personnel for the PTS applications. Bug fixes and application enhancements will adhere to GSA's change management process, with the team collaborating closely with Architectural, Engineering, and Advisory support for Application Maintenance, Enhancement, and Transformation Services. General O&M tasks include:

- Operation and maintenance (O&M) require meticulous planning and execution to operate software applications that are in production, keep the environments up to date, monitor system performance, make repairs, test any changes to the applications and/or interfaces,

and manage releases in coordination with GSA-IT Project Managers and Business Line Product Owners.

- The managerial components of O&M include budgeting, staffing, prioritizing changes (defects and improvements), and reporting.

- **DevSecOps/Agile Support (Project Manager, Application Developers, Business Analysts, Scrum Masters) -** primary interfaces are with FAS Product Owners, Business Owners, Project Managers (PMs) and GSA IT technology leads (e.g., architecture, development, etc.) and technical Pro Manjectagers; includes management and direction of technical contract staff and deliverables; overseeing of technical evaluations; management and reporting of metrics/SLAs.

- **Program Control Support (Planners/Schedulers, Bookkeeping, Accounting, Invoicing, etc.)** - provide internal support to contractor staff and interface with CORs

- **Requests for Support -** respond to data calls from business portfolios, FOIA requests and OMB/Administration; support IG/GAO audits.

- **Helpdesk -** provide Tier 2/3 technical support and create support documentation, including user guides, technical Standard Operating Procedures (SOPs) and other troubleshooting guides. Tier 1 support is provided by a separate helpdesk contract for PPMS application only.

- **Security -** Information System Security Officer (ISSO) support reviewing system changes and conducting security impact analysis; perform Assessment and Accreditation (A&A) to ensure continued Authorization to Operate (ATO).

- **Testing -** Develop / update automated test scripts for changing business requirements, UAT scripts, testing for 508 compliance, code coverage, testing system interfaces, conducting regression testing, smoke testing, performance testing, production like volume testing and creating test reports. All testing efforts will include an appropriate set of data staging.

- **Maintain operational continuity and capability -** tasks include, but are not limited to:
    - Systems/operations management and administration support
    - Defects resolution (i.e., triage, develop fix, test fix, deploy fix) and implementation of minor improvements
    - Configuration and release management

- Provide infrastructure maintenance - Perform patching and security updates to the system, including emergency deployments to address critical vulnerabilities
- Ensure the high availability of the system
- Manage and maintain configuration control, and monitor changes to the system
- Perform database and system backups
- Monitor security controls, performance measurements, and review system logs
- Review and update system documentation and update user guides to align with changes to system
- Provide Disaster Recovery (DR) and Continuity of Operations (COOP) support
- Maintain system level SLA's at all times.

Under this PWS, the contractor is responsible for providing Operations and Maintenance (O&M) services for the PTS systems. These services encompass planning and executing application and system operations, monitoring performance, applying software and security patches, testing changes, tuning the system, and updating user guides. The contractor shall utilize an Agile methodology for all O&M functions.

The PPMS system is supported by three websites: PPMS.gov, GSAAuctions.gov, and ComputersforLearning.gov. The TMSS system is supported by tmss.gsa.gov. The SmartPay system is supported by spdatawarehouse.gsa.gov, 889.smartpay.gsa.gov, smartpay.gsa.gov and smartpaytraining.gsa.gov. The PPMS, TMSS and SmartPay (PTS) are three independent business applications serving different business functions without integration points. PPMS VPCaaS environment is 100% vendor responsibility. TMSS and SmartPay applications websites are hosted in the EBTA, MCaaS, data center environments, where the hosting services are GSA managed. All hosting costs are absorbed by the government and are separate from the O&M cost.

O&M involves planning and executing activities related to the application and operating the system, monitoring system performance, applying patches (software and security), testing the system as changes are made, tuning the system, and updating the user guides. The contractor shall perform O&M functions using an Agile methodology. The contractor shall provide ongoing customer interface, coordination, planning, and support to ensure services and products are satisfactorily tested and delivered and collaborate with GSA to periodically review O&M processes and implement proposed change. The contractor shall provide the following functions under this TO:

A. Perform Site Reliability functions to ensure the PTS systems remain reliable, scalable, and available amidst frequent releases.
B. Manage and maintain all current system interfaces and integration for all internal and external connections.
C. Maintain multiple lower environments and production environments with VPCaaS supported deployment, monitoring features for PPMS and the FCS environment for TMSS and SmartPay model described in the FAS-IT Playbook.
D. Work with the Government to mature the DevSecOps capabilities and adopt recommendations from the GSA's DevSecOps guide.

E. Maintain and provide documentation such as an Operational Runbooks and Maintenance Guide of systems requirements, configuration, and engineering to the Government as directed by the Government.
F. Provide support for requests to test new software or hardware.
G. Stay abreast of new technologies and collaborate with GSA IT to review and evaluate new tools and technologies for approval and adoption into the PTS landscape.
H. Collaborate with GSA IT to improve the cataloging, publishing, and security of the PTS which leverage the FCS-provided infrastructure
I. Perform various tests including but not limited to unit testing, browser/functional testing, integration testing, regression testing, system testing, performance testing, load testing, stress testing, sanity testing, smoke testing, vulnerability testing, penetration testing and user acceptance testing. For each type of testing performed, develop, and maintain Test suites and Test Automation suites for all fixes and releases.
J. Maintain the release composition to include count of bug fixes, count of defects, count of enhancements and count of new features deployed via the release for each of the releases deployed to production.
K. Coordinate closely with the Government on the proposed use of automated testing tools under the TO.
L. Follow a disciplined IT Infrastructure Library (ITIL) process to ensure all changes, problems, and incidents are tracked in Jira (Issue & Program Tracking Software) from identification to closure and the backlog of such items, are reviewed regularly, prioritized for implementation, and maintained at optimal levels at all times.
M. Maintain the up-to-date patch and release cadence via a Release Management Plan to ensure full compliance with GSA security policies and auditing requirements for all the software services, products and libraries used within the PTS systems.
N. Prepare and provide PTS end-users with training about new features and capabilities. Maintain training documentations and related artifacts. In addition, provide ad hoc training when requested and approved by the Government.
O. Manage and maintain the current implementation of the DAV environment within PPMS (Redshift and Tableau) and TMSS / SmartPay's custom - Business Intelligence and Reporting via Tableau, Redshift), until they are replaced with FCS-D reporting tools/services (MySQL, Redshift, Databricks). FCS-D is GSA's Enterprise Data platform.
P. Collaborate with the Government to develop a strategy to achieve PTS's historical data for storage and compliance to GSA security and audit requirements.
Q. Maintain PPMS, TMSS and SmartPay user guides, videos, and related artifacts.
R. Perform Root Cause Analysis (RCA) on PPMS, TMSS and SmartPay production site discrepancies and provide documentation on corrective and preventive actions taken as requested by the Government.
S. Review and improve the current monitoring levels to build robust observability mechanisms and ensure all aspects of the application and infrastructure are effectively monitored and optimal alerting mechanisms are implemented. Develop and maintain a dashboard to provide real-time and transparent view into the pulse of the PTS systems' health, with respect to application monitoring.

T. Identify, define, and create the policies, standards, and processes for Cloud-native data management of the structured, semi, and unstructured data.
U. Collaborate with GSA and develop User Activity Traceability Dashboard to understand user interactions with the PTS systems and develop actionable insights to further improve and optimize the end UI/UX.
V. Adhere to GSA Records Retention Schedule Policy. The contractor shall create, maintain, and update the anticipated work products as described in TOR.

C.3 CURRENT INFORMATION TECHNOLOGY (IT)/NETWORK ENVIRONMENT

The systems supported by this Task Order are listed in Attachment D .

C.4 OBJECTIVEs

This PWS requires service support for the operations and maintenance of the existing systems and system enhancements for the PTS systems.
The contractor shall provide Program management services under the awarded Task Order. The contractor shall schedule meetings and provide deliverables in accordance with the deliverables table and QASP.

The Contractor shall be solely responsible for managing the work performed in the execution of this contract/order. This includes the responsibility to:

- assign appropriate resources to each task
- maintain clear organizational lines of authority
- ensure effective contract task management and administration
- establish and use proven policies, processes, analyses, and best practices

The Contractor shall maintain Program milestones for each assigned task. The Contractor shall update Government representatives on work progress and task milestones in the monthly status report.

C.4.1 Objective 1 - Project Management Services

The contractor shall provide Project management support under this TO. This includes the management scheduling, administration and oversight of all activities performed by contractor personnel, including subcontractors, to satisfy the requirements identified in this Performance Work Statement (PWS).

At this time the Government does not anticipate the proposal to include Program/Project Manager as Key Personnel.

The PM shall:

- Provide leadership, oversight, and management of a complex program, which covers a portfolio of Programs and programs.
- Ensure performance against contract and program requirements.
- Serve as a single point of ultimate accountability and responsibility to the Government.
- Coordinate and ensure completion of deliverables and other contractual requirements.
- Perform risk management.
- Develop and implement long-term strategies and roadmaps, and monitor execution to ensure alignment of tactical activities.
- Manage the program budget.
- Evaluate performance against design and schedule requirements and constraints.
- Provide oversight across a range of all Program types and Program complexities.
- Consult and advise senior Government leadership and ensure Government leaders have actionable information in a timely manner necessary to obtain decision/guidance to facilitate program execution.
- Provide Agile and scalable governance structure to effectively support the evolving environment.
- Improve performance using innovative technologies, commercial practices, and industry collaboration.
- Ensure cross-functional, cross-branch, and cross-division communication and change management to meet the goals of each initiative and/or Program, with a focus on minimizing impact on users.

C.4.1.1 Objective 1 Task 1 – Coordinate a Program Kick-Off Meeting

Within five (5) business days of the Contract/Task Order award date (or another mutually agreed time), the contractor will schedule, coordinate, and host a Program Kick-Off Meeting at a Government-approved location. The purpose of this meeting is to introduce contractor and Government personnel involved with the Task Order, and to discuss technical, management, and security issues, as well as travel authorization and reporting procedures. Attendees must include the contractor's Key Personnel, the GSA Technical Point of Contact (TPOC), other relevant Government personnel, the Government Contracting Officer (CO), and the Contracting Officer’s Representative (COR).

At least three days prior to the Program Kick-Off Meeting, the contractor shall provide a Program Kick-Off Meeting Agenda for review and approval by the COR and the GSA TPOC prior to finalizing. The agenda shall include, at a minimum, the following topics/deliverables:

- Points of Contact (POCs) for all parties.

- Personnel discussion (e.g., roles and responsibilities and lines of communication between contractor and Government).
- Staffing Plan and status.
- Transition-In Plan and discussion.
- Security discussion and requirements (e.g., building access, badges, Personal Identity Verification (PIV) cards).
- Financial reporting and invoicing requirements.
- Baseline Quality Management Plan (QMP).
- Review of SLAs and Key Performance Indicators (KPI)s.
- Identified risks and issues and applicable mitigation plans.
- Overview of program tasks, scope, and schedule as well as any assumptions.

The Government will provide the contractor with the number of Government participants for the Program Kick-Off Meeting, and the contractor shall provide copies of the presentation for all present. The contractor shall draft and provide a Program Kick-Off Meeting Minutes Report documenting the Program Kick-Off Meeting discussion and capturing any action items.

C.4.1.2 Objective 1 Task 2 - Prepare a Monthly Status Report (MSR)

The contractor PM shall develop and provide a Monthly Status Report (MSR), by the tenth of each month via electronic mail to the Contracting Officer Representative COR.

1. Activities during the reporting period, by application, which shall include on-going, new, completed and planned (30/60 day outlook) activities; progress to date on all above mentioned activities; and cost and schedule performance. The cost and schedule shall include planned versus actuals for each system. The contractor shall also provide details of work execution and system performance (e.g., Cost and Schedule and other performance metrics to be determined after contract award) to be reported into the GSA eCPIC reporting system as requested.
2. The contractor shall provide monthly reporting on Service Level Agreement(SLA) metrics and facilitate a process to review and update the SLAs on a regular basis.
3. Summarize the impacts of any new software released, and the business value of the releases to GSA and/or the Government as a whole.
4. Problems and corrective actions taken. Also include issues or concerns and proposed resolutions to address them.
5. Personnel gains, losses, vacancies (including durations of vacancies), and status (security clearance, etc.).
6. Government pending actions required for the contractor to perform assigned work. For example, software was required/requested and not provided.
7. Summary of trips taken, conferences attended, etc. (if requested, attach Trip Reports to the MSR for the reporting period).

8. Accumulated invoiced cost for each CLIN through the previous month, reported by Application.
9. Programed costs of each CLIN for the current month, reported by Application.
10. Estimated costs at completion of the current period of performance reported by Application (Base or Option Period).
11. Significant High and Critical Program Risks Summary.
12. Summary of Security Vulnerabilities and Trends by Application.
13. Summarize utilization metrics for all IT services delivered under this TO as part of the monthly status report (MSR).These reports shall be submitted in a standard electronic format to the GSA OCIO COR.
14. Root Cause Analysis for all system malfunctions.

If requested by the Government, convene a Monthly Status Meeting with at a minimum the Government PM(s), TPOC and COR. The purpose of this meeting is to present the MSR in order to ensure all stakeholders are informed of the monthly activities and provide opportunities to identify other activities and establish priorities, manage costs, and coordinate resolution of identified problems or opportunities.

C.4.1.3 Objective 1 Task 3 - Application Reporting Requirements

The contractor shall on a weekly / bi-weekly / monthly / quarterly basis

1. Provide / update the Implementation & Impact document to list major accomplishments, implementations for PTS applications along with their business impact statement. The reporting of certain or all activities may be required to be split by the two PPM divisions Utilization and Donation (U & D) and Sales and HouseHold Goods (HHG) and Freight in TMSS.
2. Update FAS business line members during scheduled meetings providing highlights of recent activities and upcoming features for a given application. The FAS business line and GSA-IT status update meetings are held every week / other week, but their schedule can be changed as needed.

C.4.1.4 Objective 1 Task 4 - Ad hoc Technical / Work Status / Administrative / Monthly Meetings/ Meetings with FAS Business Units

The Contractor shall, if requested by the Government, participate in weekly status meetings or ad-hoc technical meetings or ad hoc work status meetings at a mutually agreeable time and place to discuss tasking, work progress, technical problems, performance issues, or other technical matters. During these meetings the Contractor shall at least provide accomplishments, problems and issues and planned actions. The Contractor shall take minutes of these meetings and deliver them with the Monthly Status Report. These meetings will occur at a time and place mutually agreed upon by the parties. Note that meeting notes are not required for the daily scrum

meetings. The contractor shall participate in bi-weekly meetings held with FAS business line unit team members. During these meetings the contractor shall provide overall status, recent accomplishments/implementations, upcoming releases and other major topics that need to be discussed with the FAS business line team.

C.4.1.5 Objective 1 Task 5 -Contract Administration Meetings

The Contracting Officer (CO) may require the authorized Contractor representative to meet or participate in a teleconference with authorized Government personnel as often as deemed necessary to discuss contract performance or administrative issues. The Contractor may also request a meeting with the CO when deemed necessary. The content of meetings shall be documented in writing. Minutes shall be approved by both parties and shall be included in the Government contract file.

C.4.2 Objective 2 – Transition Management Services

Transition occurs at two key points during the period of performance: 1. task order award and 2. task order end/conclusion. At task order award, a transition must be accomplished as the Contractor transitions from the incumbent Contractor (Transition-in). At task order/contract conclusion, the Contractor must transition to the new Contractor (Transition-out). As applicable, the Contractor will be required to provide transition plans that address the following:

C.4.2.1 Objective 2 Task 1 - Transition In and Operational Readiness

The contractor shall conduct TO transition-in activities in accordance with its proposed transition approach included in its Written Technical Proposal. The contractor shall ensure that there will be minimum service disruption to vital Government business and no service degradation during and after transition. The contractor shall implement its transition-in within three calendar days after Program Start (PS) and all transition activities shall be completed within 30 calendar days after PS.

The transition-in period is defined as the period when the new contractor and the incumbent contractor will both be providing support to the client as required to support the transition to the newly awarded TO. The transition-in period shall be included and addressed within the Transition-In Plan. The Transition-In Plan shall document how the contractor plans to seamlessly transition all existing services from the current provider(s), add new services, and minimize operational and Program impacts. The Transition-In Plan shall include a clear and feasible strategy for delivering services required and shall include a detailed plan-of action and milestones to transition the functions identified in this TOR in a well-planned, orderly, and efficient manner. The contractor shall submit a draft Transition-In Plan at the Program Kick-Off Meeting, with a final copy delivered to the Government within five days after the Program Kick-Off Meeting.

All transition-in activities shall be completed no later than 30 calendar days after TOA; individual systems and applications may be transitioned using a staggered approach. The Transition-In Plan shall include an Operational Readiness Review (ORR) that demonstrates the contractor's readiness to assume operation of duties. The contractor shall assume application responsibilities and management of the system after conducting a meeting demonstrating successful completion of operational readiness and upon written Government approval no less than 15 business days prior to the end of the transition-in period.

During the transition-in period, the contractor shall provide daily status updates and a Weekly Transition Status Report to GSA personnel to be identified after TOA. On an application level, this report shall detail:

A. The application transition as defined in the Transition-In Plan.
B. The performance against the contractor's application transition schedule.
C. The status of any in-flight or in-progress Programs.
D. The contractor's staffing status, to include Homeland Security Presidential Directive (HSPD)-12 security processing.
E. The contractor's applications acceptance plan, checklist, schedule, and process.
F. A comprehensive coordination and activities plan with the incumbent application management contractor.
G. A comprehensive plan for resource shadowing and pair programming.
H. A complete transition-in activities schedule demonstrating that all activities shall be completed within 30 calendar days of the TO start date.
I. A distinct organizational line of authority.
J. A method of effective task management and administration, following the requirements set forth in the TOR.
K. The review of program level policies, processes, and analyses for overall quality and process improvement recommendations.
L. A delineation of the roles and responsibilities of any subcontractor engaged to support the TO separate from those of the prime contractor.

C.4.2.2 Objective 2 Task 2 - Transition Out

The contractor shall provide transition-out services when required by the Government. The Transition-Out Plan shall facilitate the accomplishment of a seamless transition from the incumbent to incoming contractor at the expiration of the TO. The contractor shall provide a Transition-Out Plan. The contractor shall review and update the Transition-Out Plan in accordance with the specifications.

The contractor shall collaborate with GSA IT and the successor contractor (if any) during transition-out on activities that include, but are not limited to, the coordination of transition

out/transition-in schedules, the export of GSA data from PTS to the successor contract, transfer of PTS data and profiles, and de-installation or removal of other equipment or technology.

The contractor shall also establish and maintain effective communication with the incoming contractor/Government personnel for the period of the transition via weekly status meetings or as often as necessary to ensure a seamless transition-out and avoiding the degradation of service.

The contractor shall engage in knowledge transfer on the established installation, operation, and maintenance procedures of the technologies supported (e.g., written documentation, manuals, formal classroom type training, one-on-one training sessions).

Prior to the expiration or termination of the TO, the contractor shall permit the successor contractor to observe and become familiar with any and all TO operations at both Government and contractor facilities. The GSA-IT COR will identify a specific observation period with a minimum of 30 calendar days. The contractor shall make its best efforts to not voluntarily reassign Key Personnel during the transition-out period and must follow the terms in the Key Personnel clause when providing notification of any Key Personnel changes.

In the Transition-Out Plan, the contractor shall identify how it will coordinate with the incoming contractor and/or Government personnel to transfer knowledge regarding the following:

a. Program management processes.
b. Point of Contacts.
c. Location of technical and Program management documentation and repositories.
d. Data extraction to include transfer of Government-Furnished Equipment (GFE).
e. Status of ongoing technical activities and initiatives.
f. Help Desk phone system detail and service desk tools to continue the current system.
g. Appropriate contractor-to-contractor coordination to ensure a seamless transition.
h. Transition of Key Personnel roles and responsibilities.
i. Transition of all current work in progress/backlog as well as schedules and milestones (e.g., bug releases, minor enhancement releases, and security vulnerability remediation).
j. Actions required of the Government.
k. Comprehensive plan for resource shadowing and pair programming.
l. Transition or deletion of accounts (e.g., user accounts and user access).
m. Return and/or transition of GFE and Government-Furnished Property (GFP).

n. Cancellation of GSA HSPD-12 sponsorship and return of all PIV cards.
o. Standard Operating Procedures for all routine activities

The contractor shall implement its Transition-Out Plan no later than THREE months prior to expiration of the TO.

C.4.3 Objective 3 - Application Operations and Maintenance (O&M)

GSA is responsible for the implementation, support, management and operation of GSA's applications by providing resilient, flexible, and secure technologies and services including DevSecOps, Database management, Operating Systems (OS) and system integration for the support of PPMS application deployed on the PPMS VPCaaS provisioned by the FAS Cloud Services and TMSS and SmartPay applications are deployed in the FCS environment. SmartPay application is also additionally deployed on Redhat Enterprise Linux (RHEL) servers at the Stennis Data Center (SDC) with backup servers at Research Triangle Park Data Center. The PPMS DAV environment is hosted on the PPMS VPCaaS.

For the purpose of this TO, O&M is defined as follows: activities and functions carried out to ensure existing applications perform as intended or for minor development, maintenance or enhancements..

The contractor shall provide application lifecycle management for supported applications during the TO period of performance.

C.4.3.1 Objective 3 Task 1 - Current Operations and Change Management

The contractor shall review and accept existing System Change Requests (SCRs) for impacts to the technical architecture while being aware of the organization's strategic technical direction, and engage the client if necessary. Adhere to GSA IT's strategic architecture plans and strategies, review preliminary and final designs of system changes for compliance with technical architecture principles, and provide training and coaching to O&M staff on tools, techniques, and technologies upon which the technical architecture depends.

The contractor shall provide problem resolution support, identify and resolve problems, fix defects in the technical system architecture and configuration, coordinate with system users to determine symptoms and ensure accurate problem definition and resolution.

The contractor shall utilize the latest Agile industry standards to manage the operations and maintenance of systems. The contractor shall ensure all system changes are interoperable with the most current and planned infrastructure. System change concepts shall include provisions for continuous technological improvement that will maximize opportunities for product improvement available from emerging technological advances in the commercial marketplace.

The contractor shall develop and maintain a schedule of development and releases planned across the application portfolio identified in the TOR or Systems Software Inventory attachment. This schedule shall be maintained current and compared with actual results to ensure best available data is developed and captured.

As practical, the Government's preference is for the contractor(s) to leverage a similar site structure in order to foster collaboration between the two parties and to provide a repository for Task Order documents. In addition to application code, repositories (e.g., Google site, Google Drive, Jira, Confluence, and GitHub) should include:

1. All previous Program Management Reviews (PMR) since Task Order Award
2. Current Transition Plan
3. Current Quality Control Plan
4. All Monthly Status Reports
5. Status of deliverables provided or pending
6. Status of Quality Assurance reviews
7. Risk Management Analysis
8. All SOPs

All applications in the scope of this TO rely on support from other GSA IT shared services (e.g., infrastructure, security, enterprise architecture, etc.) managed by other GSA contractors. As such, the contractor shall ensure these interdependencies are understood, and closely coordinate changes to GSA FAS applications to ensure unintended impacts to applications do not occur.

The contractor shall identify overall Program Management to be shared across Divisions who shall provide management, direction, administration, quality control, and leadership of the execution of all tasks.

The contractor shall provide support for audit, compliance reviews and independent assessments. Support shall include, but not limited to, timely delivery of data, reports and other artifacts as requested.

C.4.3.2 Objective 3 Task 2 - Environment(s)

The PPMS application is hosted on its own VPCaaS, the PPMS VPCaaS. The PPMS VPCaaS is provisioned by the FAS Cloud Services team with limited support. The contractor will manage the configuration of all the accounts and environments under PPMS VPCaaS. The PPMS Cloud engineer will work with GSA IT and the GSA Security team to maintain a secure, healthy and cost effective PPMS VPCaaS environment. TMSS and SmartPay applications are hosted on the FAS Cloud Services. SmartPay application is also additionally deployed using Redhat Enterprise

Linux (RHEL) servers at the Stennis Data Center (SDC) with backup site at Research Triangle Park (RTP) Data Center.

The contractor shall bring all critical system failures to the attention of the Government immediately.

C.4.3.3 Objective 3 Task 3 - Change Management

The contractor shall provide change management services as changes are required throughout the application lifecycle (cradle to grave). Change management is initiated and prioritized based on severity. Plan and implement software bug fixes and or updates to applications as identified by the Government to sustain operations, keep the environments and software current and compliant. This includes, but is not limited to:

1. Impact analysis.
2. Reviewing and updating documentation.
3. Developing training materials for Tier 1 Help Desk providers and user guides
4. Train the trainer events.
5. Product demonstrations.
6. End user forums.
7. Coordinating with the appropriate business portfolio.
8. Developing and implementing a training plan.
9. Other communication and background documentation.

The contractor shall develop and maintain a master schedule of development and releases planned across each Application. This schedule shall be maintained bi-weekly and compared with actual results to ensure best available data is developed and captured.

C.4.3.4 Objective 3 Task 4 - System Documentation

The contractor shall ensure that proper system documentation is developed and kept current in the application's google drive/folder. Outdated documents must be identified and removed, subject to the approval of product owners, the business group, and GSA IT. This includes compliance with GSA's Agile methodology, and the Contractor's QCP.

C.4.3.5 Objective 3 Task 5 - Release Management

The contractor shall participate in release planning and execution in coordination with other GSA stakeholders and contractors to ensure releases do not impact operations.

The contractor shall maintain a Release Management Plan to track the Release process steps and status including GSA approvals consistent with ITIL best practices for each application.The contractor shall provide release notes for software /application changes for system

enhancements. The contractor shall ensure that all customized code extensions are provided to GSA's code repository system. The release management plan will describe the plan for the distribution of software to ensure that a new release will function as intended when introduced into the existing infrastructure. PTS application follows agile methodology for managing day to day work, making enhancements, as well for fixing identified defects/bugs and making enhancements. Releases are performed to deploy code changes for the same. Typically a given sprint runs for 2 weeks followed by release for the work performed (might include multiple sprints based on the feature size) as listed in the sprint. Occasionally there might be a requirement to deviate from the planned/scheduled release to accommodate certain needs. For the purpose of this TO there will be 2 types of releases:

1. Planned/scheduled release - to deploy/implement code changes for work performed during the sprint.
2. Emergency release - to deploy changes needed for maintaining continuity of business/operations, security related changes and any other changes that do not follow standard release schedule.

The contractor shall review configuration and development documentation forPTS. The contractor shall identify potential risks and documentation deficiency and coordinate with other development teams to resolve issues prior to application deployment. The contractor shall prepare for and implement a scheduled release of the application/enhancement. The contractor shall notify, train and coordinate with Service/Help Desk staff to ensure that its staff is prepared to support the application/enhancement. All releases to production environments must be approved by the government.

The contractor shall:

1. Review documentation for any issues based on current functionality.
2. Conduct all testing as specified in the Testing section of this TOR.
3. Review deployment plans for accuracy with the Government and obtain approval.
4. Notify stakeholders of upcoming releases.
5. Update system change requests to reflect updates through the release process.
6. Coordinate release management with configuration management.
7. Baseline application performance in production, working with the Infrastructure group, using the provided tools, for applications where it is applicable.
8. Maintain release notes and version description documentation.
9. Provide training to Help Desk staff as needed.
10. Develop user materials, FAQs and provide training when necessary for updated/new functionality.
11. Prepare and Issue Release Notices as needed.
12. Prepare release rollback plan

The contractor shall release software upon approval by the Government after a deployment readiness review.

C.4.3.6 Objective 3 Task 6 - Data and Database Management

In collaboration with the GSA's Infrastructure organization, the contractor shall support, manage, and monitor system database environments for data integrity, performance, malfunctions, and support new development. The contractor shall monitor and sustain databases, and incorporate changes or updates to the supported data models, schemas, and related support software. The contractor shall provide continuous improvement in the integration of information within the database to facilitate data sharing across information systems, and in accordance with the organization's architectural strategic direction.

The contractor shall perform database administration for application activities as and when required, including:

1. Making instance and database configuration changes.
2. Performing Software upgrades/patches.
3. Managing file system mounts.
4. Indexing and Reindexing the databases.
5. Redesigning the database.
6. Creating table spaces, containers, etc.
7. Building and copying databases.
8. Developing and maintaining Shell, Structured Query Language (SQL) scripts.
9. Processing database requests, including grant privilege requests, new development schema requests, SQL tuning requests, database backups and/or restores, troubleshooting (finding/resolving deadlocks), and production data extracts.
10. Processing change requests to implement data repairs.
11. Building, creating, refreshing, and maintaining the replication databases.
12. Monitoring all databases and the status of active jobs, resolving any errors with jobs failing to run.
13. Consulting with analysts and developers on data features, table features, and SQL strategy, including documentation and classes.
14. Maintaining or creating new data dictionaries.
15. Validating data extract performance.
16. Designing, implementing, and supporting perspectives and data marts.
17. Reviewing and recommending improvements to SQL code for performance.
18. Analyzing, recommending, and implementing approved changes affecting database design.
19. Designing new database structures.
20. Designing, implementing, and supporting the Object Data Model.

21. Maintaining the automated model transition tool.
22. Developing and maintaining Extract, Transform, and Load (ETL) procedures.
23. Analyzing proposed Change Requests for database impacts.
24. Participating in Joint Analysis and Design (JAD) sessions for Change Requests requiring database changes.
25. Upgrade database as needed to support identified critical vulnerabilities and/or database out of support scenarios.

C.4.3.7 Objective 3 Task 7 - AWS FAS Cloud Services Platform Management

In collaboration with the FAS Cloud Service, the contractor shall be responsible for the terms and conditions of the services that the application consumes. FAS Cloud Services are subject to change based on GSA IT's policy or GSA IT's Acquisition IT Architecture Strategy. The FAS Cloud Services team provides limited support for PPMS VPCaaS due to the nature of the VPCaaS environment set-up. The contractor (in partnership with the security team) will primarily manage the configuration of all the accounts and environments with limited support from the FAS Cloud Services team. The TMSS / SmartPay application development team shall perform the activities needed to maintain compliance with those services conditions and Customer Tenant Responsibility matrix. The specific activities of what the application is required to perform is dependent on which of the FAS Cloud Services are leveraged. Those activities can range, for example, from rebuilding/redeploying a technology "stack" with services provided by FCS using a shared service, all the way up to responsibility of that application's managing the entire environment (Operating System patching, User Management, etc). Currently the TMSS and SmartPay applications are hosted within the EBTA, MCaaS environments of the FCS.

C.4.3.8 Objective 3 Task 8 - Problem Management and Defect Resolution

The contractor shall perform problem management and implement software and system solutions (i.e., fixes) as identified by the Government. As appropriate, the contractor shall coordinate any interactions with entities interfacing with the supported systems. Contractor maintenance activities shall follow current patch cycle schedules established by the GSA Infrastructure team, as well as external application teams where interfaces and integrations are present. The contractor shall work with these external teams for problem resolution, and escalate to the Government as necessary.

Some software related incidents opened by the technical support staff may be converted to Problem Reports (PR) and, subsequently, Change Requests (CR). The Government categorizes the PRs and CRs as high, medium, or low depending on impact to the system. Under this Task, the contractor shall be responsible for identifying, triaging, developing, and deploying bug fixes and Government-agreed-upon, minor enhancements to the supported systems.

C.4.3.9 Objective 3 Task 9 - User Training (As Needed)

The contractor shall develop and conduct user training for applications as training requests are received. This training, which focuses on the functionality of applications,can be delivered in a variety of formats such as video, Google Hangouts, or PowerPoint presentations.

C.4.3.10 Objective 3 Task 10 - Regulatory and Minor Enhancements

For the purpose of this TO, application enhancements are defined as new functionality for an existing application, or to otherwise modernize the 'back end' or 'front end' of an application to gain efficiencies including migrating the current technical architecture to a future technical architecture within the GSA platforms environment when appropriate.

When a new functionality (typically not qualified as minor enhancement) has been approved by the Government, the contractor shall follow the existing development methodology and provide the artifacts agreed to by the Government and the Contractor. The contractor shall perform a system impact analysis, and provide a ROM (Rough Order of Magnitude) for the work to be approved/disapproved by the Government, and make additional recommendations to develop the Program in the most effective manner possible and agreed deliverables shall provide business value to GSA.

Requirements Development

The contractor shall be responsible for performing a system impact analysis, followed by a cost and schedule ROM for all DM&E work. Upon Government approval and funding allocation, the contractor shall utilize Agile methodology to develop the Epic(s) and Story Points/Requirements, and begin work in Jira. This process will identify the requirements to meet user business needs and any technical constraints or requirements. The contractor shall clearly identify all existing functionality distinct from the requested/desired enhancements.

Technical Architecture Development

The contractor shall review the existing design and architecture documents, and align to the organization's strategic technology direction. The results of this shall be captured in a Technical Architecture Document.

The Technical Architecture Document shall be comprehensive, include all existing and to-be architectural requirements, and shall meet all functional requirements. Additionally, the contractor shall:

1. Follow the architecture guidelines for each platform or technology used for the development of the Program.
2. Follow industry code conventions (i.e., Java code conventions) or other standard coding practices in development.

3. Incorporate all GSA security guidelines throughout the development process, leveraging the static code analysis tools to produce secure code.

Technical Design Development

The contractor shall review the requirements and design documents and develop a Technical Design Document identifying any tools, level of effort, and duration.

This shall include:

1. The technologies to be used.
2. The use of existing services.
3. The re-use of existing code.
4. Building automated test scripts (where possible).
5. The design structure of modules.
6. Requirements.
7. An estimate of the level of effort and cost for the Program.
8. A preliminary release schedule.
9. Leveraging the use of Application Prototyping.

Programming/Coding

Upon Government approval, the contractor will begin Program development. All programming must occur in a Non-Production Environment. The contractor will either create a new, or edit an existing, Technical Design Document for developed components. Where applicable, secure coding techniques and security scanning will be utilized to ensure solution security.

The contractor shall report the progress of development as part of the Agile process.

Leveraging AI tools in the software development:

AI tools are revolutionizing software engineering by serving as intelligent assistants for developers and AI engineers (for example the GitHub Co-Pilot tool) . These tools significantly enhance coding tasks through:

- **Code Refactoring and Optimization:** Generating optimized and refined code.
- **Debugging and Error Resolution:** Providing in-depth assistance in identifying and resolving issues.
- **Security Vulnerability Detection:** Proactively identifying and addressing security flaws.
- **Automated Testing and Test Case Generation:** Creating and executing comprehensive test cases.
- **Documentation Generation:** Automatically generating clear and concise documentation.
- **Learning and Skill Development:** Aiding in continuous learning and skill enhancement.

Specifying how the contractor offers these capabilities to empower developers and engineers to produce higher-quality code, solve problems more efficiently, and accelerate the delivery of innovative solutions.

Integrating AI into DevOps:

Integrating AI into DevOps revolutionizes IT infrastructure, creating more resilient and efficient systems. This includes predictive issue identification, automated ticket triaging, and intelligent knowledge assistants.

AI proactively identifies issues by analyzing operational data (logs, metrics, network traffic, historical incidents) to detect anomalies and patterns, predicting outages, performance degradations, or security vulnerabilities before they impact services. This allows early intervention, reducing downtime and improving reliability.

Automated ticket triaging uses AI-powered NLP to categorize, prioritize, and route support tickets, streamlining incident response and freeing human engineers for complex problem-solving.

An AI-powered knowledge assistant provides instant access to system documentation, troubleshooting steps, and historical resolutions, empowering DevOps teams to resolve issues faster and facilitating knowledge sharing.

In conclusion, AI in DevOps creates self-healing infrastructure, proactively mitigating issues, automating tasks, and assisting human operators. This enhances reliability, performance, and team efficiency, allowing focus on innovation.

Quality Management / Quality Assurance

The contractor shall test all development and perform all testing required by the GSA.

The contractor shall identify and implement its approach for providing and ensuring quality throughout its solution to meet the requirements of the TO. The contractor shall provide a QMP at the Program Kick-Off Meeting and maintain and update it as changes in the program processes are identified. The contractor’s QMP shall describe the application of the appropriate methodology (e.g., quality control and/or quality assurance) for accomplishing TO performance expectations and objectives. The QMP shall describe how the appropriate methodology integrates with the Government’s requirements. At a minimum, the QMP documents the necessary information required to effectively manage Program quality from Program planning to delivery. It defines a Program's quality policies, procedures, criteria for and areas of application, and roles, responsibilities and authorities, quality measures, quality control and quality assurance

The quality assurance shall include, but is not limited to:

1. Analyzing the resource requirements and skill sets for testing.
2. Creating test plans, scenarios, user scripts, and data based on the business requirements which are suitable for the application design.
3. Performing and coordinating test readiness reviews.
4. Scheduling and executing tests.
5. Conducting smoke & functional testing to ensure all requirements are satisfied.
6. Conducting integration testing & support user acceptance to ensure all compatibility is maintained to/from all external applications.
7. Conducting load testing to ensure that platform requirements are identified and maintained.
8. Security testing to ensure compliance with all GSA and Federal security policies.
9. Testing for compliance with Section 508 of the American with Disabilities Act.
10. Documenting and maintaining test results in the approved Configuration Management System.
11. Validating that any required user documentation is accurately portrayed.
12. Conducting compatibility testing with all interconnected systems.
13. Conducting performance testing.
14. Conducting regression testing.
15. Conducting Smoke testing.
16. Supporting User Acceptance Testing
17. Maximizing the use of robust automated testing tools to support the comprehensive testing requirements suitable to the complexity of the application.
18. Create automation scripts for testing the critical functionalities as applicable and use it for completing the regression testing.

The contractor shall ensure that all security issues identified by vulnerability scanning shall be resolved in accordance with the GSA Information Technology (IT) Security Policy.

Utilizing Agile methodology: the contractor shall review functional requirements, perform impact assessment, develop test cases, and perform continuous testing in each agile sprint. Upon completion of testing of each shippable feature, the contractor reviews the feature with GSA-IT and the stakeholders for approval. All code is transitioned to configuration and release management prior to Production release.

During performance of this TO, the Government may transition additional existing applications to the portfolio to meet business requirements; these applications will be within the general scope of all of the applications listed in the Systems Software Inventory attachment

Upon receipt of information regarding the additional application that requires support, the contractor shall provide an estimated level of effort and estimated cost for the application. Upon Government acceptance of the estimated level of effort and cost, the contractor shall provide the same services as requested, for all objectives under Section 4.

Depending on the origin of the transitioned system, a configuration audit may be required. This will be a formal examination of the configuration records and system documentation to verify the system is accurately documented and approved changes to the baseline(s) are incorporated, documented, tested, and traceable to functional requirements.

C.4.3.11 Objective 3 Task 11 - Daily Operations

The contractor shall manage, maintain, and conduct the day-to-day Tier 2 and Tier 3 level operations and support for PPMS and Tier 1, Tier 2 and Tier 3 support for TMSS and SmartPay. The contractor shall respond to all inquiries received from the PTS user community or current Tier 1 Help Desk operator through the current GSA Service Desk ticketing system. The contractor shall leverage the Government-provided Jira or other approved change management software tool as a part of its comprehensive Tier 2 and Tier 3 solution. The contractor shall resolve all incidents, within its control/immediate control, that impact existing functionality for all applications governed by this TO. For incidents requiring other resolver groups, the contractor shall coordinate with and support that resolver group.

For purposes of this TO, the following are representative tasks performed at each support level:

1. Tier 1 Support for TMSS and SmartPay only - Provides basic applications and technical analysis, procurement system workflow assistance, and routine data administration and manipulation. This “front line” support request may arrive via telephone, email, or on-line incident submission, and all requests for assistance shall be logged in and be ready for analysis through the Government-provided incident tracking (feedback) system.
2. Tier 2 Support PTS – Provides users more complex support and subject matter expertise on supported software applications to include hardware and software technical assistance and service requests from the Tier 1 level.
3. Tier 3 Support PTS – Provides more advanced technical support on highly complex inquiries and support on critical calls that may have an immediate negative impact on operations. Engineers and certified applications personnel may respond to technical issues escalated from Tier 2 or as directed from the Government

C.4.3.12 Objective 3 Task 12 - Information Assurance

The contractor shall provide dedicated Information System Security Officer (ISSO) support for the PTS applications that includes the following functions to keep the PTS applications FISMA compliant and Authority To Operate (ATO'ed). :

1. Validate system hardware and software inventories.
2. Interpret operating system, database, and web application vulnerability scan reports.
3. Write and update security documentation (System Security Plans, Contingency Plans, Business Impact Analysis, Privacy Impact Assessments, Configuration Management Plans, Contingency Tests & Test Reports).
4. Track and manage existing and future vulnerabilities through the system Plan of Action and Milestones (POA&M).
5. Review and track firewall change requests and steward requests through the change request process.
6. Support Security Assessment, PCI DSS, and other audit activities.
7. Support Contingency Plan Testing.
8. Support Annual FISMA Self Assessments.
9. Ensure compliance with the GSA Information Technology (IT) Security Policy (CIO P 2100.1H (09/24/2012) or updated version as provided by the GSA.
10. Respond to security incidents per GSA security policy.
11. Ensure compliance with the IT Security Procedural Guide Managing Enterprise Risk (CIO-IT Security-06-30 revision 7 (05/31/2011) or updated version as provided by the GSA.
12. Ensure compliance with IT Procedural Guide Security Language for IT Acquisition Efforts (CIO-IT Security-09-48 revision 1 (12/06/2009) or updated version as provided by the GSA.

Support Assessment and Accreditation (A&A)

The contractor shall provide support to all required A&A documentation and services required to support the A&A process for all applications included in this TO. The contractor is not the responsible party for the A&A process; however, the contractor shall support this process. This includes, but is not limited to:

1. Continuous monitoring support.
2. Maintaining and monitoring controls within the System Security Plan.
3. Supporting the A&A process.
4. Performing Privacy Impact Assessments (PIA) / PTA.
5. Maintaining PCI DSS as appropriate.
6. Providing evidence.
7. Responding to inquiries/questions.

8. Remediating issues identified in POA&Ms as specified by Security Policy.

C.4.3.13 Objective 3 Task 13 - SURGE SUPPORT

The Government may exercise Optional Surge Support to address unforeseen, ad-hoc requirements or significant unplanned increases in workload that may arise under the scope of this TOR. Optional surge support will be invoked at the Government's discretion through a written contract modification issued by the GSA Contracting Officer. This optional work will be exercised in line with the proposed pricing for the corresponding TOR tasks.

Surge support is capped at a maximum of 20% of the overall Operations and Maintenance (O&M) cost.

Surge Activation & Activities

As GSA IT manages critical applications and infrastructure that support government operations, the program must be able to respond rapidly to changes in operational needs or enhancement requirements resulting from executive orders or policy changes, acts of congress, Changing customer agency priorities and mission requirements, or national emergencies.

Surge support shall align to TOR Objective 3: Application Operations, Site Reliability, and DevOps. Surge activities shall support fast-track development of critical features or functionality, emergency regulatory compliance implementations, rapid prototyping and proof of concept development, accelerated cloud migration activities, and accelerated AI use case development and deployment.

Accelerated Development and Deployment

- Fast-track development of critical features or functionality
- Emergency regulatory compliance implementations
- Rapid prototyping and proof of concept development
- Accelerated cloud migration activities
- Accelerated AI use case development and deployment

Surge Staffing & Pricing Requirements

The contractor shall:

- Staff Optional Surge Support using only those labor categories and rates awarded under the mandatory tasks of this TOR
- Maintain a surge staffing plan identifying qualified resources available for rapid deployment

- Ensure surge staff possess appropriate security clearances and GSA system access
- Prior to awarding the modification, the Contracting Officer will provide the Contractor with a written request for surge support specifying the increase in workload support required, the nature of work to be performed, deliverables, and required timeframes. The Contractor shall respond to this request in writing within five (5) business days with a price quote and Surge Plan, which shall include, Program approach, milestones and schedules, and detailed resource information to be reviewed and approved by the Government.
- The Contractor shall meet the surge support requirements without decreasing the current support to, or quality of, any of the other requirements under this TOR

C.4.3.14 Objective 3 Task 14 - Service Level Agreements (SLA) & Performance Measures:

This Service Level Agreement ("SLA" or "Agreement"), between the awarded contractor and the General Services Administration, for the provisioning of IT services required to support and sustain the PTS application.

This Agreement remains valid until superseded by a formal contract modification that is mutually endorsed by GSA and the contractor.

This Agreement outlines the parameters of IT services covered as they are stated by the primary stakeholders. This SLA does not supersede current processes and procedures unless explicitly stated herein.

In alignment with GSA's mission and performance target:

- Ensure system availability of 99% or higher, excluding scheduled maintenance, to support critical agency functions.
- Provide continuous monitoring and diagnostics across production and pre-production environments to proactively detect and address issues.
- Resolve defects and service requests based on business impact and response tiers:

SLA's - Defect Remediation Timeline:

Priority	Impact	Examples	Contractor's Response Time

L1 - Critical	Service outage or a major application problem making applications impossible to use by the users.	Application is not available or the application does not save the data correctly (data integrity issues that prevent daily business operation).	The outage should be addressed within 30 minutes and a solution should be provided within 2 hours.
L2 - High	Major functionality impaired or impacting a large user base. Partial workaround available.	Slow application response time; session timeouts; some application functionality is not working, and data integrity issues.	The service issues should be addressed within 3 hours and a solution should be provided within a business day.
L3 - Medium	Issue impacts some users or features, but operations continue	Minor functionality is broken and the application is still usable for the majority of the users.	The service issues should be addressed within 3 business days.
L4 - Low	Minor impact on users, data or application	A feature or function has a minor issue which needs correction to data or code fix.	The request should be addressed within 5 business days or when no other competing priorities exist.

Performance Measures:

Objective Category	Performance Indicator	Target
System Uptime Percentage	The applications should be available 24/7 except on routine maintenance windows and should normally be upgradeable while in use except agreed upon maintenance windows.	≥ 99%

Mean Time to Repair	Mean Time for Repair of Application during each unplanned outage should be <30 minutes. Total Annual Hours of Application Unplanned Outage Time (During Business Hours) is <15 hours.	Each unplanned outage should not be longer than 30 minutes at the maximum up to a maximum of 15 hours annually.
Vulnerability Resolution Rate & Data Security and Privacy	Critical Findings < 15 Days High Findings < 30 Days Medium Findings < 60 Days Low Addressed < 90 Days; Maintain ATOs for all applications on the program, analyze and track security scan results on a weekly basis, conduct COOP and Incident response activities annually, conduct FISMA self-assessment annually. Support annual GSA audits and annual security deliverables.	The target performance indicators assume findings are within the delivery team's control. Resolution may be delayed in cases involving external dependencies such as infrastructure teams, third-party systems, or network-related issues. Such exceptions must be documented and communicated in accordance with GSA guidelines.
Response Time for Critical Issues	SLA Compliance Rate	≥ 95% across all severity tiers
Quality Assessment Surveillance Plan (QASP)	Biweekly Status Report PP&TT Implementation and Impact weekly update Security related documents update Standard Operating Procedure (SOP) updates Application user guide updates.	Delivered/updated to maintain compliance. All required documentation and software/tools comply with the GSA IT Standards / FAS IT playbook.

Enhancement Delivery (Optional DME)	Story points delivered per sprint	Reviewed per release plan
Accessibility (508) Compliant	Section 508 score	Compliant with GSA requirements - currently at 90% for user facing modules
Functional Automation	Functional Test Automation coverage percentage	≥ 80%
Unit Test Coverage	Unit Test Coverage Percentage	≥ 85%
Defects escaped to Prod (O&M and DME)	Defects escaped to production	< 1%
Documentation Quality	Artifact Currency (Monthly Audit) - Artifact currency refers to the current validity or relevance of a document, record, or piece of information within a specific context, typically in Program management or quality assurance.	100% accurate and up to date
UI/UX and System Responsiveness	Typical website response targets of 3s and mobile device targets of 5s should be supported by the architecture with most pages loaded in considerably less time.	≥ 98%
Committed Vs Delivered User Stories (O&M and	Percentage of User Stories Delivered vs. Committed To is >98%	User stories delivered should be accepted by

DME)		stakeholders and be >98%
Defect Density Metrics	Typically measured per thousand lines of code (KLOC) Defect Density = (Total Identified Defects / Total Size of Software) x 1000.	0.1-0.5 defects per KLOC
Staff Training	All cleared staff aligned to the contract complete annual required GSA training by the due date.	100% of the time (unless excused by GSA for documented reasons).

C.5 Task Order-wide Objectives

C.5.1 Task Order-wide Objective 1 – Contract and Project Management

The Contractor shall be solely responsible for managing the work performed in the execution of this contract/order. This includes the responsibility to:

- assign appropriate resources to each task
- maintain clear organizational lines of authority
- ensure effective contract task management and administration
- establish and use proven policies, processes, analyses, and best practices

The Contractor shall maintain project milestones for each assigned task. The Contractor shall update Government representatives on work progress and task milestones during the monthly status meetings.

C.5.2 Task Order-wide Objective 2 – Subcontract Management

The Contractor shall be fully responsible for management, control, and performance of any Subcontractor used on this contract. If a Subcontractor is being used, the Prime Contractor must inform the Government. Use of a Subcontractor on the Contractor's team shall not relieve the Prime Contractor of responsibility or accountability in the execution of this contract/order. The contractor shall obtain advance approval from the government before a new subcontractor is added to the prime contractor's team. Subcontractors may not be allowed to further subcontract work without advance approval of the government. If a request for approval is made to the government, it shall provide a justification that includes the benefits to the government of approving the request.

C.5.3 Task Order-wide Objective 3 – Business Relations

A primary element of project success is the business relationship between the Contractor and Government representatives. Within this context the Government will monitor the Contractor's contribution to business relations and provide feedback when required. The Contractor shall make every effort to establish and maintain clear and constant communication channels with the Government primaries (CO, COR, and Government Technical Representative) of this contract for the purpose of:

- Promptly identifying TOR and/or business relationship issues of controversy and the bilateral development and implementation of corrective action plans.
- Ensuring the professional and ethical behavior of Contractor personnel.
- Maintaining effective and responsive Subcontractor management.
- Ensuring the Contractor support team is fully aware and engaged in strengthening the interdependency that exists between the Contractors and their Government counterparts.

C.5.4 Task Order-wide Objective 4 – Contractor Response

The contractor shall ensure prompt response to Government inquiries, requests for information or requests for contractual actions.

C.5.5 Task Order-wide Objective 5 – Team Continuity and Employee Retention

The Government recognizes the benefits in maintaining the continuity of contractor team members. These benefits include but are not limited to retention of corporate knowledge, minimizing contractor familiarization, maintaining/increasing performance levels, schedule adherence and preserving organizational interfaces developed over time. These benefits also accrue to the Contractor. Within the context of effective and efficient personnel management, the Contractor shall take reasonable and appropriate steps to retain the qualified employees staffed against this contract to maintain continuity and performance while effectively reducing costs borne by the Government.

C.5.6 Task Order-wide Objective 6 – Professional Appearance

Contractor employees shall present a neat and professional appearance appropriate to the work being performed at all times when interacting with Government representatives, working in Government facilities, or representing the Government at meetings or before third parties.

C.6 PERFORMANCE REQUIREMENTS SUMMARY (PRS)

This Task Order requires service support for the operations and maintenance of the existing systems and minor system enhancements for the PTS systems. The contractor shall provide project management services under this Task Order. The contractor shall schedule meetings and provide deliverables in accordance with the deliverables table and QASP.
See full Performance Requirements Summary (PRS) below:

PERFORMANCE REQUIREMENTS SUMMARY

Tasks	Performance Standards	Acceptable Quality Levels	Methods of Surveillance	Frequency	Applicable CPAR Factors
L1 - Critical Service outage or a major application problem making applications impossible to use by the users.	Application is not available or the application does not save the data correctly (data integrity issues that prevent daily business operation).	The outage should be addressed within 30 minutes and a solution should be provided within 2 hours.	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
L2 - High Major functionality impaired or impacting a large user base. Partial workaround available.	Slow application response time; session timeouts; some application functionality is not working, and data integrity issues.	The service issues should be addressed within 3 hours and a solution should be provided within a business day.	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
L3 - Medium Issue impacts some users or features, but operations continue	Minor functionality is broken and the application is still usable for the majority of the users.	The service issues should be addressed within 3 business days.	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
L4 - Low Minor impact on users, data or application	A feature or function has a minor issue which needs correction to data or code fix.	The request should be addressed within 5 business days or when no other competing priorities exist.	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
System Uptime Percentage	The applications should be available 24/7 except on routine maintenance windows and should normally be upgradeable while in use except agreed upon maintenance windows.	≥ 99%	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
Mean Time to Repair	Mean Time for Repair of Application during each unplanned outage should be <30 minutes. Total Annual Hours of Application Unplanned Outage Time (During Business Hours) is <15 hours.	Each unplanned outage should not be longer than 30 minutes at the maximum up to a maximum of 15 hours annually.	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality

Tasks	Performance Standards	Acceptable Quality Levels	Methods of Surveillance	Frequency	Applicable CPAR Factors
Vulnerability Resolution Rate & Data Security and Privacy	Critical Findings < 15 Days High Findings < 30 Days Medium Findings < 60 Days Low Addressed < 90 Days; Maintain ATOs for all applications on the program, analyze and track security scan results on a weekly basis, conduct COOP and Incident response activities annually, conduct FISMA self-assessment annually. Support annual GSA audits and annual security deliverables.	The target performance indicators assume findings are within the delivery team's control. Resolution may be delayed in cases involving external dependencies such as infrastructure teams, third-party systems, or network-related issues. Such exceptions must be documented and communicated in accordance with GSA guidelines.	Perform analysis on the security scans	Monthly	Quality
Response Time for Critical Issues	SLA Compliance Rate	≥ 95% across all severity tiers	Review the past 2 weeks data and occurrences	Bi-Weekly	Quality
Quality Assessment Surveillance Plan (QASP)	Biweekly Status Report PP&TT Implementation and Impact weekly update Security related documents update Standard Operating Procedure (SOP) updates Application user guide updates.	Delivered/updated to maintain compliance. All required documentation and software/tools comply with the GSA IT Standards / FAS IT playbook.	Review the reports	Bi-Weekly	Management Quality
Enhancement Delivery (Optional DME)	Story points delivered per sprint	Reviewed per release plan	Review after each release	Bi-Weekly - After each sprint	Quality Schedule

Tasks	Performance Standards	Acceptable Quality Levels	Methods of Surveillance	Frequency	Applicable CPAR Factors
Accessibility (508) Compliant	Section 508 score	Compliant with GSA requirements - currently at 90% for user facing modules	Review the implemented features to ensure 508 is addressed and scores are at minimum 90%	After each release	Quality
Functional Automation	Functional Test Automation coverage percentage	≥ 80%	Measure coverage—code, requirements/feature, risk, data, and workflow—aligned with project milestones and resources.	After each release	Quality
Unit Test Coverage	Unit Test Coverage Percentage	≥ 85%	Measure coverage—code, requirements/feature, risk, data, and workflow—aligned with project milestones and resources.	After each release	Quality

Defects escaped to Prod (O&M and DME)	Defects escaped to production	< 1%	Coverage should be measured based on the severity of identified issues (e.g., Critical, High, Medium, Low). The following categories of issues should be tracked: a. **Critical Defects:** Application crashes or unrecoverable errors. b. **High Severity Issues:** Security vulnerabilities, Incorrect data calculations or displays, and Functional issues where the application does not meet expected requirements. c. **Medium Severity Issues:** Performance problems (e.g., slow response times) that negatively impact the user experience, and Usability problems that prevent users from easily completing tasks.	After each release	Quality Schedule Cost Control

Tasks	Performance Standards	Acceptable Quality Levels	Methods of Surveillance	Frequency	Applicable CPAR Factors
			d. **Other/Low Severity Issues:** Accessibility issues that impede use by individuals with disabilities.		
Documentation Quality	Artifact Currency (Monthly Audit) - Artifact currency refers to the current validity or relevance of a document, record, or piece of information within a specific context, typically in project management or quality assurance.	100% accurate and up to date	Check updated documents to ensure the relevance and update of the documents for the last month	Monthly	Quality Cost Control Management
UI/UX and System Responsiveness	Typical website response targets of 3s and mobile device targets of 5s should be supported by the architecture with most pages loaded in considerably less time.	≥ 98%	Validate if any applicable changes in the release	After each release	Quality
Committed Vs Delivered User Stories (O&M and DME)	Percentage of User Stories Delivered vs. Committed To is >98%	User stories delivered should be accepted by stakeholders and be >98%	Evaluate the difference between the planned commitment (User Story Points/Effort Estimates, Number of Tasks, Specific Deliverables, and Acceptance Criteria) and the actual delivery. This assessment must be based on evidence that the deliverables were fully tested, deployed, documented, and officially accepted by Stakeholders, meeting all agreed-upon acceptance criteria.	After each release	Quality Schedule

Tasks	Performance Standards	Acceptable Quality Levels	Methods of Surveillance	Frequency	Applicable CPAR Factors
Defect Density Metrics	Typically measured per thousand lines of code (KLOC) Defect Density = (Total Identified Defects / Total Size of Software) x 1000.	0.1-0.5 defects per KLOC	# of defects found in the software development release.	After each release	Quality Schedule
Staff Training	All cleared staff aligned to the contract complete annual required GSA training by the due date.	100% of the time (unless excused by GSA for documented reasons).	Check the staff on target in completing the all required GSA trainings	Monthly	Quality Schedule Management

This page intentionally left blank.

SECTION E – INSPECTION AND ACCEPTANCE

E.1 PLACE OF INSPECTION AND ACCEPTANCE

Inspection and acceptance of all work performance, reports, and other deliverables under this TO will be performed by the GSA IT COR.

E.1.1 GSA ASSIST PORTAL REGISTRATION

The Contractor shall register in GSA's electronic Web-Based Order Processing System, called ASSIST (https://assist.gsa.gov/). ASSIST is the government's portal to formally accept the Task Order upon award, receive contract modifications for review, submit deliverables and invoices, and etc. For additional assistance contact the ASSIST Helpdesk at 877-472-4877 or assist.servicedesk@gsa.gov.

E.2 SCOPE OF INSPECTION

All deliverables will be inspected for content, completeness, accuracy, and conformance to TO requirements by the GSA IT COR. Inspection may include validation of information or software through the use of automated tools, testing, or inspections of the deliverables, as specified in the TO. The scope and nature of this inspection will be sufficiently comprehensive to ensure the completeness, quality, and adequacy of all deliverables.

The Government requires a period NTE 15 calendar days after receipt of deliverable items for inspection and acceptance or rejection.

E.3 BASIS OF ACCEPTANCE

The basis for acceptance shall be compliance with the requirements set forth in the TO and relevant terms and conditions of the contract. Rejected deliverable items shall be corrected in accordance with the applicable clauses.

Acceptance of deliverables (e.g., reports, documents, and narrative-type deliverables) will occur when all discrepancies, errors, or other deficiencies, as identified in writing by the Government, have been resolved through documentation updates, program correction, or other mutually agreeable methods.

If a deliverable is adequate, the Government may accept it or provide comments for incorporation. All of the Government's comments on deliverables shall either be incorporated in the succeeding version of the deliverable, or the contractor shall explain to the Government's satisfaction why such comments should not be incorporated.

If the Government finds that a deliverable contains spelling errors, grammatical errors, or improper format, or otherwise does not conform to the quality assurance requirements stated within the TO, the document may be rejected without further review and returned to the contractor for correction and resubmission. If the contractor requires additional Government guidance to produce an acceptable deliverable, the contractor shall arrange a meeting with the GSA IT COR.

E.4 DELIVERABLES

The Government will provide written acceptance, comments, and/or change requests, if any, within 15 calendar days (unless specified otherwise in Section F.3) from Government receipt of the deliverable. Upon receipt of the Government comments, the contractor shall have ten calendar days to incorporate the Government's comments and/or change requests and to resubmit the deliverable.

E.5 WRITTEN ACCEPTANCE/REJECTION BY THE GOVERNMENT

The AAS CO or GSA OCIO COR will provide written notification of acceptance or rejection of all deliverables within 14 calendar days (unless specified otherwise in Section F). All notifications of rejection will be accompanied with an explanation of the specific deficiencies causing the rejection.

Once accepted, electronic deliverables shall be submitted to the AAS CO and GSA OCIO COR via the Assisted Service Shared Information System (ASSIST) Collaborations no later than 30calendar days after the AAS CO's or GSA OCIO COR's acceptance. The Contractor shall grant the Government a non-exclusive, royalty-free license to share the disclosed utilization with other Federal agencies for official Government purposes.

E.6 NON-CONFORMING PRODUCTS OR SERVICES

Non-conforming products or services will be rejected. Deficiencies shall be corrected, by the contractor, within ten calendar days of the rejection notice. If the deficiencies cannot be corrected within ten calendar days, the contractor shall immediately notify the COR of the reason for the delay and provide a proposed corrective action plan within ten calendar days.

If the contractor does not provide products or services that conform to the requirements of this TO, the Government may withhold the fixed price until the non-conforming products or services are remediated.

SECTION F – DELIVERIES OR PERFORMANCE

F.1 PERIOD OF PERFORMANCE

The period of performance for this TO is a one-year base period and four one-year options.

Base Period:	8/27/2026-8/26/2027
First Option Period:	8/27/2027-8/26/2028
Second Option Period:	8/27/2028-8/26/2029
Third Option Period:	8/27/2029-8/26/2030
Fourth Option Period:	8/27/2030-8/26/2031

F.2 PLACE OF PERFORMANCE

The primary place of performance where the contractor will perform the work will be remote or at the contractor's facility. On occasion, placing TO personnel in Government facilities may be necessary for efficient execution of a task or support in-person meetings as required. At least five business days of notice will normally be provided.

F.3 TASK ORDER (TO) SCHEDULE AND MILESTONE DATES

The following schedule of milestones will be used by the COR to monitor timely progress under this TO.

The following abbreviations are used in this schedule:

CLIN: Contract Line Item Number
DEL: Deliverable
GOV'T: Government
IAW: In Accordance With
N/A: Not Applicable
NLT: No Later Than
POP: Period of Performance
PWS: Performance Work Statement
TOR: Task Order Request
TOA: Task Order Award
Days: Unless otherwise specified, all references to days are calendar days.

Deliverables are due the next Government workday if the due date falls on a holiday or weekend.

Data Rights Clause – Abbreviations in this column of the table below shall be interpreted as follows:

N/A: Not Applicable
UR: Unlimited Rights, per FAR 27.404-1(a) (GSA Class Deviation RFO-2025-27) and 52.227-14

SECTION F – DELIVERIES OR PERFORMANCE

The Government asserts UR rights to open-source COTS software. Any collateral agreements (within the meaning of FAR 52.227-14) proposed for data, regardless of the type of rights offered, shall be subject to the requirements of TOR Section H.17 through H.19. For purposes of the foregoing, the terms "collateral agreement," "Supplier Agreement," and "Commercial Supplier Agreement" have the same meaning.

The Government does not assert any rights to management software tools if the contractor does not plan to charge the Government directly for that tool and does not propose that the Government will own or use that tool.

The contractor shall deliver the deliverables listed in the following table on the dates specified:

TOR Ref.	Event or Item Title	Delivery Time	Delivery Place
H.6 Security Requirement	Contractor Employee Non-disclosure Agreement (one for each employee assigned to work on this order	After award but prior to commencement of performance by each Contractor or Subcontractor employee	Electronically to Program's google drive & email to the COR
Section C.4 Objective 1 Task 1	Participate in the Program Kick-off meeting Quality Control Plan-Draft	Within 5 business days after award or as agreed by the parties 10 Business Days after the award	Electronically to the Program's google drive & email to the COR
Section C.4, Objective 1 Task 1	Quality Control Plan-Final	30 Business Days after Government review. (The Government shall review and provide comments within 7 business days after receipt of the draft QCP.)	Electronically to the Program's google drive & email to the COR
Section C.4, Objective 1	Staff Matrix A complete and current list of Contractor employees and the task/office/function they are supporting	Furnished at the kick-off meeting with an update furnished on or before the date of any personnel change.	Electronically to the Program's google drive & email to the COR

Section C.4, Objective 1	Funds and Man-Hour Expenditure Report	NLT 10 business days after end of the month.	Electronically to the Program's google drive & email to the COR
Section C.4, Objective 1	Monthly Status Report – Final	NLT 10 business days after the end of the month.	Electronically to the Program's google drive & email to the COR
Section C.4, Objective 3 Task 13	Defect Remediation including response time for Critical Issues	Ongoing Reporting - Weekly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: System Uptime / Downtime	Ongoing Reporting - Weekly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: Unplanned Outage and mean time to Repair	Ongoing Reporting - Weekly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: Vulnerability Resolution	Ongoing Reporting - Weekly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: Response Time for Critical Issues	Ongoing Reporting - Weekly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: Quality Assessment Surveillance Plan (QASP)	Monthly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: Enhancement Delivery (Optional	After every production release/deployment	Electronically to the Program's google drive and present to stakeholders

	DME)		
Section C.4, Objective 3 Task 13	Performance Measures: Accessibility (508) Compliant	After every production release/deployment	Electronically to the Program's google drive and present to stakeholders
Section C.4, Objective 3 Task 13	Performance Measures: Functional Automation	After every production release/deployment	Electronically to the Program's google drive and present to stakeholders
Section C.4, Objective 3 Task 13	Performance Measures: Unit Test Coverage	After every production release/deployment	Electronically to the Program's google drive and present to stakeholders
Section C.4, Objective 3 Task 13	Performance Measures: Defects escaped to Prod (O&M and DME)	After every production release/deployment	Electronically to the Program's google drive and present to stakeholders
Section C.4, Objective 3 Task 13	Performance Measures:Documentation Quality	Monthly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures: UI/UX and System Responsiveness	Monthly	Electronically to the Program's google drive and present to stakeholders (optional)
Section C.4, Objective 3 Task 13	Performance Measures:Committed Vs Delivered User Stories (O&M and DME)	After every production/deployment release	Electronically to the Program's google drive and present to stakeholders
Section C.4, Objective 3 Task 13	Performance Measures: Defect Density Metrics	After every production deployment/release	Electronically to the Program's google drive and present to stakeholders

The contractor shall mark all deliverables listed in the above table to indicate authorship by contractor (i.e., non-Government) personnel; provided, however, that no deliverable shall contain any proprietary markings inconsistent with the Government's data rights set forth in this TO. The Government reserves the right to treat non-conforming markings in accordance with FAR 52.227-14(e) and (f).

F.4 DELIVERABLES MEDIA

The following are the required electronic formats, whose versions shall be compatible with the latest commonly available version on the market.

a.	Text	Microsoft (MS) Word, Google Docs, Portable Document Format (PDF)
b.	Spreadsheets	MS Excel, Google Sheets
c.	Briefings	MS PowerPoint, Google Slides
d.	Drawings	MS Visio, Google Drawings
e.	Schedules	MS Program, Smartsheet

F.5 METHOD OF DELIVERY

Unclassified deliverables and correspondence shall be delivered to the AAS CO or GSA OCIO COR at the email address provided in Section G.1.1 for inspection and acceptance.

Copies of all deliverables shall also be delivered to the GSA OCIO TPOC at the email address provided in Section G.1.1.

The contractor shall utilize the ASSIST Collaborations to deliver all AAS CO- or GSA OCIO COR-accepted deliverables identified in Section F.3 unless the deliverable(s) meets one or more of the following exceptions.

a. Deliverable(s) that cannot be uploaded due to format (e.g., website).
b. Classified deliverable(s).
c. Individual deliverable(s) that exceed the ASSIST file size limitations.

For deliverables where an above exception applies, the contractor shall submit notification via the ASSIST Collaborations outlining the applicable exception(s), the method of delivery, the alternative deliverable(s) storage location, the point(s) of contact who received the deliverable(s), and the date of deliverable(s) submission.

The contractor shall utilize a standard naming convention when uploading deliverables in the ASSIST Collaborations. The naming convention of deliverables shall follow the following format: [Acquisition Identifier #][Document Name][Final Document Date or Date Received][File Extension]. Date must be in this format: YYYY-MM-DD.

F.6 NOTICE REGARDING LATE DELIVERY/PROBLEM NOTIFICATION REPORT (PNR)

The contractor shall notify the AAS COR and GSA IT COR via a Problem Notification Report (PNR) (Section J.1, Attachment G) as soon as it becomes apparent to the contractor that a scheduled delivery will be late. The contractor shall include in the PNR the rationale for late delivery, the expected date for the delivery, and the Program impact of the late delivery. The AAS COR and GSA IT COR will review the new schedule and provide guidance to the

contractor. Such notification in no way limits any Government contractual rights or remedies including, but not limited to, termination.

F.7 HOURS OF OPERATION

For Contractor employees working or meeting in Government facilities, normal business hours are between 7 AM – 5 PM Eastern time, Monday through Friday, with core hours 9 AM - 3PM Eastern time. Otherwise, the Contractor shall be responsible for managing work hours of its employees, provided they are available when necessary to interact with Government employees. In the event that individual tasks or subtasks require expedited performance or extended work days to meet schedule constraints or work volume, the Government shall communicate that need to the Contractor's Project Manager or Team Lead who, in turn, is responsible for managing the Contractor's labor resources to meet the schedule constraints. Project Manager or Team Lead will be readily available to their Government point of contact as needed. If Contractor employees are working at Government facilities and task completion deadlines require extended hours, the Government will provide authorization to occupy and use Government facilities beyond normal duty hours.

F.7.1 HOLIDAYS

The Contractor shall make best efforts to align employee holiday leave to the U.S. Office of Personnel Management published here:

opm.gov/policy-data-oversight/pay-leave/federal-holidays/

The following Federal holidays are observed and therefore shall be staffed similar to other non-duty days (i.e., weekends):

a. New Year's Day
b. Martin Luther King Day
c. President's Day
d. Memorial Day
e. Juneteenth
f. Independence Day
g. Labor Day
h. Columbus Day
i. Veteran's Day
j. Thanksgiving Day
k. Christmas Day

Any other day designated by Federal statute, Executive order, or the President's proclamation in which the Federal Government is closed.

G.1 CONTRACTING OFFICER'S REPRESENTATIVE (COR)

The AAS CO appointed an AAS COR and GSA IT COR in writing through a COR Designation Letter. The AAS COR and GSA IT COR will receive, for the Government, all work called for by the TO and will represent the AAS CO in the technical phases of the work. Both CORs will provide no supervisory or instructional assistance to contractor personnel.

The AAS COR and GSA IT COR are not authorized to change any of the terms and conditions, scope, schedule, and price of the Contract or the TO. Changes in the scope of work will be made only by the AAS CO by properly executed modifications to the Contract or the TO.

G.1.1 CONTRACT ADMINISTRATION

Contracting Officer:

Luis Nieves
GSA FAS AAS Civilian
Email: *Luis.Nieves@gsa.gov*

Contract Specialist:

David Crawford

Email: david.crawford@gsa.gov

Contracting Officer's Representative:

Provided at award.

Technical Point of Contact:

Provided at award.

G.2 INVOICE SUBMISSION

The contractor shall submit Requests for Payments in accordance with TOR section G.3 and General Services Acquisition Manual (GSAM) 552.212-4, Contract Terms and Conditions—Commercial Products and Commercial Services (DEVIATION FAR 52.212-4) (Jan 2023) to be considered proper for payment. In addition, the following data elements shall be included on each invoice.

Task Order Number: *(from GSA Form 300, Block 2)*

Paying Number: *(FIN) (From GSA Form 300, Requisition/Reference Number Block or Form SF30 Block 4)*

Procurement Instrument Identifier (PIID): to be issued upon award

Program Title: FAS Acquisition & Ordering Systems

The contractor shall submit invoices as follows:

The contractor shall utilize ASSIST to submit invoices. The contractor shall manually enter CLIN charges into the ASSIST Invoice Service. Summary charges on invoices shall match the charges listed in ASSIST for all CLINs.
The contractor shall submit invoices electronically by logging into the ASSIST portal (assist.gsa.gov), navigating to the appropriate award, and creating the invoice for that award. Do NOT mail or electronically submit any invoices directly to the GSA Finance Center (neither by mail nor via electronic submission).

- Log into ASSIST using your assigned Identification (ID) and password.
- Complete login by entering your one-time authentication code to complete the multi-factor authentication.
- Click on the Award Administration menu option from the ASSIST Acquisition menu tab.
- Locate the order against which you want to invoice.
- Open the order by clicking on the Award PIID hyperlink.
- Click on the left-hand Invoice Summary navigator link.
- Click on the Create New Invoice button.

By utilizing this method, no paper copy of the invoice shall be submitted to GSA AAS or the GSA Finance Center. The contractor shall provide invoice backup data, as an attachment to the invoice, in accordance with the contract type, including details such as labor categories, rates, and quantities of labor hours per labor category. The COR may require the contractor to submit a written "hardcopy" invoice with the client's certification prior to invoice payment. A paper copy of the invoice is required for a credit.
The contractor is certifying, by submission of an invoice in ASSIST, that the invoice is correct and proper for payment.
For additional assistance or if there are any issues submitting an invoice, contact the ASSIST Service Desk for support at 877-472-4877 (toll free) or by email at assist.servicedesk@gsa.gov.

G.3 INVOICE REQUIREMENTS

The contractor shall submit invoices, to include all subcontractor invoices once per month. Lag time in invoicing cannot be greater than 60 calendar days.

The contractor shall submit a draft copy of an invoice backup in Excel to the COR for review prior to its submission to ASSIST. The draft invoice shall not be construed as a proper invoice in accordance with FAR Subpart 32.9 (GSA Class Deviation RFO-2025-32) and GSAM Subpart 532.9. The contractor shall provide receipts on an as-requested basis.

Each contract type shall be addressed separately in the invoice submission.

The final invoice is desired to be submitted within six months of Program completion. Upon Program completion, the contractor shall provide a final invoice status update monthly.

Regardless of contract type, the contractor shall report the following data:

- Task Order Award Number (NOT the Solicitation Number).

- Contractor Invoice Number.
- Contractor Name.
- Point of Contact Information.
- Current Period of Performance.
- Amount of Invoice Subcontracted.

The amount of invoice that was subcontracted to a small business shall be made available upon request.

G.3.1 TIME-AND-MATERIALS (T&M) CONTRACT LINE ITEM NUMBERS (CLINs) (for LABOR)

The contractor may invoice monthly on the basis of hours incurred for the T&M CLINs. The invoice shall include the period of performance covered by the invoice (all current charges shall be within the active period of performance) and the CLIN number and title. All hours and costs shall be reported by CLIN element (as shown in Section B), by contractor employee, and shall be provided for the current billing month and in total from Program inception to date. The contractor shall provide the invoice data in spreadsheet form with the following detailed information. The listing shall include separate columns and totals for the current invoice period and the Program to date.

a. Employee name (current and past employees).
b. Employee company.
c. Employee labor category.
d. Monthly and total cumulative hours worked.
e. Corresponding negotiated TO ceiling rate.
f. Hours incurred not billed reported by CLIN.
g. Total amount paid (lump sum) by CLIN.
h. Corresponding labor rate from Section B.

G.3.2 FIRM-FIXED-PRICE (FFP) CONTRACT LINE ITEM NUMBERS (CLINs)

Not Applicable.

G.3.3 OTHER DIRECT COSTS (ODCs)

The contractor may invoice monthly on the basis of cost incurred for the ODC CLINs. The invoice shall include the period of performance covered by the invoice and the CLIN number and title. In addition, the contractor shall provide the following detailed information for each invoice submitted, as applicable. Spreadsheet submissions, in MS Excel format, are required.

1. ODCs purchased.
2. Request to Initiate Purchase (RIP) (Section J.1, Attachment O) or Consent to Purchase (CTP) (Section J.1, Attachment N) number or identifier.
3. Date delivery accepted by the Government.
4. Associated CLIN.
5. Program-to-date totals by CLIN.
6. Cost incurred not billed by CLIN.

7. Remaining balance of the CLIN.
8. Any applicable fee.
9. Approved RIP or CTP cost and variance from actual costs.
10. Explanation of variances exceeding ten percent of the approved versus actual costs.

G.3.4 TRAVEL

Not Applicable.

G.4 TASK ORDER (TO) CLOSEOUT

The Government may unilaterally close out the TO 20 months after TO completion.

Interim Closeouts: The Government will attempt to close each Performance Period at completion and will use Quick-Closeout Procedures IAW FAR 42.507 (GSA Class Deviation RFO-2025-42).

When possible. The contractor shall submit a final invoice within 180 calendar days after the end of each Performance Period.

Final Invoice: The contractor shall identify and submit invoices for final payment within six months of TO completion. After this submission, no further charges are to be billed. A copy of the written client agency acceptance of task completion must be attached to final invoices. The contractor shall request from GSA an extension for final invoices that may exceed the six-month time frame. After the final invoice has been paid, the contractor shall furnish a completed and signed Release of Claims (GSA Form 1142) to the AAS CO. The release of claims is due within 15 calendar days of final payment

H.1 NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)

The NAICS Code for this TO is 541511 - Custom Computer Programming Services.

H.2 PRODUCT SERVICE CODE (PSC)

The PSC is DA01 (IT and Telecom - Business Application/Application Development Support Services - Labor).

H.3 KEY PERSONNEL & NON-KEY PERSONNEL

The following are the minimum personnel who shall be designated as "Key." The Government does not intend to dictate the composition of the ideal team to perform this TO. The contractor may propose additional key resources with relevant justification for these proposed roles.

Key Personnel

a. Cloud Solutions Architect
b. Cloud Engineer
c. Application Software Developer (Full Stack Developer)

Non-Key Personnel

a. Scrum Master / Business Analyst:
b. Software Quality Assurance Engineer and Software Development Engineer in Tester (SDET)
c. Application Software Developer (Full Stack Developer)

The Government desires that Key Personnel be assigned for the duration of the T.O. At this time the Government does not anticipate the proposal to include Program/Project Manager as Key Personnel.

H.3.1 Cloud Solutions Architect

The contractor shall identify a Cloud Solutions Architect by name to create architectural blueprints, designs, and solutions for Cloud-native systems adhering to the organization's requirements, scalability needs, performance considerations, security concerns, and cost efficiency goals. The Cloud Solutions Architect shall stay updated with the latest Cloud technologies, services, and trends. The Cloud Solutions Architect shall effectively interpret business, technical goals, objectives, and challenges; and proactively develop solutions, architecture transition strategies, and roadmaps that align with the program priorities.

a. It is required that the Cloud Solutions Architect has the following qualifications:
    1. Active and recognized Amazon Web Services (AWS) Certified Solutions Architect Professional Certification.
    2. A minimum of ten years of experience in developing and implementing sustainable enterprise scale Cloud-native architectures, systems modernization using microservices

architecture, containerization, and event-driven patterns with a focus on adopting emerging technologies.
3. A minimum of five years of experience in Bounded Context and Domain Driven Design patterns, systems integration, API first design, modern SecDevOps practices, and micro frontends design patterns.

b. It is desired that the Cloud Solutions Architect has the following qualifications:
   1. Experience in implementing Cloud solution architecture that includes evaluation, selection, and integration of critical technical components that meet the defined functional, non-functional and security requirements.
   2. Experience in developing proof of concepts, prototypes, solutions using Cloud-native technologies, AWS services and products, and emerging technologies.
   3. Experience in architecting and implementing CI/CD automation and Zero Downtime deployments with advanced knowledge and experience in one or more current programming languages (e.g., Java, JavaScript (including AngularJS), Python, Rust, Go, Ruby, or Hypertext Preprocessor (PHP)).
   4. Experience in building applications as composition of decoupled services and independently deployable units using microservice, and/or API based architectures at an enterprise scale.
   5. Experience in working closely with technical leads, engineering teams, and architecture stakeholders for technical issues and architecture framework capabilities for use by other development teams.

H.3.2 Cloud Engineer:

The contractor shall identify a highly skilled professional cloud engineer by name who focuses on designing, developing, and managing cloud-based infrastructure, applications, and services. It is required that the following key qualifications and skills are essential:

a. Design and Development:
   1. Cloud engineers design and develop cloud-based infrastructure, applications, and services that align with the organization's requirements.
   2. They select the appropriate cloud platform, create architecture diagrams, and develop automation scripts for efficient deployment and operations of cloud resources.
b. Deployment and Migration:
   1. Cloud engineers are responsible for deploying new applications to the cloud and migrating existing applications from on-premises infrastructure to the cloud.
   2. Their goal is to ensure a seamless transition process that does not disrupt the organization's operations.
c. Monitoring and Optimization:
   1. Cloud engineers monitor the performance of cloud-based systems.
   2. They optimize resources to ensure cost-effectiveness and high availability.
   3. Additionally, they troubleshoot and resolve any issues that may arise in the cloud environment.
d. Security and Compliance:
   1. Ensuring the security of cloud infrastructure is a critical responsibility.

2. Cloud engineers work to comply with business and regulatory requirements while safeguarding data and applications.

e. Interaction and Collaboration:
   1. They collaborate closely with other IT professionals, including developers, architects, and system administrators.
   2. Effective communication and team collaboration are essential for successful cloud engineering.

H.3.3 Application Software Developer (Full Stack Developer):

The contractor full stack developer shall design, develop, deploy, operate, and maintain the applications, to provide delivery in the most efficient way possible. He/She should leverage automated processes to mitigate security vulnerabilities in the environment by working with the security to triage security vulnerabilities and planning mitigation activities. Coordinate with team members to help the project realize value through enhanced value offerings.
It is required that the full stack developer has the following qualifications:

a. The full stack developer/engineer requires minimum of 10 years of programming experience
b. Includes 5+ years of experience in working within a software engineer team who leveraged DevSecOps, building and managing applications hosted in a cloud environment.
c. Solid understanding of and experience implementing large, complex projects with experience in UI/UX, CI/CD and cloud integration tools like Atlassian (JIRA and
d. Confluence), Github, Jenkins, Artifactory, Datagod, etc…
e. Strong background working in an agile development environment, collaborating with Application Development and Architecture Teams
f. Experience with service-oriented architecture, web services, Application Programming Interfaces.
g. Experience working in a High Availability environment with 99%+ uptime
h. Strong background in Java, Python, Amazon Web Service (AWS), MySQL, PostgreSQL, JBoss, React, Angular, US Web Design Standards, Spark, Vault.
i. Comfortable writing deployment scripts in languages such as Python, Unix Shell.
j. Experience using a wide variety of open source and COTS technologies and tools.
k. A strong focus on achieving value for business objective

H.3.4 Scrum Master / Business Analyst:

For this task order the position of business analyst is also expected to carry out the role and responsibilities of a Scrum Master. The contractor shall identify a Business Systems Analyst by name who focuses on designing and aligning organization's business strategies and processes to achieve its goals and objectives and performs the duties of a scrum master.

It is required that the Business Systems Analyst has the following qualifications:

- A minimum of five years of experience and expertise in developing and maintaining business architecture artifacts including product roadmaps, business capability maps, user personas, user journey maps, business process design, business process reengineering and optimization.
- Detailed understanding of Bounded Context and Domain Driven Design.

- A minimum of five years of experience in performing detailed business architecture review of large-scale financial systems and document implementation strategies to re-architect the business components.
- Keeping the development team organized and progressing on the project tasks in order of priority. The Scrum Master will help keep the team on track.
- The scrum master will lead the team's daily standup. In these brief morning meetings, the team discusses what they've accomplished, what they're planning to work on that day, and any obstacles they face completing their tasks.
- The scrum master will keep these meetings short and on point. Then they will act on any useful information derived from the meeting—such as finding a way to remove obstacles to the team's progress.
- The scrum master will also help to facilitate other Scrum ceremonies, including but not limited to sprint planning sessions, where the product and development teams discuss the priority items to work on in the upcoming sprint, backlog grooming, sprint review, sprint retrospective.
- The scrum master's role in these meetings will be to listen to team members and allow participants to make decisions about projects and priorities that help with the overall project's success.

The scrum master, business analyst must have credentials that substantiate that he/she has:

- Educational attainment that is appropriate for managing the type of work described in the , both TOR in size and scope.
- Sufficient experience to be conversant in and have the capacity to develop a working knowledge of PPMS.
- The business analyst's experience must demonstrate that he or she can understand all aspects of the work, with the ability to translate complex business requirements to epics and user stories and direct the development staff to perform successfully.
- 5+ years of proven experience as a successful scrum master /business analyst.
- Industry certifications from reputed organizations - Certified Scrum Master (CSM).
- An appropriate security clearance as prescribed in "Security Requirements" within this TOR.

H.3.5 Software Quality Assurance Engineer and Software Development Engineer in Tester (SDET)

The contractor Quality Assurance Engineer shall be responsible for the overall quality of the applications making sure that the deployed code, DB and other components work seamlessly without errors providing near 100% uptime for a given application. The contractor QA Engineer must have the following skills and experience:

- Detailed knowledge of QA modules with 5+ years of experience as a QA Engineer
- supporting large, complex applications.
- Creation of test plans
- Creation of test scripts
- Execution of test scripts
- Create manual and automated software tests to identify functionality issues.
- Has expertise in automating regression tests, integrating solutions into databases, reducing test flakiness, improving pass rates.

- Has the ability to work in an Agile environment and has critical thinking and analytical skills to examine bug reports and prioritize necessary tests.

H.3.6 Application Software Developer (Full Stack Developer):

The contractor full stack developer shall design, develop, deploy, operate, and maintain the applications, to provide delivery in the most efficient way possible. He/She should leverage automated processes to mitigate security vulnerabilities in the environment by working with the security to triage security vulnerabilities and planning mitigation activities. Coordinate with team members to help the project realize value through enhanced value offerings.
It is required that the full stack developer has the following qualifications:

- The full stack developer/engineer requires minimum of 10 years of programming experience
- Includes 5+ years of experience in working within a software engineer team who leveraged DevSecOps, building and managing applications hosted in a cloud environment.
- Solid understanding of and experience implementing large, complex projects with experience in UI/UX, CI/CD and cloud integration tools like Atlassian (JIRA and
- Confluence), Github, Jenkins, Artifactory, Splunk, etc…
- Strong background working in an agile development environment, collaborating with Application Development and Architecture Teams
- Experience with service-oriented architecture, web services, Application Programming Interfaces.
- Experience working in a High Availability environment with 99%+ uptime
- Strong background in Java, Python, Amazon Web Service (AWS), MySQL, PostgreSQL, JBoss, React, Angular, US Web Design Standards, Spark, Vault, Databricks, Datadog.
- Comfortable writing deployment scripts in languages such as Python, Unix Shell.
- Experience using a wide variety of open source and COTS technologies and tools.
- A strong focus on achieving value for business objectives

H.3.7 KEY PERSONNEL SUBSTITUTION

The Contractor shall not remove or replace any personnel designated as key personnel without making a written request to and receiving written concurrence from the Contracting Officer. The Contractor's request for a change to key personnel shall be made no later than ten (10) calendar days in advance of any proposed substitution, and shall include a justification for the change. The request shall
(1) indicate the labor category or labor categories affected by the proposed change,
(2) include resume(s) of the proposed substitute in sufficient detail to allow the Government to assess their qualifications and experience, and
(3) include a statement addressing the impact of the change (and transition/training plan from the departing to the incoming resource) on the Contractor performance.

Requests for substitution will not be unreasonably withheld by the Government. The Government will approve initial contractor key personnel at the time of award. Replacement key personnel will be approved via modification to the contract/task order. If the Government CO and the COR determine that the proposed substitution, or the removal of personnel without substitution or replacement, is unacceptable or would impair the successful performance of the

work, the Contracting Officer will request corrective action. Should the Contractor fail to take necessary and timely corrective action, the Government may exercise its rights under the Disputes provisions of this contract or take other action as authorized under the provisions of this task order, the Prime contract upon which this order is based, or pursue other legal remedies allowable by law.

H.3.8 NON KEY PERSONNEL SUBSTITUTION

Government approval is required prior to replacing any of its non-key personnel staff, the Contractor shall provide resumes and/or other adequate documentation to verify to the Government that all proposed replacements (temporary or permanent) meet the security and minimum educational and experience requirements of this TOR. Additionally, the Government requests the courtesy of being immediately informed of any potential vacancy or prior to any staff member being removed, rotated, reassigned, diverted or replaced.

H.4 GOVERNMENT-FURNISHED PROPERTY (GFP)

Unless otherwise stipulated, the Contractor is responsible for providing all necessary resources to perform the technical and administrative services required by this contract/task order. This includes fully trained personnel, personnel management and supervision, all related internal supporting business functions (including background and “overhead” personnel), materials, supplies, equipment, and facilities.

Equipment – Tools - Accessories
For contractors who have received appropriate investigation responses (e.g., Enter on Duty email), the Government will provide access to the GSA Network. The contractor is responsible for providing staff workstations and tools necessary to complete tasks. If required, GSA will issue GFE.

The Contractor shall immediately notify the COR who will terminate Government LAN access responsibility for any employee terminated or transferred from this contract This is a condition of GFP.

Facilities
From time to time, as dictated by task requirements, contractors may be required to work at the GSA Headquarters. In those cases, the Government will provide access to tools to schedule workspaces/conference rooms.

When Government facilities are utilized in the performance of this contract, the Government will provide photo identification (See Security Requirements H.6)

During the contract/task order, the Government may provide additional Government Furnished Items (GFIs)—materials, equipment, and facilities—beyond those initially listed. These will be made available upon the Government Technical Representative's receipt of a written request from the Contractor.

NOTE: All Government-provided products and facilities remain the property of the Government and shall be returned upon completion of the support services. Contractor personnel supporting this requirement shall return all items that were used during the performance of these requirements by the end of the performance period.
Safeguarding Government Furnished Property - Physical Security

The Contractor shall be responsible for safeguarding all Government property provided for Contractor use. At the end of each work period, Government facilities, property, equipment and materials shall be secured. The Contractor shall be responsible for any damage caused by his personnel to the building, finishes, furnishings, equipment, etc., and shall repair, clean, replace, or restore damaged items to the condition existing immediately prior to the item being damaged.
Training

During the course of this task order the Government may require Contractor employees to receive GSA mandatory internal training in areas necessary to allow the Contractor to fulfill the requirements of this task order (e.g., Government unique software or software tools, Security Training, etc). In such cases Government mandated training shall be considered part of this contract and charged against the task(s) to which the individual Contractor employee is assigned.

NOTE: The Contractor shall be responsible for the supervision, training and guidance of its personnel to accomplish this order. Unless Contractor employee training is specifically identified and authorized by the Government, in writing, the Contractor shall not bill the Government for employee time spent in training or for any costs related to or associated with Contractor employee acquired training. This applies to training of any type or for any purpose, including training that is either necessary for job or employment eligibility or a prerequisite to performance of work under this contract/order, whether general in nature or specialized and unique to this requirement.

H.5 GOVERNMENT-FURNISHED INFORMATION (GFI)

Data

The Government will provide access to required documents, reports, database access, data, network, application access and other information as available and as required to facilitate the accomplishment of work, as stated within this TOR.

The contractor is responsible for obtaining data necessary to perform each task if that data is in the public domain and is not otherwise furnished by the government.

The Government will provide access to required documents, reports, database access, data, network, application access and other information as available and as required to facilitate the accomplishment of work, as stated within this TOR.

H.6 SECURITY REQUIREMENTS

Contractors entering into an agreement for services to the General Services Administration (GSA) and/or its Federal customers shall be contractually subject to all GSA and Federal IT Security standards, policies, and reporting requirements. The Contractor shall meet and comply with all GSA IT Security Policies and all applicable GSA and NIST standards and guidelines, other Government-wide laws and regulations for protection and security of Information Technology. There is no defined timeframe for the ATO, but the ATO must be approved and in place before any application/system can be deployed to production.

IT Security Procedural Guide: Security and Privacy Requirements for IT Acquisition Efforts CIO-IT Security-09-48, Section 2.4 states "The Contractor shall comply with Assessment and Authorization (A&A) requirements as mandated by Federal laws and policies, including making available any documentation, physical access, and logical access needed to support this requirement. The Level of Effort for the A&A is based on the System's NIST Federal Information Processing Standard (FIPS) Publication 199 categorization."

H.6.1 IT SECURITY REQUIREMENTS

Contractors are required to comply with Federal Information Processing Standards (FIPS), the "Special Publications 800 series" guidelines published by NIST. Federal Information Processing Standards (FIPS) publication requirements are mandatory for use. NIST Special Publications are guidance unless required by GSA Chief Information Security Officer and/or GSA policies, procedures or procedural guides, in which case usage is mandatory. In addition, Contractors are required to comply with GSA Acquisition Letter MV-19-04.

- FIPS PUB 199, "Standards for Security Categorization of Federal Information and Information Systems"
- FIPS PUB 200, "Minimum Security Requirements for Federal Information and Information Systems"
- FIPS PUB 140-2, "Security Requirements for Cryptographic Modules"
- NIST Special Publication 800-18 Revision 1, "Guide for Developing Security Plans for Federal Information Systems"
- NIST Special Publication 800-30 Revision 1, "Guide for Conducting Risk Assessments"
- NIST Special Publication 800-34 Revision 1, "Contingency Planning Guide for Federal Information Systems"
- NIST Special Publication 800-37 Revision 1, "Guide for Applying the Risk Management Framework to Federal Information Systems: A Security Lifecycle Approach"

- NIST Special Publication 800-47, "Security Guide for Interconnecting Information Technology Systems"
- NIST Special Publication 800-53 Revision 4, "Security and Privacy Controls for Federal Information Systems and Organizations"
- NIST Special Publication 800-53A Revision 4, "Assessing Security and Privacy Controls in Federal Information Systems and Organizations: Building Effective Assessment Plans"

H.6.2 SAFEGUARDING SENSITIVE DATA AND INFORMATION TECHNOLOGY RESOURCES

The contractor may have access to sensitive (to include privileged and confidential) data, information, and materials of the United States (U.S.) Government. These printed and electronic documents are for internal use only and remain the sole property of the U.S. Government. Some of these materials are protected by the Privacy Act of 1974 (AMENDED) and Title 38. Unauthorized disclosure of Privacy Act or Title 38 covered materials is a criminal offense.

(a) In accordance with FAR 39.105, this section is included in the contract.
(b) This section applies to all who access or use GSA information technology (IT) resources or sensitive data, including awardees, Contractors, subcontractors, lessors, suppliers and manufacturers.
(c) The GSA policies as identified in paragraphs of this section are applicable to the contract. These policies can be found at http://www.gsa.gov/directives or https://insite.gsa.gov/directives. All the GSA policies listed in this paragraph must be followed.
(1) CIO P 1878.2A Conducting Privacy Impact Assessments (PIAs) in GSA
(2) CIO P 2100.1 GSA Information Technology (IT) Security Policy
(3) CIO P 2180.1 GSA Rules of Behavior for Handling Personally Identifiable Information (Pll)
(4) CIO 9297.1 GSA Data Release Policy
(5) CIO 9297.2B GSA Information Breach Notification Policy
(1) CIO P 2100.2A GSA Wireless Local Area Network (LAN) Security
(2) CIO 2100.3C Mandatory Information Technology (IT) Security Training Requirement for Agency and Contractor Employees with Significant Security Responsibilities
(3) CIO 2104.1A GSA Information Technology IT General Rules of Behavior
(4) CIO 2182.2 Mandatory Use of Personal Identity Verification (PIV) Credentials
(5) ADM P 9732.1 D Suitability and Personnel Security
(1) _ CIO 2102.1 Information Technology (IT) Integration Policy
(2) _CIO 2105.1 C GSA Section 508: Managing Electronic and Information Technology for Individuals with Disabilities
(3) _ CIO 2106.1 GSA Social Media Policy
(4) _CIO 2107.1 Implementation of the Online Resource Reservation Software

(5) _ CIO 2108.1 Software License Management
(6) _ CIO 2160.29 GSA Electronic Messaging and Related Services
(7) _ CIO 2160.4A CIO Provisioning of Information Technology (IT) Devices
(8) _ CIO 2162.1 Digital Signatures
(9) _ CIO P 2165.2 GSA Telecommunications Policy
(10)_CIO IL-13-01 Mobile Devices and Applications
(11)_CIO IL-14-03 Information Technology (IT) Integration Policy
(12) _HCO 9297.1 GSA Data Release Policy

(13)_HCO 9297.2B GSA Information Breach Notification Policy

(14)_ADM P 9732.1 D Suitability and Personnel Security

This section shall be inserted in all subcontracts.

H.6.3 SECURITY INVESTIGATIONS

Contractor personnel working under this TO shall undergo a Tier 2S Investigation (formerly called Moderate Risk Background), and must have a favorable outcome after the investigation and adjudication in order to work on the contract. When Government on-site meetings are required, the Government will provide personnel to ensure approved contractor personnel have access to Government facilities. Selected contractor employees will be required to complete mandatory Security Awareness and Privacy Training (this training is often provided internally by GSA via GSA Online University).

H.7 INFORMATION ASSURANCE

The contractor may have access to sensitive (including privileged and confidential) data, information, and materials of the Government. These printed and electronic documents are for internal use only and remain the sole property of the Government. Some of these materials are protected by the Privacy Act of 1974 (As Amended). Unauthorized disclosure of Privacy Act covered materials is a criminal offense.

H.7.1 GENERAL SERVICES ADMINISTRATION (GSA) INFORMATION TECHNOLOGY (IT) SECURITY REQUIREMENTS

The contractor shall deliver an IT Security Plan (See **TOR Section 9, IT Security Requirement)** within 30 calendar days of award that describes the processes and procedures that will be followed to ensure appropriate security of IT resources that are developed, processed, or used under this order. The IT Security Plan shall comply with applicable Federal laws including, but not limited to, 40 U.S.C. 11331, the Federal Information Security Management Act (FISMA) of 2002, and the E-Government Act of 2002. The IT Security Plan shall meet IT security requirements in accordance with Federal and GSA policies and procedures. The contractor shall submit written proof of IT security authorization (**TOR Section H, IT Security Requirement**) NLT six months after award and verify that the IT Security Plan remains valid annually.

H.7.2 SAFEGUARDING SENSITIVE DATA AND INFORMATION TECHNOLOGY (IT) RESOURCES.

In accordance with FAR 39.106, this section is included in this TO. This section applies to all users of sensitive data and IT resources, including awardees, contractors, subcontractors, lessors, suppliers, and manufacturers. All applicable GSA policies shall be followed. These policies can be found at:

gsa.gov/directives-library.

This section shall be inserted in all subcontracts:

The contractor may have access to sensitive (to include privileged and confidential) data, information, and materials of the United States (U.S.) Government. These printed and electronic documents are for internal use only and remain the sole property of the U.S. Government. Some of these materials are protected by the Privacy Act of 1974 (AMENDED) and Title 38. Unauthorized disclosure of Privacy Act or Title 38 covered materials is a criminal offense.

(a) In accordance with FAR 39.105, this section is included in the contract.

(b) This section applies to all who access or use GSA information technology (IT) resources or sensitive data, including awardees, Contractors, subcontractors, lessors, suppliers and manufacturers.
(c) The GSA policies as identified in paragraphs of this section are applicable to the contract. These policies can be found at http://www.gsa.gov/directives or https://insite.gsa.gov/directives. All the GSA policies listed in this paragraph must be followed.
(1) CIO P 1878.2A Conducting Privacy Impact Assessments (PIAs) in GSA
(2) CIO P 2100.1 GSA Information Technology (IT) Security Policy
(3) CIO P 2180.1 GSA Rules of Behavior for Handling Personally Identifiable Information (Pll)

(22) _HCO 9297.1 GSA Data Release Policy
(23)_HCO 9297.2B GSA Information Breach Notification Policy
(24)_ADM P 9732.1 D Suitability and Personnel Security

This section shall be inserted in all subcontracts.

H.8 SECURITY CLEARANCES

Contractor personnel working under this TO shall undergo a Tier 2S Investigation (formerly called Moderate Risk Background), and must have a favorable outcome after the investigation and adjudication in order to work on the contract. When Government on-site meetings are required, the Government will provide personnel to ensure approved contractor personnel have access to Government facilities. Selected contractor employees will be required to complete mandatory Security Awareness and Privacy Training (this training is often provided internally by GSA via GSA Online University).

In general, all necessary facility and employee security clearances shall be at the expense of the contractor. The contractor shall comply with all security requirements.

H.9 FACILITY CLEARANCE (FCL)

Contractor performance for this requirement is remote but the contractor shall comply with the following Personal Identity Verification clause.

52.204-9, Personal Identity Verification of Contractor Personnel. (Jan 2006)

(a) The Contractor shall comply with agency personal identity verification procedures identified in the contract that implement Homeland Security Presidential Directive-12 (HSPD-12), Office of Management and Budget (OMB) guidance M-05-24, and Federal Information Processing Standards Publication (FIPS PUB) Number 201.
(b) The Contractor shall insert this clause in all subcontracts when the subcontractor is required to have physical access to a federally-controlled facility or access to a Federal information system

H.10 CYBER-SUPPLY CHAIN RISK ASSESSMENT

The Government may perform a cyber-supply chain risk assessment of the awarded contractor at any time during the period of performance. The Government may review any information provided by the contractor to the Government as part of this contract action, along with any other information available to the Government from any other source, to assess the cyber-supply chain risk associated with the contractor. The Government may monitor the following cyber-supply chain risk information, including, but not limited to:

a. Functionality and features of awarded products and services, including access to data and information system privileges.
b. The ability of a source to produce and deliver products and services as expected.
c. Foreign control of, or influence over, a source, product, or service (e.g., foreign ownership, personal and professional ties between a source and any foreign entity, legal regime of any foreign country in which a source is headquartered or conducts operations).
d. Security, authenticity, and integrity of products and services and their supply and compilation chains.
e. The contractor's capacity to mitigate identified risks.
f. Any other considerations that would factor into an analysis of the security, integrity, resilience, quality, trustworthiness, or authenticity of products, services, or sources.

In the event supply chain risks are identified during contract administration and corrective action becomes necessary, mutually agreeable corrective actions will be sought based upon specific identified risks. Failure to resolve any identified risk may result in Government action, including not extending the period of performance, not exercising remaining option periods, and contract termination.

H.11 TECHNICAL DIRECTION LETTERS (TDLs)

TDLs are Not Applicable.

H.12 MISSION-ESSENTIAL SERVICES

Not Applicable.

H.13 TRAINING AND PERMITS

During the course of this contract/task order the Government may require Contractor employees to receive GSA mandatory internal training in areas necessary to allow the Contractor to fulfill the requirements of this contract/task order (e.g., Government unique software or software tools, Security Training, etc). In such cases Government mandated training shall be considered part of this contract and charged against the task(s) to which the individual Contractor employee is assigned

H.14 ORGANIZATIONAL CONFLICT OF INTEREST (OCI) AND NON-DISCLOSURE REQUIREMENTS

The resultant task order can cause OCI concerns and may preclude the contractor from competing for any future requirement that incorporates, involves, or relates to work performed

by the contractor under the awarded TO. Any OCI determinations for future procurements will only be made by that CO upon submission of those offers. To manage these concerns, the contractor will be responsible for delivering an OCI Mitigation Plan.

H.14.1 ORGANIZATIONAL CONFLICT OF INTEREST (OCI)

If a contractor has performed, is currently performing or anticipates performing work that creates or represents an actual or potential OCI, the contractor shall immediately disclose this actual or potential OCI to the AAS CO in accordance with FAR Subpart 9.5 (GSA Class Deviation RFO-2025-09) . The nature of the OCI may involve the prime contractor, subcontractors of any tier, or teaming partners.

H.14.2 NON-DISCLOSURE REQUIREMENTS

If the contractor acts on behalf of, or provides advice with respect to any phase of an agency procurement, as defined in FAR 3.104-4 (GSA Class Deviation RFO-2025-03), then the contractor shall execute and submit a Corporate Non-Disclosure Agreement (NDA) Form **Attachment L** and ensure that all its personnel (including subcontractors, teaming partners, and consultants) who will be personally and substantially involved in the performance of the TO:

a. Are instructed in the FAR 3.104 (GSA Class Deviation RFO-2025-03) requirements for disclosure, protection, and marking of contractor bid or proposal information, or source selection information.
b. Are instructed in FAR Part 9 (GSA Class Deviation RFO-2025-09) for third-party disclosures when acting in an advisory capacity.

All proposed replacement contractor personnel shall also be instructed in the requirements of FAR 3.104 (GSA Class Deviation RFO-2025-03). Any information provided by contractors in the performance of this TO or obtained from the Government is only to be used in the performance of the TO. The contractor shall put in place appropriate procedures for the protection of such information and shall be liable to the Government for any misuse or unauthorized disclosure of such information by its personnel, as defined above.

H.15 SECTION 508 COMPLIANCE REQUIREMENTS

The Contractor shall support the Government in its compliance with Section 508 throughout the development and implementation of the work to be performed. Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794d) requires that when Federal agencies develop, procure, maintain, or use electronic information technology, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees who do not have disabilities, unless an undue burden would be imposed on the agency.
All Information and Communication Technology (ICT) products, platforms, and services (e.g., hardware, software, websites, multimedia) procured, developed, maintained, delivered, and used as part of this TO, shall fully comply with Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794d) and Revised Section 508 Standards in 36 Code of Federal Regulations (CFR) § 1194.1 and Appendices A, C, and D.

The contractor shall identify all ICT products, platforms, and services to be used and the degree of compliance with the applicable standards. Additionally, the contractor shall clearly indicate where the information pertaining to Section 508 compliance can be found (e.g., vendor's or other exact web page location). The contractor shall ensure that the list is easily accessible by typical users beginning at time of award.

H.16 OTHER DIRECT COSTS (ODCs) AND MATERIALS AND EQUIPMENT

The Government may require the contractor to purchase ODCs critical and related to the services being acquired under the TO. Such requirements will be identified at the time a TOR is issued or may be identified during the course of a TO by the Government or the contractor. If the contractor initiates a purchase within the scope of this TO, the contractor shall submit to the COR a CTP or RIP. The CTP/RIP shall:

- Be prepared in a legible manner.
- Include the purpose of the purchase.
- Specify the items being purchased.
- Show the estimated cost of the purchase.
- Include a cost comparison.
- Show the rationale behind the purchase.

The contractor shall not make any purchases without an approved RIP from the COR or an approved CTP from the AAS CO and without complying with the requirements of Section H.16 RIPs and CTPs shall be submitted for approval using ASSIST Collaborations.

H.17 COMMERCIAL SUPPLIER AGREEMENTS

H.17.1 The Government understands that commercial software tools that may be purchased in furtherance of this TO as described in Section C of this TOR and as contemplated in the ODC and Materials and Equipment may be subject to commercial agreements which may take a variety of forms, including without limitation licensing agreements, terms of service, maintenance agreements, and the like, whether existing in hard copy or in an electronic or online format such as "clickwrap" or "browsewrap" (collectively, "Supplier Agreements"). For purposes of this TO, the Supplier Agreements are "collateral agreements" within the meaning of FAR 52.227-14.

H.17.2 The contractor shall ensure that any proposed Supplier Agreements allow the associated software and services to be used as necessary to achieve the objectives of this TO. The contractor shall provide all applicable Supplier Agreements to the AAS CO prior to purchase and shall cooperate with the Government, including negotiations with the licensor as appropriate, to ensure compliance with this Section. Without limiting the generality of the foregoing, a compliant Supplier Agreement shall permit all of the following at no extra charge to the Government (a) access and use by support contractors, including a successor contractor upon termination or expiration of this TO; (b) access and use by employees of other Federal, state and local law enforcement agencies; (c) transfer to a different data center and/or a successor contractor's cloud; and (d) the creation of derivative works that shall be subject to at least the same rights as set forth in subparagraphs (a) through (c) above. The above rights constitute "other rights and

limitations" as contemplated in subparagraph (d) of FAR 52.227-14, Rights In Data – General (May 2014), Alternate III (Dec 2007).

H.18 PRESS/NEWS RELEASE

The contractor shall not make any press/news release pertaining to this TO without prior Government approval and only in coordination with the AAS CO.

H.19 INTELLECTUAL PROPERTY RIGHTS

Data Rights

The Government shall have unlimited right to all data generated and delivered under this contract or order. This data shall not be used, published, or distributed by the Contractor without specific permission from the Government.

Additionally, all documented processes, procedures, tools and applications developed under this (TOR) are the property of the Government. All text, electronic digital files, data, new capabilities or modifications of existing applications, source code, documentation, and other products generated, modified or created under this contract shall become the property of the Government. The Government shall have unlimited rights to all such information/deliverables.

The Government shall have the right to use all commercially developed and privately funded data delivered under this contract or order in accordance with, and subject to, the published agreements and restrictions that accompany that data.

Limited Use of Data

All data delivered or made available to the Contractor as Government Furnished Data shall remain the property of the Government and shall only be used by the Contractor in the performance of this contract or order. The Government retains all rights to Government Furnished Data.

At the conclusion of this contract/task order all Government Furnished Data shall be dealt with according to the disposition instruction provided by the Contracting Office. If the Contracting Officer fails to provide disposition instructions for Government Furnished Data within thirty days of contract/task order end date, then the Contractor shall return all hard copy data and delete or otherwise destroy all electronic data.

Proprietary Data

The Contractor shall not employ the use of any proprietary data or software in the performance of this contract without the advanced written consent of the Contracting Officer.

The existence of any patent, patent application, or other intellectual property right that encumbers any deliverable shall be disclosed in writing on the cover letter that accompanies the delivery. If no such disclosures are provided, the data rights provisions in FAR 52.227-14 apply.

H.20 CONTRACTOR IDENTIFICATION

As stated in 48 CFR 211.106, Purchase Descriptions for Service Contracts, contractor personnel shall identify themselves as contractor personnel by introducing themselves or being introduced

as contractor personnel and by displaying distinguishing badges or other visible identification for meetings with Government personnel. Contractor personnel shall appropriately identify themselves as contractor employees in telephone conversations and in formal and informal written correspondence.

H.21 PERSONAL IDENTITY VERIFICATION (PIV) CARD

The contractor shall provide a written status of issued security badges and PIV cards at closeout of the TO and at the end of each option period, provide a PIV Report containing the following:

TO *TBD* requires contractor personnel and/or subcontract personnel to have routine physical access to a Federally controlled facility and/or routine access to a Federally controlled information system as identified in the TOR.

The contractor understands its responsibility of complying with the agency's PIV procedures applicable to the installation where performance will occur. The contractor shall account for all forms of Government-provided identification issued to the contractor employees and/or subcontractor employees in connection with performance under this contract/order.

The contractor shall provide a report to the AAS CO and GSA *OCIO* COR stating the total number of PIVs issued under this TO as required in Section 5. Each report shall include the following information, at a minimum:

1. Contractor employee's name and title.
2. Date the PIV credential/security badge is required under the contract.
3. Date the PIV credential is issued.
4. Unique PIV credential number.
5. Date PIV credential is no longer needed.
6. Date PIV credential is returned.

The contractor shall return all identification to the issuing agency immediately when any of the following apply:

1. PIV is no longer needed for contract performance.
2. Upon completion of the contractor employee and/or subcontractor employee's employment.
3. Upon completion or termination of TO.

The contractor understands the AAS CO may delay final payment under the TO if the contractor fails to comply with these requirements.

H.22 ENERGY STAR AND FEMP-DESIGNATED ENERGY EFFICIENT PRODUCTS

The Energy Policy Act (EPAct) of 2005 requires Federal agencies to purchase Energy Star and Federal Energy Management Program (FEMP)-designated energy efficient products. The contractor shall provide products that earn the Energy Star and meet the Energy Star specifications for energy efficiency. The contractor is encouraged to visit energystar.gov for complete product specifications and updated lists of qualifying products.

Additionally, the Energy Independence and Security Act of 2007 (EISA) requires Federal agencies to purchase products that use low wattage during standby mode. The contractor shall use low wattage products wherever possible or as required under this TO.

The Electronic Product Environmental Assessment Tool (EPEAT) was created to define what it means for electronic products to be “environmentally preferable.” The EPEAT standard has three tiers: Bronze, Silver, and Gold. Bronze means the product meets the mandatory criteria, Silver means the product meets the mandatory criteria plus 50 percent of the optional criteria, and Gold means the product meets the mandatory criteria plus 75 percent of the optional criteria. The contractor shall ensure that for those products covered by an EPEAT standard, 95 percent of the products are EPEAT-registered.

I.1 TASK ORDER (TO) CLAUSES

All applicable and required clauses set forth in the Revolutionary FAR Overhaul (RFO) automatically flow down to all GWAC TOs, based on their specific contract type (e.g., fixed-price, T&M, LH), statement of work, competition requirements, commercial or not commercial, and dollar value as of the date the TO solicitation is issued. All applicable contract clauses and terms and conditions from the contractor's GSA GWAC will be incorporated under any resultant TO.

I.2 FEDERAL ACQUISITION REGULATION (FAR) 52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This TO incorporates one or more clauses by reference with the same force and effect as if they were given in full text. Upon request, the AAS CO will make their full text available. Also, the full text of a clause may be accessed electronically at the FAR website:

acquisition.gov/far/

I.2.1 FEDERAL ACQUISITION REGULATION (FAR) CLAUSES INCORPORATED BY FULL TEXT

FAR 52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six months. The Contracting Officer may exercise the option by written notice to the Contractor within 10 days.

(End of clause)

FAR 52.217-9 OPTION TO EXTEND THE TERM OF THE CONTRACT (MAR 2000)

a. The Government may extend the term of this contract by written notice to the Contractor within *14 days* provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days before the contract expires. The preliminary notice does not commit the Government to an extension.
b. If the Government exercises this option, the extended contract shall be considered to include this option clause.
c. The total duration of this contract, including the exercise of any options under this clause, shall not exceed 5 years.

(End of clause)

FAR 52.223-23 Sustainable Products (DEVIATION NOV 2025)

(a) *Definitions.* As used in this clause—

Sustainable product means—

(1) A product that contains recovered material designated by the EPA under the Comprehensive Procurement Guidelines (42 U.S.C. 6962) (40 CFR part 247) (https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program#products).

(2) An energy-efficient product or low standby power device (42 U.S.C. 8259b) (10 CFR part 436, subpart C) (https://www.energy.gov/eere/femp/search-energy-efficient-products, https://www.energystar.gov/products?s=mega, and https://www.energy.gov/femp/low-standby-power-product-list).

(3) A biobased product that meets the content requirements of the USDA under the BioPreferred® program (7 U.S.C. 8102) (7 CFR Part 4270) (https://www.biopreferred.gov/).

(4) A substance identified in the EPA's Significant New Alternatives Policy (SNAP) program as a safe alternative to an ozone-depleting substance (42 U.S.C. 7671l) (40 CFR part 82, subpart G) (https://www.epa.gov/snap/unacceptable-and-acceptable-substitutes-tables).

(b) *Requirements*. The Government has identified in the statement of work or elsewhere in the contract the sustainable products that are required during the performance of this contract. The Contractor shall ensure that it provides sustainable products as required by this contract, when the products are—

(1) Delivered to the Government;

(2) Furnished for use by the Government;

(3) Incorporated into the construction of a public building or public work; or

(c) Furnished for use in performing services under this contract, where the cost of the products is a direct cost to this contract.

End of clause

FAR 52.244-6 SUBCONTRACTS FOR COMMERCIAL PRODUCTS AND COMMERCIAL SERVICE (JAN 2025) (DEVIATION APR 2026)

(a) *Definitions*. As used in this clause—

Commercial product, commercial service and nondevelopmental item have the meanings contained in Federal Acquisition Regulation (FAR) 2.101.

Subcontract has the meaning at FAR 44.401

(b) *Requirements*.

(1) To the maximum extent practicable, the Contractor shall incorporate, and require its subcontractors at all tiers to incorporate, commercial products, commercial services, or non-developmental items as components of items to be supplied under this contract.

(2) If a clause in the following table is included in the contract, the Contractor shall insert the clause in subcontracts for commercial products or commercial services and must flow down the requirements of the clause to subcontracts as indicated in the specific clause:

Number	Title	Date
52.203-13	Contractor Code of Business Ethics and Conduct	Nov 2021
52.203-17	Contractor Employee Whistleblower Rights	Nov 2023
52.203-19	Prohibition on Requiring Certain Internal Confidentiality Agreements or Statements	Jan 2017
52.204-9	Personal Identity Verification of Contractor Personnel	Jan 2011
52.219-8 *	Utilization of Small Business Concerns	Jan 2025

52.240-92 with Alt II	Security Requirements, with its Alternate II	DATE
52.247-64	Preference for Privately Owned U.S.-Flag Commercial Vessels	Nov 2021

* Include only if the subcontract offers further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds the applicable threshold specified in FAR 19.109(a) on the date of subcontract award, the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(c) *Subcontracts*. The Contractor shall include the terms of this clause, including this paragraph (c), in subcontracts awarded under this contract.

(End of clause)

I.3 GENERAL SERVICES ACQUISITION MANUAL (GSAM) CLAUSES INCORPORATED BY REFERENCE

The full text of a provision may be accessed electronically at the GSAM website:

acquisition.gov/gsam/gsam.html

GSAM	TITLE	DATE

I.3.1 GENERAL SERVICES ACQUISITION MANUAL (GSAM) CLAUSES INCORPORATED BY FULL TEXT

GSAM 552.212-71 CONTRACT TERMS AND CONDITIONS APPLICABLE TO GSA ACQUISITION OF COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES (OCT 2023)

As prescribed in 512.301(a)(1), insert the following clause:

Contract Terms and Conditions Applicable to GSA Acquisition of Commercial Products and Commercial Services (OCT 2023)

(a) The Contractor agrees to comply with any clause that is incorporated herein by reference to implement agency policy applicable to acquisition of commercial products, including commercial components, and commercial services. The clause in effect based on the applicable regulation cited on the date the solicitation is issued applies unless otherwise stated herein. The Contracting Officer should check the clauses in paragraph (b) that apply or delete the clauses that do not apply from the list. The Contracting Officer may add the date of the clause if desired for clarity. The GSAR clauses in paragraph (b) of this section are incorporated by reference.

[The Contracting Officer should check the clauses that apply or delete the clauses that do not apply from the list. The Contracting Officer may add the date of the clause if desired for clarity.]

(b) Clauses.

552.219-70 Allocation of Orders—Partially Set-Aside Items

552.229-70 Federal, State, and Local Taxes
552.232-72 Final Payment Under Building Services Contracts
552.237-71 Qualifications of Employees
552.242-70 Status Report of Orders and Shipments

(End of clause)

K.1 REPRESENTATION PROVISIONS PROVIDED IN FULL TEXT

Notice 1- System Updates and Representation

System updates may lag policy updates. The System for Award Management (SAM) may continue to require entities to complete representations based on provisions that **are not** included in agency solicitations. Examples include:

- FAR 52.222-25, Affirmative Action Compliance
- FAR 52.212-3(d) and (t), Offeror Representations and Certifications–Commercial Products and Commercial Services
- FAR 52.223-22, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals – Representation

GSA will neither consider the representations when making award decisions nor enforce requirements. Entities are not required to, nor are they able to, update their entity registration to remove these representations in SAM.

(End of notice)

Notice 2 - FAR Compliance and Equal Employment Opportunity (EEO) Changes

As of February 15, 2025, FAR clauses and provisions covered under E.O. 11246, Equal Employment Opportunity, will no longer be enforced. Therefore, contractors and their subcontractors will not be held accountable for applying the FAR clauses or provisions outlined in FAR subpart 22.8 - Equal Employment Opportunity or the associated provisions and clauses prescribed at FAR 22.810. In addition, contractors will no longer be required to comply with the System for Award Management (SAM) representation requirements based on these provisions and clauses. Examples include:

- FAR 52.222-25, Affirmative Action Compliance, and
- FAR 52.212-3(d), Offeror Representations and Certifications— Commercial Products and Commercial Services.

This notification does not affect:

Any FAR subparts that are based on statute or are not covered by E.O. 11246 such as:

- FAR subpart 22.13, Equal Opportunity for Veterans and its related clauses and provisions; and
- FAR subpart 22.14, Employment of Workers and Disabilities;

Existing U.S. laws on civil rights, nondiscrimination, or any laws that generally apply to a company regardless of whether it is a government contractor.

(End of notice)

FAR 52.240-90 SECURITY PROHIBITIONS AND EXCLUSIONS REPRESENTATIONS AND CERTIFICATIONS (NOV 2025)

(a) Definitions. As used in this provision-—

Backhaul, covered article, covered telecommunications equipment or services, critical technology, FASCSA order, Intelligence community, interconnection arrangements, national security system, roaming, sensitive compartmented information, sensitive compartmented information system, source, and substantial or essential component have the meanings provided in the clause 52.240-91, Security Prohibitions and Exclusions.

Business operations means engaging in commerce in any form, including by acquiring, developing, maintaining, owning, selling, possessing, leasing, or operating equipment, facilities, personnel, products, services, personal property, real property, or any other apparatus of business or commerce.

Marginalized populations of Sudan means—

(1) Adversely affected groups in regions authorized to receive assistance under section 8(c) of the Darfur Peace and Accountability Act (Pub. L. 109-344) (50 U.S.C. 1701 note); and

(2) Marginalized areas in Northern Sudan described in section 4(9) of such Act.

Restricted business operations means business operations in Sudan that include power production activities, mineral extraction activities, oil-related activities, or the production of military equipment, as those terms are defined in the Sudan Accountability and Divestment Act of 2007 (Pub. L. 110-174). Restricted business operations do not include business operations that the person (as that term is defined in Section 2 of the Sudan Accountability and Divestment Act of 2007) conducting the business can demonstrate—

(1) Are conducted under contract directly and exclusively with the regional government of southern Sudan;

(2) Are conducted under specific authorization from the Office of Foreign Assets Control in the Department of the Treasury, or are expressly exempted under Federal law from the requirement to be conducted under such authorization;

(3) Consist of providing goods or services to marginalized populations of Sudan;

(4) Consist of providing goods or services to an internationally recognized peacekeeping force or humanitarian organization;

(5) Consist of providing goods or services that are used only to promote health or education; or

(6) Have been voluntarily suspended.

Sensitive technology—

(1) Means hardware, software, telecommunications equipment, or any other technology that is to be used specifically—

(i) To restrict the free flow of unbiased information in Iran; or

(ii) To disrupt, monitor, or otherwise restrict speech of the people of Iran; and

(2) Does not include information or informational materials the export of which the President does not have the authority to regulate or prohibit pursuant to section 203(b)(3) of the International Emergency Economic Powers Act (50 U.S.C. 1702(b)(3)).

(b) Procedures.

(1) Covered telecommunications and video surveillance. The Offeror shall review the list of excluded parties in the System for Award Management (SAM) at https://www.sam.gov for entities excluded from receiving federal awards for “covered telecommunications equipment or services.”

(2) FASCSA Orders.

(i) The Offeror shall search in SAM for the phrase “FASCSA order” for any covered article, or any products or services produced or provided by a source, if there is an applicable FASCSA order described in paragraph (e) of FAR 52.240-91, Security Prohibitions and Exclusions.

(ii) The Offeror shall review the solicitation for any FASCSA orders that are not in SAM but are effective and apply to the solicitation and resultant contract (see FAR 40.204-1(c)(2)).

(iii) FASCSA orders issued after the date of solicitation do not apply unless added by an amendment to the solicitation.

(c) Covered telecommunications equipment or services representations. By submission of its offer, the Offeror represents that, after conducting a reasonable inquiry (that looks at any information in the Offeror's possession but does not need to include an internal or third-party audit)—

(1) It will not provide covered telecommunications equipment or services to the Government in the performance of any contract, subcontract or other contractual instrument resulting from this solicitation, except as waived by the solicitation, or as disclosed in paragraph (g); and

(2) It does not use covered telecommunications equipment or services, or use any equipment, system, or service that uses covered telecommunications equipment or services, except as waived by the solicitation, or as disclosed in paragraph (g).

(d) FASCSA Representation. By submission of this offer, the offeror represents that it has conducted a reasonable inquiry, and that the offeror does not propose to provide or use in response to this solicitation any covered article, or any products or services produced or provided by a source, if the covered article or the source is prohibited by an applicable FASCSA order in effect on the date the solicitation was issued, except as waived by the solicitation, or as disclosed in paragraph (g). A reasonable inquiry will look at any information in the offeror's possession but does not need to include an internal or third-party audit.

(e) Sudan certification. By submission of its offer, the offeror certifies, after conducting a reasonable inquiry (that looks at any information in the offeror's possession but does not need to include an internal or third-party audit), that the offeror does not conduct any restricted business operations in Sudan.

(f) Iran Representation and Certifications.

(1) Except as provided in paragraph (f)(2) of this provision or if a waiver has been granted in accordance with FAR 40.203-3, the offeror, after conducting a reasonable inquiry (that looks at any information in the offeror's possession but does not need to include an internal or third-party audit), by submission of its offer—

(i) Represents, to the best of its knowledge and belief, that the offeror does not export any sensitive technology to the government of Iran or any entities or individuals owned or controlled by, or acting on behalf or at the direction of, the government of Iran;

(ii) Certifies that the offeror, or any person (as defined at section 15 of the Iran Sanctions Act of 1996, Pub. L. 104-172, 50 U.S.C. 1701 note) owned or controlled by the offeror, does not engage in any activities for which sanctions may be imposed under section 5 of the Act. These sanctioned activities are in the areas of development of the petroleum resources of Iran, production of refined petroleum products in Iran, sale and provision of refined petroleum products to Iran, and contributing to Iran's ability to acquire or develop certain weapons or technologies; and

(iii) Certifies that the offeror, and any person owned or controlled by the offeror, does not knowingly engage in any transaction that exceeds $15,000 with Iran's Revolutionary Guard Corps or any of its officials, agents, or affiliates, the property and interests in property of which are blocked pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.) (see OFAC's Specially Designated Nationals and Blocked Persons List at https://www.treasury.gov/resource-center/sanctions/SDN-List/Pages/default.aspx)

(2) Exception for trade agreements. The representation and certification requirements of paragraph (f)(1) of this provision do not apply if—

(i) This solicitation includes a trade agreements notice or certification (e.g., 52.225-6, Trade Agreements Certificate); and

(ii) The offeror has certified that all the offered products to be supplied are designated country end products or designated country construction material.

(iii) The offeror shall email questions concerning sensitive technology to the Department of State at CISADA106@state.gov.

(g) Disclosure.

(1) If the Offeror is not able to represent compliance with the prohibitions in paragraphs (c) or (d), then the Offeror shall disclose within 72 hours to the contracting office identified in paragraph (g)(2) the following information for each product or service not compliant:

(i) Contract number and order number, if applicable;

(ii) Identification of whether this disclosure relates to paragraph (c) on covered telecommunication equipment or services, or to paragraph (d) on FASCSA orders;

(iii) A description of the products or services that the Contractor identifies or has reason to suspect is prohibited (include brand; model number, such as the original equipment manufacturer (OEM) number, manufacturer part number, or wholesaler number; and item description, as applicable);

(iv) The entity that produced the product or service (include entity name, unique entity identifier, Contractor and Government Entity (CAGE) code, facilities responsible for design, fabrication, assembly, packaging, and test of the product, and whether the entity was the OEM or a distributor (provide manufacturer codes and distributor codes used for the product));

(v) Description of the functionality of the product or service and how that functionality impacts the risk to the product or service;

(vi) An explanation of any factors relevant to determining if the product or service should be permitted by an applicable exception, exemption, or waiver (if the offeror would like the Government to consider a waiver);

(vii) Whether alternative products or services are available that would be compliant with the prohibition;

(viii) If the product or service is related to item maintenance, include the following information on the item being maintained:

(A) Brand;

(B) Model number, OEM number, manufacturer part number, or wholesaler number; and

(C) Item description, as applicable.

(ix) Any readily available information about mitigation actions undertaken or recommended.

(2) If a disclosure is required to be submitted to a contracting office, the offeror shall submit the disclosure as follows:

(i) If a Department of Defense contracting office, the offeror shall submit the disclosure to the website at https://dibnet.dod.mil.

(ii) For all other contracting offices, the Offeror shall submit the disclosure to the Contracting Officer.

(3) If the disclosure provided does not contain any of the information required by paragraph (1), and the Offeror later discovers new information that is required by paragraph (1), then the Offeror shall submit a subsequent disclosure within 72 hours of discovering the new information.

(h) Executive agency review of disclosures. The Contracting Officer will review disclosures provided in paragraph (g) to determine if any applicable waiver may be sought. The Contracting Officer may choose not to pursue a waiver and may instead make an award to an Offeror that does not require a waiver.

(End of provision)

FAR 52.227-15 REPRESENTATION OF LIMITED RIGHTS DATA AND RESTRICTED COMPUTER SOFTWARE) (DEC 2007)

As prescribed in 27.409(c), insert the following provision:

REPRESENTATION OF LIMITED RIGHTS DATA AND RESTRICTED COMPUTER SOFTWARE (DEC 2007)

(a) This solicitation sets forth the Government's known delivery requirements for data (as defined in the clause at 52.227-14, Rights in Data-General). Any resulting contract may also provide the Government the option to order additional data under the Additional Data Requirements clause at 52.227-16, if included in the contract. Any data delivered under the resulting contract will be subject to the Rights in Data-General clause at 52.227-14 included in this contract. Under the latter clause, a Contractor may withhold from delivery data that qualify as limited rights data or restricted computer software, and deliver form, fit, and function data instead. The latter clause also may be used with its Alternates II and/or III to obtain delivery of limited rights data or restricted computer software, marked with limited rights or restricted rights notices, as appropriate. In addition, use of Alternate V with this latter clause provides the Government the right to inspect such data at the Contractor's facility.

(b) By completing the remainder of this paragraph, the offeror represents that it has reviewed the requirements for the delivery of technical data or computer software and states [*offeror check appropriate block*]-

□ None of the data proposed for fulfilling the data delivery requirements qualifies as limited rights data or restricted computer software; or

□ Data proposed for fulfilling the data delivery requirements qualify as limited rights data or restricted computer software and are identified as follows:

_____

_____

_____

(c) Any identification of limited rights data or restricted computer software in the offeror's response is not determinative of the status of the data should a contract be awarded to the offeror.

(End of provision)

L.1 FEDERAL ACQUISITION REGULATION (FAR) 52.252-1 SOLICITATION PROVISIONS INCORPORATED BY REFERENCE (FEB 1998)

This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the AAS CO will make the full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its proposal or offer. In lieu of submitting the full text of those provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its proposal or offer. Also, the full text of a solicitation provision may be accessed electronically at:

acquisition.gov/far

L.1.1 SOLICITATION PROVISIONS PROVIDED IN FULL TEXT

FAR 52.215-20 Requirements for Certified Cost or Pricing Data and Data Other Than Certified Cost or Pricing Data – Alternate IV (NOV 2025 DEVIATION)

(a) Submission of certified cost or pricing data is not required.

(b) Provide data described below:

All data required to be submitted as part of the offeror's proposal is described in Sections L.5, L.6, and L.7 of this solicitation. The offeror must use the formats for submission of data prescribed in these sections. By submitting a proposal, the offeror grants the AAS CO or an authorized representative the right to examine records that formed the basis for the pricing proposal. That examination can take place at any time before the award. It may include those books, records, documents, and other types of factual data (regardless of form or whether the data are specifically referenced or included in the proposal as the basis for pricing) that will permit an adequate evaluation of the proposed price.

(End of provision)

L.2 GENERAL INSTRUCTIONS

a. The offeror is expected to examine this entire solicitation document including the offeror's (8a) STARS III master contract. Failure to do so will be at the offeror's own risk.

b. The Government intends to make an award based on initial offers. Proposals shall set forth full, accurate, and complete information as required by this solicitation package (including Attachments listed in Section J). The penalty for making false statements in proposals is prescribed in 18 U.S.C. 1001.

c. An offeror submitting restricted data shall mark it as follows in accordance with the FAR 52.215-1, Instructions to Offerors - Competitive Acquisition (Nov 2021) (Deviation Nov 2025), which is incorporated by reference. FAR Clause 52.215-1(e) states: "*Restriction on disclosure and use of data*. Offerors that include in their proposals data that they do not want disclosed to the public for any purpose, or used by the Government except for evaluation purposes, shall –

(1) Mark the title page with the following legend:

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed-in whole or in part-for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of-or in connection with-the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtained from another source without restriction. The data subject to the restriction is contained in sheets [insert numbers or other identification of sheets]; and

(2) Mark each sheet of data it wishes to restrict with the following legend:

Use or disclosure of data contained on this sheet is subject to the restriction on the title page of this proposal."

d. The Government assumes no liability for disclosure or use of unmarked data and may use or disclose the data for any purpose. Unless restricted, information submitted in response to this request may become subject to disclosure to the public pursuant to the provisions of the Freedom of Information Act (5 U.S.C. 552).
e. This procurement is conducted under the procedures of FAR Subpart 16.5 (GSA Class Deviation RFO-2025-16). The policies and procedures of FAR Subpart 15.2 (GSA Class Deviation RFO-2025-15) do not apply.

L.3 GENERAL INFORMATION

Proposals shall be valid for a period of not less than 120 calendar days from the date of delivery. **For proposal purposes only**, offerors shall use a Program Start date of **8/27/2026**.

L.3.1 AVAILABILITY OF EQUIPMENT AND SOFTWARE

All commercial hardware and software proposed in response to this solicitation document shall have been formally announced for general release on or before the closing date of the solicitation. Failure to have equipment or software announced prior to submission of proposal may render the offeror's proposal NOT ACCEPTABLE.

All commercial and non-commercial hardware and software proposed in response to this solicitation document shall ***not*** have been formally announced as at its end of life or end of technical support by its publisher or licensor. Proposals that include commercial or non-commercial hardware and software that is at its end of life may render the offeror's proposal NOT ACCEPTABLE.

L.3.2 CONTRACTOR SUPPORT DURING TECHNICAL EVALUATION

NOT Applicable.

L.4 SUBMISSION OF OFFERS

The offers shall be provided to the Government in three (3) parts via two (2) Phases. Each Part (Parts I, II, and III) must be separately bound. The submission shall contain the following:

Phase 1 Submit Via GSA EBUY	
Part I	a. Staffing Plan (limited to 1 page Excel) b. Staffing Rationale (limited to 3 pages) c. KPQM (limited to 2 pages for each Key Personnel) d. Technical Assumptions (if any) e. Service Level Agreements (SLAs) and Performance Metrics (limited to 3 pages) f. Written Response to TOR addressing Factor 1 ONLY(limited to 12 pages for Part I) g. Pass/Fail Elements

Phase 2 Only when directed to Submit Via GSA ASSIST SYSTEM	
Part II	a. Draft Transition-In Plan (limited to 3 pages) b. QMP (limited to 3 pages) c. Vendor Supplier Chain Management Plan (see attachment E) d. Corporate Experience Questionnaire (limited to 5 pages each corporate experience) e. Complete Written Technical Proposal addressing Factor 2 Management Approach (limited to 10 pages) and Factor 3 Relevant Corporate Experience (limited to 5 pages per experience)
Part III	Pricing Proposal with Option periods breakout

An email notification will be sent to advise each offeror of the Government's recommendation to proceed or not to proceed with a Phase 2 submission. The proposals rated most highly for Phase 1 will be advised to proceed to Phase 2 of the proposal submission process. Offerors not among the most highly rated will be advised that their offer is unlikely to be selected. The intent of the advice is to minimize development costs for those offerors with little to no chance of receiving an award. However, those offerors may still move forward with Phase 2 knowing their offer is not among the most highly rated for the most important technical factor and is therefore unlikely to be selected for award. **Phase 1 offerors that were advised not to proceed may still participate in Phase 2, but MUST officially inform the CO and CS of the intent to proceed with Phase 2 via email at luis.nieves@gsa.gov and david.crawford@gsa.gov within two (2) business days of receiving the government's email notification.**

The offeror shall submit each Proposal Part by the due dates indicated in the Solicitation.

No paper (hard copy) proposal will be accepted. The proposal shall NOT be submitted to any other parties. Any corrupt or unreadable documents shall not be considered for evaluation purposes. Any files not received by the cut-off date and time specified herein shall be deemed late and not considered for evaluation purposes.

- All electronic files shall be in MS Word, PowerPoint, PDF, or Excel formats.
- Any documents provided in Section J shall be submitted using the same file format, font size, and margins as the document provided (e.g., Staffing Plan shall be submitted in Excel file format).
- Electronic proposal pages (with the exception of Excel and PowerPoint) must maintain one-inch margins.
- Excel files must maintain margins of no less than 0.7"
- PowerPoint files must be in Standard (4:3) format and maintain margins of no less than 0.5". PowerPoint files converted to PDF shall maintain the 4:3 format and margins of no less than 0.5".
- Excel file cells shall not be locked and shall include all formulas.
- Electronic proposal pages must maintain 12-point Times New Roman font and be single spaced, with the exception of charts/graphics/tables.
- Charts/Graphics/Tables must maintain a minimum of ten-point Times New Roman font. Charts/Graphics/Tables embedded in the proposal will count toward page limitations.

- Headers and footers may be of a font larger than 12 point but shall not be smaller than ten-point font.
- The formatting requirements regarding margins and font do not apply to screenshots or pre-existing documentation prepared by another organization; however, the text must be presented in a legible manner.
- Unless otherwise specified, a single electronic page in 8.5" x 11" format will be counted as one page where page limitations apply.
- Electronic ledger size (11" x 17") format may be used for tables and information that are more easily read on a single, large page (e.g., the Staffing Plan).
- A single electronic page in 11" x 17" format will be counted as two pages where page limitations apply.
- Items such as a Title Page, Table of Contents, Cover Letter, List of Figures, and Acronym Lists are excluded from the page counts below, unless they are included in a document (e.g., a Table of Contents within the Transition-In Plan), in which case it would count toward the stated page limitations.
- PDF files will be allowed for executed documents such as Letters of Commitment.

Any pages submitted beyond the page limitations will be removed and not evaluated.

Offerors shall safeguard Federal Government classified information. The systems and processes used to conduct this procurement are not approved for the processing of classified information. It is the offeror's responsibility to ensure that the proposal documents submitted do not result in unauthorized dissemination of classified information. Classified information is not requested by this TOR and the submission of offers that include classified information is prohibited in response to this TOR. Any offer that includes classified information or creates classified compilations by data aggregation will be eliminated from the competition and will not be considered for award.

L.5 SUBMISSION OF THE WRITTEN PRICE PROPOSAL (PART III)

The offeror shall fully support all proposed prices. The offeror's proposal is presumed to represent the offeror's best efforts in response to the solicitation. Any inconsistency, whether real or apparent, between promised performance and price, shall be explained in the proposal.

Written Price proposals shall be submitted electronically via the method indicated in the email. The offeror shall submit all proposed prices using MS Excel software, utilizing the formats without cells locked and including all formulas.

The offeror shall not include any price data in Parts I & II of the proposal.

L.5.1 WRITTEN PRICE PROPOSAL

Part III contains the Written Price Proposal information. The offeror shall provide a Cover Letter that identifies a POC, Unique Entity ID (UEI) (generated by SAM.gov), CAGE code, and master contract number. This volume shall contain the following:

a. Contract Registration
b. Provision Representations

c. Business Systems (Approved Purchasing Systems, and any other systems as applicable to this requirement)
d. ~~Solicitation, Offer and Award (Standard Form SF 33)~~
e. OCI Statement and NDA
f. Section B – Supplies or Services and Prices. Do not include price for six-month extension period authorized by FAR clause 52.217-8.
g. Price Supporting Documentation
h. Subcontractor Supporting Documentation
i. Price Assumptions

L.5.1.1 CONTRACT REGISTRATION

The offeror shall submit a statement that the contract under which this proposal is being submitted has been registered in ASSIST and that all information in ASSIST is up to date. ASSIST can be accessed by visiting the following webpage:

assist.gsa.gov/assist-web/registration/contractor/search

L.5.1.2 PROVISION REPRESENTATIONS

The offeror shall respond in accordance with the provisions in FAR 52.240-90 (Nov 2025) (Deviation) under Section K.

The offeror shall complete and provide the remainder of FAR 52.227-15(b), Representation of Limited Rights Data and Restricted Computer Software.

L.5.1.3 BUSINESS SYSTEMS

a. The offeror shall describe all applicable business systems (Accounting, Estimating, and Purchasing).
b. The offeror shall describe if the systems have been audited by a Federal agency. If yes, the description shall specifically include the date of the last purchasing system audit conducted by the cognizant Federal agency (e.g., DCAA or DCMA), a copy of the results of the audit, audit report numbers, and date for the approved purchasing system. This shall include verification in a form acceptable to the Government of the currently determined adequate and approved system (e.g., copy of most recent Government purchasing system approval).
c. The offeror shall include the name, office, email, and phone number of its cognizant DCAA/Government audit agency and DCMA/Government Administrative Contracting Officers (ACO) who are responsible for any purchasing system reviews of the contractor.

L.5.1.4 NOTICE OF NIST SP 800-171 DOD ASSESSMENT REQUIREMENTS

Not Applicable

L.5.1.5 SOLICITATION, OFFER AND AWARD (SF 33)

Not Applicable

~~When completed and signed by the offeror, SF 33, "Solicitation, Offer and Award," constitutes the offeror's acceptance of the terms and conditions of the proposed TO. Therefore, the form must be executed by representatives of the offeror authorized to commit the offeror to contractual obligations. The offeror shall sign the SF 33 in Block 17.~~

~~The authorized negotiator or the signatory of the SF 33 will be notified of the date and time of the Oral Question and Answer (Q&A) session. The offeror shall provide the name of the individual(s), the position title, telephone number, and email address of that individual(s).~~

L.5.1.6 ORGANIZATIONAL CONFLICT OF INTEREST (OCI) STATEMENT AND NON-DISCLOSURE AGREEMENT (NDA)

The offeror and each subcontractor, consultant, and teaming partner involved in proposal development shall complete and sign an OCI Statement**, Attachment P**. The offeror shall represent either that (1) it is not aware of any facts which create any actual or potential OCI relating to the award of this contract, or (2) it has included information in its proposal, providing all current information bearing on the existence of any actual or potential OCI. The offeror shall provide a copy of any existing mitigation plan from the relevant awarded contract(s). If an existing mitigation plan does not exist, and the offeror with an actual or potential OCI believes the conflict can be avoided, neutralized, or mitigated, the offeror shall submit a new mitigation plan to the Government for review.

In addition to the mitigation plan, the AAS CO may require further information from the offeror. The AAS CO will use all information submitted by the offeror, and any other relevant information known to GSA, to determine whether an award to the offeror may take place, and whether the mitigation plan adequately avoids, neutralizes, or mitigates the OCI. If any such conflict of interest is found to exist, the AAS CO may determine that the conflict cannot be avoided, neutralized, mitigated, or otherwise resolved to the satisfaction of the Government, and the offeror may be found ineligible for award. Alternatively, the AAS CO may determine that it is otherwise in the best interest of the U.S. to contract with the offeror and include the appropriate provisions to avoid, neutralize, mitigate, or waive such conflict in the contract awarded.

If the offeror enters into an NDA with *any other contractor*, the offeror may include the signed agreement in their offer.

L.5.1.7 SECTION B – SUPPLIES OR SERVICES AND PRICES

The offeror shall indicate the price to be charged for each item in **Section B** rounded to the nearest whole dollar.

L.5.1.8 PRICE SUPPORTING DOCUMENTATION

The price supporting documentation is required to enable the Government to perform price analysis. The offeror shall provide the following price supporting documentation:

a. Summary schedule (Section B) which provides the total NTE amount for each CLIN and the total NTE price offered. All proposed, allowable indirect rates shall be notated within the price proposal and a copy of existing Defense Contract Audit Agency (DCAA) forward-pricing rate approval(s) or forward-pricing rate recommendation(s) for such indirect rates shall be provided. In the absence of forward-pricing rate approval(s) or recommendation(s) the contractor shall include support for indirect rates proposed (e.g., historical indirect rates for the last three years inclusive of appropriate explanations for any major increases and/or decreases in the rates between years or from the rates proposed). The Government provided NTE values are inclusive of any applicable indirect rates..
b. Full back-up documentation (e.g., historical invoices) for the Labor CLINs for each period of performance and each task area using the provided Price Excel Workbook **(Section J, Attachment R)**. The back-up documentation shall detail the labor categories to be used, labor hours proposed by category, and hourly rate for each category.
c. The offeror shall identify the discounts offered by the offeror and/or the offeror's teaming partner(s) or subcontractor(s), if applicable.
d. The offeror shall also include a crosswalk of its labor categories to the master contract.

L.5.1.9 SUBCONTRACTOR SUPPORTING DOCUMENTATION

The offeror shall also provide supporting price documentation for all proposed subcontractors, including:

a. The proposed type of subcontract, the rationale and/or justification for this type of subcontract type, and how the fee will be determined and paid.
b. A narrative detailing the processes used to evaluate the subcontracts it is proposing, including price analysis conducted as appropriate for each subcontract.
c. T&M: The labor rate, the level of effort, and supporting documentation to substantiate the proposed labor rates are required for the T&M amount. Supporting documentation could include past invoices, GSA Schedule price lists, or other applicable information.

Failure to provide complete supporting documentation may result in no further consideration of the offeror's proposal. **Unpriced subcontractors <u>are not</u> permitted under the Labor CLINs. Failure to provide a price for each proposed subcontractor under the Labor CLINs may result in no further consideration of the offeror's proposal.**

L.5.1.10 PRICE ASSUMPTIONS

The offeror shall submit all (if any) assumptions upon which the Written Price Proposal is based.

L.5.2.1 PASS/FAIL ELEMENTS

A failure on any single Pass/Fail criteria will make the proposal ineligible for award, with no further evaluation of the Written Technical Proposal (Part I) accomplished by the Government. At the time of proposal Part I submission, the offeror shall provide:

a. Named Key Personnel: Each proposed Key Person shall be named. The offeror shall provide a list of Key Personnel, position titles, and names (Section H.3.8 and any additional proposed Key Personnel titles and names. This list shall be consistent with the information provided in the Staffing Plan, and Key Personnel Qualification Matrix (KPQM) **Attachment T** in the Written Technical Proposal. A proposal that states, "To Be Determined" (TBD) for a proposed Key Person, or omits a Key Person, will be rejected by the Government.
b. Letters of Commitment: The offeror shall provide a Letter of Commitment **Attachment U** for each proposed Key Person. To meet this Pass/Fail criterion, the letter shall be signed by the proposed Key Person and shall state that (1) the proposed Key Person named is employed by the offeror or subcontractor, or has an offer of employment from the offeror or subcontractor that the Key Person intends to accept in the event of an award being made to the offeror; and (2) the proposed Key Person is available and committed to begin work on the Program Start date designated in Section L.3.
c. Section 508 Compliance: The offeror shall include a statement indicating its capability to comply with Section 508 requirements throughout its performance of this TO in compliance with Section H.15.
d. Required Certifications: The offeror shall provide evidence that it possesses the required certifications in compliance with Section H.6.1-H.6.2 including *(specify certifications (e.g.,* International Organization for Standardization (ISO) 9001:2008, Capability Maturity Model Integration (CMMI) Maturity Level).
e. Awardee of the Master Contract: The offeror shall demonstrate that it is an awardee of the master contract by providing the appropriate documentation (e.g., a copy of the master contract award or proof of Government-approved novation).

L.6 SUBMISSION OF THE WRITTEN TECHNICAL PROPOSAL (PART I & II)

Each offeror shall submit all information described in the following paragraphs. The Written Technical Proposal parts shall be submitted electronically via the method indicated in the solicitation.

Part I & II is the Written Technical Proposal and shall contain the following (page limitations, if applicable, are indicated in the parentheses following each item):

Phase 1:

h. Staffing Plan (1 page excel)
i. Staffing Rationale (limited to 3 pages)
j. KPQM (limited to 2 pages for each Key Personnel)
k. Technical Assumptions (if any)
l. Service Level Agreements (SLAs) and Performance Metrics (limited to 3 pages together)
m. Written Response to TOR addressing Factor 1 ONLY(limited to 12 pages for Part I)

Phase 2:

f. Draft Transition-In Plan (limited to 3 pages)
g. QMP (limited to 3 pages)
h. Vendor Supplier Chain Management Plan (see attachment E)
i. Corporate Experience Questionnaire (limited to 5 pages each corporate experience)
j. Written Response to TOR addressing Factor 2 (limited to 10 pages for Part II)

L.6.1 STAFFING PLAN

The offeror shall provide a Staffing Plan in accordance with the TOR, submissions shall contain all individuals that will be working on this effort. All Key Personnel proposed shall be identified in the Staffing Plan and available to begin work immediately on the Start Date indicated in Section L.3 General Information of this solicitation.

All non-Key Personnel shall meet the requirements of the labor category and skill level as defined in the offerors (8a) Stars III master contract. If the names of all non-Key Personnel are not known prior to offer submission, the offeror may indicate to be determined or TBD in the Staffing Plan. The names of non-Key Personnel are the only identifiers that may remain unspecified in the Staffing Plan. The offeror shall supply all requested information for all proposed personnel regardless of whether a name or TBD is provided. Information in the Staffing Plan provides a basis for the Government to determine the efficacy of the Staffing Plan in relation to the offeror's Technical Approach. All qualification sections of the proposed Staffing Plan shall be completed uniquely for each person or TBD role provided. The offeror shall only fill in qualifications the first time the name appears in the table.

The offeror shall include all proposed personnel in each performance period of the Staffing Plan, regardless of whether there are hours proposed for that person in that period to maintain consistency between each period of performance.

The offeror shall ensure there is consistency in the level of effort between the Staffing Plan provided in Part I and the Written Price Proposal provided in Part III, being cognizant of rounding issues. This includes providing level of effort information in the Price Excel Workbook in Part III (**Section J, Attachment R**) and the Staffing Plan in Part I in response to any optional or surge tasks for which the Government has provided an estimate in Section L.3.

L.6.1.1 STAFFING RATIONALE

The offeror shall provide a Staffing Rationale that explains how and why the proposed staffing presented in the Staffing Plan will accomplish the offeror's overall solution. The offeror shall describe its rationale for the proposed labor mix and level of effort to support each TOR task. The offeror shall also describe what factors drove its proposed labor mix, how its proposed staffing solution will accomplish the Government's objectives and requirements, and how its proposed staffing will be able to execute the offeror's Technical Approach and Management Approach.

L.6.2 KEY PERSONNEL QUALIFICATION MATRIX (KPQM)

The offeror shall submit a KPQM (**Section J, Attachment T)** for each Key Person proposed relating the specialized experience identified in Section H.3 of this TOR and the qualifications of

the person or persons being proposed for that position. For those additional Key Personnel proposed, the offeror shall identify the specialized experience and the corresponding qualifications for this experience. The offeror shall represent the following:

a. All Key Personnel meet the requirements of the *(8a)STARS III* Contract.
b. All Key Personnel meet the requirements of the TO. Within the KPQM, the offeror shall provide the date(s) of the proposed Key Personnel's most recent investigation ~~and Counterintelligence Scope Polygraph (CSP)~~, what type of investigation was completed (e.g., Single Scope Background Investigation (SSBI) or SSBI-Periodic Reinvestigation (SSBI-PR)/Continuous Evaluation), and which agency/agencies conducted the investigation and CSP. The offeror shall also indicate the required security clearance level in the Staffing Plan referenced in Section L.6.1of the TOR.

All Key Personnel requirements apply at the time of proposal submission, unless otherwise noted.

L.6.3 DRAFT TRANSITION-IN PLAN

The offeror shall provide a draft Transition-In Plan that aligns with the requirements in Section C. The offeror shall include in the draft Transition-In Plan an approach that provides for a seamless transition from the incumbent to the new contractor (hereafter referred to as the offeror).

The draft Transition-In Plan shall identify the roles and responsibilities of the offeror including proposed schedule(s) and milestones to ensure no disruption of service. The draft Transition-In Plan shall also identify and discuss the roles and responsibilities of the incumbent contractor and information expected from the incumbent. The offeror shall also identify any actions the offeror assumes are the responsibility of the Government.

Additionally, the Transition-In Plan shall include, at a minimum, the following information:

a. The offeror's transition methodology, process, and timelines.
b. The offeror's risk management methodology.
c. The offeror's identified technical, management, and staffing risks and proposed mitigation strategies to ensure continuity of support is maintained.
d. The offeror's knowledge transfer and training methodology.

L.6.4 TECHNICAL ASSUMPTIONS

The offeror shall identify and address any assumptions affecting the technical proposal citing the component(s) of the proposal to which they pertain. All technical assumptions and Basis of Estimate assumptions shall be included in the technical volume. This shall include any non- price information that serves as the basis of a price assumption identified in the offeror's Written Price Proposal.

The Government may reject any proposal that includes any assumption that adversely impacts the Government's requirements.

L.6.5 QUALITY MANAGEMENT PLAN (QMP)

The offeror shall identify its approach for ensuring quality in meeting the requirements of each Task Area of the TO (i.e., not just the corporate generic quality control process). The offeror shall describe its methodology and approach for determining and meeting performance measures identified in Section C.6.

The QMP shall contain at a minimum the following:

a. Performance monitoring methods.
b. Performance measures.
c. Approach to ensure that cost, performance, and schedule comply with task planning.
d. Methodology for continuous improvement of processes and procedures, including the identification of service metrics that can be tracked in the TO.
e. Government roles.
f. Contractor roles.

L.6.6 CORPORATE EXPERIENCE

The Corporate Experience information must be submitted in the format provided in Attachment V. The Government reserves the right to contact references and/or project owners to obtain additional clarifying information regarding project relevance or contractor performance

All projects shall be contracts or orders for the performance of actual technical requirements. Master contract vehicles (e.g., Blanket Purchase Agreements (BPAs), Indefinite Delivery/Indefinite Quantity (IDIQ) contracts) do not satisfy the Corporate Experience requirement unless submitted together with a TO similar in size, scope, and complexity to this requirement and awarded and performed under the vehicle. A master contract vehicle experience (with an underlying TO) counts as one of the required three Corporate Experience projects.

L.6.7 WRITTEN RESPONSE TO PERFORMANCE WORK STATEMENT (TOR)

The offeror shall detail the proposed Technical Approach to meet all requirements established in the solicitation TOR.

L.7 IN-PERSON ORAL TECHNICAL PROPOSAL PRESENTATION

NOT Applicable

L.8 WRITTEN TECHNICAL PROPOSAL TOPICS

The Written Technical Proposal shall include the following topics and be organized in the following order:

a. Factor 1:Technical Approach
b. Factor 2: Management Approach
c. Factor 3: Relevant Corporate Experience

L.8.1 TECHNICAL APPROACH (FACTOR 1)

The Offeror shall provide a written narrative not exceeding 12 pages containing a comprehensive, actionable technical approach detailing their strategy to meet the PWS requirements, demonstrating a deep understanding of the environment and ability to execute services with excellence.This is not a PWS reiteration.

The focus is on **Section C.4 Objectives**. Proposals must detail methodologies, tools, resources, and governance for:

1. **Current Operations and Change Management (Transition):** Seamless transition, knowledge transfer, staff augmentation, service level maintenance, and a robust, iterative change management framework (people, process, technology).
2. **Application Environments:** Management and maintenance of all environments (Dev, Test, UAT, Staging, Prod), including configuration management, synchronization, patching, version control, stability, and availability.
3. **Change Management (Process and Governance):** Explicitly define the Change Management process: flow, approvals, risk assessment, communication, tracking, scheduling, implementation, and verification, minimizing end-user impact and ensuring compliance.
4. **Application and system testing:** Demonstrate a comprehensive testing plan, incorporating automation, which encompasses**:**
    - Unit Testing
    - System Testing
    - Integration Testing
    - Performance Testing
    - User Acceptance Testing (UAT)
    - Regression Testing
5. **System Documentation:** Strategy for creation, maintenance, and storage of documentation (e.g., diagrams, SOPs, guides, disaster recovery plans), including standards, version control, accuracy, and accessibility.
6. **Release Management:** Present a mature, defined Release Management process: planning, scheduling, coordination, and control of all releases. Detail CI/CD, automated testing, rollback procedures, and the go/no-go process.
7. **Data and Database Management:** Comprehensive management: performance monitoring, optimization, security, backup/recovery, archiving, integrity checks, and expertise with existing technologies for high availability and compliance.
8. **AWS FAS Cloud Services Platform Management:** Demonstrate specialized expertise: cost optimization, IaC management, security configurations, utilization monitoring, capacity planning, and adherence to Government cloud governance.
9. **Problem Management and Defect Resolution:** Proactive/reactive approach: root cause

analysis, minimizing recurrence, and efficient defect lifecycle management (logging, prioritization, fixing, testing). Discuss KPIs for resolution time.

10. **User Training:** Strategy for developing and delivering effective training (modalities, content updates, assessment) for new features/changes.
11. **Regulatory and Minor Enhancements:** Process for flexible intake, prioritization, development, testing, and deployment of regulatory changes and minor system enhancements with rapid turnaround.
12. **Daily Operations:** Clear description of staffing, operational rhythm, monitoring tools for 24/7/365 coverage, high availability, service desk, incident management, routine maintenance, and escalation.
13. **Information (Security) Assurance:** Approach for maintaining/enhancing security posture: adherence to Federal mandates (FISMA, FedRAMP), patch management, vulnerability scanning, incident response, access control (Zero Trust), and continuous monitoring.

These elements are not subfactors and will not be individually rated but will be evaluated as a whole to arrive at the factor-level rating.

L.8.1.1 SERVICE LEVEL AGREEMENTS (SLAs) AND PERFORMANCE METRICS

The offeror shall discuss the following elements:

1. The offeror's proposed performance measures, metrics, and/or SLAs. Discuss why they were selected, the performance levels, and why it is important to measure the selected characteristic.
2. The offeror's process for determining main performance measurements for critical processes and how in total they represent a comprehensive measurement system to identify critical aspects of system and management performance. Illustrate how the team will provide the highest value for dollars spent to the Government.
3. The offeror's understanding of the link between identified performance metrics and achievement of the support objectives.
4. The offeror's approach to continuously improving performance, including identification of new/revised performance metrics and the innovative employment and management of SLAs as well as corrective actions for substandard performance.

L.8.2 MANAGEMENT APPROACH (FACTOR 2)

The offeror shall provide a written narrative not exceeding 10 pages addressing their Management Approach. If the offeror is proposing to use subcontractors, the Technical and Management Approach must address the roles and responsibilities of the prime contractor and each subcontractor including what tasks will be the responsibility of the prime contractor and the subcontractors to perform. There must be a thorough narrative on how the prime contractor and the subcontractors will relate to each other and with the Government to ensure that all requirements will be met. The prime contractor shall have overall responsibility for the

program management of the task order.

In addition to the above requirements, the offeror shall also identify and describe:

1. A draft Transition-In Plan that aligns with the requirements in C.4.2.1. The offeror shall include in the Draft Transition-In Plan an approach that provides for a seamless transition from the incumbent to the offeror (upon award). The draft Transition-In Plan shall identify the roles and responsibilities of the offeror including proposed schedule(s) and milestones to ensure no disruption of service. The draft Transition-In Plan shall also identify and discuss the roles and responsibilities of the incumbent contractor and information expected from the incumbent. The offeror shall also identify any actions the offeror assumes are the responsibility of the Government.
2. Risk management during the task order (to include the transition-in and any potential Organizational Conflict of Interest) and the planned actions to mitigate or eliminate risks.
3. Approach for providing program management and communication support, process management and control, program status and cost (including planned versus actual expenditures) reporting, Agile Execution and Staffing, Operations & Maintenance, Security and Compliance**,** Performance & Scalability, and Cloud Platform Management.
4. The degree of effectiveness and efficiency of the offeror's methodology to manage cost over the life of the task order and continually reduce O&M costs through innovation and automation.
5. The offeror's approach/ability to react to the client's requirements and the dynamics of a rapidly changing world and mission environment through dedicated resources, quick responses, and flexibility when determining information technology solutions.
6. The offeror's methodology, processes, and procedures for establishing and maintaining high quality in the performance of all tasks under the TO, including the QMP.

L.8.3 RELEVANT CORPORATE EXPERIENCE (FACTOR 3)

The offeror shall provide Relevant Corporate Experience for at least two (2) but no more than that three (3) awarded projects performed within the last five (5) years. At least two Relevant Corporate Experience references shall be the offeror's direct experience. If subcontractors are being proposed, no more than one (1) relevant corporate experience may be submitted for each proposed subcontractor in relation to the work that individual subcontractor is being proposed to perform under this task order. A subcontractor's relevant and recent project experience will only be evaluated if the subcontractor also provides a Letter of Commitment, signed by a company executive on company letterhead, stating the firm is committed to be a subcontractor, at time of award, on this project for the prime contractor submitting the response to the solicitation. The Government will not review any additional corporate experiences submitted in excess of the stated limitation, or any corporate experiences not within the stated timeframes. Providing less than three (3) total experiences may indicate to the Government a lack of relevant experiences

which may be considered by the Government during any best value tradeoff analysis.

Each must be similar in size, scope, and complexity to the requirements identified in the TOR.

The Corporate Experience information must be submitted in the format provided in Attachment T. The Government reserves the right to contact references and/or project owners to obtain additional clarifying information regarding project relevance or contractor performance.

All projects shall be contracts or orders for the performance of actual technical requirements. Master contract vehicles (e.g., Blanket Purchase Agreements (BPAs), Indefinite Delivery/Indefinite Quantity (IDIQ) contracts) do not satisfy the Corporate Experience requirement unless submitted together with a TO similar in size, scope, and complexity to this requirement and awarded and performed under the vehicle. A master contract vehicle experience (with an underlying TO) counts as one of the required three Corporate Experience projects.

There are no requirements in length of time for projects submitted; however, longer length of time will be measured more favorably.

L.9 SUBMISSION OF QUESTIONS

Offerors are requested to submit questions grouped by solicitation Section and make reference to the particular Section/Subsection number. Questions must be received before the date specified on the TOR for receipt of questions using the format in Section J, Attachment X. Questions or requests for extension submitted after the cut-off date may not be considered.

Any information given to a prospective offeror concerning this solicitation will be furnished promptly to other prospective offerors as an amendment to the solicitation.

L.10 DELIVERY INSTRUCTIONS

The offeror shall deliver written proposals to and receive acceptance from the address and individual identified in the TOR. Proposals not received by 11:00 a.m. Eastern Time (ET) on the date stated in the TOR will not be considered.

L.11 INFORM

IN DEPTH FEEDBACK THROUGH OPEN REPORTING METHODS (INFORM) PROCEDURES
A. Overview of the IN-depth Feedback through Open Reporting Methods (INFORM) Process

This solicitation is part of GSA's post award communication process called INFORM. The process is designed to enhance the quality and usefulness of post-award communications by providing greater transparency and openness into the procurement process. INFORM seeks to increase GSA-industry communication by providing clearer and more complete information to explain the award decision.

B. Detailed Description of the INFORM Process

B.1. Component 1 - Notification of Award

After award and in accordance with any post-award notification timeframes required by regulation,the contracting officer will issue written notices (e.g., Notification Letter and Evaluation Statement (NLES)) to the successful and unsuccessful offerors. The notices will contain:

- All information required by statute or regulation;
- An unredacted copy of the complete technical evaluation for that particular offeror that includes a full description of the unsuccessful offeror's strengths, weaknesses, risks, and deficiencies;
- An overall technical evaluation summary for that particular offeror and the successful offeror that includes evaluated price; overall technical ranking, rating, or score.

B.2. Component 2 - Request for Oral Feedback Meeting or Written Questions

Within three business days after receipt of notification, an offeror may, but is not required to:

- submit a written request to the contracting officer for an oral feedback meeting;
- submit a list of written questions to the contracting officer; or
- take no further action.

If the offeror timely elects to request an oral feedback meeting or submit a list of written questions, GSA will consider any such request to constitute a required debriefing. If an offeror does not request an oral feedback meeting or submit a list of written questions within the three day time period, the receipt of GSA's notification concludes the INFORM process and satisfies the FAR requirement for a debriefing.

If the offeror submits a list of written questions in lieu of the oral feedback meeting, the contracting officer will attempt to respond within five business days of receipt of the written questions. Unless otherwise stated, the contracting officer's response to the written questions will conclude the INFORM process and any corresponding post-award debriefing.

If the offeror requests an oral feedback meeting, the offeror should provide the following information:

- Primary point of contact;
- List of participants with titles (e.g., Senior Vice President);
- List of topics to assist GSA better prepare for the oral feedback meeting;

B.3. Component 3 - Oral Feedback Meeting

During the oral feedback meeting, GSA's objectives are to provide:

- Reasonable responses to written questions submitted by the offeror;
- Explanations for the evaluation conclusions and contract award decisions;
- Any additional information about the fairness and impartiality of the evaluation and why the award decision was rational;
- Reasonable responses to additional questions raised during the meeting;
- Additional transparency into the underlying competition process; and,
- A greater understanding of the evaluation and award process.

GSA will not provide any information that is prohibited by law or regulation.

M.1 METHOD OF AWARD

The Government anticipates awarding a TO to the offeror whose proposal is the most advantageous to the Government, price and other factors considered. Technical proposals will be evaluated based on the factors described in Section **M.6.** A price evaluation will only be done for offerors with a technical proposal receiving an overall technical rating of ACCEPTABLE or higher. The receipt of an evaluation rating of NOT ACCEPTABLE in any single factor **(this includes a NOT RELEVANT rating for Corporate Experience**) will result in the overall proposal being determined NOT ACCEPTABLE and, therefore, ineligible for award. All evaluation factors other than price, when combined, are significantly more important than price. Award may be made to the offeror whose proposal is determined to be the best value for the Government.

This acquisition is being conducted under FAR Subpart 16.5 (GSA Class Deviation RFO-2025-16). Principles and procedures of FAR Subpart 15.2 (GSA Class Deviation RFO-2025-15) do not apply. The Government intends to award initial proposals. The Government may do any or all of the following:

a. This is a task order award utilizing the streamlined procedures of FAR subpart 16.5 (GSA Class Deviation RFO-2025-16) wherein the contracting officer may exercise broad discretion in developing appropriate order placement procedures. Accordingly, also reserved to the Government is the right for the AAS CO, at the conclusion of the evaluation process and after the AAS CO has determined the Government's apparent best value awardee but prior to award, to negotiate exclusively with that proposed awardee on all aspects of that offeror's proposal that the AAS CO deems appropriate, including but not limited to technical and price issues, negotiating changes to specific proposal terms, in order to finalize terms of the order for award. If the AAS CO is unable to negotiate with that offeror to terms agreeable to the Government, then the AAS CO reserves the right to negotiate similarly with the offeror that was next-in-line to be the apparent best value awardee. Once the Government has begun communications with the next-in-line contractor, no further communications with the original apparent best value awardee offeror will be entertained until after the task order has been awarded. This process may continue with the offerors that submitted proposals until an award is made, or until a decision is made to reopen negotiations with all offerors, or until the AAS CO determines to make no award. Post-selection negotiations, if any, with the apparent best value awardee shall not constitute a competitive range determination and shall not otherwise entitle other offerors, if any, to an opportunity to revise proposals.
b. AAS does not incorporate proposals into any resultant award.

Proposals shall set forth full, accurate, and complete information as required by this solicitation package (including Attachments). The penalty for making false statements in proposals is prescribed in 18 U.S.C. 1001.

M.2 PASS/FAIL ELEMENTS

The Government will evaluate the following pass/fail elements. **A failure on any single Pass/Fail criteria will make the proposal ineligible for award, with no further evaluation of the technical and price proposal conducted by the Government.**

The following will be evaluated on a Pass/Fail basis:

a. The Government will reject any proposal that does not provide a name for each Key Person proposed at the proposal submission due date. A proposal that states, "To Be Determined" or TBD for a proposed Key Person, or omits a Key Person, will be rejected by the Government (Section L.5.2.1).
b. The Government will reject any proposal that does not provide a Letter of Commitment, signed by each proposed Key Person at the proposal submission due date (Section L.5.2.1).
c. The Government will reject any proposal that does not provide a Section 508 Compliance Statement (Section H.15).
d. The Government will reject any proposal that does not provide evidence of the required certifications in compliance with Section H 6.1 through H6.2 including *e.g., ISO 9001:2008, CMMI Maturity Level*
e. The Government will reject any proposal where the offeror does not provide the appropriate documentation to represent that it is an awardee of the GSA master Contract (Section L.2).

M.3 PRICE PROPOSAL EVALUATION

The offeror's price proposal (Section **L.5.1.10**, Part III) will be evaluated to assess for price reasonableness. The six-month extension period, authorized by FAR 52.217-8, will not be included in the total proposed price; however, it will be evaluated to ensure that the option is available for the unilateral exercise of the Government should an extension become necessary. The offeror shall not propose a price for the six-month extension. The Government will determine the "rate specified in the contract" referred to in FAR 52.217-8 by dividing the total value of the final option period by the total number of months in the final option period to arrive at a calculated month amount. The CAF is not included in the price evaluation.

The Government may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between the periods of performance (e.g., total per each period of performance of all CLINs combined). Unbalanced pricing exists when, despite an acceptable total evaluated price, the total price of one or more periods of performance is significantly overstated or understated as indicated by the application of price analysis techniques. A proposal may be rejected if the Contracting Officer determines that the lack of balance poses an unacceptable risk to the Government.

M.3.1 STAFFING AND PRICE PROPOSAL INCONSISTENCIES

The Government reserves the right to reject as unacceptable any price proposal with inconsistencies between the Staffing Plan and the price proposal (e.g., personnel, labor

categories, level of effort, or hours for specific tasks) that are so significant they materially impact the Government's ability to evaluate the proposal.

M.4 ORGANIZATIONAL CONFLICT OF INTEREST (OCI)

OCI Statement will be evaluated to assess whether or not an actual or potential OCI exists as defined by FAR Subpart 9.5 (GSA Class Deviation RFO-2025-09). If an actual or potential OCI is identified that cannot be mitigated, avoided, or neutralized in accordance with FAR Subpart 9.5 (GSA Class Deviation RFO-2025-09), that offeror may be ineligible for award.

M.5 PRICE ASSUMPTIONS

The Government may reject any proposal that includes any price assumptions that may adversely impact satisfying the Government's requirements. The Government does not intend to incorporate proposals into any resultant award; any assumption to that effect will be rejected.

M.5.1 OVERTIME AND EXTENDED BILLING HOUR PRACTICES

The Government may reject any proposal that includes overtime or extended hours billing practices that adversely impact or affect the Government's requirements.

M.6 TECHNICAL EVALUATION FACTORS

The Government will evaluate technical proposals (Section L.8, parts I and II based on the following factors:

Factor 1:Technical Approach.

Factor 2: Management Approach

Factor 3: Relevant Corporate Experience

The technical proposal evaluation factors are listed in descending order of importance. The three technical factors combined are significantly more important than price. The Government will combine the results of all the written submissions, including the Q&A responses, to arrive at a rating for the technical evaluation factors as a whole. The receipt of an evaluation rating of NOT ACCEPTABLE in any single factor (**this includes a NOT RELEVANT rating for Corporate Experience**) will result in the overall proposal being determined NOT ACCEPTABLE and, therefore, ineligible for award.

METHODOLOGY. For this acquisition, the term "methodology" is defined as the system of practices, techniques, procedures, and rules as required by this TO. This definition is based on the Program Management Institute (PMI) Program Management Body of Knowledge (PMBOK). For the avoidance of doubt, the Government is seeking a coherent discussion of how the offeror proposes to meet its requirements, rather than a mere restatement of the requirements or a mere listing of what it proposes to do. The latter will not be deemed to constitute a methodology.

M.6.1 TECHNICAL ASSUMPTIONS

Offeror assumptions will be reviewed in the context of the technical factor to which they apply. The Government may reject any proposal that includes any assumption that may adversely impact satisfying the Government's requirements.

M.6.1 FACTOR 1: TECHNICAL APPROACH

The Government will evaluate the Technical Approach factor based on the clarity and completeness of the approach and the degree to which the proposal meets the requirements of the TOR Section L.8 - 8.3 and includes innovative and efficient methodologies.

The following are not subfactors and will not be individually rated but will be evaluated as a whole to arrive at the factor-level rating.

1. **Current Operations and Change Management (Transition):** Seamless transition, knowledge transfer, staff augmentation, service level maintenance, and a robust, iterative change management framework (people, process, technology).
2. **Application Environments:** Management and maintenance of all environments (Dev, Test, UAT, Staging, Prod), including configuration management, synchronization, patching, version control, stability, and availability.
3. **Change Management (Process and Governance):** Explicitly define the Change Management process: flow, approvals, risk assessment, communication, tracking, scheduling, implementation, and verification, minimizing end-user impact and ensuring compliance.
4. **Application and system testing:** Demonstrate a comprehensive testing plan, incorporating automation, which encompasses**:**
    - Unit Testing
    - Integration Testing
    - Performance Testing
    - User Acceptance Testing (UAT)
    - Regression Testing
5. **System Documentation:** Strategy for creation, maintenance, and storage of documentation (e.g., diagrams, SOPs, guides, disaster recovery plans), including standards, version control, accuracy, and accessibility.
6. **Release Management:** Present a mature, defined Release Management process: planning, scheduling, coordination, and control of all releases. Detail CI/CD, automated testing, rollback procedures, and the go/no-go process.
7. **Data and Database Management:** Comprehensive management: performance monitoring, optimization, security, backup/recovery, archiving, integrity checks, and expertise with existing technologies for high availability and compliance.
8. **AWS FAS Cloud Services Platform Management:** Demonstrate specialized expertise: cost optimization, IaC management, security configurations, utilization monitoring,

capacity planning, and adherence to Government cloud governance.

9. **Problem Management and Defect Resolution:** Proactive/reactive approach: root cause analysis, minimizing recurrence, and efficient defect lifecycle management (logging, prioritization, fixing, testing). Discuss KPIs for resolution time.
10. **User Training:** Strategy for developing and delivering effective training (modalities, content updates, assessment) for new features/changes.
11. **Regulatory and Minor Enhancements:** Process for flexible intake, prioritization, development, testing, and deployment of regulatory changes and minor system enhancements with rapid turnaround.
12. **Daily Operations:** Clear description of staffing, operational rhythm, monitoring tools for 24/7/365 coverage, high availability, service desk, incident management, routine maintenance, and escalation.
13. **Information (Security) Assurance:** Approach for maintaining/enhancing security posture: adherence to Federal mandates (FISMA, FedRAMP), patch management, vulnerability scanning, incident response, access control (Zero Trust), and continuous monitoring.

Ratings and Definitions:

Adjectival Rating	Description
EXCELLENT	A high-quality proposal that meets all requirements, may exceed some or many requirements, and shows a thorough understanding of the requirements. The risk of unsuccessful performance is very low. .
GOOD	A quality proposal that meets all requirements, exceeds some requirements, and shows a sound understanding of the requirements. The risk of unsuccessful performance is low to moderate.
ACCEPTABLE	An adequate proposal that meets all requirements and shows some understanding of the requirements. The risk of unsuccessful performance is moderate.
UNACCEPTABLE	A low-quality proposal that fails to meet the requirements and shows little to no understanding of the requirements. The risk of unsuccessful performance is high. There may be few, if any, strengths.

M.6.2 FACTOR 2: MANAGEMENT APPROACH

The Management Approach will be evaluated to assess the degree to which it reflects an effective, efficient, feasible, and practical level of understanding of the operating environment in accomplishing the tasks and deliverables of this TO from a management perspective, in particular those areas described in Section L.8.2, with minimal risk, and innovative and cost-effective ideas.

The following are not sub-factors and will not be separately rated. The offeror's Management Approach will be evaluated based on the degree to which it reflects:

a. A draft Transition-In Plan that aligns with the requirements in C.4.2.1. The offeror shall include in the Draft Transition-In Plan an approach that provides for a seamless transition from the incumbent to the offeror (upon award). The draft Transition-In Plan shall identify the roles and responsibilities of the offeror including proposed schedule(s) and milestones to ensure no disruption of service. The draft Transition-In Plan shall also identify and discuss the roles and responsibilities of the incumbent contractor and information expected from the incumbent. The offeror shall also identify any actions the offeror assumes are the responsibility of the Government.
b. Risk management during the task order (to include the transition-in and any potential Organizational Conflict of Interest) and the planned actions to mitigate or eliminate risks.
c. Approach for providing program management and communication support, process management and control, program status and cost (including planned versus actual expenditures) reporting, Agile Execution and Staffing, Operations & Maintenance, Security and Compliance**,** Performance & Scalability, and Cloud Platform Management.
d. The degree of effectiveness and efficiency of the offeror's methodology to manage cost over the life of the task order and continually reduce O&M costs through innovation and automation.
e. The offeror's approach/ability to react to the client's requirements and the dynamics of a rapidly changing world and mission environment through dedicated resources, quick responses, and flexibility when determining information technology solutions.
f. The offeror's methodology, processes, and procedures for establishing and maintaining high quality in the performance of all tasks under the TO, including the QMP.

Ratings and Definitions:

Adjectival Rating	Description
EXCELLENT	A high-quality proposal that meets all requirements, may exceed some or many requirements, and shows a thorough understanding of the requirements. The risk of unsuccessful performance is very low. .
GOOD	A quality proposal that meets all requirements, exceeds some requirements, and shows a sound understanding of the requirements. The risk of unsuccessful performance is low to moderate.
ACCEPTABLE	An adequate proposal that meets all requirements and shows some understanding of the requirements. The risk of unsuccessful performance is moderate.

UNACCEPTABLE	A low-quality proposal that fails to meet the requirements and shows little to no understanding of the requirements. The risk of unsuccessful performance is high. There may be few, if any, strengths.

M.6.3 FACTOR 3: RELEVANT CORPORATE EXPERIENCE

The Government will evaluate the Relevant Corporate Experience factor based on the offeror's responses to Section L.8.3. Projects will be evaluated on the relevance, clarity, and completeness in demonstrating successful projects of similar size, scope, and complexity as compared to the work to be performed by each applicable contractor. The Government will not review any additional corporate experiences submitted in excess of the stated limitations. Providing less than three (3) experiences may indicate to the Government a lack of relevant experiences, which may be considered by the Government during any best value tradeoff analysis. There are no requirements in length of time for projects submitted; however, longer length of time will be measured more favorably.

Relevance Rating	**Description**
RELEVANT	Each of the provided Corporate Experience efforts are similar in size, scope, and complexity to the solicitation requirements.
NOT RELEVANT	At least one of the provided Corporate Experience efforts is not similar in size, scope, or complexity to the solicitation requirements or there was a failure to meet a solicitation requirement called for in the Corporate Experience Section in L.8.3.

The Government will evaluate Corporate Experience provided from both the prime contractor and any subcontractors equally.
