9.15. Travel 54
9.16. Employee Accountability and Workforce Continuity 55
9.17. Contractor Professionalism and Conduct 56
9.18. Freedom Of Information Act (FOIA) 56
9.19. Controlled Unclassified Information (CUI) 57
9.20. Privacy Act Compliance 57
9.21. Records Management 58
9.22. Safety Concerns 58
9.23. Inherently Governmental Functions 58
9.24. Ethics 58
9.25. Professional Appearance Of Workspace 58

9.26. Workplace Conduct 59
9.27. Traffic Laws and Regulations 59
9.28. Weapons, Firearms, and Ammunition 59

SECTION I - Background

1. Background

1.1. General. The Air Force Office of Special Investigations (AFOSI) provides special investigative services for the protection of Air and Space Force's resources, personnel, and operations. The agency's mission prioritizes the exploitation of counterintelligence activities for force protection, solving violent crimes that impact U. S. Forces, combatting threats to DoW's information systems and technologies, and deterring acquisition fraud. AFOSI produces investigative and counterintelligence records, which are used in the prosecution of these cases and are critical to the success of the Air and Space Force missions.

1.2. Purpose. The Directorate of Information Technology Services and Solutions (XT) is responsible for IT maintenance, user support, cybersecurity and software development for over 3,500 personnel across 300+ locations worldwide. AFOSI XT serves as the global communications focal point for all AFOSI members.

The purpose of this contract is to establish a comprehensive framework for delivering high-quality information technology support and solutions tailored to optimize the operational efficiency and functionality of AFOSI. This contract will provide a range of IT services encompassing system maintenance, sustainment, network operations, cloud operations, cybersecurity, software implementation and development, service desk support and end-user assistance services. AFOSI seeks to ensure seamless technological operations, mitigate risks, foster innovation, and enable scalability, thereby empowering AFOSI to focus on its core objectives of law enforcement and counterintelligence.

1.3. Scope. The contractor shall provide all necessary managerial, personnel, expertise, and non-personal services necessary to perform enterprise-wide IT support as defined in this PWS and in accordance with (IAW) applicable AFOSI, Department of the Air Force (DAF), Department of War (DoW) and Intelligence Community Directive (ICD) policies, processes, and regulations.

This support encompasses all technical services required to support the following domains:

- Non-secure Internet Protocol Router Network (NIPRNet)
- The Secure Internet Protocol Router Network (SIPRNet)
- Air Force Sensitive Compartmented Information (AFSCI) Network
- Special Access Program Network (SAPnet)
- Testing Integration Center/Development (TIC/DEV)

The Contractor should have experience performing desired tasks in on premise and cloud environments. AFOSI utilizes the AFNet on the NIPRNet and the AFSCI network for JWICS connectivity. The Contractor is responsible for supporting and assisting with all systems, applications, peripheral components, data, and system migrations (both on

premise to cloud and cloud to on premise). The Contractor should also have experience with Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS) system models.

Additional details about the scope of the AFOSI environments are:

NIPR Environment. AFOSI participates in the larger DAF AFNet and therefore we do not manage our own complete domain. The M365 environment on AFNet is operated and managed by 16AF. There are approximately 900 end-user devices at RKB. There are approximately 60 virtual servers managed by AFOSI in the RKB, hosted on 10 physical Dell servers. Network equipment across the entire environment (RKB plus field units not directly supported by 16AF) consists of approximately 40 switches and 40 routers, all Cisco. Other RKB networking equipment is provided by the ITCSU.

SIPR Environment. AFOSI manages our own SIPR domain and therefore responsible for all Active Directory components of this network. The M365 environment on AFOSI SIPR is operated and managed by DISA. There are approximately 700 end-user devices at RKB. There are approximately 57 SIPR virtual servers managed by AFOSI in the RKB, hosted on 2 physical servers and approximately 14 SIPR virtual servers managed by AFOSI at the AFOSI CFPs hosted on 4 physical servers. Network equipment across the entire environment (RKB plus field units) consists of approximately 75 switches and 120 routers, all Cisco. Other RKB networking equipment is provided by the ITCSU.

SAP Environment. AFOSI manages our own SAP domain and therefore responsible for all Active Directory components of this network. This network is limited to less than 150 desktops/user located at the RKB and several field locations. There are less than 10 servers on this network. Network equipment across the entire environment consists of less than a dozen each switches and routers, all Cisco. Other RKB networking equipment is provided by the ITCSU.

AFSCI Environment. AFOSI participates in the larger DAF AFSCI network and therefore we do not manage our own complete domain. There are approximately 200 desktops and 1 file/backup server in the RKB assigned to this network. AFOSI does not manage any of the underlying network infrastructure. Other RKB networking equipment is provided by the ITCSU.

1.4. Non-Personal Services. This solicitation is for a Non-Personal Services Information Technology (IT) support contract. The Government shall not supervise or task Contractor employees in any manner that generates actions of the nature of personal services, or that creates the perception of such services. It is the responsibility of the Contractor to manage its employees directly and to strictly avoid any actions that constitute, or are perceived to constitute, personal services. If the Contractor believes any Government action constitutes personal services, they must notify the Contracting Officer (CO) immediately.

Contractor personnel shall not perform any of the following duties or tasks:

- Binding the United States to take action
- Determining agency policy

- Determining agency budget priorities
- Directing and controlling federal employees
- Hiring or firing federal employees
- Approving position descriptions
- Determining performance standards for federal employees
- Conducting performance evaluations of federal employees
- Selecting sources for contract award
- Approving contract modifications
- Ordering or executing the payment of government funds
- Accepting or rejecting goods or services on behalf of the government
- Determining what supplies or services are to be acquired
- Participating as a voting member on a source selection board
- Approving federal regulations
- Commanding military forces or conducting foreign relations

1.5. Operating Locations. Support is executed via six primary operating locations:

- Headquarters (HQ): MCB Quantico, VA (Supported by this contract for HQ and the National Capital Region).
- Operating Location E (OL-E): Joint Base San Antonio - Randolph AFB, TX.
- Operating Location AD (OL-AD): Ramstein AB, Germany.
- Operating Location AE (OL-AE): Yokota AB, Japan.
- Operating Location C (OL-C): Joint Base Langley-Eustis - Langley AFB, VA.
- Operating Location AO (OL-AO): Federal Law Enforcement Training Center, Glynco, GA.

Note: Operating locations outside of HQ Quantico are supported by Government civilians and military personnel; however, contractor personnel will be required to assist the personnel in those locations as needed regarding services hosted at or managed by RKB government personnel.

1.6. External Coordination. The United States Navy's Information Technology Common Services Unit (ITCSU) maintains primary responsibility for ingress and egress network traffic crossing the Quantico perimeter boundary. Therefore, regular and ongoing coordination between ITCSU and AFOSI HQ/XT personnel is a mandatory requirement. Additionally, as AFOSI is co-located with other law enforcement and intelligence agencies, the Contractor shall coordinate with these agencies for joint efforts as required.

SECTION II – Task Descriptions

2. Task Descriptions

2.1. Task Summary. The Contractor shall provide a variety of services and perform various tasks associated with the delivery of information technology solutions to AFOSI. A description of these tasks, the qualifications and experience required by personnel performing those tasks, estimated and anticipated workloads, and performance standards are included below. A description of the deliverables associated with each task can be found in Section VII.

2.2. DAF 365 Support. The Contractor shall provide comprehensive technical support for Department of the Air Force 365 (DAF365) SharePoint environments across both classified and unclassified domains. This support encompasses the full lifecycle management of site architecture, including the creation, configuration, and maintenance of lists, document libraries, and site collections in accordance with DAF governance and security policies.

The Contractor shall provide end-to-end development and sustainment of Microsoft Power Platform solutions. This includes designing and maintaining automated workflows via Power Automate, developing custom business applications via Power Apps, and creating data visualization dashboards via Power BI. The Contractor shall serve as the primary technical interface for stakeholders, providing customer support, requirements gathering, and troubleshooting to ensure mission-critical information accessibility and process efficiency.

2.2.1. Qualifications, Certifications, Education & Experience

The Contractor shall provide personnel who meet the following certification, security, and technical experience requirements prior to the commencement of work.

Qualifications. To successfully execute the deliverables defined in the PWS, personnel must demonstrate proficiency in the following areas:

- Expertise in managing Site Collections, Sites, and Hubs.
- Proficiency in configuring unique permissions and managing access control groups in accordance with Zero Trust principles.
- Experience resolving sync issues and managing storage quotas.
- Requires working knowledge of Entra ID, Akami Global Content Delivery System (GCDS), and Okta Verify to assist in troubleshooting. Direct administration of these systems is not required as they are managed by AFNET.
- Advanced knowledge of cloud flows, including the use of OData filter queries, loops, error handling, and connecting to both standard and custom connectors.

- Ability to design Canvas Apps and Model-Driven Apps with intuitive UI/UX. Proficiency in Power Fx formulas for logic and data manipulation.
- Proficiency in DAX (Data Analysis Expressions) for creating measures and calculated columns. Experience in data modeling (Star Schema) and cleaning data using Power Query.
- Ability to integrate SharePoint lists as data sources for Power Apps and Power BI.
- Understanding of JSON (JavaScript Object Notation) for parsing API outputs within Power Automate.
- Familiarity with the limitations and governance nuances of the Government Community Cloud (GCC/GCC High) environments compared to commercial tenants.
- Personnel must possess and maintain an active Top Secret security clearance at the time of proposal submission to support classified environment requirements.

Certifications

- Microsoft Certified: Power Platform Functional Consultant Associate (PL-200) (Preferred but not required)
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) (Preferred but not required)
- Microsoft Certified: PL-900 (Preferred but not required)
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of experience in SharePoint Site Collection Administration and Microsoft Power Platform development.

2.3. Appian Support

The Contractor shall augment existing development support for AFOSI Appian environments across both classified and unclassified domains. This support encompasses the planning, configuration, development, and maintenance of sites, interfaces, records, components, and other Appian objects.

This includes designing and maintaining workflows via the Appian Process Modeler, developing custom user interfaces via the Interface Designer, and creating data visualization dashboards via Appian Reports and Records. It is estimated that 3,824 annual labor hours will be required to complete the tasks above and to serve as a

technical interface for stakeholders, providing customer support, requirements gathering, and troubleshooting to ensure mission-critical information accessibility and process efficiency.

2.3.1. Qualifications, Certifications, Education & Experience

The Contractor shall provide personnel who meet the following certification, security, and technical experience requirements prior to the commencement of work.

Qualifications. Personnel must be proficient in the following areas of Appian development and integration:

- Possess advanced knowledge of process flow design, including the use of Smart Services, XOR/AND/OR gateways, sub-processes, and effective exception handling (e.g., timer events, error flows).
- Demonstrate the ability to design intuitive and effective user experiences (UI/UX) using the SAIL (Self-Assembling Interface Layer) framework. This includes creating dynamic interfaces that are responsive to both mobile and desktop views.
- Have proficiency in configuring and using Appian Records (Data Fabric), defining the relationships between different data entities, and creating grid and chart-based visualizations for command-level dashboards.
- Show the ability to design and manage relational database schemas in environments like SQL, MariaDB, or Oracle, and map them to Appian Custom Data Types (CDTs).
- Strong understanding of using JSON to parse outputs from Integration Objects and experience configuring Connected Systems via Web APIs.
- Be familiar with the specific limitations, governance, and nuances of developing within DoW IL5/IL6 environments, as they differ from standard commercial Appian instances.
- Understand and adhere to the standard that all deliverables (interfaces, reports, etc.) must meet 100% of their defined requirements with no critical defects upon final User Acceptance Testing (UAT).
- Be knowledgeable of and ensure all developed solutions adhere to 100% of Department of the Air Force (DAF) security and compliance standards, including the proper handling of CUI/PII and the implementation of row-level security.

Certifications

- Appian Certified Associate Developer (Preferred but not required)
- Appian Certified Senior Developer (Preferred but not required)
- Appian Certified Lead Developer (Preferred but not required)

- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of experience in Appian planning, developing, and delivering interfaces, processes, data models, and records.

2.4. Atlassian Support

The Contractor shall provide comprehensive technical support for AFOSI's Atlassian implementations (Jira Software, Jira Service Management, Confluence) across both classified and unclassified domains. This support encompasses full lifecycle management of the platform, including project creation, space management, plugin (app) vetting and configuration, and user access management in accordance with DAF governance and security policies.

The Contractor shall provide end-to-end configuration and sustainment of Atlassian workflows and schemes. This includes designing and maintaining complex Jira workflows (including validators, conditions, and post-functions), creating advanced Confluence templates and blueprints, and managing permissions schemes to ensure data segregation. The Contractor shall serve as the primary technical interface for stakeholders, providing customer support, requirements gathering, and troubleshooting to ensure mission-critical collaboration and tracking efficiency. We project that the successful completion of all required tasks will necessitate an estimate of 956 hours of labor per year.

2.4.1. Qualifications, Certifications, Education & Experience

The Contractor shall provide personnel who meet the following certification, security, and technical experience requirements prior to commencement of work. Personnel must demonstrate the following experience and training to successfully manage the Jira and Confluence platforms.

Qualifications

- Proven expertise in the end-to-end administration of Jira projects. This includes hands-on experience configuring all core components, such as Issue Types, Workflows, Screens, Fields, and Notification Schemes.
- Must be proficient in using JQL (Jira Query Language) to create complex filters and advanced reports. This knowledge is typically gained through hands-on practice and specialized Atlassian training.

- Demonstrated ability to manage and maintain Confluence instances, including the administration of Spaces, the creation and management of Templates, and the use of Macros.
- Hands-on experience using "Automation for Jira" to build rules that streamline business processes and reduce manual effort.
- A working knowledge of scripting tools (such as ScriptRunner for Jira) is required for developing advanced customizations and implementing complex workflow logic that goes beyond native capabilities. This implies familiarity with scripting principles and the Atlassian development environment.

Certifications

- Atlassian Certified Associate - Confluence Essentials (Preferred but not required)
- Atlassian Certified Professional - Managing Jira Projects (ACP-620) (Preferred but not required)
- Atlassian Certified Professional - Jira Administrator for Cloud (ACP-120) (Preferred but not required)
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of hands-on experience as a Jira Administrator or Project Lead, specifically demonstrating the ability to design custom workflows that utilize conditions, validators, and post-functions. Must be proficient in configuring boards and permissions, as well as building Confluence spaces using macros and templates.

2.5. Hyland OnBase Support

The Contractor shall provide comprehensive technical support for AFOSI's Hyland OnBase environments across both classified and unclassified domains. This support encompasses the administration and maintenance of the Enterprise Content Management (ECM) platform, including Disk Groups, Document Types, Keyword configurations, and Client (Unity/Web) deployment.

The Contractor shall provide end-to-end development and sustainment of OnBase solutions. This includes designing and maintaining Unity Forms, configuring Workflow logic (timers, rules, actions), and managing Document Import Processors (DIP). The Contractor shall serve as the primary technical interface for stakeholders, facilitating the digitization of manual processes and ensuring the integrity of stored records. We project that the successful completion of all required tasks will

necessitate an estimate of 956 hours of labor per year.

2.5.1. Qualifications, Certifications, Education & Experience

Personnel must demonstrate the following education and experience to successfully configure, develop, and integrate within the OnBase environment:

Qualifications

- Proven expertise in configuring core OnBase components, including Document Types, Keyword Types, and Auto-Fill Keyword Sets.
- Demonstrated proficiency in managing Disk Groups and ensuring the integrity of storage volumes within OnBase.
- Hands-on experience with configuring and troubleshooting the OnBase Unity Client and Web Server environments.
- Ability to design and implement complex Workflow Life Cycles, incorporating System Work, Timers, and Notification features.
- Proficiency in designing sophisticated Unity Forms, including the application of custom logic, data validation, and dynamic visibility settings.
- Experience with OnBase Application Enabler or Workview (Case Management) solutions.
- Capability to configure DIP (Document Import Processor) and COLD/ERM for automated data ingestion into OnBase.
- Familiarity with SQL for effectively querying the OnBase database for reporting needs and troubleshooting activities.

Certifications (Preferred but not required)

- OnBase Administrator Series (Preferred but not required)
- OnBase Workflow Administrator Series (Preferred, not required)
- Hyland Certified Developer Specialist (HCDS) Series (Preferred, not required)
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of hands-on experience as a Hyland OnBase System Administrator, specifically demonstrating the ability to design and maintain workflows, forms, and custom logic.

2.6. Cloud Hosting Support

The Contractor shall augment AFOSI's current cloud engineering and operations staff to provide systems engineering and administration support for Department of the Air Force applications hosted within the CloudOne (AWS GovCloud) environment. This support encompasses support of cloud infrastructure, including the provisioning, configuration, and sustainment of Compute (EC2), Storage (S3/EBS), and Database (RDS) services.

The Contractor shall assist with performing continuous security hardening (STIG'ing) of all operating systems, databases, and services, ensuring compliance with DoW Impact Levels 4/5/6 (IL5/IL6) requirements. Furthermore, the Contractor shall manage the deployment and maintenance of applications, utilizing Infrastructure as Code (IaC) and DevSecOps pipelines and knowledge of Kubernetes where applicable, while maintaining up-to-date system documentation and architecture diagrams.

2.6.1. Qualifications, Certifications, Education & Experience

The Contractor shall provide personnel who meet the following certification, security, and technical experience requirements prior to the commencement of work.

Qualifications

- At least 3 years of specialized experience in cloud administration within Federal/Department of War (DoW) environments, with specific expertise in GovCloud offerings (e.g., AWS, Microsoft Azure, Google Cloud, and/or VMware vSphere).
- Demonstrated proficiency in the following technical areas:
  - Managing core AWS services: EC2 (Compute), S3 (Object Storage), VPC (Networking), RDS (Relational Database), and IAM (Identity & Access Management). Configuring Security Groups and NACLs to implement Zero Trust architectures. Familiarity with CloudOne shared services, boundary protections, and ingress/egress patterns.
  - Applying DISA STIGs to Windows Server and RHEL/Linux distributions using Group Policy or automation tools (Ansible, Chef, Puppet). Utilizing SCAP Compliance Checker (SCC) and analyzing results to remediate findings. Knowledge of FIPS 140-2 encryption standards for data at rest and in transit.
  - Proficiency with Infrastructure as Code (IaC), automation, and scripting.

Certifications

- Mandatory DoW 8140 Certification: Must possess a CompTIA Security+ CE or a higher-level certification (e.g., CASP+, CISSP).

- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of hands-on experience as a Hyland OnBase System Administrator, specifically demonstrating the ability to design and maintain workflows, forms, and custom logic.

2.7. OSI Cloud Cyber Support

Cybersecurity is performed by a combination of government and contractor personnel. The AFOSI government team will perform the cybersecurity/Information System Security Manager (ISSM) responsibilities regarding the submission of all Risk Management Framework (RMF) artifacts as defined in DoWI 8510.01 and AFI 17-101. The contractor shall manage user access, ensure hardware and software compliance with security guidelines (STIGs/SRGs), follow configuration management procedures, and coordinate changes with relevant cybersecurity offices. The contractor should also provide technical engineering and implementation of security solutions. This includes designing and managing vulnerability scanning architecture, engineering the Security Information and Event Management (SIEM) solution, integrating security testing into the development pipeline, defining secure configuration baselines, and developing technical documentation for security architecture.

2.7.1. Qualifications, Certifications, Education & Experience

Personnel must meet the following requirements before the commencement of work.

Qualifications

- Direct experience with the NIST Risk Management Framework (RMF). Employees should have practical experience with moving a system/RMF package through all steps from categorization to continuous monitoring.
- Mastery in developing and maintaining the Body of Evidence (BoE). This includes creating/updating System Security Plans (SSP), Risk Assessment Reports (RAR), and Security Assessment Plans (SAP).
- Experience identifying vulnerabilities via tools like ACAS (Tenable) or HBSS (McAfee) and managing the Plan of Action and Milestones (POA&M) to track and remediate those risks.

- Hands-on experience with the Enterprise Mission Assurance Support Service (eMASS), which is the standard DoW tool for tracking RMF progress and compliance.
- Practical knowledge of implementing and auditing DISA Security Technical Implementation Guides (STIGs) on servers, workstations, and network devices.

Certifications

- Must possess a CompTIA Security+ CE or a higher-level certification (e.g., CASP+, CISSP).
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- High school diploma or GED equivalent.

Experience

- At least 3 years of experience in circuit management, network engineering, or telecommunications support. Familiarity with DISA Circulars, the Connection Approval Process (CAP), and telecommunications service workflows.

2.8. Cybersecurity Support On-Premise Systems, Stand-Alone & Enclaves

Cybersecurity is performed by a combination of government and contractor personnel. The contractor will perform a variety of subtasks under this task to include:

Vulnerability Management -The Contractor shall establish and maintain a comprehensive vulnerability management program using ACAS to continuously identify, assess, and remediate vulnerabilities across AFOSI networks and applications. Weekly vulnerability scans shall be conducted, and identified vulnerabilities reported to the Government in a Vulnerability Report submitted by 1700 EST every Friday. Vulnerabilities shall be remediated based on DoW timelines: critical (15 days), high (30 days), moderate (60 days), and low (90 days). For vulnerabilities that cannot be remediated within the allocated time, a POA&M shall be created.

The Contractor shall manage SCAP content, ensuring integration with STIGs, secure images, and supporting configuration items. A validated Secure Host Baseline (SHB) shall be maintained, with all changes reviewed and approved by a configuration management board. The Contractor shall proactively update systems with patches, fixes, definitions, updated STIGs, and service packs in coordination with the ISSM. Weekly reports detailing remediation efforts, compliance status, and

risk reduction shall be provided.

Risk Management Framework (RMF) Support. The Contractor shall develop system Authorization and Accreditation (A&A) packages using eMASS and assist in system categorization, STIG applicability, and SSP development. RMF documentation, including Risk Assessment Reports (RARs), Security Assessment Reports (SARs), and POA&Ms, shall be prepared and submitted to the Authorizing Official (AO). Initial Phase (IP) controls must be answered prior to submission of the Authorization to Operate (ATO) package, and Final Phase (FP) controls must be completed within the first year following the award of the ATO.

The Contractor shall support continuous monitoring actions, updating the Security Plan, RAR, and POA&M as necessary to reflect changes to the system or its environment. Annual FISMA reviews shall be conducted to ensure all security controls are reviewed and tested. The Contractor shall provide recommendations for decommissioning systems reaching end-of-life.

Software Certification. The Contractor shall complete all required Air Force software certification documentation and software testing actions for desktop, client/server, and web applications. Vulnerability assessments, code scans, and mitigation planning shall be conducted to ensure compliance with HQ CCC/Software & Application Certification Assessments and the AFOSI Authorizing Official guidance and applicable STIGs. The Contractor shall coordinate with AFOSI technicians, software vendors, and mission partners to mitigate findings and support the final issuance of a software certification decision.

Security Information and Event Management (SIEM). The Contractor shall tailor and maintain AFOSI's SIEM platform to collect logs, perform backend analytics, and support cybersecurity operations. The SIEM platform shall be optimized to meet network security requirements, ensuring 99% availability during duty hours, accurate log collection, and actionable analytics. Enhancements and maintenance shall be implemented to ensure the platform's functionality and effectiveness.

Incident Response Support. The Contractor shall provide technical support for incident response activities by executing government-approved procedures, providing system data and logs, and implementing corrective actions as directed by the government lead. Application performance and availability shall be monitored, with any degradation or outages reported in accordance with the Incident Response Plan. Upon confirmation of a security incident, the Contractor shall perform containment, eradication, and recovery activities to minimize disruption to AFOSI operations.

2.8.1. Qualifications, Certifications, Education & Experience

Personnel must meet the following requirements before the commencement of work.

Qualifications

- Direct experience with the NIST Risk Management Framework (RMF). Employees should have practical experience with moving a system/RMF package through all steps from categorization to continuous monitoring.
- Mastery in developing and maintaining the Body of Evidence (BoE). This includes creating/updating System Security Plans (SSP), Risk Assessment Reports (RAR), and Security Assessment Plans (SAP).
- Experience identifying vulnerabilities via tools like ACAS (Tenable) or HBSS (McAfee) and managing the Plan of Action and Milestones (POA&M) to track and remediate those risks.
- Hands-on experience with the Enterprise Mission Assurance Support Service (eMASS), which is the standard DoW tool for tracking RMF progress and compliance.
- Practical knowledge of implementing and auditing DISA Security Technical Implementation Guides (STIGs) on servers, workstations, and network devices.
- Hands-on experience with tools such as ACAS, eMASS, STIGMan, LanSweeper, SCAP, and SIEM platforms.

Certifications

- CISSP, CompTIA Security+, ITIL Foundation, or equivalent certifications.
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- Bachelor's degree in Cybersecurity, IT, Computer Science, or a related discipline; equivalent professional experience will also be considered.

Experience

- At least 3 years in relevant areas such as vulnerability management, RMF Implementation, software certification, SIEM, incident response, and configuration/change management.

2.9. Project Management Support

The Contractor shall provide project management support to AFOSI leadership and teams for IT-related projects, utilizing Agile (preferred) and Waterfall methodologies. Responsibilities include planning, coordination, reporting, and documentation to ensure successful project execution. The Contractor shall support Agile activities such as Kanban boards, Scrum meetings, Sprint Planning, Sprint Reviews, demonstrations, and

backlog reviews.

The Contractor shall prepare written documentation, including briefings, technical reports, meeting minutes, and memorandums. The Contractor shall maintain continual contact with AFOSI leadership to ensure alignment with organizational priorities and provide support for enterprise-wide IT requirements triggered by policy changes, new technology, or requests for new capabilities.

2.9.1. Qualifications, Certifications, Education & Experience

Qualifications

- Demonstrated proficiency in both Agile and Waterfall project management methodologies, with a specific preference for Agile practices including Kanban board management and Scrum framework implementation.
- Proven experience facilitating core Agile ceremonies, such as Sprint Planning, Sprint Reviews, Daily Scrums, and backlog refinement sessions to ensure team alignment and velocity.
- Advanced capability in preparing professional written documentation, including executive-level briefings, technical reports, meeting minutes, and official memorandums.
- Experience managing enterprise-wide IT initiatives, with the ability to adapt project scope and execution in response to policy changes, new technology integration, or emerging capabilities.
- Demonstrated ability to maintain continual liaison with senior leadership to ensure project alignment with organizational priorities and to effectively communicate technical requirements and status updates.

Certifications

- Personnel must possess and maintain an active Top Secret security clearance.

Education

- Bachelor’s degree in IT, Business Administration, or related discipline; equivalent professional experience will also be considered.

Experience

- At least 5 years of experience in IT project management, with proven experience applying both waterfall and Agile methodologies. This must include managing projects through a traditional waterfall lifecycle and utilizing Agile frameworks like Scrum and Kanban (including sprint planning, backlog management, and use of Kanban boards).

2.10. Circuit Management Support

The Contractor shall provide circuit management support to AFOSI's telecommunications program manager (PM) by submitting, tracking, and coordinating Telecommunications Service Requests (TSRs) and Web Orders (WOs) via DISA's Direct Order Entry system for long-haul telecommunications requirements. All activities shall comply with DISA policies and the Defense Information System Network Connection Process Guide. The Contractor shall access and update data in DISA's CAP, GIAP, and SNAP databases and validate services against Telecommunications Service Orders (TSOs) and technical parameters specified in DISA Circular 300-175-9.

The Contractor shall prepare and submit completion reports within 72 hours of the service date, including Delayed Service Reports, Exception Reports, Ready-for-Use Reports, and In-Effect Reports. The Contractor shall follow up on ongoing issues every three days and provide updates to AFOSI leadership. Annual audits of circuit history folders shall ensure compliance with documentation standards, and the Review & Revalidation (R&R) database shall be updated biannually or upon circuit discontinuation.

2.10.1. Qualifications, Certifications, Education & Experience

Qualifications

- Demonstrated expertise in utilizing DISA's Direct Order Entry (DDOE) system to initiate, track, and manage Telecommunications Service Requests (TSRs) and Web Orders (WOs).
- Proven ability to access, update, and maintain accuracy within critical DISA databases, including the Connection Approval Process (CAP), Global Information Grid Interconnection Approval Process (GIAP), and SNAP.
- Experience validating telecommunications services against Telecommunications Service Orders (TSOs) and ensuring compliance with technical parameters outlined.
- Proficiency in preparing and submitting accurate completion reports within strict reporting timelines.
- Experience conducting comprehensive audits of circuit history and maintaining Review & Revalidation (R&R) databases to ensure 100% documentation compliance.

Certifications

- CompTIA Security+ or Cisco Certified Network Associate (CCNA)
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- Bachelor's degree in IT, Business Administration, or a related discipline; equivalent professional experience will also be considered.

Experience

- At least 3 years of experience in circuit management, network engineering, or telecommunications support. Personnel must possess a working knowledge of and have direct experience with the procedures outlined in DISA Circulars, the Consolidated Acquisition Process (CAP), and standard telecommunications service workflows.

2.11. Privacy and IT Portfolio Management

The Contractor shall serve as the MAJCOM-appointed IT Portfolio Manager as required by the Clinger-Cohen Act of 1996. Responsibilities include interpreting DoW IT Portfolio Management policies, providing guidance to AFOSI personnel, and overseeing the AFOSI Enterprise IT investment governance structure. The Contractor shall analyze Post Implementation Reviews (PIRs) to assess IT investments' efficiency and optimize IT Capital Planning procedures with Enterprise Architecture to reduce redundant and inefficient spending.

The Contractor shall establish a Plan of Action and Milestones (POA&M) to address identified gaps in IT management. In carrying out their duties, the Contractor will utilize ITIPS as the authoritative system for all IT Portfolio Management data and activities, ensuring alignment with the DoW. The Contractor is responsible for improving the accuracy of the IT Portfolio data by performing continuous validation and cleansing, which ensures leadership has reliable information for data-driven decision-making. Additionally, the Contractor shall monitor project execution by tracking performance against established goals and will assess benefit realization by measuring if the investments deliver their intended mission value for internal and external stakeholders.

In addition to IT Portfolio Management, the Contractor shall provide privacy management support to ensure compliance with DoW Privacy Impact Assessment (PIA) Guidance and Air Force Instructions. Responsibilities include assisting the Cybersecurity Program Manager in implementing cybersecurity measures to protect Personally Identifiable Information (PII), drafting and reviewing PIAs, and ensuring compliance with System of Records Notices (SORN) and Privacy Act System Notices.

2.11.1. Qualifications, Certifications, Education & Experience

Qualifications

- Experience interpreting DoW IT Portfolio Management policies and overseeing Enterprise IT investment governance structures in accordance with the Clinger-Cohen Act.

- Specific experience using the Information Technology Investment Portfolio System (ITIPS) as the authoritative source for IT portfolio management and data reporting.
- Demonstrated ability to draft, review, and manage Privacy Impact Assessments (PIAs) and System of Records Notices (SORNs) to ensure full compliance with DoW and Air Force privacy regulations.
- Experience developing Policy Plans of Action and Milestones (POA&M) to align IT management strategies with the DoW Modernization Plan and address gaps in execution.

Certifications

- Certified Information Systems Security Officer or GIAC Security Leadership Certification
- Personnel must possess and maintain an active Top Secret security clearance.

Education

- Bachelor's degree in IT, Business Administration, or related discipline; equivalent professional experience will also be considered.

Experience

- At least 5 years of experience in IT Portfolio Management and Capital Planning and a minimum of 3 years of experience in privacy management and compliance, including drafting and reviewing PIAs and SORN.

2.12. Configuration and Change Management

The Contractor shall implement a robust Configuration Management (CM) and Change Management (ChM) program to manage the configuration of all software and hardware infrastructure. The CM process shall pertain to all networks, functions, and systems in accordance with best practices. The contractor shall also implement a Change Management (ChM) program to ensure standardized methods, processes and procedures are used for all changes, facilitate efficient and prompt handling of all changes, and maintain the proper balance between the need for change and the potential detrimental impact of changes. In support of CM and ChM, the Contractor shall perform IT systems engineering including but not limited to tasks such as designing, building, and testing minor to significant IT solutions that meet customer requirements. These solutions may consist of software, hardware, and integration of software/hardware for on premise deployments. Physical/logical Visio or PowerPoint diagrams shall be maintained and made available in a centralized location on all networks with full access provided to government staff. Backup and recovery images/snapshots shall be maintained in approved cloud and on-premise enclaves.

The Contractor shall utilize standardized change management methods to ensure

efficient handling of IT infrastructure changes. Requests For Changes shall be created, reviewed, coordinated with relevant stakeholders, and submitted to the government for approval. Changes shall be tested prior to deployment, and deployment activities coordinated to minimize service disruptions. The Contractor shall update the government on the success or failure of approved changes and any follow-on actions required. All ChM and CM activities shall be documented in standard operating procedures, and all change-related artifacts will be maintained in accordance with DAF records management policies and procedures and be fully accessible to government staff at all times.

2.12.1. Qualifications, Certifications, Education & Experience

Qualifications

- Knowledge of Change Management and Configuration Management processes and best practices
- Expert-level understanding of DAF Enterprise IT policies and 17-series instructions
- Expert-level understanding of DAF Methods and Procedures Technical Orders pertaining to DAF IT change and configuration management
- Knowledge of records management and knowledge management processes

Certifications

- Personnel must possess and maintain an active Top Secret security clearance with access to Sensitive Compartmented Information, and
- ITILv4 Foundations or Specialist certification, or
- PMI Project Management Professional certification

Education

- A bachelor's degree in IT, Computer Science, or a related discipline; equivalent professional experience will also be considered.

Experience

- At least 5 years' experience in a government position or a contractor position supporting a government agency where change management, configuration management, or IT systems engineering was a primary duty

2.13. Network Engineering and Management

The Contractor shall provide comprehensive technical support for ongoing network infrastructure operations and maintenance, as well as planning for network expansion and architectural changes in response to mission changes and unit moves, additions, and/or closures. Specific task areas include but are not limited to building and/or implementing and executing solutions to connect workstations, servers, and peripheral

devices to local area and wide area networks including Virtual Local Area Networks (VLAN). It also includes installing, configuring, operating, and maintaining network equipment such as cables, switches, routers, firewalls, network monitoring devices, network management platforms, and identification of network performance issues. The Contractor shall perform technical services on all AFOSI operational on-premise enclaves to include AFOSI to DAF and DoW network points-of-presence, and the local test/integration network.

Designing/Building/Implementing Network Solutions. The contractor shall design/build and implement/execute network solutions. The contractor shall deploy solutions that ride on OSI owned network infrastructure, DAF-controlled networks, mission partner networks such as DISA and Navy ITCSU provided systems, and commercial facilities. Coordination and escalating priorities with base communication squadrons, elements of 16AF, and sister service organizations is critical in maintaining a highly available network with sufficient bandwidth to support OSI's mission.

Installing and Maintaining Network Equipment. The contractor shall install, configure, and maintain network equipment in the AFOSI HQ data center and locations in the National Capital Region. The contractor shall troubleshoot and resolve problems ranging from minor to significant. The contractor shall also work with other DoW and government and industry vendor support elements, when troubleshooting network problems to include NIPR, SIPR, and AFSCI at AFOSI HQ or field locations.

Video Teleconference (VTC) Network Operations and Maintenance. AFOSI maintains VTC end-user equipment on NIPRNet and SIPRNet, and JWICS. The Contractor shall support VTC O&M tasks such as routine, preventive, scheduled and unscheduled maintenance actions required to keep the VTC infrastructure in an operational state which includes but not limited to patching workstations and network devices, performing software installations and troubleshooting of software, upgrades and tech refresh of hardware to include displays, speakers, microphones, IP phones and VTC/video control system used in conference rooms. It also includes the task of monitoring and troubleshooting network connectivity and bandwidth issues for reliable VTC sessions.

Tasking Orders and Compliance. The Contractor shall comply with HQ USCYBERCOM directives and implementing AFCYBER orders pertaining to network and system configuration, operation, and maintenance. All network and system operations will also comply with published Air Force Instructions, Air Force Manuals, and Methods and Procedures Technical Orders (MPTOs). Changes to current or future infrastructure will be processed through the Configuration and Change Management processes described in section 2.1.11. Contractor activities and support are also subject to review by the Defense Cyber Defense Command Cyber Operational Readiness Assessment (CORA) process.

Testing and Development Environment. The Contractor shall operate and maintain a testing and development environment (referred to as the "Testing Integration

Center/Development (TIC/DEV)" environment elsewhere in this PWS) to perform the following functions:

- Replication of the production network hardware and software environment to provide accurate testing results of proposed network changes arising from internal requirements or downward-directed programs such as various Zero Trust initiatives.
- Testing software applications for environmental capability and security compliance prior to deployment.
- Conducting software validation, patch testing, and network equipment compatibility checks prior to deployment.

2.13.1. Qualifications, Certifications, Education & Experience

Qualifications

- Expert-level knowledge in typical network platforms and equipment including Cisco routers, switches, and related management equipment and service (Identity Services Engine, Catalyst Center, etc.), Palo Alto hardware and software, and other software-defined networking, identity management, and micro/macro segmentation platforms (Okta, Illumio, Forescout, and similar)
- Expert-level knowledge of DAF cyber enterprise policies and procedures including but not limited to 17- and 33-series DAF Instructions and Manuals and 00-33x series MPTOs
- Expert-level knowledge of USCYBERCOM and AFCYBER command and control processes, especially those applicable to DoW Information Network (DoWIN) operations
- Knowledge of applicable NIST publications including SP 800-53 rev5, SP 800-34 rev1, NIST SP 800-209, and related documents

Certifications

- Personnel must possess and maintain an active Top Secret security clearance with access to Sensitive Compartmented Information, and
- CompTIA Network+CE (minimum), or
- Cisco CCNA (minimum), or
- Cisco CCNP or CCIE (preferred), or
- ISC2 CISSP (preferred)

Education

Bachelor's (or higher) degree in IT Management, Cybersecurity, Computer Science, Computer Engineering, Electrical Engineering, or a related discipline; equivalent professional experience will also be considered.

Experience

At least 5 years' experience in a government position or a contractor position supporting a government agency where network management, network operations, or IT systems engineering was a primary duty

2.14. System Management

The Contractor shall provide comprehensive technical support for on-premise servers, storage area networks, and network attached storage, as well as cloud-based storage solutions and virtual computing environments across both classified and unclassified domains. This support encompasses the full lifecycle management of on-premise and cloud-based compute and store environments. The Contractor shall also develop backup and restoral procedures to ensure AFOSI mission and support information is available in normal operating locations as well as locations designated as alternate locations for business continuity and disaster recovery. All enterprise services shall be monitored daily via centralized enterprise management tools to identify and resolve network services (such as AD, DHCP, authentication), application availability, and performance issues. System Administrators will also manage the right sizing of virtual machines and make recommendations for additional hardware to increase performance or capacity.

The Contractor is responsible for assisting the agency with its ongoing activities of migrating systems and resources to an approved cloud enclave including but not limited to migrating data, systems, application, and network storage objects on an as needed basis. AFOSI has migrated multiple services to cloud-hosted platforms and intends to continue this migration to become a cloud first organization. See Section 2.1.5, "Cloud Hosting Support", for related requirements.

The Contractor shall create a back-up plan and schedule for mission-critical data and infrastructure configuration data, and a recovery plan that illustrates recovery from catastrophic system failure utilizing data from back-ups. Additionally, develop and maintain a history of past recoveries performed whether from real world system failures or quarterly data recovery samples. Backup and recovery plans shall also include cloud enclaves and planning for business continuity/disaster recovery in support of command-developed Continuity of Operations (COOP) plans that includes a comprehensive Communication Support and Disaster Recovery plan IAW NIST-SP 800-53 Rev.5 Security and Privacy Controls for Federal Information System, NIST-SP 800-34 Rev.1 Contingency Planning Guide for Federal Information Systems, and DAFI 10-208 Air Force Continuity of Operations (COOP) Program. The COOP plan must be capable of being implemented within 24 hours of notification.

2.14.1. Qualifications, Certifications, Education & Experience

Qualifications

- Expert-level knowledge in typical server platforms (Red Hat Linux and similar), virtualization platforms (VMWare and similar), backup applications (Commvault and similar)
- Expert-level knowledge of backup and recovery best practices applicable to a highly distributed enterprise
- Expert-level knowledge of Business Continuity and Disaster Recovery planning processes including execution of restoral of enterprise services at an alternate operations center or site
- Knowledge of applicable NIST publications including SP 800-53 rev5, SP 800-34 rev1, NIST SP 800-209, and related documents
- Knowledge of the DAF and AFOSI COOP planning process and governing guidance

Certifications

- Personnel must possess and maintain an active Top Secret security clearance with access to Sensitive Compartmented Information, and
- CompTIA Cloud+CE, Server+CE, and/or Security+CE
- Red Hat Certified System Administrator, Windows Server Adminstrator, VMWare Certified Professional (Data Center or Cloud Management), CommVault Certified Professional

Education

- Bachelor's (or higher) degree in IT Management, Cybersecurity, Computer Science, or a related discipline; equivalent professional experience will also be considered.

Experience

- At least 3 years of specialized experience in system administration within Federal/Department of War (DoW) environments, with specific expertise in typical server platforms (Red Hat Linux and similar), virtualization platforms (VMWare and similar), backup applications (Commvault and similar)

2.15. IT Service Management

The Contractor shall operate a Service Desk Monday through Friday, 0600ET to 1800ET to provide customer service to either phone-in or walk-in customers, and to provide first-look support to customer request tickets submitted through the DAF standard service request portals and ticketing systems on unclassified or classified networks. For walk-in or phone-in requests, service desk personnel will create a ticket on the customer's behalf in the appropriate system. Service desk and supporting personnel are fully responsible for cradle-to-grave response to reported problem or incident to include necessary troubleshooting, escalations, and collaboration with mission partners until the problem is resolved. Contractor shall not close the original ticket in the DAF system until the ticket

is resolved.

Executive Customer Support. The contractor shall ensure immediate attention and support is provided to the AFOSI Top Four (Executive tickets/issues). The Executive staff consists of the AFOSI Commander, Executive Director, Vice Commander, and Command Chief Master Sergeant. Tickets submitted by Agency Leadership will receive priority and an in-person visit may be required.

Mobile Device Support. Mobile device support is primarily limited to users who are issued a cell phone from the government Personal Wireless Communication Systems (PWCS) Manager in AFOSI HQ and users in the National Capital Region (NCR).

VTC End-User Support. The contractor shall assist AFOSI users in establishing connectivity when their own efforts fail. For the Top Four leaders (Commander, Executive Director, Vice Commander, and Command Chief Master Sergeant) of AFOSI, the contractor shall be available at the VTC location within the MCBQ Russell-Knox Building to ensure the VTC sessions are established.

Incident and Outage Management. The contractor shall track all incidents or outages in a ticket maintained in a DAF standard ticketing system, currently Service Now (SNow). Tickets shall be opened immediately upon user report of an incident, problem, or outage in accordance with the Priority Response Matrix (Addendum 2) which provides an explanation of the different impacts to assist in determining the priority level. All tickets shall include a comprehensive work log of all troubleshooting, status updates, as well as listing every affected user or group by name, computer number, and time reported.

Authorized Service Interruptions (ASI). In support of operations and networks, an ASI allows for scheduled downtime with minimum service interruptions. Contractor shall generate an ASI Request Form including the following information: Execution plan, planned actions, list of services affected, impact, estimated length of time, location, point of contract and ASI execution, contingency plan and any other information deemed relevant to ASI by the government or contractor. Internally generated ASIs shall normally be performed between 1800ET on Friday and 1900ET on Sundays unless directed otherwise by the government. All non-emergency ASIs must be submitted to Associate Director, XTI, or his/her designee one week prior to implementation to allow for adequate staffing and coordination with AFOSI operational elements.

Monitoring and Reporting. The contractor shall configure standard monitoring systems to provide near real time updates on network and system status. Significant events as defined in the Priority Response Matrix will be reported in accordance with the procedures listed in the Matrix. Other near-real time displays and dashboards will be defined, created, and monitored to provide status reporting on request of XT leadership including the Associate Directors.

Daily Stand-Up Meetings. Each contractor section shall be represented at daily meetings with XTI leadership (Associate Director, Chief of User Services, and/or Chief,

Infrastructure Management), Chief Information Officer (CIO), or designee. The contractor will brief the status of high or critical outages, a status of the previous day's operations and tickets opened for more than 7 workdays and any significant events. Status data points may include the number of tickets opened, number of tickets closed, new DAF cyber tasking orders, and significant trends.

After Action Reports (AARs). An AAR shall be completed and submitted to the government within 72 hours of resolution of any unplanned outage documenting the start and finish time of the outage, logging the notification of the government/customers, listing all affected systems, users or networks, cause of outage, troubleshooting steps, process improvements and any action items necessary including documentation of what was done incorrectly, and a mitigation plan with suggestions for how to prevent recurrence.

Account and Access Management. The Contractor will manage user accounts on networks where this service is not provided by DAF cyber enterprise forces. Contractor will manage AFOSI-specific privileged user functions, security groups, organizational units, and distribution lists on all infrastructure unless otherwise directed by the government. The contractor will maintain documentation on network object configuration in a permanent repository on the applicable network(s), accessible to both government and contractor personnel. The contractor shall provide personnel to be trained as Trusted Agents to be able to create SIPR user tokens and well as NIPR and SIPR admin tokens. Contractor will work with AFNet enterprise forces to ensure the proper security groups are created for all government pro staff users. Contractors and support vendors who require server access will have the appropriate certifications as required by DoWM 8140.01 and proper clearances for supporting agency missions.

IT Service Management System. The Contractor shall coordinate with CFP personnel and DAF enterprise cyber forces to ensure the ITSM systems (unclassified and classified) used to receive, process, and close out service requests are appropriately configured to enable seamless transition of service requests (tickets) both internally within AFOSI/XT, and with external mission partners. The ITSM systems shall also be configured to accurately capture service times and provide accurate performance data to XT leadership via regularly scheduled and on-demand reporting, as well as dashboards or similar near real-time views of service delivery.

2.15.1. Qualifications, Certifications, Education & Experience

Qualifications

- Expert-level knowledge of DAF cyber enterprise policies and procedures including but not limited to 17 and 33-series DAF Instructions and Manuals and 00-33x series MPTOs
- Expert-level knowledge of USCYBERCOM and AFCYBER command and control processes, especially those applicable to DoW Information Network (DoWIN) operations

- Knowledge of applicable end user device configurations and troubleshooting techniques, especially those used in or applicable to DoW and DAF systems and networks

Certifications

- Personnel must possess and maintain an active Top Secret security clearance with access to Sensitive Compartmented Information, and
- CompTIA Security+CE or Network+CE, or ITILv4 Foundation (minimum for operational personnel), or
- ITILv4 Specialist or ISC2 CC (minimum for management personnel), or
- ISC2 CISSP or ISACA CISM

Education

- Associate's (or higher) degree in IT Management, Cybersecurity, Computer Science, or a related discipline; equivalent professional experience will also be considered for service desk operational personnel
- A Bachelor's or higher is strongly preferred for service desk management personnel

Experience

- At least 3 years of specialized experience in system administration, network administration, or service desk operations within Federal/Department of War (DoW) environments for operational personnel
- At least 5 years of specialized experience in system administration, network administration, or service desk operations within Federal/Department of War (DoW) environments for management personnel

SECTION III – Additional Requirements

3. Additional Requirements

3.1. Other Direct Costs: The Government may identify Other Direct Costs (ODCs) necessary for the successful performance of this effort. This category encompasses tools, software licenses, IT services, training, hardware, and technical resources required to meet task order requirements. Anticipated ODCs include, but are not limited to, testing environment components, cloud computing resources, software licenses, and IT-related hardware. These items are directly chargeable to specific tasks and are distinct from general and administrative (G&A) expenses. All ODC expenditures must be directly tied to mission needs and require prior written approval from the Contracting Officer (CO) or Contracting Officer's Representative (COR). The Contractor shall provide detailed cost estimates and justifications for all proposed ODCs within their proposal. Furthermore, the Contractor shall maintain detailed records of expenditures, provide monthly utilization reports, and ensure that all purchased items are delivered as project deliverables. The Government reserves the right to furnish any materials deemed advantageous to the Government in lieu of Contractor procurement.

SECTION IV – Program Management

4. Program Management

4.1. Program Management Responsibilities. The Contractor shall provide effective program management for all work conducted under this contract and identified in Section II as well as all items including, but not limited to:

- Resource assignment and budgeting
- Scheduling
- Quality control
- Scope management
- Deliverable submission
- Monthly status reports
- Project closeout
- Meeting facilitation
- Trip reports

4.2. Program Management Plan (PMP). The Contractor shall submit a Program Management Plan (PMP) to AFOSI within three (3) business days of contract award. The Government will review the PMP within ten (10) business days of receipt to ensure it encompasses all required elements. Any identified discrepancies shall be resolved by the Contractor within five (5) business days of notification. At a minimum, the PMP shall include:

- A schedule of status meetings, including dates, times, and allotted resources.
- Kick-off meeting details, including a draft agenda and a plan for meeting minutes.

4.3. Staffing. The Contractor shall provide a staffing plan (e.g., rosters, listings, or spreadsheets) that identifies personnel identified to perform all tasks associated with this PWS.

4.3.1. Vacancies. The Contractor shall ensure vacancies are filled with qualified personnel within fifteen (15) business days, unless a written extension is approved in advance by the Contracting Officer's Representative (COR).

4.4. Additional Qualification Standards. Certain labor categories may require specific professional certifications based on task order requirements. These certifications will be identified in the applicable task and may include, but are not limited to, CISSP, CISM, PMP, CEH, AWS Solutions Architect, Security+, or equivalent.

SECTION V – Key Personnel

5. Key Personnel

5.1. Key Personnel List. The following personnel are considered key personnel by the government:

- Title: Program Manager/Alternate Program Manager
- Responsibilities: Overall contract execution, resource management, quality control and program delivery.

5.2. Program Manager / Alternate Program Manager. The contractor shall provide a Program Manager/Alternate Program Manager who shall be responsible for the performance of the work. The name of this person and an alternate, who shall act for the Contractor when the manager/team lead is absent and shall be designated in writing to the Contracting Officer and Contracting Officer Representative. At time of proposal, the Contractor shall present resumes for their Program Manager and Alternate Program Manager to demonstrate an understanding of the requirement. Key personnel shall have full authority to act for the Contractor on all contract matters relating to fulfillment of the tasks identified in Section II. Key personnel shall be available between 8:00 a.m. to 4:30p.m., Monday through Friday except Federal holidays or when the government facility is closed for administrative reasons.

5.3. Key Personnel Replacement. In the event replacement of Key Personnel becomes necessary, the Contractor shall notify the Contracting Officer in writing at least 30 calendar days in advance. The Contractor shall provide a detailed resume of the proposed replacement demonstrating equivalent or superior qualifications. The Government reserves the right to approve or disapprove any proposed substitutions. Replacement personnel must be in place with appropriate overlap to ensure continuity of operations and minimal impact to ongoing operations.

SECTION VI – Service Summary

6. Service Summary

6.1. Service Summary. The contractor service requirements are summarized into performance objectives that relate directly to mission essential items. The performance threshold briefly describes the minimum acceptable levels of service required for each requirement and will be assessed on an "Acceptable" or "Unacceptable" basis. These thresholds are critical to mission success.

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
SS – 1 – System Availability	2.2, 2.3, 2.4, 2.5,	Services (SharePoint, Atlassian, Appian, OnBase) shall maintain 98% availability during duty hours, excluding scheduled maintenance.	Periodic review of system monitoring logs and uptime reports.
SS – 2 Process & Workflow Automation	2.2, 2.3, 2.4, 2.5	- Power Automate flows shall have a failure rate < 2% due to logic errors. - Appian automated processes must have a 99% success rate. - OnBase workflows shall execute without system errors 98% of the time.	Periodic review Random analysis of platform analytics, workflow execution logs, and error/exception reports.
SS – 3 Data & Reporting Accuracy	2.2, 2.3, 2.4, 2.5	Reports and dashboards must reflect source data accurately Database schemas and data mappings shall contain less than 5 errors.	Periodic review Random data validation testing, comparison of reports to source systems, and review of schema definitions.

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
SS – 4 Deployment & Change Mgt.	2.2, 2.3, 2.4, 2.5	Application deployments must have a 95% success rate on the first attempt. - Workflow/scheme changes must have a 0% critical failure rate. - All configuration changes must be documented and validated without service regression.	Periodic review of deployment logs, change management records, and post-deployment validation results.
SS-5 User Interface (UI) Quality	2.2, 2.3, 2.4, 2.5	Interfaces must be functional, generally free of errors, and intuitive. Newly released interfaces should have less than five user-reported errors.	Periodic analysis of UAT feedback and review of post-deployment help desk ticket trends related to usability.
SS- 6 Vulnerability Management	2.7, 2.8	Vulnerabilities must be remediated within DoW timelines: critical (15 days), high (30 days), moderate (60 days), low (90 days).	Weekly review of Vulnerability Reports and compliance with ACAS findings and STIG requirements.
SS-7 Contingency Planning	2.7, 2.8	Contingency Plan must be submitted within 30 days of award and tested annually for effectiveness.	Periodic Review of Contingency Plan and validation through annual testing exercises.
SS-8 Audit and Accountability	2.7, 2.8	Audit logs must be collected, stored, and reviewed in accordance with the Audit and Accountability Plan.	Periodic Review of Audit and Accountability Plan and random sampling of log management activities.

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
SS-9 Data Backup and Recovery	2.14	Data backups must be performed according to the Data Backup and Recovery Plan, with recovery procedures validated annually.	Review of Data Backup and Recovery Plan and validation through annual recovery testing.
SS-10 Change Management	2..12	All changes must follow standardized methods and procedures, with RFCs submitted within 5 business days of request.	Periodic Review of Change Management Plan and random sampling of RFC logs for compliance.
SS-11 Configuration Management	2..12	Server baselines must be established within 60 days of contract award and updated within one week of changes.	Review of Configuration Management Plan and spot checks of server configurations.
SS-12 Continuous Monitoring	2..8	System security controls must be reviewed and updated annually, with 100% compliance to AF guidelines.	Review of Continuous Monitoring Plan and annual FISMA compliance audits.
SS-13 Project Management Support	2.9	All assigned projects must be completed in full satisfaction of all defined objectives and adhere strictly to established timelines. Assigned projects must meet 95% of defined objectives and timelines. All required documentation must be complete, accurate, and fully compliant with all specified standards and requirements. Documentation must meet 95% of requirements..	Periodic review of Project Documentation and Agile Activity Reports for accuracy and timeliness.

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
SS-14 Circuit Management Support	2.10	The Contractor shall adhere to strict reporting and maintenance timelines. All Telecommunication Service Requests (TSRs) and Work Orders (WOs) must be submitted within 24 hours of receipt, and all completion reports are due within 72 hours of the service date, with a required 95% on-time performance standard for both. Furthermore, the Contractor must provide status updates on ongoing issues to AFOSI leadership every three days until resolution. To ensure data integrity, the Contractor will conduct annual audits of circuit history folders and update the Review & Revalidation (R&R) database biannually or upon circuit discontinuation.	Periodic review of TSR submissions, Completion Reports, and Circuit History Folder Audits.
SS-15 Privacy and IT Portfolio Management	2.11	IT Portfolio data must maintain 98% accuracy. PIAs and SORN must meet 100% compliance with DoW Privacy Guidance.	Periodic review of IT Portfolio Health Reports, PIAs, and SORN updates for accuracy and compliance.
SS-16 Network and System documentation	2.12, 2.13, 2.14, 2.15	Diagrams detailing the physical and logical configuration of network equipment and servers at every AFOSI location where AFOSI-controlled equipment items are located; for cloud-based systems, a logical	Review of approved authorized change request documents and comparison with drawings and documents posted to the configuration

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
		description of the services used and relevant configuration information must be updated within 7 days of completion of an authorized change, and no less frequently than annually ; diagrams and descriptions may have no more than 2 errors per system diagram or logical description.	management repository. Biannual audits of documentation status and comparison to running configurations.
SS-17 Network and System Availability	2.13, 2.14	Servers and networks will be operational and providing services no less than 99.9% of normal worldwide operating hours, excluding Authorized Service Interruption periods.	Periodic Random inspections of server and network monitoring systems, and review of contractor monthly service summary reports
SS-18 Backup and Recovery Availability and Accuracy	2.13, 2.144	Backups must accurately restore 99.9% of recorded data, and must provide restoration within 4 hours of notification of need for recovery	Quarterly testing of representative backup samples
SS-19 Equipment Installation Practices	2.13, 2.14	IT infrastructure shall be installed according to Building Industry Consulting Service International (BICSI) and commercial best practices. All cables shall be labeled with Termination “A” and “Z” points and in accordance with ITCSU/AF policy. There must be no more than 3 identifiable discrepancies per installed system at the completion of installation, and discrepancies	Periodic Random sampling and inspection of equipment and infrastructure post-installation

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
		must be corrected within 7 days of identification.	
SS-20 Service Request Responsiveness	2.15	Ninety-seven percent (97%), as measured over a 30 day period, of service requests will be completed or resolved within 7 days of receipt or within the response time parameters established within the Priority Response Matrix (Addendum 2), whichever is more stringent, unless provided an exception by XT leadership	Random review of Enterprise-approved IT Service Management system, and review of contractor monthly service summary reports
SS-21 Enterprise Command and Control of cyberspace forces	2.13, 2.14, 2.15	Ninety-eight percent (98%), as measured over a 30 day period, of AFCYBER TASKORDs and similar taskings originated from AFCYBER or higher level authority applicable to infrastructure and/or service desk operations will be acknowledged within the specified time period, and corrective action will be executed according to the tasking, unless a government-approved Plan of Action and Milestones (POAM) is in place.	Random sampling of unclassified and classified TASKORD management systems, and review of contractor monthly service summary reports
SS-22 Security Information and Event Management (SIEM)	2.7	The Contractor shall maintain the Security Information and Event Management (SIEM) platform to meet network security requirements. Performance will be measured	Will verify SIEM platform performance through automated uptime monitoring, periodic audits of log data to

Performance Objective	PWS Paragraph	Performance Threshold	Method of Surveillance
		by three key metrics: 1) The platform must maintain at least 99% availability during duty hours. 2) Log collection must be accurate and complete. 3) The system must produce actionable analytics and generate critical security alerts in a timely manner.	ensure accuracy, and regular validation of security alerts and incident reports to confirm they are actionable.
SS-23 Submit Completion Reports	2.10.	The Contractor shall prepare and submit completion reports within 72 hours of the service date, including Delayed Service Reports, Exception Reports, Ready-for-Use Reports, and In-Effect Reports. The Contractor shall follow up on ongoing issues every three days and provide updates to AFOSI leadership. Annual audits of circuit history folders shall ensure compliance with documentation standards.	The Review & Revalidation (R&R) database shall be updated biannually or upon circuit discontinuation.

SECTION VII - Deliverables

7. Deliverables

7.1. Deliverables. The Contractor shall provide deliverable(s) in a format mutually agreed upon by the Government and the Contractor. The following enumerated deliverables are not expected to change. Due Date intervals are not expected to change but actual dates may need to be revised depending on actual contract start date.

Task ID	Title	Frequency	Description
2.15	Monthly Applications Report	Monthly	A consolidated monthly summary of: 1. Customer support tickets and requests involving supported applications. 2. Resolution or completion status and resolution/completion details of all tickets and requests. 3. A listing and description of all completed applications, flows, interfaces, dashboards, sites, libraries, lists, etc.
2.6	Monthly Cloud Report	Monthly	A consolidated monthly summary of all activities conducted by the Contractor in the OSI Cloud environments.
2.7	Monthly Cyber Security Report	Monthly	A consolidated monthly summary of all activities conducted by the Contractor related to cyber work activities supporting OSI On-premise networks, stand-alones and hosted applications and data therein.
2.8	Weekly Vulnerability Report	Weekly	Report detailing identified vulnerabilities, remediation efforts, and compliance status.
2.8	Vulnerability Management Plan	Within 30 days of award, then Annually	A comprehensive plan detailing how vulnerabilities will be identified, assessed, prioritized, and remediated based on ACAS findings and STIG compliance.
2.15	Contingency Plan	Within 30 days of award, then Annually	A plan detailing procedures for responding to cybersecurity incidents, system outages, and other

Task ID	Title	Frequency	Description
			contingencies to ensure mission continuity.
2.7- 2.8	Audit and Accountability Plan	Within 30 days of award, then Annually	A plan defining how system logs will be collected, stored, reviewed, and reported to detect unauthorized activity and ensure accountability.
2.8	Software Certification Documentation	As Needed	Comprehensive documentation for Air Force software certification, including testing actions.
2.12	Configuration Baseline Report	Within 60 days of award, then within 7 days of implementation of an authorized change, but no less frequent than annually	Initial and updated snapshots of workstation, server, network configurations across all AFOSI enclaves.
2.12	Configuration Management Plan	Within 30 days of award, annually	Configuration Management Plan for all AFOSI systems, enclaves and applications
2.12	Change Management Plan	Within 30 days of award, annually	Change Management Plan for all AFOSI systems, enclaves and applications
2.12, 2.14	Data Backup and Recovery Plan	Within 30 days of award, annually	A plan detailing procedures for regular data backups and recovery to ensure data integrity and availability in case of loss or disruption.
2.9	Project Documentation	As Needed	Written documentation, including briefings, technical reports, and meeting minutes.
2.10	Circuit History Folder Audit	Annually	Annual audit of circuit history folders to ensure compliance with documentation standards.
2.11	IT Portfolio Health Report	Annually	Report detailing IT portfolio compliance, performance, and alignment with strategic goals.
2.11	Privacy Impact Assessments (PIAs)	As Needed	Drafted, reviewed, or approved PIAs for systems requiring privacy compliance.
2.12, 2.13, 2.14, 2.15	Network Diagrams	Within 60 days of award, then within 7 days of implementation of an authorized change, but no	Diagrams detailing the physical and logical configuration of network equipment at every AFOSI location, including connectivity to base or WAN circuits

Task ID	Title	Frequency	Description
		less frequent than annually	
2.12	System and Server Diagrams	Within 60 days of award, then within 7 days of implementation of an authorized change, but no less frequent than annually	Diagrams detailing the physical and logical configuration of servers at every AFOSI location where servers are located; for cloud-based systems, a logical description of the services used and relevant configuration information
2.15	Authorized Service Interruption	(Routine) Provided to the government for approval 7 days prior to scheduled outage (Emergency) Provided to the government for approval as soon as known, but at least 24 hours prior to scheduled outage	Document including Execution plan, planned actions, list of services affected, impact, estimated length of time, location, point of contract and ASI execution, contingency or roll-back plan and any other information deemed relevant to ASI by the government or contractor
2.15	Monthly Service Summary	Within 7 days of the end of each calendar month	Summary of Service Desk and Service Request (ticket) activity for the previous month, showing the number of tickets open at the beginning and end of the month, the number of tickets opened during the month, the number of tickets closed during the month, and the number of tickets which exceeded the service level agreement parameters for ticket closure, including an explanation of the relevant circumstances
2.15	After Action Report	As needed subsequent to an ASI or an unscheduled outage	Summary of the event documenting the start and finish time of the outage, logging the notification of the government/customers, listing all affected systems, users or networks, cause of outage, troubleshooting steps, process improvements and any action

Task ID	Title	Frequency	Description
			items necessary including notation of what was done incorrectly and proposed corrective action.
2.8	Vulnerability Scans	Weekly	Weekly vulnerability scans shall be conducted, and identified vulnerabilities reported to the Government in a Vulnerability Report submitted by 1700 EST every Friday.
2.8	Remediation Reports	Weekly	Weekly reports detailing remediation efforts, compliance status, and risk reduction shall be provided.
9.9	Kickoff Meeting Agenda	Within 3 calendar days of contract award	Include primary objectives
9.11.2	Transition out Plan	60 calendar days prior to contract expiration date	Plan to facilitate a seamless transfer of responsibility to a successor Contractor or the Government without disruption to the mission.
9.12.3	Quality Control Plan	Within 15 days after contract award/with 5 days of updates	Plan for effective quality control program to ensure services are performed IAW this PWS, applicable laws and regulations, and best practices.

SECTION VIII – Government Furnished Property, Equipment and Services

8. Government Furnished Property, Equipment and Services

8.1. Government-Furnished Property, Equipment, and Information: The Government will provide the necessary equipment, systems, information, and documentation required to perform the services defined in this PWS. The Contractor shall be responsible for the proper care, stewardship, and reporting of all Government-furnished items in their possession.

8.2. Ownership: The contractor may be required to acquire/lease property on behalf of the government. Leased facilities will remain the property of the contractor. Ownership of equipment and material purchased by the contractor on behalf of the government will be transferred to AFOSI.

SECTION IX – General Information

9. General Information

9.1. Work Hours. The Contractor shall maintain a standard work week of forty (40) hours, consisting of five (5) eight-hour days, Monday through Friday. To ensure seamless integration with the Government, the following scheduling parameters apply:

9.1.1. Facility Operational Window: 0600 – 1800

9.1.2. Core Duty Hours: 0800 – 1600

9.1.3. Contractor personnel shall align their duty schedules with the normal operating hours of AFOSI. The Government reserves the right to authorize variances to these schedules based on mission requirements.

9.2. Place of Performance and Remote Work: The Contractor shall be granted access to Government facilities during the operational window; however, access remains subject to facility availability and may be restricted during emergencies or Government-directed closures.

9.2.1. Remote Personnel: Personnel authorized for remote work shall document operating practices that align with the core hours and mission tempo of their supported location. The Contractor is responsible for ensuring that remote performance does not degrade the quality or level of support.

9.3. Workplace Flexibility: The Contractor may be required to access facilities or perform work outside of standard duty hours to support mission-critical requirements as directed by the Contracting Officer's Representative (COR).

9.4. Base Closures and Inclement Weather: In the event of inclement weather or emergency situations, the Contractor shall adhere to the reporting guidance issued by the installation to at their primary place of performance.

9.4.1. Quantico Personnel: Staff assigned to the Russell-Knox Building shall monitor the Marine Corps Base Quantico status at: https://www.quantico.marines.mil/Resources/Weather/ and the Office of Personnel Management status at: https://opm.gov/status.

9.4.2. Reporting Protocol: During base closures or delayed openings, Contractor personnel shall follow the same reporting instructions as Government civilians (e.g., telework or administrative closing) as directed by the COR.

9.5. Federal Holiday Observance: The Contractor shall observe Federal holidays in accordance with the schedule and policies established by the Office of Personnel Management (OPM). When a holiday falls on a Saturday or Sunday, the observance day will align with the OPM-designated "in-lieu-of" day. The following legal public holidays are observed:

- New Year's Day: January 1st
- Martin Luther King, Jr. Day: Third Monday in January
- Washington's Birthday (President's Day): Third Monday in February
- Memorial Day: Last Monday in May
- Juneteenth National Independence Day: June 19th
- Independence Day: July 4th
- Labor Day: First Monday in September
- Columbus Day (Indigenous Peoples' Day): Second Monday in October
- Veterans Day: November 11th
- Thanksgiving Day: Fourth Thursday in November
- Christmas Day: December 25th

9.6. Scheduled and Situational Telework: To optimize workspace utilization within the AFOSI office environment and to support evolving mission requirements, the Contractor shall support both scheduled and situational telework for its personnel. Telework is not an entitlement; it is authorized at the sole discretion of the Government and may be rescinded or modified at any time based on operational necessity.

9.7. Remote Performance Requirements: On days when Contractor personnel are not required to be physically present at Government facilities, the Contractor shall ensure that employees remain fully productive and accessible from an alternate work location. The Contractor is responsible for ensuring that all teleworking personnel have the necessary equipment, secure connectivity, and environment to perform their duties in accordance with the PWS.

9.8. Authorization and Coordination: All telework arrangements must be coordinated with and approved by the Contracting Officer's Representative (COR). The Contractor shall maintain a roster or schedule of teleworking personnel and ensure that "in-office" coverage remains sufficient to meet on-site mission requirements as defined by the Government.

9.9. Kickoff/Orientation Meeting

9.9.1. Coordination and Scheduling: Within five (5) calendar days of contract award, the Contractor shall organize, schedule, and facilitate a Project Kick-Off Meeting. At the Government's discretion, this session may be conducted in person at a designated Government facility or virtually via secure platforms such as Microsoft Teams or Zoom. The Contractor shall submit a draft Kick-Off Meeting Agenda to the Contracting Officer's Representative (COR) for review and approval no later than (NLT) three (3) calendar days after contract award. The Contractor shall incorporate any Government revisions and finalize the agenda prior to the scheduled meeting date. The Government will provide the Contractor with the anticipated number of participants in advance.

9.9.2. Purpose and Scope: The primary objective of this meeting is to establish a formal introduction between Contractor staff and the Government stakeholders assigned to this effort. This forum shall serve as the baseline for aligning project expectations, including but not limited to:

9.9.2.1. Technical & Management Oversight: Review of the PWS, performance milestones, and management structures.

9.9.2.2. Operational Logistics: Coordination of travel authorizations, facility access, and resource allocation.

9.9.2.3. Communications: Establishment of formal lines of communication between the Contractor, the Contracting Officer (CO), and the Contracting Officer's Representative (COR).

9.9.2.4. Reporting Standards: Clarification of the frequency, format, and delivery methods for all required contract deliverables and status reports.

9.9.3. Attendance and Documentation: At a minimum, attendees shall include the Contractor's Key Personnel, primary Government stakeholders, and the COR. The Contractor shall develop and distribute a comprehensive Kick-Off Meeting Agenda to all participants at least 24 hours prior to the meeting. This agenda shall encompass the aforementioned topics and provide a framework for the initial execution of the contract.

9.10. Transition In.

9.10.1. Transition-In Period: The Contractor shall execute a seamless and transparent transition from the incumbent contractor to ensure the continuity of mission-critical IT services. The primary objective of the transition-in period is to achieve full operational capability and assume all responsibilities outlined in this PWS by the contract performance start date, with no degradation of services.

9.10.2. Transition-In Plan (TIP): The Contractor shall submit a Transition-In Plan as part of their initial proposal. The TIP shall serve as the roadmap for the transition and must address:

9.10.2.1. Program Management and Governance: The TIP shall detail the Contractor's management approach for the transition period.

- Schedule and Milestones: A detailed Integrated Master Schedule (IMS) identifying all transition activities, timelines, dependencies, and responsible parties, culminating in the assumption of full performance.
- Risk Management: A plan to identify, analyze, and mitigate potential risks that could impact the transition schedule, cost, or performance.
- Communication Plan: A framework for all transition-related communications, including a schedule of recurring status meetings with Government stakeholders and the incumbent contractor.
- Key Personnel Integration: A plan for the integration of all proposed Key Personnel, ensuring their availability for all transition activities from the start of the transition-in period.

9.10.2.2. Personnel Management and Staffing: The TIP shall outline the Contractor's strategy to ensure a fully staffed, qualified, and certified workforce is in place by the contract performance start date.

- Staffing Plan: A comprehensive plan detailing the timeline and process for recruiting, hiring, and onboarding all necessary personnel to meet the requirements of the PWS.
- Position Fulfillment: A staffing roster that tracks the status of all positions to ensure 100% of required personnel are identified and ready for duty.
- Qualifications and Certifications: A process to verify and document that all personnel meet or exceed the security, technical, and certification requirements specified in this PWS prior to the performance start date.

9.10.2.3. Technical and Operational Onboarding: The TIP shall describe the Contractor's methodology for gaining complete situational awareness of

the technical environment and operational procedures.

- Knowledge Transfer: A plan for conducting knowledge transfer sessions with incumbent and Government personnel to understand existing workflows, standard operating procedures (SOPs), and service level agreements (SLAs).
- System and Infrastructure Familiarization: A schedule for conducting site visits and technical exchanges to gain a comprehensive understanding of all Government IT systems, hardware, software, and network architecture.
- Assumption of Operations: A detailed checklist and timeline for the orderly transfer of all operational tasks and responsibilities.

9.10.2.4. Security, Access, and Compliance: The TIP shall detail the Contractor's plan to meet all physical and logical security requirements.

- Security Clearance Adjudication: A process and timeline for submitting and tracking all required personnel security clearances and background investigations.
- Access Credentialing: A plan for obtaining all necessary access credentials, including Common Access Cards (CACs), network/system accounts, and physical access badges, for all personnel.
- Compliance Documentation: A process for ensuring all personnel complete mandatory Government security training and sign all required user agreements and non-disclosure agreements (NDAs) prior to being granted access.

9.10.2.5. Logistics and Resource Management: The TIP shall outline the procedures for the accountability and management of all Government and Contractor resources.

- Government Furnished Property/Information (GFP/GFI): A plan to conduct a joint inventory with the Government to formally accept and establish accountability for all GFP/GFI.
- Contractor Acquired Property: If required, a timeline for the acquisition, delivery, and staging of all Contractor-provided equipment and materials required for performance.
- Asset Management: A description of the processes and systems the Contractor will use to manage and control all assets, including inventory, keys, and consumable stock levels, from day one of performance.

9.10.3. Site Orientation: The Contractor shall coordinate with the COR to ensure staff are briefed on facility-specific emergency procedures, safety protocols, and "Core Duty Hour" expectations.

9.10.4. Security Integration: All personnel must complete mandatory Government security training (e.g., Cyber Awareness, Privacy Act, CUI Handling) before being granted network access.

9.10.5. Transition Status Reporting: To ensure transparency during the Phase-In period, the Contractor shall generate:

9.10.5.2. Weekly Updates: Provide a written weekly status report to the CO and COR detailing progress against the Transition-In Plan milestones.

9.10.5.3. Full Performance Start: Upon successful completion of the 30 day transition-in period, on the first day of the full performance period, the Contractor shall be 100% staffed and capable of executing all tasks outlined in the PWS. Any remaining "learning curve" issues shall be handled internally by the Contractor and shall not impact the quality or timeliness of deliverables provided to the Government.

9.10.5.4. Cost: The transition period shall be conducted at no direct cost to the Government. The Offeror shall confirm their understanding that all costs associated with the transition are to be included within the firm-fixed-price of the subsequent performance periods.

9.11. Transition Out

9.11.2. Phase-Out/Transition-Out: The Contractor shall develop and submit a comprehensive Transition-Out Plan to the Contracting Officer (CO) and COR no later than (NLT) sixty (60) calendar days prior to the contract expiration date. The primary objective is to facilitate a seamless transfer of responsibility to a successor Contractor or the Government without disruption to the mission. During the transition period, the Contractor remains responsible for the full performance of all PWS requirements. The plan shall detail the methodology for knowledge transfer, including:

9.11.2.2. Operational Processes: Project management workflows and standard operating procedures (SOPs).

9.11.2.3. Stakeholder Management: Comprehensive lists of internal and external Points of Contact (POCs).

9.11.2.4. Document Repository: Mapping and delivery of all technical and project management documentation.

9.11.2.5. Work-in-Progress: Status reports for all ongoing technical initiatives and outstanding milestones.

9.11.2.6. Administrative Actions: A checklist of required Government actions to finalize the transition.

9.11.3. IT Coordination: Status of IT-related programs, software licenses, and hardware assets.

9.11.4. Communication and Coordination: Throughout the transition period, the Contractor shall facilitate effective communication with Government personnel and the incoming Contractor. This shall include mandatory weekly transition status meetings to track progress against the Transition-Out Plan and resolve any emerging issues.

9.11.4.2. Personnel Transition and Rights: The Government’s priority is workforce stability. The following personnel rules apply:

9.11.4.2.2. Recruitment: Succeeding Contractors may interview current employees for potential employment.

9.11.4.2.3. First Right of Refusal: The incumbent Contractor maintains the first right of refusal regarding their employees' assignments; however, the Contractor shall not impede an employee’s decision to transition to a successor firm.

9.11.4.2.4. Employee Release: The Contractor shall formally release any employee who voluntarily accepts a position with the succeeding Contractor to ensure no lapse in mission support.

9.11.4.2.5. Shadowing and Orientation: During the final thirty (30) days of the contract, if directed by the CO, the incumbent shall assist in orienting the successor’s personnel on routine tasks and environment-specific

protocols.

9.11.4.3. Property and Asset Transfer: The Contractor shall coordinate the turnover of all Government-Furnished Property (GFP).

9.11.4.3.2. Accountable Property: All items listed in the official property inventory (e.g., IT hardware, specialized equipment) shall be transferred directly to the Government or the successor as directed.

9.11.4.3.3. Consumables and Office Equipment: Non-accountable items (desks, chairs, and general office supplies) shall remain with the Government facility.

9.11.4.3.4. Contractor-Owned Property: Items purchased solely by the incumbent Contractor using corporate funds (not reimbursed as a direct cost) remain the property of the incumbent and shall be removed from the facility NLT the final day of the performance period.

9.12. Quality Control

9.12.2. Quality Assurance. The government shall evaluate the contractor's performance under this contract in accordance with the Quality Assurance Surveillance Plan. The contractor's performance will be monitored on a continuous basis to ensure that the contractor has performed in accordance with the performance standards. Any recurrence or failure to meet the requirements outlined in this PWS will be documented and reported as a failure to meet key performance measures.

9.12.3. Quality Control Plan (QCP). The Contractor shall develop and maintain an effective quality control program to ensure services are performed IAW this PWS, applicable laws and regulations, and best practices.. The QCP shall be submitted to the COR within fifteen days after contract award and shall be kept up to date within five days of updates/changes.

9.13. System For Award Management (Formerly CMRA)

9.13.2. The contractor shall report ALL labor hours (including subcontractor labor hours) required for performance of services provided under this contract via the System for Award Management (SAM) data collection site. The contractor is required to completely fill in all required data fields at

http://www.SAM.gov. Reporting inputs shall be for the labor executed during the period of performance for each government fiscal year (FY), which runs 1 October through 30 September. The UIC for AFDW is FF16M0. While inputs may be reported anytime during the FY, all data shall be reported not later than 31 October of each calendar year. The contractor may direct questions to the System for Award Management help desk.

9.13.3. Subcontractor Input in SAM. Prime contractors are responsible to ensure all subcontractor data is reported. Subcontractors will not be able to enter any data into SAM but will enter their information into a Bulk Loader spreadsheet available from the SAM helpdesk. Subcontractor shall fill in columns A-C then return it to the SAM helpdesk after it's completed, and a technician team will enter the information into SAM.

9.14. Security Instructions

9.14.2. Physical Security and Asset Protection: The Contractor is responsible for the continuous safeguarding of all Government-furnished property, equipment and documents.

9.14.3. Access Control and Credential Management: The Contractor shall implement rigorous internal controls to ensure that building access instruments (keys, passes, fobs, or CACs) are protected against loss, theft, or unauthorized use.

9.14.4. Access Codes and Combinations: Security codes and lock combinations provided by the Government shall be restricted to authorized personnel only. Sharing codes with individuals outside the organization is strictly forbidden.

9.14.5. Safeguarding Security Records: Any authorized written records of combinations to secure storage containers, vaults, or classified rooms shall be marked and safeguarded at a classification level equal to the highest level of material stored within that container or area.

9.14.6. Personnel and Vehicle Identification: The Contractor is responsible for ensuring that all staff and non-government-owned vehicles (POVs) obtain the necessary passes and identification items required for contract performance.

9.14.7. Credentialing: The Contractor shall coordinate with the COR to ensure all employees receive the appropriate badges and credentials prior to the start of

work.

9.14.8. Vehicle Access: All vehicles used by Contractor personnel to access the installation must meet base requirements for insurance, registration, and identification as prescribed by the installation commander.

9.14.9. Communications Security (COMSEC): The Contractor may require access to COMSEC information to fulfill mission requirements.

9.14.10. Safeguarding: Access and use of COMSEC shall be managed and safeguarded in accordance with the instructions provided in the DD Form 254.

9.14.11. Contractor Identification and Disclosure: To prevent the appearance of "personal services" and ensure transparency, Contractor personnel must always distinguish themselves from Government employees.

9.14.12. Common Access Cards (CAC): Personnel shall wear their Government-issued CAC in a visible manner at all times when outside their immediate workspace.

9.14.13. Communication: In all professional interactions, including meetings, telephonic conversations, and electronic mail, Contractor personnel shall identify themselves as such.

9.15. Travel

9.15.2. Local Travel and Commuting: The Contractor shall perform local travel to attend meetings and events or as required by the mission. Travel within the National Capital Region (NCR) commuting vicinity is considered a standard business cost and the Government will not provide separate reimbursement for mileage, tolls, or parking for travel within this area.

9.15.3. CONUS Travel: The Contractor may be required to conduct CONUS travel to perform mission-related duties and/or attend meetings and events. The Contractor shall coordinate and obtain written approval from the COR at least ten (10) business days prior to travel.

9.15.4. OCONUS Travel: The Contractor may be required to conduct OCONUS travel to perform mission-related duties and/or attend meetings and events. For OCONUS travel the Contractor shall obtain COR approval at least twenty (20) business days prior to departure. The Contractor is responsible for obtaining all

necessary clearances and meeting country-specific entry requirements prior to travel.

9.15.5. Travel Authorizations and Regulations: All travel must be performed in accordance with the Joint Travel Regulations (JTR) to ensure cost-efficiency and team integrity.

9.15.6. Urgent Travel. If mission requirements dictate urgent travel, the Contractor shall notify the COR as soon as the requirement is identified to seek expedited approval.

9.15.7. Government Vehicle Usage: When authorized by the Government, Contractor personnel may operate General Services Administration (GSA)-leased or AFOSI-procured vehicles to fulfill mission requirements. Usage is strictly limited to official business and must comply with all installation and AFOSI-specific motor vehicle policies.

9.15.8. Trip Reports: Within five (5) business days of returning from travel, the Contractor shall submit a Trip Report to the Program Manager (PM) and the COR. These reports shall summarize the purpose of the trip, key activities, and any significant outcomes or follow-up actions.

9.16. Employee Accountability and Workforce Continuity

9.16.2. Workforce Stability and Turnover Management: The Contractor shall maintain a stable, highly qualified workforce throughout the period of performance. The Contractor shall target an annual employee turnover rate of 10% or less. To ensure mission continuity, the following vacancy constraints apply:

9.16.2.2. Filling Vacancies: No position shall remain vacant for more than fifteen (15) business days.

9.16.2.3. Staffing of Contractor Personnel. Provide a detailed plan for recruiting, hiring, and onboarding personnel. Include strategy for retaining incumbent staff, if applicable, and contingency plans for filling any vacancies.

9.16.2.2.1. The Contractor shall provide a stable workforce, throughout the duration of the contract, by maintaining a 10% or less employee turnover rate. No position shall remain vacant for more than fifteen (15) business days. The government shall not be billed for positions

left vacant over fifteen (15) business days unless the vacancy is due to government delay and otherwise approved by the CO.

9.16.3. Personnel Roster and Sensitive Data Protection: The Contractor shall maintain an accurate and comprehensive roster of all personnel assigned to this contract. If Personally Identifiable Information (PII) is included on the roster, it must be password-protected or encrypted in accordance with agency data protection standards. The Contractor shall provide an updated listing immediately upon any change in personnel or upon formal request by the Government.

9.17. Contractor Professionalism and Conduct

9.17.2. The Contractor shall uphold a high standard of professional appearance, conduct, and demeanor at all times while representing the Government or performing duties on a Government installation. All deliverables and work assignments shall be executed in strict accordance with established project timelines and milestones. Contractor personnel must demonstrate the ability to function effectively and maintain peak efficiency during sustained periods of increased operational tempo, high-pressure scenarios, and mission-related stress. The Contractor is responsible for ensuring its workforce remains resilient and capable of meeting performance standards under demanding conditions. As a core requirement, Contractor personnel shall function as an integral component of a multi-disciplinary team of professionals dedicated to the protection of Department of the Air Force (DAF) personnel, assets, and resources.

9.18. Freedom Of Information Act (FOIA)

9.18.2. All official Government records created, maintained, or processed in the performance of this contract are subject to the Freedom of Information Act (5 U.S.C. § 552), DoW 5400.7-R, and all applicable Department of the Air Force Supplements. The Contractor shall provide full cooperation to the Government to ensure compliance with these statutory disclosure requirements. The Contractor is strictly prohibited from releasing any information or records to any party, including members of the public or Government/Contractor personnel acting in a private capacity, in response to a FOIA request. This prohibition applies to all inquiries, whether received in writing, electronically, or orally. Upon receipt of any request for information under FOIA, the Contractor shall immediately, and in no case later than 24 hours after receipt, notify the Contracting Officer (CO) and the Contracting Officer's

Representative (COR). The Contractor shall forward the request to the CO for formal coordination with the AFOSI FOIA Manager. The Government maintains sole authority to review, redact, and authorize the release of records to ensure compliance with agency policy and legal exemptions.

All official Government records generated, maintained, or processed under this contract are subject to the provisions of the Freedom of Information Act (5 U.S.C. § 552), DoW 5400.7-R, and the applicable Air Force Supplements. These regulations govern the public's right to access Federal agency records, and the Contractor shall ensure full cooperation with the Government in meeting these legal obligations. If the Contractor receives any request for the disclosure or release of information, whether submitted in writing or conveyed orally, they are strictly prohibited from responding to the requester directly. This applies to all inquiries from the public, including Government or Contractor personnel acting in a private capacity. The Contractor shall immediately notify the Contracting Officer (CO) of any such request. The CO will subsequently coordinate with the AFOSI FOIA Manager to ensure the request is processed, reviewed, and redacted (if necessary) in accordance with statutory requirements and agency policy.

9.19. Controlled Unclassified Information (CUI)

9.19.2. The Contractor shall safeguard all CUI generated or utilized in strict accordance with Department of War (DoW) standards. Such information must be protected from unauthorized disclosure until it is formally approved for public release by the Government. The Contractor shall implement procedures for the proper marking, handling, dissemination, and secure storage of CUI as prescribed by DoWI 5230.09 (Clearance of DoW Information for Public Release), DoWI 5230.29 (Security and Policy Review of DoW Information for Public Release), and DoWI 5400.04 (Provision of Information to Congress). Furthermore, all administrative and technical safeguards must align with DoWM 5400.07 (DoW Freedom of Information Act (FOIA) Program). Failure to comply with these marking and safeguarding requirements may result in the immediate suspension of access to Government information systems.

9.20. Privacy Act Compliance

9.20.2. Performance under this contract may necessitate access to data protected by the Privacy Act of 1974. The Contractor shall ensure all personnel maintain strict adherence to the requirements of Title 5 of the U.S. Code, Section 552a, as well as all relevant agency-specific policies and regulations regarding the

processing, handling, and safeguarding of such information.

9.21. Records Management

9.21.2. All documentation and records generated or received by the Contractor throughout the execution of this contract must be systematically maintained and remain promptly accessible for review. Every record produced under this agreement is considered the exclusive property of the U.S. Government and shall be surrendered or managed in accordance with Government disposition instructions.

9.22. Safety Concerns

9.22.2. The Contractor maintains exclusive responsibility for adhering to Occupational Safety and Health Administration (OSHA) standards to ensure the protection of its workforce. While the Government prioritizes a safe working environment, it assumes no liability for overseeing "personal" safety protocols that do not pose a direct risk of damage to Government property, equipment, or resources.

9.23. Inherently Governmental Functions

9.23.2. The Contractor is strictly prohibited from executing any tasks or responsibilities that constitute inherently governmental functions, as characterized under Federal Acquisition Regulation (FAR) Subpart 7.5. All services performed under this PWS must remain within the scope of non-personal services and shall not involve the exercise of sovereign Government authority or the determination of agency policy.

9.24. Ethics

9.24.2. The Contractor is prohibited from employing any U.S. Government personnel if such employment results in a conflict of interest or the appearance thereof. Furthermore, no member of the Department of the Air Force, whether in a military or civilian capacity, shall be employed by the Contractor unless that individual has formally requested and obtained the necessary authorizations as prescribed by DoWD 5500.07, Joint Ethics Regulation (JER).

9.25. Professional Appearance of Workspace

9.25.2. The Contractor shall maintain a professional and organized work environment, ensuring that all assigned areas remain free of clutter and debris. It is the Contractor's responsibility to uphold a high standard of orderliness to mitigate risks and prevent any conditions that could result in safety violations or workplace hazards.

9.26. Workplace Conduct

9.26.2. The Contractor shall maintain a drug-free and professional workplace. The consumption, possession, or distribution of alcoholic beverages or illegal drugs by Contractor personnel while on duty or at Government facilities is strictly forbidden. Personnel must report for duty in a condition fit for work. The Contractor shall immediately remove any employee found to be under the influence of, or impaired by, alcohol or drugs. The Contractor shall notify the CO and COR immediately following the removal of any employee for impairment and provide a plan to ensure mission continuity.

9.27. Traffic Laws and Regulations

9.27.2. The Contractor and its personnel shall strictly adhere to all federal, state, and installation-specific traffic laws and regulations while operating vehicles on any Government property. This includes, but is not limited to, speed limits, parking restrictions, hands-free device requirements, and seat belt mandates. Violations of installation traffic laws may result in the suspension of base driving privileges or the removal of the individual's access to the facility, which shall not excuse the Contractor from meeting performance requirements.

9.28. Weapons, Firearms, and Ammunition

The Contractor shall ensure that all personnel are aware of and comply with strict prohibitions regarding weapons on Government property. Contractor employees are strictly prohibited from possessing or transporting personal weapons, firearms, or ammunition of any kind while on Marine Corps Base Quantico or any other military installation. This mandate applies to the individual's person, Contractor-owned vehicles, and privately-owned vehicles (POVs). All personnel and vehicles entering a military installation are subject to search. Discovery of prohibited items may lead to criminal prosecution and permanent revocation of base access.

ADDENDUM 1: Historical Data Supporting Labor Hours Listed for the Following Tasks

Appian Support

Para 2.3. This figure was derived from analysis and comparison to similar requirements. For this FFP effort, offerors may propose a flexible staffing plan to accommodate potential workload fluctuations.

Atlassian Support

Para 2.4. The Government's engineering estimate is 956 annual labor hours. This figure was derived from analysis and comparison to similar requirements. For this FFP effort, offerors must propose a flexible staffing plan priced to accommodate potential workload fluctuations. Previous Contract – FA701425F0299; Cost $112,500.00

Hyland OnBase Support

Para 2.5. The Government's engineering estimate is 956 annual labor hours. This figure was derived from analysis and comparison to similar requirements. For this FFP effort, offerors may propose a flexible staffing plan to accommodate potential workload fluctuations. Previous Contract FA701422F0281; Cost $168,471.60

ADDENDUM 2: Priority Response Matrix

Priority	**Response/Ticket Opened**	**Resolution**	**Case Type Usage Examples (not all-inclusive)**	**Notification Timeline**
1 – Critical (Outage)	Immediately Upon Credible Report (I-UCR)	4 Hours	-More than 50 people lose access to a network, application, or service on NIPR or SIPR -Users cannot access I2MS Application -AFOSI Region or AFOSI HQ lose network access or experience degradation (NIPR or SIPR) -Core routers or VPN down (NIPR or SIPR) -50 or more user systems are quarantined - DAF Enterprise Services (email, TEAMS, SharePoint) outage - Cybersecurity Incident involving Top Secret and above	Notify XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) within 45 minutes of discovery 24/7/7 via e-mail and phone call. Affected users notified with government direction. Provide updated status every 2 hours or as requested.

			-Issue impacting RKB Data Center Operations - Safety issue involving personnel working in room K1360 -Mission critical – mission critical communications are not being received or sent and/or functional group experience mission degradation/loss -Issues can be designated as CRITICAL by the XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) or XT Director or XT Senior Technical Advisor as needed due to mission impact or management visibility	

2-High (Outage)	I-UCR	8 Hours	--More than 20 but less than 50 users lose access to network, application, or service (NIPR or SIPR) -Users cannot access CI2MS Application or SIPR JIRA -Routers or VPN down on NIPR or SIPR impacting 20 but less than 50 users -More than 20 but less than 50 user systems are quarantined - Cybersecurity Incident involving Secret and above -The user is in AFOSI Top 4 (section 3.1.2 Executive Customer Support) -Issue impacting AFOSI Watch - DAF Enterprise Services (email, TEAMS, SharePoint) degradation	Notify XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) within 45 minutes of discovery 0600 EST -1900 EST 7 days a week via e-mail and phone call. Affected users notified with government direction. Provide updated status every 4 hours or as requested.

			-The user supports a command- wide AFOS I functional area or service -Escalate high priority tickets to critical priority if unresolved after 2 duty days in high -Issues can be designated as HIGH by the XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) or XT Director or XT Senior Technical Advisor as needed due to mission impact or management visibility	
3- Medium	30 Minutes	24 Hours	More than 20 but less than 50 users lose access to network, application, or service (NIPR or SIPR) -Single Detachment can't access NIPR or SIPR Users cannot access ONBASE – NIPR, IBM COGNOS, JIRA-JWICS -Escalate medium ticket to high priority if unresolved after 5	Notify XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) via email within 2 hours of discovery. Affected users notified with government direction. Provide updated status every duty day or as requested.

			duty days in medium -Issues can be designated as MEDIUM by the XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) or XT Director or XT Senior Technical Advisor as needed due to mission impact or management visibility	
4-Low	60 Minutes	3 Duty Days	-Normal user requests that do not cause work stoppage -Complex issues that are not mission critical and that do not affect more than 5 users -Moderately complex issues - Users cannot access ONBASE on SIPR -Escalate routine ticket to medium priority if unresolved after 7 duty days	Notify XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) via email within 2 hours if users cannot access ONBASE-SIPR. Provide updated status every duty day or as requested.
5- Routine, quick	4 Hours	1 Duty Day	-Easy/quick resolutions, quick turnaround requests such as: -Account creation, password resets, profile updates, active	N/A

			directory updates, IT Configuration info, websites/proxies, answer customer questions, send guides, instructions, and links	

Government Notification

For Critical Outage During Normal Duty Hours 0800 – 1600 M-F excluding weekends and govt holidays - perform all the actions below until verbal contact is made with government personnel:

- Send email to XT Leadership (XT Director, Senior Technical Advisor) and XTI Leadership (XTI AD, XTI Field Liaison, XTI Chief of Network Operations) using govt email describing critical outage.

Name	Title	Govt Email	Govt Desk Phone	After Hours Phone
	XTI Associate Director			
	XTI Chief Network Operations			
	XTI Field Liaison			
	XT Senior Technical Advisor			
	XT Director			

- Call the XTI Associate Director's Govt Desk Phone. If no answer, leave message and wait 10 minutes for a call back. If no call back, call the next person on the list. If no answer, leave a message. Wait 10 minutes. Continue until verbal contact is made with an XT leader.
- Once verbal contact is made with XT Leadership, a government action officer will be assigned as the lead POC to receive updates and disseminate information within the government and coordinate with the contractor until resolution.

For Critical Outage Outside Normal Duty Hours to include nights and weekends, follow the above process of sending an email to XT Leadership and begin calling using the after hours phone number.

For High Outage During Normal Duty Hours 0800 – 1600 M-F excluding weekends and govt holidays, follow the **Critical Outage** During Normal Duty Hours instructions.

For High Outage Outside Normal Duty Hours to include nights and weekends, from 0600 EST -1900 EST 7 days a week, send e-mail try and make phone contact to after hours phone number leaving a message and waiting 30 minutes between calls.

For Medium send email to all XTI Leadership.

For Low email to all XTI Leadership if ONBASE on SIPR is down.

Outages Reported by Field CFPs

Outages detected by Field CFPs (East, West, PACAF, USAFE) will open a ticket and contact XTI Leadership to help coordinate and assign a government action officer. XTI leadership will contact the contractor's on-call phone (240-778-xxxx) for after-hours support.

Mission Partners Contacts

ITCSU

The ITCSU Service Desk Hours of operation are 0700 EST-1800 EST Monday-Friday at (571-305-xxxx). Phone tree options are as follows:

Option 1 – Service Desk

Option 2 – Network

Option 3 – VoiP

Option 4 – Systems

Option 5 – Cybersecurity

Option 6 – After Hours Support

If no response from Service Desk After Hours Support, please call the Security Operations Center (SOC) (571-305-xxxx)

844th Comm Group and Andrews Comm Squadrons (844th – Pentagon, 744th -JBA, 794th – JBAB, 894th -NCR)

The AFNCR Service Desk at (xxx-xxx-xxxx) is manned 0600 EST – 1800 EST Monday – Friday will be your starting point for everything.

Additional Numbers for the AFNCR Service Desk

240-857-xxxx – Main telephone line for reporting tickets.

301-981-xxxx – Secondary phone number

202-767-xxxx – Secondary phone number

307-981-xxxx – Secondary phone number

A Teams Chat "AFOSI Coordination and Troubleshooting" which includes members from XTI/XTA, Abacus Contractor, and 844th Comm Group Civilians and Contractors is monitored 24/7 and used to coordinate resolution of issues.

In an extreme emergency requiring 1-4 hr response times, please call the Major Incident Line (240-612-xxxx)

83rd NOS
