ACRONYMS

The following are common acronyms used in contract documents and/or Government meetings:

AFES	Adaptive Force Equipment Sets
AMHS	Automated Message Handling System
AOR	Area Of Responsibility
AT	Anit-Terrorism
ATO	Anti-Terrorism Officer
BICmd	Blount Island Command
CAC	Common Access Card
CBRN	Chemical, Biological, Radiological and Nuclear
CAF	Consolidated Adjudication Facility
CFR	Code of Federal Regulations
COCOM	Combatant Commander
CONUS	Continental United States (excludes Alaska and Hawaii)
COR	Contracting Officer Representative
DD254	Department of Defense Contract Security Requirement List
DFARS	Defense Federal Acquisition Regulation Supplement
DOD	Department of Defense
DOD SAFE	DoD Secure Access File Exchange
DOTS	DoDIIS One-Way Transfer Service
ECMRA	Enterprise-Wide Contractor Manpower Reporting application
EUCOM	U.S. European Command
ETA-IBS	Electronic Transportation Acquisition - Integrated Booking System
FAR	Federal Acquisition Regulation
FPCONS	Force Protection Conditions
FDP&E	Force Deployment & Planning Execution
FIE	Fly in/Flow In Echelon
FMF	Fleet Marine Force
FMT	Force Management Tool
FY	Fiscal Year
GCC	Geographic Combatant Commander
HQMC	Headquarter Marine Corps
ICODES	Integrated Computerized Deployment System
IAW	In Accordance With
IT	Information Technology
IFS	Indoor Storage Facility
IGC	IDE-GNT Convergence
JET	JOPES Editing Tool
JFRGII	Joint Force Requirements Generator II
JLENT	Joint Logistics Enterprise
JLLIS	Joint Lessons Learned Information System
JOPES	Joint Operations Planning Execution System
JPERMS	JOPES Permissions
KO	Contracting Officer
LOGCOM	Marine Corps Logistics Command
LOGTOOL	USMC Logway
MAGTF	Marine Air Ground Task Force

MAP-K	Marine Augmentation Unit-Kuwait
MARCORLOGCOM	Marine Corps Logistics Command
MC	Marine Corps
MPSRON	Marine Prepositioning Force Squadron
MCPP	Marine Corps Prepositioning Program
MCATS	Marine Corps Action Tracking System
MCO	Marine Corps Order
MCSF-BI	Marine Corps Support Facility, Blount Island
MEB	Marine Expeditionary Brigade II
MEU	Marine Expeditionary Unit
MCPIC	Marine Corps Prepositioning Information Center
MCPP-N	Marine Corps Prepositioning Program-Norway
MPS	Maritime Prepositioning Ships
MLTA	Messaging Liaison Tasking Authority
MLS	Military Shipping Label
NATO	North Atlantic Treaty Organization
NFPA	National Fire Protection Association
OSHA	Occupational Health and Safety Administration
OCI	Organizational Conflict of Interest
OCONUS	Outside Continental United States (includes Alaska and Hawaii)
PDA	Personnel Digital Assistant
POC	Point of Contact
PRS	Performance Requirements Summary
PWS	Performance Work Statement
QA	Quality Assurance
QASP	Quality Assurance Surveillance Plan
QC	Quality Control
QCP	Quality Control Program
RAM	Random Access Measures
RFITV	Radio Frequency In Transit Visibility
ROMO	Range of Military Operations
RQT	Rapid Query Tool
SAM	System for Award Management
SSDM	Sea Service Deployment Module
TCIR	Total Case Incidence Rate
TPFDD	Time Phased Force Deployment Data
TSC	Theater Security Cooperation
ULN	Unit Line Number
VPP	Voluntary Protection Program

PERFORMANCE WORK STATEMENT (PWS)

Joint Operations Planning and Execution System (JOPES) & Message Task Liaison Support Services

Blount Island Command

General Information

1.1. GENERAL. This is a non-personnel services contract. The Government shall not exercise any supervision or control over the contract service providers performing the services herein. Such contract service providers shall be accountable solely to the Contractor who, in turn is responsible to the Government.

1.2 BACKGROUND. The United States Marine Corps Support Facility Blount Island (MCSF-BI) and Blount Island Command (BICmd) are located on Blount Island in Jacksonville, Duval County, Florida. Although the island originally consisted of a series of small natural islands near the mouth of the St Johns River, it is now primarily an artificial feature that was created from dredge spoil between 1930 and 1975. MCSF-BI sits on the eastern half of the island and encompasses approximately 900 acres. MCSF-BI is ten miles northeast of Jacksonville's central business district and seven miles west of the Atlantic Ocean. Adjacent to a federally maintained state and local deep-water shipping channel, the island has direct unobstructed access to the ocean.

BICmd is the Marine Corps Logistics Command's (LOGCOM) agency for managing the Marine Corps Prepositioning Programs (MCPP). As such, it plans, coordinates, and executes the logistics efforts in support of the Maritime Prepositioning Ships (MPS) program, the Marine Corps Prepositioning Program-Norway (MCPP-N) and the Marine Corps Prepositioning Program-Philippines (MCPP-PHIL).

As modern warfare continues to evolve, the Marine Corps is entering a period of substantive change that will impact our prepositioning programs. Over the course of the next decade, the MCPP must fundamentally change the way it supports the Fleet Marine Force (FMF) and its assigned missions. The MCPP will transition into a balanced afloat and ashore integrated prepositioning network which feeds into regional and global Joint Logistics Enterprise (JLENT) pipelines capable of rapidly assembling, deploying and sustaining the right size force in regional and global conflicts.

BICmd and its supporting contractors must be capable of executing current operations while simultaneously modernizing and transitioning into a future enterprise, capable of supporting a distributed prepositioning network based on the Marine Corps' ongoing Force Design efforts.

The Marine Corps Prepositioning Program (MCPP), which currently consists of two Maritime Prepositioning Force (MPF) Squadrons (MPSRON: MPSRON-2 and MPSRON-3), MCPP-N and the MCPP-PHIL, have been operationally invaluable in supporting our nation's interests across the world. These three unique, yet distinctly different programs, provide the essential elements needed to support and execute crisis response, global reach, and forward presence. The MCPP enables the rapid deployment of Marine Air Ground Task Force (MAGTFs) and/or augment individual Marine units forward deployed. These forces are uniquely capable of strengthening alliances, securing strategic access and defeating adversaries.

The MCPP is a keystone in the Marine Corps capability for setting the conditions for national security. The prepositioning of equipment and supplies in support of Marine Air Ground Task

Force (MAGTF) of all sizes, up to and including a Marine Expeditionary Brigade (MEB), capable of executing missions across the Range of Military Operations (ROMO), enables Marine forces to fulfill their role and responsibility as our nation's force in readiness in a time of crisis. Our prepositioning programs will continue to enable operations across the Joint Operational Continuum including prepositioning capability sets and supplies across a logistics network spanning the globe. This will enable the FMF to shape, provide deterrence, seize the initiative, dominate, stabilize and enable the civilian authorities. Currently, when combined with the forces and their equipment arriving in the fly or flow-in echelon (FIE), prepositioning programs provide forward deployed equipment and supplies needed to sustain up to a MEB-sized MAGTF for 30 days of operations: thus, reducing total strategic lift requirements.

The MCPP consists of both afloat and ashore capabilities. Both the afloat and ashore programs are managed out of the Continental United States (CONUS) by BICmd at MCSF-BI, Jacksonville, Florida.

1.3 MPF. The current Marine Corps afloat program is made up of Navy owned vessels divided into two squadrons, MPSRON-2 located in Diego Garcia and MPSRON-3, located in Guam and Saipan. The ships currently cycle through BICmd in Jacksonville, Florida every 36-42 months to be reset with a modernized load.

1.3.1 MCPP-N. The Marine Corps' MCPP-N is one of two ashore prepositioning programs. It is in the Kingdom of Norway. MCPP-N is Headquarters Marine Corps (HQMC) sponsored and bilaterally managed with the host nation to support the reinforcement of Norway and U.S. Marine Corps global expeditionary operations, including establishment of forward operating bases and selected security cooperation activities in support of U. S. geographic combatant commanders. Equipment and supplies are prepositioned and maintained in six caves, three (3) of which are climate controlled for the storage of all classes of supply (less Class V munitions) and three (3) are specifically intended for the storage of Class V. MCPP-N is currently equipped to support three (3) types of MAGTFs.

1) A crisis response capable MAGTF (approx. 5000 personnel) built around a Marine Infantry Battalion (Reinforced),

2) Three (3) Theater Security Cooperation (TSC) MAGTFs, each built around a Rifle Company, and

3) Augmenting up to and including a MEB which also requires closing MPF or amphibious ships.

The program is undergoing another transition where the PO will be designed to support a MEB (-) (Reinforced) with additional equipment in support of Adaptive Force Equipment Sets (AFES) such as cold weather; Chemical, Biological, Radiological and Nuclear (CBRN); and Arrival and Assembly. Equipment and supplies making up this program has and continues to support all Geographic Combatant Commanders (GCC) around the world but due to its geographical location, has assets required specifically to operate in the U. S. European Command (EUCOM) region with North Atlantic Treaty Organization (NATO) forces.

1.3.2 MCPP-PHIL. The Marine Corps' MCPP-PHIL is the second USMC ashore prepositioning program as currently configured and is in the Philippines. The MCPP-PHIL contains specific USMC equipment designed to provide an equipment set ashore as the Combatant Commander COCOM theater reserve with Theater Specific Equipment. MCPP-PHIL equipment is maintained and issued/recovered by BICmd at the direction of HQMC. Equipment and supplies are prepositioned and maintained in a warehouse at Subic Bay Free Port Zone. The location is

utilized to store communications equipment, Engineer equipment and Motor Transport equipment in temperature-controlled warehouse. In addition, the equipment sets support Special Purpose MAGTF Crisis Response Central Command and other Marine Corps units within the Area of Responsibility (AOR).

DESCRIPTION OF SERVICES/INTRODUCTION. The contractor shall provide required personnel to provide administrative support and security compliance services as necessary to ensure BICmd has a comprehensive Joint Operations Planning Execution System (JOPES) and Task Management program to include but not limited to the accountability of all messages and tasks, for collecting, organizing, relaying, assigning, and allocating information and tasks to the specified sections.

1.4 OPERATIONS. As stated above, each of the two squadrons returns to the MCSF-BI 36- 42 months for inspection, maintenance, update and/or exchange of equipment, supplies and munitions that are stored on board. Equipment and supplies are serviced or replaced in the facilities at Blount Island. Munitions are shipped by rail to the naval weapons rework facility for inspections and refurbishment as necessary and then returned to Blount Island by rail for back loading on the ship. Major container and lighterage inspections/repairs also take place off site.

Normally, a ship's maintenance cycle is conducted over a 69 day to 92-day periods. A typical maintenance cycle begins when a ship arrives at Blount Island's Berth 1 for download. This activity normally takes seven days. Upon completion of the download, the ship sails to a contracted dry dock where it undergoes maintenance and upgrades as necessary. Simultaneously, at BICmd, the equipment, and supplies are inspected, replaced, and/or repaired. This maintenance period can be as short as 70 or as long as 120 calendar days. The ship then returns from its separate maintenance cycle, is backloaded and sails to its area of responsibility. The backload, like the download, requires seven days.

1.5 OBJECTIVES. Manage the JOPES system.

1.5.1 SCOPE. The scope of this work statement is confined to the realm of current Joint Operation Planning and Execution System (JOPES version 4.5.0.0) process, procedures, maintenance and upkeep of JOPES requirements. The nature of this work is both sensitive and complex requiring coordination of disparate resources into a cohesive plan of action aggregating personnel with other units to maximize lift efficiency. The contractor is required to continually assessing potential vulnerabilities and associated risks with minimal information due to fluid planning developments the government may only have limited information to provide the contractor. By extrapolating the likelihood of any potential risk from these assessments, mitigation strategies and plans can be reviewed and updated. This work requires comprehensive knowledge of and direct experience of JOPES.

1.5.2 TASKS/DUTIES. The contractor shall perform the following tasks:

- Completely understand the Marine Corps planning process and articulate gaps, weakness to support BICmd mission, that includes logistics operations, planning and execution.

- Maintain automated systems (through management of data input and output) ensuring accuracy of data for transfer into JOPES and manage resources for use in contingency missions.

Expert knowledge of the Department of Defense JOPES, and the current Department of Defense requirements generation process through COCOM planning guidance to permit development of rapid and effective support to both deliberate and crisis planning. Ability to evaluate Commanders' requirements and develop and propose course of action which address those requirements for Maritime Prepositioning Program, Marine Corps Prepositioning Program Norway (MCPP-N) and Marine Corps Prepositioning Program Philippines (MCPP-PHIL) to include future ashore sites as they become operational.

- Serves as operational/functional JOPES, MAGTF Planner.

1.5.3 RESPONSIBILITIES

- Serves as the principal staff functional authority on JOPES policy, procedures, and supporting systems (as described herein) necessary to conduct joint force deployments for the entire range of conventional joint military operations.

- Ability to project, relate and adapt to existing situations to future requirements; agile to react with logistical programs and high capacity for responsibility.

- Input all required JOPES transactions.

- Create all JOPES related NEWSGROUPS.

- Monitor all JOPES Newsgroups and respond as required.

- Enters data in MAGTF Deployment Support System II (MDSSII), produces Transportation Control and Movement Document (TCMD), Military Shipping Label (MSL), and Radio Frequency In-Transit-Visibility (RFITV) tags. Transfers data into Joint Force Requirement Generator II (JFRG II) and JOPES to ensure compliance with both theater and DOD requirements.

- Review and analyze existing and proposed operational procedures and represent BICmd on all worldwide transportation movement matters.

- Conduct studies and analyze services for all modes of Government and commercial transportation and formulate transportation plans as it applies to BICmd.

- Responsible for logistics management of new or upgraded equipment systems and capabilities spanning the MPS program. Plans, directs, controls and coordinates logistics support programs. Determines control measures to provide logistics support data for management. Monitors/evaluates development of logistics support concepts and documentation to determine if discrepancies exist and makes corrections. Visits activities, units/sites and other subordinate elements to instruct, advise and assist staff and unit personnel in logistics support practices/procedures pertinent to communications equipment & supplies.

1.6 OBJECTIVE. Manage the Message Task Liaison duties.

1.6.1 SCOPE. The scope of this work statement is confined to the realm of 100% accountability

of all messages and tasks pertaining to BICmd. The contractor shall have the responsibilities for collecting, organizing, relaying, assigning, and allocating information and tasks to the specified sections. He/she will also make the timely and necessary responses to original assignees as required to ensure a professional relationship is maintained with commands pertaining to BICmd. The duties will include drafting and releasing Naval Message traffic for BICmd and MCSF-BI as required.

1.6.2 TASKS/DUTIES. The contractor shall perform the following tasks:

Completely understand the mission of BICmd to fully support the Command's mission, which includes logistics operations, planning and execution.

- Maintain automated systems ensuring accuracy of data for transfer into SharePoint and manage resources.

- Expert knowledge of the SharePoint and the Automated Message Handling System (AHMS).

- Serves as operational/functional SharePoint Operator.

- The Automated Message Handling System (AMHS) website contains two email inboxes, which enable the user to view messages sent from parent commands concerning Blount Island. It is he/she responsibility to decipher and determine if, where, how (whether it is information or a task itself), and who the message will be sent to within the command. Messages will typically pertain to certain sections within BICmd, and the Messaging Tasking Liaison Authority (MTLA) will ensure that information is passed properly via email and hard copy.

- Enterprise Tasker Support System (ETMS2). ETMS2 replaced service level and major command level tasking software. BICmd Task Manager, is responsible for assigning Task Office of Primary Responsibility (OPR), Office of Coordinating Responsibility (OCR), and due dates. This individual is required to send the Task with attachments to all relevant department directors, follow-up with a reminder email on the due date, maintain records of each Task, and close out all Tasks within the Enterprise Task Management Software Solution (ETMS2). This individual is also required to provide weekly reports of Tasks in progress, organized by due date.

1.6.3 RESPONSIBILITIES. Encompass receipt, distribution, and final input for all messages and tasks assigned to BICmd.

- Maintain automated systems ensuring accuracy of data for transfer into SharePoint. Manage and track all messages, taskers from ETMS2 and BICmd responses to each.

- Maintain 100% accountability of all messages and taskers pertaining to BICmd.

- Make timely and necessary responses to original assignees as required.

- Responsible for collecting, organizing, relaying, assigning, and allocating information and tasks to the specified section.

- Perform a wide range of technical input and oversight for taskers.

- Serve as the Command expert and focal point on all taskers.

1.7 PERSONNEL REQUIREMENTS

- Knowledge of the Department of Defense Transportation System.

- Be highly competent in the use of personnel computers, varied research methodologies, computer software (Microsoft Office Suite) and other products to provide program calculations, what-if scenarios, programmatic databases as specified herein, as well as associated documentation and support.

- Excellent communications, team building, and negotiation skills to work successfully with a diverse mix of military members, government civilians, and contractors in the execution of a variety of projects including plans generation, direct support to combatant commanders, training, analysis, and reporting.

- Have and maintain a SECRET Security clearance.

- Must be detail oriented and able to manage large projects through to completion.

- Must have 1-2 years minimum experience working as a JOPES 4.0 systems operator.

- Manage and analyze high quantities of detailed movement data to ensure accuracy and timely submission through the Force Deployment Planning and Execution (FDP&E) process.

- Track and provide visibility of detailed movement data.

- Manage and verify Time Phased Force Deployment Data (TPFDD) utilizing the JOPES Editing Tool (JET) and feeder systems (Web S&M, RQT, JFRG II, RF-ITV, etc.).

- Contractor builds Level VI detail requirement in Marine Air Ground Task Force Deployment Support System II.

- Draft, review, track, and release messages using Thunderbird newsgroup and be prepared to transition to JFRG II in the future.

- Demonstrate experience and skills to represent the organization to others, including meetings with senior military officers and government civilians, conferences, and other government and commercial organizations. This includes the ability to convey complex ideas in written and oral form and the ability to represent the organizational goals and objectives in contentious situations.

- Knowledge of systems analysis and design techniques, pertinent characteristics of system software, and computer equipment requirements, to the extent that the contractor

advises on new system functionality with high volume prepositioning data in order to perform studies to evaluate merits of proposed or existing applications.
Contractor employee must have knowledge and experience with system analysis and design techniques sufficient to write clear procedural instructions for user and operations personnel. The contractor will be involved in the testing process of the new systems.

- Knowledge of MTLA.

- Must have access and advance knowledge with the AMHS.

- In-depth knowledge of the Maritime Prepositioning Force Program and BICmd.

- Be prepared to travel away from the Command and deploy with the Marine Corps, as required.
-
- Advanced knowledge navigating the “ETMS2 Taskers” website.

- Must have the ability to effectively communicate orally and in writing.

- Must have the ability to maintain good working relations.

- Must have the ability to plan and organize work.

- Must have the ability to gather, analyze, organize, and present information and data.

- Must possess a fundamental knowledge of automated data processing concepts, systems capabilities, and must complete tasks within normal work hours. to effectively complete assigned tasks.

- Must have the ability to identify problems and develop innovative solutions.

- Must have the ability to use office automation tools and techniques to design and generate reports, briefing materials, and/or comparable documents. (i.e. Microsoft Office Microsoft Project, SharePoint, MCPIC, MCATS and AMHS message system).

- Must possess basic knowledge of security, safety, and environmental requirements specific to MPF operations at BICmd.

- Must possess knowledge of logistics management principles, concepts, policies and regulations.

1.8 WORK ENVIRONMENT. Work is normally in an office setting and requires normal safety precautions. On occasion, involves work outside office environment at download and backload sites during inclement weather and adverse conditions. There may be a need to work at remote deployment nodes during deployment execution operations. Requiring prolonged standing and walking on hard and sometimes uneven surfaces, stooping, bending, climbing, and working in tiring and uncomfortable positions, during deployment execution operations, is exposed to excessive noise from military vehicles, material handling equipment and sometimes adverse weather conditions.

1.9 DELIVERABLES. The following products/efforts are required of the contractor.

-Provide deliverables such as reports, analyses, briefings.

- For all BICmd movements in support of the Marine Corps Prepositioning Programs (MCPP) or MCLC.

-Generate weekly Unit Line Number (ULN) status reports, which include dates validated via certification process.

- Generate weekly recap of ULN in process, enroute and completed.

- Generate/establish MPSRON ULN structure.

- Generate MPSRON exercise requirements in JOPES.

- Provide weekly updates for all tasks assigned.

- Maintain all messages, tasks, and responses in an automated system.

1.10 APPLICABLE DOCUMENTS. Must have an intimate working knowledge of:

- CJCSM 3122.01 JOPES Vol I: Planning Policies and Procedures

- CJCSM 3122.03 JOPES Volume II, Planning and Execution Formats and Guidance.

- CJCSM 3130.04 Joint Deployment Policies and Procedures

- CJCSM 3122.04A, Joint Operation Planning and Execution System (JOPES), Volume II, (Supplemental Planning Formats and Guidance) (Classified)

- CJCSM 3150.16D, Joint Operation Planning and Execution System Reporting Structure (JOPESREP), Volume I

- DOD 4500.9-R, Defense Transportation Regulation (DTR)

- JP 0-2, Unified Action Armed Forces (UNAAF)

- JP 3-35, Joint Deployment and Redeployment Operations

- JP 4-0, Doctrine for Logistic Support of Joint Operations

- JP 4-01, Joint Doctrine for the Defense Transportation System

- JP 5-0, Joint Task Force Planning Guidance and Procedures

- JSCP, Joint Strategic Capabilities Plan

- DoD Directive 5220.22-M, (National Industrial Security Program Operating Manual (NISPOM))

- SECNAVINST 5510.30C, Department of the Navy Personnel Security Program

- SECNAVINST 5510.36B, Department of the Navy Information Security Program (ISP) Regulation

- MCO P3000.18, Marine Corps Planner's Manual

- MCO 3000.18B: Marine Corps Force Deployment Planning and Execution (FDP&E) process manual.

MCO 3061.1 Total Force Mobilization and Deployment Plan (TFMDP)

- MCO P5510.18B, United States Marine Corps Information and Personnel Security Program Manual (IPSP)

- MCO P5530.14E, Marine Corps Physical Security Program Manual

- MCWP 5-10, Marine Corps Planning Process

- MCDP 4, Logistics

- MCDP 5, Planning

1.10.1 APPLICABLE SYSTEMS. Due to the complexity and interoperability the contractor must have an intimate working knowledge of the following systems which integrate, interface, or provide data for JOPES requirements:

- Joint Operation Planning and Execution System (JOPES)
  1.A.) JOPES Editing Tool (JET) - Subsystem within JOPES
  1.B.) Rapid Query Tool (RQT) - Subsystem within JOPES
  1.C.) JOPES Permissions (JPERMS) - Subsystem within JOPES

- Mozilla Thunderbird (Newsgroups)

- Joint Force Requirement Generator II (JFRG II)

- Automated Message Handling System (AMHS)

- Sea Service Deployment Module (SSDM)

- LOGCOM SharePoint (Tasker Management)

- Department of the Navy Tasking, Records, and Consolidated Knowledge Enterprise Repository (DONTRACKER)

- Force Management Tool (FMT)

- DoDIIS One-Way Transfer Service (DOTS)

- DoD Secure Access File Exchange (DoD SAFE)

- Marine Corps Prepositioning Information Center (MCPIC)
- Electronic Transportation Acquisition - Integrated Booking System (ETA-IBS)
- Single Mobility System
- IDE-GTN Convergence (IGC)
- JLLIS (Joint Lessons Learned Information System)
- ICODES (Integrated Computerized Deployment System)
- LogTool (USMC LOGWAY)

1.11 PERIOD OF PERFORMANCE. The base period of performance shall be from 19 October 2026 – 18 October 2027 with four (4) one-year option periods. Notification to exercise option years will be given 90-120 days in advance.

- OY1 19 October 2027 – 18 October 2028
- OY2 19 October 2028 – 18 October 2029
- OY3 19 October 2029 – 18 October 2030
- OY4 19 October 2030 – 18 October 2031

1.12 GENERAL INFORMATION

1.12.1 QUALITY CONTROL. The contractor will provide quality control to data contained and entered applicable USMC transportation systems.

1.12.2 QUALITY ASSURANCE. The government shall evaluate the contractor's performance under this contract in accordance with the Quality Assurance Surveillance Plan. This plan is primarily focused on what the Government must do to ensure that the contractor has performed in accordance with the performance standards. It defines how the performance standards will be
applied, the frequency of surveillance, and the minimum acceptable defect rate(s).

1.12.3 RECOGNIZED HOLIDAYS.

New Year's Day
Martin Luther King Jr.'s Birthday
President's Day
Memorial Day
Juneteenth
Independence Day
Labor Day
Columbus Day
Veteran's Day
Thanksgiving Day
Christmas Day

1.12.4 HOURS OF OPERATION. The contractor is responsible for conducting business, between the hours of 0630 - 1700 Eastern Standard Time (EST) Monday thru Friday (contractor support services must be available on site for eight hours within the referenced core business hours) except Federal holidays or when the Government facility is closed (all personnel will be

notified through the Blount Island Mass Notification System) due to local or national emergencies, administrative closings, or similar Government directed facility closings. The Contractor must always maintain an adequate workforce for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. When hiring personnel, the Contractor shall keep in mind that the stability and continuity of the workforce are essential. The government may assume responsibility in the absence of the employee. As the services required depend on minimal staffing with specific skills that are not easily supported for prolonged absences and/or hiring actions, the contract value may be adjusted accordingly for such absences to reflect the reduced value of services provided.

1.12.5 PLACE OF PERFORMANCE. The work to be performed under this contract will be performed at MCSF-BI, Jacksonville, Fl. MCSF-BI is a United States Marine Corps installation.

1.12.6 TYPE OF CONTRACT. The Government will award a Firm Fixed Price Contract.

1.12.7 PERSONNEL AND INFORMATION SECURITY REQUIREMENTS.

1.12.7.1 GOVERNING SECURITY DIRECTIVES AND POLICIES. The contractor shall comply with DoD Directive 5220.22-M (National Industrial Security Program Operating Manual (NISPOM)), SECNAV M-5510.36 (Department of the Navy Information Security Program), SECNAV Instruction 5510.30C (Department of the Navy Personnel Security Program), MCO 5510.18B (United States Marine Corps Information and Personnel Security Program), and adhere to all Blount Island Command and Marine Corps Support Facility - Blount Island security instructions, orders, policies, and directives. See Attachment_____(DD Form 254).

1.12.7.2 SECURITY CLEARANCES. This contract requires the contractor to possess a Secret Facility Security Clearance in accordance with the DD Form 254 and will require contracted personnel to gain and maintain a favorably adjudicated T3 investigation in accordance with MCO 5510.18B. This assignment requires a favorably adjudicated T3 investigation. It is the contractor's responsibility for submission of security investigations for the performance of their work.

1.12.7.3 FINGERPRINTS. Prior to employment of new employees, the contractor shall coordinate with the BICmd Security Office for submission of electronic fingerprints. Upon completion of fingerprinting, the BICmd Security Office will provide the SF-85 or SF-86 application. The contractor shall implement staffing policies and procedures to ensure that pre-employment requirements are met in a timely manner to provide sufficient manning upon contract implementation and to meet workload fluctuations thereafter.

1.12.7.4 SECURITY CLEARANCE AND ACCESS. In order to be eligible to provide support to classified programs, the Contractor (to include team members and sub-contractors) shall be registered in the System for Award Management (SAM) database with an active Contractor and Government Unique Entity Identifier (UEI) Code or North Atlantic Treaty Organization (NATO) CAGE and either hold a facility clearance or be eligible to receive a facility clearance with personnel capable of obtaining and maintaining Secret clearances.

The government will have and exercise full and complete control over granting, denying, withholding, or terminating security clearances for the Contractor employees. Furthermore, the government reserves the right to grant personnel temporary security clearances in emergency

situations. However, this will not obligate the government to grant any of these personnel permanent clearances if the subsequent background investigation does not recommend the clearance.

1.12.7.5 PERSONAL IDENTITY VERIFICATION CARD. In support of this effort, three identification cards will be required to support the following functions:

- Facility/Base Access Only: Blount Island Command Badge (no access to computer)
- Information Systems Access: Common Access Card (CAC) (access to government computer)
- OCONUS Support: Uniformed Services Identification and Privilege Card

1.12.7.6 CAC REQUIREMENTS. The CAC is a DoD-mandated program affecting military, DoD civilians and eligible contractors. In addition to its use as an ID card, the CAC is expected to provide a variety of functional capabilities such as access to buildings and facilities, and secure access to government computer systems and networks. CACs shall by all personnel who meet one or both of the following criteria:

- Require local access to DoD computer networks and systems in either the unclassified environment, or the classified environment where authorized by governing security directives.
- Perform work which requires the use of a CAC for installation entry control or physical access to facilities and buildings.

1.12.7.6.1 To meet CAC eligibility criteria, contractors must obtain and maintain a favorably adjudicated Personnel Security Investigation (PSI). Prior to authorizing a CAC, contractors Joint Personnel Adjudication System (JPAS) record must indicate a completed and favorably adjudicated PSI or (at a minimum) that a PSI is submitted and accepted at U.S. Office of Management (OPM) with favorable fingerprints. The minimum acceptable investigation is a favorable T1. If the contractor's open investigation closes and is not favorably adjudicated, the contractor's CAC will be confiscated.

1.12.7.6.2 The contractor shall return all CACs from terminated employees to the government Trusted Agent Security Manager (TASM).

1.12.7.6.3 The contractor shall immediately remove any employee that endangers national security. Report violations of security requirements to the BICmd Security Manager to allow dual reporting to the appropriate consolidated adjudication facility (CAF).

1.12.7.7 BLOUNT ISLAND COMMAND PERSONNEL AND INFORMATION SECURITY POINTS OF CONTACT:

MSgt Justin Santiago
Security Manager
Commercial: 904-696-5132
Email: justin.santiago@usmc.mil

Derrick Williams
Assistant Security Manager

1.12.7.8 CONTRACTOR/SUBCONTRACTOR ACCESS TO MCSF-BI. To gain access to the installation, the Plans & Data Support Contractor will comply with requirements outlined in CmdO 5560.1 (Entry Control Procedures) for MCSF-BI badges and vehicle registration.

1.12.7.9 CONUS ANTI-TERRORISM (AT) CONSIDERATIONS

1.12.7.9.1 The Contractor shall comply with monthly Random Anti-Terrorism Measures (RAM) as directed by CmdO 3302.1, Marine Corps Support Facility Blount Island Mission Assurance Plan. These RAM, at a minimum, will consist of the random implementation of higher Force Protection Condition (FPCON) measures in consideration of the local terrorist capabilities. Random use of other physical security measures will be used to supplement FPCON measures.

1.12.7.9.2 FPCON describes the progressive level of countermeasures in response to a terrorist threat to U.S. military facilities and personnel. FPCON measures are used to deter terrorist attacks on DoD facilities and personnel by:
• Varying routines.

• Being sensitive to changes in the security atmosphere around DoD facilities and personnel.

1.12.7.9.3 The five FPCON levels are defined as follows:

• Normal: This condition applies when a general global threat of possible terrorist activity exist and warrants a routine security posture.

• Alpha: This condition applies when a general threat of possible terrorist activity against personnel and facilities, the nature, and extent of which are unpredictable.

• Bravo: This condition applies when an increased and more predictable threat of terrorist activity exists.

• Charlie: This condition applies when an incident occurs or intelligence is received indicating some form of terrorist action or targeting against personnel or facilities is likely.

• Delta: This condition applies in the immediate area where a terrorist attack has occurred or when intelligence has been received that a terrorist action against a specific location or person is imminent.

1.12.7.9.4 Personnel may be asked to leave the base or not be allowed to enter the base when in elevated FPCONs.

1.12.7.9.5 During increased FPCONs, the Contractor and its equipment are subject to search via scheduled spot check or RAMs at any time. Spot checks may also be conducted as RAMs.

1.12.7.9.6 During FPCONs Normal and Alpha, personnel without base issued passes

or credentials must be sponsored onto the installation.

1.12.7.9.7 During FPCON Bravo, Charlie and Delta, personnel without base issued identification shall be physically escorted onto the installation.

1.12.7.9.8 During Higher FPCONs (Charlie and Delta) the government will curtail non-essential operations/functions; access by non-essential contractors will be suspended as the direction of the Installation Commander.

1.11.7.9.9 ANTI-TERRORISM (AT) TRAINING. Anti-Terrorism Level I training is required by all personnel working aboard MCSF-BI. The Anti-Terrorism Officer (ATO) monitors this annual requirement. Training will be accessed on Marine Net or TWMS at: https://www.marinenet.usmc.mil or https://www.twms.navy.mil. Upon completion of the training, the individual will print and maintain a copy of his/her certificate. If the individual participates in a Temporary Additional Duty (TAD) overseas, he/she must have current AT Level I certification. Additionally, personnel going overseas on TAD are required to receive a travel advisory briefing provided by the ATO.

1.11.7.9.10 OPERATIONS SECURITY PROGRAM (OPSEC). All communications with DoD organizations are subject to OPSEC review. Contractor personnel shall be aware that computer and telecommunication networks are continually subject to intercept by unfriendly intelligence organizations. The DoD has authorized the military departments to conduct OPSEC monitoring and recording of emails/telephone calls originating from, or terminating at, DoD organizations. Therefore, Contractor personnel are advised that any time they send an email/place a call to, or receive an email/call from, a USMC organization, they are subject to OPSEC procedures. The Contractor shall ensure wide and frequent dissemination of the above information to all employees dealing with official DoD information. There are no known organizational conflicts of interest. The resultant contractor employees will be required to complete a DD 254 and sign a non-disclosure statement before beginning work as there may be access to classified or sensitive information.

1.11.7.9.11 PHYSICAL SECURITY. The contractor shall be responsible for safeguarding all government equipment, information, and property provided for contractor use. At the close of each work period, government facilities, equipment, and materials shall be secured.

1.12.8 POST AWARD CONFERENCE/PERIODIC PROGRESS MEETINGS. The Contractor agrees to attend any post award conference convened by the contracting activity or contract administration office in accordance with Federal Acquisition Regulation Subpart 42.5. The Contracting Officer, Contracting Officer’s Representative (COR), and other Government personnel, as appropriate, may meet periodically with the contractor to review the contractor's performance. At these meetings the contracting officer will apprise the contractor of how the government views the contractor's performance and the contractor will apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the government.

1.12.9 CONTRACTING OFFICER REPRESENTATIVE (COR). The COR monitors all technical aspects of the contract and assists in contract administration. The COR is authorized to perform the following functions: assure that the Contractor performs the technical requirements of the contract: perform inspections necessary in connection with contract performance: maintain written and oral communications with the Contractor

concerning technical aspects of the contract: issue written interpretations of technical requirements, including Government drawings, designs, specifications: monitor Contractor's performance and notifies both the Contracting Officer and Contractor of any deficiencies; coordinate availability of government furnished property, and provide site entry of Contractor personnel. A letter of designation issued to the COR, a copy of which is sent to the Contractor, states the responsibilities and limitations of the COR, especially regarding changes in cost or price, estimates or changes in delivery dates. The COR is not authorized to change any of the terms and conditions of the resulting contract.

1.12.10 IDENTIFICATION OF CONTRACTOR EMPLOYEES. In accordance with DFARS 211.106, all contract personnel attending meetings, answering Government telephones, and working in other situations where their contractor status is not obvious to third parties are required to identify themselves as such to avoid creating an impression in the minds of members of the public that they are Government officials. They must also ensure that all documents or reports produced by contractors are suitably marked as contractor products or that contractor participation is appropriately disclosed. All contractor personnel working at Blount Island will be required to obtain and wear badges in the performance of this service.

1.12.11 ORGANIZATIONAL CONFLICT OF INTEREST. Contractor and subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent Organizational Conflict of Interests (OCI) as defined in FAR Subpart 9.5. The Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential OCI and shall promptly submit a plan to the Contracting Officer to avoid or mitigate any such OCI. The Contractor’s mitigation plan will be determined to be acceptable solely at the discretion of the Contracting Officer and in the event the Contracting Officer unilaterally determines that any such OCI cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the OCI.

1.12.12 SAFETY

1.12.12.1 LOGCOM has been recognized by OSHA as an OSHA Voluntary Protection Programs (VPP) installation. VPP affects all applicable contractors operating on site. It is the contractor's responsibility to ensure its employees and managers are in full compliance with OSHA requirements and have a general understanding of VPP. All contractors, whether regularly involved in routine site operations or engaged in temporary projects such as construction or repair, must follow the safety and health rules of LOGCOM. Detailed information on VPP is available on the OSHA website at http://www.osha.gov/dcsp/vpp/index.html. The contractor shall comply with commercial safety standards as identified by the Occupational Safety and Health Administration. The contractor shall comply with all Federal, State, Department of Defense (DoD), Navy, Marine Corps (MC), and local rules and regulations to include but not limited to Occupational Safety and Health Administration (OSHA) Standards, National Fire Protection Association (NFPA) Standards, Navy Marine Corps Directive (NAVMC DIR) 5100.8, Marine Corps Order (MCO) 5100.8, and MARCORLOGCOMO (LCO) 5100.8. The contractor must have a written Safety Plan and submit it to the contracting officer representative (COR) for review and approval by the Contracting Officer within ten (10) calendar days after contract award. In addition to the requirements listed above, the contractor’s written Safety Plan

shall, as a minimum, address the following:

1. Mishap reporting procedures
2. Weekly safety meetings
3. Employee training requirements
4. Monthly safety inspections
5. Requirements for subcontractors to comply with the safety provisions of this contract

1.12.12.2 Additional Safety requirements:

1.12.12.2.1 Applicable Contractors: These requirements apply to contractors, subcontractors, and their employees or agents.

1.12.12.2.2 Days Away, Restricted, and or Transfer Case Incident Rate (DART): Number of recordable injuries and illness cases per 100 full-time employees resulting in days away from work, restricted work activity, and/or job transfer that a site has experienced in a given period.

1.12.12.2.3 Total Case Incidence Rate (TCIR): Total number of recordable injuries and illness cases per 100 full-time employees that a site has experienced in a given period.

1.12.12.2.4 Contractors must submit their 3-yr TCIR and DART rates as part of their proposal for the proposal to be considered technically acceptable.

1.12.12.2.5 As soon as reasonably possible but no later than 24 hours of any mishap or incident resulting in personal injury (OSHA recordable) and/or significant property damage while performing work authorized by this contract, the contractor shall notify the following:

1. The activity's Safety Representative – Name/Phone Number: Russell Prothero, Russell.Prothero@usmc.mil (904) 696-5624.
2. The COR; Richard Buhr, Richard.buhr@usmc.mil (904) 696-5038
3. The Contracting Officer: Stanly Sanders, Stanley.Sanders@usmc.mil (904) 696-4812.
4. A written report of the mishap/incident shall be sent within 24 hours to the designated Safety Representative, COR, and Contracting Officer stated herein.

1.12.12.2.6 Mishap notifications shall contain, as a minimum, the following information:

1. Contract Number, Name of Company, and Name and Title of Person(s) Reporting
2. Date, Time, and exact location of accident/incident
3. Brief narrative of accident/incident (Events leading to accident/incident)
4. Cause of accident/incident, if known
5. Estimated cost of accident/incident (material and labor to repair/replace)
6. Nomenclature of equipment and personnel involved in accident/incident
7. Corrective actions (taken or proposed)
8. Other pertinent information

1.12.12.2.7 Contractor must fully cooperate with LOGCOM safety personnel during safety inspections of the workplace and inspections of required documentation.

Safety requirements listed in this PWS that do not relate to the contractor's operations or services may be waived by the Contracting Officer. Objections made by the contractor must be reported to the Contracting Officer within 10 days of contract award.

Objections will be considered on a case-by-case basis.

1.12.12.2.8 Smoking and the use of tobacco products is allowed in designated areas only.

1.12.12.2.9 All vehicle operators and passengers of contractor and privately owned vehicles are required to wear seatbelts while their vehicle is in operation on the installation and/or performing work under this contract. The use of seatbelts is also required on all mobile construction equipment operating on the installation and/or performing work under this contract.

1.12.12.2.10 All vehicle operators and passengers are prohibited from using a cell phone, personal digital assistant (PDA), or Blackberry™, unless the vehicle is safely parked, or the operator is using a hands-free device. The use of portable headphones, earphones, or other listening devices (except for hand-free cell phones) while operating a motor vehicle is also prohibited.

1.12.12.2.11 Should an accident occur and in the event the US government investigates the mishap, the contractor and subcontractors shall cooperate fully and assist government personnel during the investigation period. Instructions pertaining to the assistance required from the contractor in support of an investigation and the point of contact of the command safety personnel involved in an investigation will be provided by the COR or the Contracting Officer.

1.12.13 GOVERNMENT FURNISHED FACILITIES, SUPPLIES, AND SERVICES. Unless otherwise authorized by the Contracting Officer, work shall be performed at Government provided facilities in Jacksonville, Florida. Basic facilities such as work space and its associated operating requirements (i.e. phones, desks, utilities, information technology, and consumable and general purpose office supplies) will be provided while working in Government facilities. Performance of this requirement may require work or desk space sharing.

1.13. 5237.102-90 ENTERPRISE-WIDE CONTRACTOR MANPOWER REPORTING APPLICATION (ECMRA). The contractor shall report contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract for the **Blount Island Command USMC** via a secure data collection site. Contracted services excluded from reporting are based on Product Service Codes (PSCs). The excluded PSCs are:

(1) W, Lease/Rental of Equipment.

(2) X, Lease/Rental of Facilities.

(3) Y, Construction of Structures and Facilities.

(4) D, Automatic Data Processing and Telecommunications, IT and Telecom-Telecommunications Transmission (D304) and Internet (D322) ONLY.

(5) S, Utilities ONLY.

(6) V, Freight and Shipping ONLY.

The contractor is required to completely fill in all required data fields using the following web address: https://www.sam.gov. Reporting inputs will be for the labor executed during the period of performance during each Government fiscal year (FY), which runs October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk, linked at https://www.sam.gov.

1.14. MISSION ESSENTIAL CONTRACT REQUIREMENTS. If the services provided hereunder are determined to be mission essential, the contractor shall comply with DFARS 252.237-7023 and 252.237-7024.

1.15. TRAVEL All travel efforts will be approved by the Contracting Officer prior to incurring any travel related costs; the Contractor will be responsible for coordination of all travel arrangements unless the Contracting Officer directs otherwise. The only travel reimbursed on this contract is the travel performed by the contractor's employees assigned to work directly on this contract; any travel performed by the Contractor's management team, for any purpose, will not be reimbursed. The Contractor shall be responsible for covering all costs associated with local travel; local transportation is not reimbursable under this contract as a travel expense.

Profit shall not be applied to the travel costs. Only approved travel and related expenses will be reimbursed to the Contractor for actual expenses associated with coach or economy airfare rates; for lodging, meals, and incidentals not to exceed per diem rates listed at http://www.gsa.gov/portal/category/104711 or http://www.fedtravel.com/travel-tools/per-diem-rates.html ; and reimbursable expenses. Although Contractor travel is not subject to the Joint Travel Regulation (JTR), the JTR standards for employee's reimbursable expenses will be used by the Contracting Officer for determining reimbursable expenses for authorization of Contractor travel. The JTR is posted at http://www.defensetravel.dod.mil/site/travelreg.cfm . The Contractor will be responsible for all travel expenses exceeding the authorized per diem rates unless previously approved in writing by the Contracting Officer. The Government will not reimburse or otherwise pay salary, wage expenses, or hourly rates incurred during or associated with travel. Any travel performed and not pre-approved by the Contracting Officer, shall not be reimbursed.

The Contractor may be required to travel to CONUS and OCONUS locations in support of this contract to fulfill the requirements contained in this PWS. The Contractor shall ensure all employees that travel OCONUS in support of this contract are in possession of a valid visa or passport as required by the State Department. The Contractor has full responsibility for obtaining visa(s) and/or passport(s). Defense Base Act Insurance if required for employees as defined by the Defense Base Act (42 U.S.C 1651, et seq).

The Contractor shall submit a Travel Authorization Request form for approval no less than 10 calendar days prior to the planned departure date. The Travel Authorization Request form requires approval of both the COR and/or government Project Manager and the Contracting Officer. Minimum documentation required for Travel Authorization includes (1) Name and title of traveler, (2) Purpose of the trip, (3) dates of travel and destination, and (4) travel mode(s) authorized (5) appropriate Contract Number and Contract Line-Item Number (6) and a detail of all anticipated expenses to be authorized with the net total to be authorized identified. Travel requests will specify and provide justification for any items that exceed what is authorized on the JTR, for example, excess baggage will only be authorized for one

Contractor's representative per trip. Government Contract Airline City Pair flights are not authorized for use by government Contractors. Contractor will book airline flights with the most direct route, and at the lowest possible price (standard coach or economy fares). The proposed cost shall be in accordance with the criteria outlined at FAR 31.205-46 for Travel. Estimated per-diem and lodging rates for travel within the Continental United States (CONUS) shall not exceed the General Services Administration (GSA) per diem rates; however, reimbursement will be based upon actual expenses incurred not to exceed the amount(s) authorized on a daily basis. For travel Outside the Continental United States (OCONUS), per diem set forth by the US Department of State shall be used. Per Diem rates can be found at http://www.defensetravel.dod.mil/site/perdiem.cfm.

The Contractor shall submit a Trip Report to the Contracting Officer and the COR within seven (7) business days of completing any authorized travel. The Trip Report shall be in a Contractor- Provided, Government Approved format describing the significant events of the trip and a summary of all actual expenses associated with the authorized travel for which reimbursement will be requested. Supporting documentation, to include receipts for actual expenses shall be attached to the provided for all expenses for reimbursement.

DEFINITIONS

CONTRACTOR. A supplier or vendor awarded a contract to provide specific supplies or service to the government. The term used in this contract refers to the prime.

CONTRACTING OFFICER. A person with authority to enter into, administer, and or terminate contracts, and make related determinations and findings on behalf of the government. Note: The only individual who can legally bind the government.

CONTRACTING OFFICER'S REPRESENTATIVE (COR). An employee of the U.S. Government appointed by the contracting officer to administer the contract. Such appointment shall be in writing and shall state the scope of authority and limitations. This individual has authority to provide technical direction to the Contractor as long as the direction is within the scope of the contract, does not constitute change, and has no funding implications. This individual does NOT have authority to change the terms and conditions of the contract.

DEFECTIVE SERVICE. A service output that does not meet the standard of performance associated with the Performance Work Statement.

DELIVERABLE. Anything that can be physically delivered but may include non-manufactured things such as meeting minutes or reports.

PHYSICAL SECURITY. Actions that prevent the loss or damage of Government property.

QUALITY ASSURANCE. The government procedures to verify that services being performed by the Contractor are performed according to acceptable standards.

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP). An organized written document specifying the surveillance methodology to be used for surveillance of contractor performance.

QUALITY CONTROL. All necessary measures taken by the Contractor to assure that the quality of a product or service shall meet contract requirements.

SUBCONTRACTOR. One that enters a contract with a prime contractor. The Government does not have privity of contract with the subcontractor.

WORKDAY. The contractor is responsible for conducting business, between the hours of 0630- 1700 Eastern Standard Time (EST) Monday Through Friday (contractor support services must be available on site for eight hours within the referenced core business hours) except Federal holidays or when the Government facility is closed (all personnel will be notified through Blount Island Mass Notification System) due to local or national emergencies, administrative closings, or similar Government directed facility closings.

WORK WEEK. Monday through Friday, unless specified otherwise.

SERVICE AGREEMENT

Introductory Statement

Welcome to the United States Marine Corps Support Facility - Blount Island (MCSF-BI), home of Blount Island Command (BICmd). Aboard our Installation, we take our commitment to the safety of persons and the environment very seriously.

Our Environmental Policy

Our Environmental Policy is posted at several locations throughout the Installation. MCSF-BI and BICmd are committed to environmental excellence and recognizes the importance of protecting the global ecosystem, reducing the use of natural resources, and supporting responsible and sustainable development through the operation of an environmental management system. Strict adherence to this environmental policy will create long-term environmental benefits and preserve the natural resources necessary to support the future operation of the Installation. This policy is also intended to promote a safer and healthier working environment, thereby ensuring the current and future wellbeing of all employees and our community. The policy commits **to compliance with legal and other requirements**, **continuous improvement**, **pollution prevention**, **setting objectives and targets** and **is communicated to all persons** working for and on behalf of MCSF-BI.

It is the responsibility of each employee, whether government civilian, military or contractor, to abide by this policy statement and make certain their work actions are always consistent with its content.

Federal facilities must lead by example and therefore sound environmental principles shall be integrated into all affairs conducted aboard the Installation, including:

- Increasing energy efficiency; measuring; reporting and reducing greenhouse gas emissions from direct and indirect activities.
- Conserving and protecting water resources through efficiency reuse and storm water management.
- Eliminating waste, recycling and pollution prevention.
- Leveraging agency acquisitions to foster markets for sustainable technologies and environmentally preferable materials, products and services.
- Designing, constructing, maintaining and operating high performance sustainable buildings in sustainable locations.
- Strengthening the vitality and livability of the Installation community; and
- Informing Installation employees about and involving them in achievement of these goals.

Our Safety Policy

In matters affecting occupational safety and health, this Command and Installation operates as a team that includes every military member, civilian employees, and contractor working on the Installation. Accordingly, it is the Policy of Command to:

- Understand, embrace, and carry out the Safety and Force Preservation Policies of the Commandant of the Marine Corps and the Commanding Officer.
- Implement and maintain an aggressive, proactive safety program to enhance our war-fighting capabilities and prevent on- and off-duty mishaps.
- Comply with all applicable health and safety legal and other requirements, including Executive Orders, Department of Defense Instructions, Marine Corps Orders, and Navy Instructions, and to exceed such requirements where practical and merited.
- Achieve and maintain OSHA VPP Star program status.
- Seek and seize opportunities to improve health and safety management and performance.
- Regularly set, review, and revise objectives for improvement of our health and safety performance.

- Institute hazard awareness and risk management as fundamental elements in doctrine, training, material acquisition, supply, tactical operations, and off-duty recreational planning.
- Communicate openly with our internal and external stakeholders, including other military facilities, in order to share information about health and safety ideas and performance.

Environmental Expectations

We expect you to comply with all applicable local, state and federal environmental regulations and standards involving the handling, collection and disposal of all hazardous materials and industrial waste by-products. Additionally, if your process, service or activity will or has the potential to create emission sources, which may impact our air, water or property, you must contact a representative of BICmd immediately before performing that process, service or activity.

We also administer and maintain an active recycling program; we recommend that you recycle all metal-containing materials, paper products, or universal waste materials such as light bulbs and batteries.

If you cause or create a spill or chemical release on MCSF-BI property, you must notify the MCSF-BI IMO Environmental Office immediately. Leaks/Spills must be contained and cleaned up immediately by trained personnel. You will contain the leak/spill as best as you can and let your POC know immediately so additional response action can be initiated, if necessary.

If you are asked to evacuate the facility, you will return to the Command Building (Facility 100) and report to the MCSF- BI POC. If you are directed to seek shelter, follow directions or ask for assistance from any MCSF-BI personnel for assistance. Otherwise, follow directions from your MCSF-BI POC. Should you have any questions on the agreement, please don't hesitate to contact the MCSF-BI Environmental Management Representative Mr. Mike Keethler, 904-696- 5688.

Prior to do any work on the facility you are required to provide a Hazardous Material Log (ESOH-F-8.1.1042) of all the items that will be brought on the facility and the amounts. We will also need notification of any fueling or defuel activity (ESOH-F-8.1.1041) while on the facility.

The following have been identified as significant environmental aspects and potential impacts:

- Construction – Air, Soil and Water Contamination
- Painting – Air, Soil and Water Contamination
- Hazardous Compliance – Air, Water and Soil Contamination
- Battery Management – Air, Soil and Water Contamination
- Vehicle Maintenance – Air, Water and Soil Contamination

If your process, service or activity will or has the potential to impact our activity in these areas, you are to notify your MCSF-BI POC. Based on the services, products or activities you will provide, additional documentation may need to be required and executed by you or a representative of your company. Thank You and Have A Great Day!

_____Initial for Environmental Expectations

Safety Expectations

Contractor employees shall be responsible to ensure all materials supplied to, or work performed aboard, the Installation complies fully with the applicable provisions of federal and state occupational safety and health acts, standards, and regulations including Lockout/Tagout, Hot Work, Hazard Communication, Lift Truck Safety, Confined Spaces, Hazardous Materials,

Flammables and Combustibles, and other applicable provisions, acts, standards and/or regulations.

VPP is a partnering and recognition program of OSHA for worksites that are committed to effective employee protection beyond the minimum requirements of OSHA standards and that can demonstrate excellence in occupational safety and health. It is our intent that the OSH Program and OSH performance of everybody aboard the Installation achieve and maintain world-class status across the Installation. Contractors are expected to participate as appropriate in efforts to achieve and maintain VPP "Star" status.

All contractor employees must wear required safety equipment whenever engaged in work requiring personal protective equipment.

All contractors shall report any injuries or vehicle accidents that occur at MCSF-BI to the Health and Safety Section, 904-696-5623/5624.

The contractor (□is not required to; □shall) have available an OSH Plan for the work being performed aboard the Installation and shall submit a copy of their OSH Plan to IMO Health and Safety Manager(s) upon request.

Job safety analysis (also known as job hazard analysis, activity hazard analysis, and/or operational risk management) is a method used to identify hazards associated with a particular task and then develop measures to eliminate or control the hazards in order to ensure safe completion of the work. Contractors shall complete JSAs for the jobs they are performing aboard the Installation and implement hazard mitigation methods developed through the JSAs. If a contractor does not have a JSA form available, we will provide one.

All contractor employees have the authority to stop work if they observe unsafe conditions endangering the safety of themselves, coworkers, Government personnel, or others in the surrounding area. Likewise, Installation personnel have the duty and authority to stop contractors' work if they observe unsafe conditions endangering the safety of themselves, contractor employees, Government personnel, or others in the surrounding area.

When it is necessary to leave a job prior to completion, the following minimum measures must be taken:

- All materials, rigging, boards, loose nails, and other debris must be removed from the floor.
- There shall not be materials or equipment left overhead or on the roof unless secured in place.
- Adequate barricades and warnings must be erected at all openings, excavations, and obstructions.
- If material handling equipment is being used, any boom must be lowered to the ground prior to leaving the job.

If you are asked to evacuate the facility, you will return to the Headquarters Building (Building 100) and report to your Installation Point of Contact (POC). If you are directed to seek shelter, follow directions or ask for assistance from any Government personnel for assistance. Otherwise, follow directions from your POC.

____Initial for Safety Expectations

Facility Contacts

For any OSH-related questions or concerns, please contact Mr. Jeff Churchill, IMO Safety Manager, at (904) 696-5623. Mr. Churchill will also serve as contractor employees' POC for Safety matters while aboard the Installation.

For any environmental questions or concerns, please contact Mr. Mike Keethler, IMO

Environmental Manager, at (904) 696-5688. Mr. Keethler will also serve as contractor employees' POC for Environmental matters while aboard the Installation.

Agreement and Acknowledgement

As a Contractor, you must agree to comply with all requirements outlined in this Service Agreement (SA) prior to commencing work aboard the Installation. After you have read this document, please sign below to acknowledge you understand its contents and agree to the requirements outlined.

I certify that I am an authorized representative of a company performing work at MCSF-BI and the employees of our company have been trained and/or are qualified and/or certified and competent to perform their duties in safe and environmentally conscious manner.

_____	_____	_____	_____
Printed Name	Signature	Company Name	Date

Contractors and their Personnel are Responsible for all Information contained within this Document. This agreement is only valid for one year from date signed.

Violation of any part of this SA is considered non-fulfillment of the superior contract, subject to contractual enforcement mechanisms, and/or termination of contract.

Non-Disclosure Agreement for Contractor Employees and Subcontractors

I, _____, am an employee of or a subcontractor to _____, a contractor acting under contract No. _____to the Contract Support Management Office, Blount Island Command, Jacksonville, Florida. I understand that in the performance of this contract, I may have access to sensitive or proprietary business, technical, financial, and/or source selection information belonging to the Government or other contractors. Proprietary information includes, but is not limited to, cost/pricing data. Government spend plan data, contractor technical proposal data, independent government cost negotiations, contracting plans and statements of work. I agree not to discuss, divulge, or disclose any such information or data to any person or entity except the government person(s) directly concerned with the performance of this contract. I have read and understand the provisions of the Procurement Integrity Act as implemented in Federal Acquisition Regulations (FAR) 3.104 and I will not engage in any conduct prohibited by this Act or the FAR. Additionally I acknowledge and understand that if I violate any provision of this agreement for any reason my contract may be subject to investigation and potentially terminated.

The obligations imposed herein do not extend to information/data which:

is in the public domain at the time of receipt or it come into the public domain thereafter through no act of mine.

is disclosed with the prior written approval of the Contracting Officer;

is demonstrated to have been developed by _____, or me independently of disclosures made hereunder.

is disclosed pursuant to court order, after notification to the Contracting Officer;

is disclosed inadvertently despite the exercise of the same reasonable degree of care a party normally uses to protect its own proprietary information.

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

The contractor service requirements are summarized into performance objectives that relate directly to mission essential items. The performance threshold briefly describes the minimum acceptable levels of service required for each requirement. These thresholds are critical to mission success.

Performance Element	Performance Requirement	Surveillance Method	Acceptable Quality Level	Incentives / Disincentives
Contract Clause FAR 52.222-50 Combating Trafficking in Persons	Trafficking in Persons Validate the Contractor has conducted training or kept records with employee signatures, as understanding of the U.S. Government's zero tolerance policy; a documented list of what the Contractor cites as appropriate actions to violations; documented the number of violations (if any) and documented actions taken	Periodic Inspection – as determined by the COR	Acceptable performance has been met 100% compliance IAW U.S. Government zero tolerance policy.	- Past performance will be recorded and considered in determining best value for future contracts. - Exercising Option(s)
Contract Deliverables	Contract deliverable furnished as prescribed in the PWS	Verified by the COR, COTR, QAR, as applicable	95% of deliverables submitted timely and without rework required	- Past performance will be recorded and considered in determining best value for future contracts. - Exercising Option(s)
Overall Contract Performance	Overall contract performance of sufficient quality to earn a Satisfactory (or higher) rating in the COR's annual performance report or assessment of the contractor.	Assessment by the COR	All performance elements rated Satisfactory or higher.	- Past performance will be recorded and considered in determining best value for future contracts. - Exercising Option(s)
Invoices	Invoices in accordance with contract procedures are timely and accurate.	Review and acceptance of the invoice.	100% of the invoices are timely and accurate.	- Past performance will be recorded and considered in determining best value for future contracts. - Exercising Option(s)
