AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE	PAGE	OF	PAGES
	1		86

2. AMENDMENT/MODIFICATION NO.	3. EFFECTIVE DATE	4. REQUISITION/PURCHASE REQ. NO.	5. PROJECT NO. *(If applicable)*
0001	10/28/2026		

6. ISSUED BY	CODE	7. ADMINISTERED BY *(If other than Item 6)*	CODE
DLA Contracting Services Office Philadelphia - DCSO-P 700 Robbins Ave. Philadelphia, PA 19111	SP4709	SEE BLOCK 6	SP4709

8. NAME AND ADDRESS OF CONTRACTOR *(No., street, county, State and ZIP Code)*	(X)	9A. AMENDMENT OF SOLICITATION NO.
	☒	SP4709-26-Q-3039
		9B. DATED *(SEE ITEM 11)* 11/04/2026
	☐	10A. MODIFICATION OF CONTRACT/ORDER NO.
		10B. DATED *(SEE ITEM 13)*
CODE / FACILITY CODE		

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☒ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☒ is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing items 8 and 15, and returning 1 copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA *(If required)*

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	
☐	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: *(Specify authority)* THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
☐	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES *(such as changes in paying office, appropriation date, etc.)* SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
☐	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
☐	D. OTHER *(Specify type of modification and authority)*

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (*Organized by UCF section headings, including solicitation/contract subject matter where feasible.)*

- Provide Answers to Submitted Vendor Questions below

- Provide Updated PWS with tracked changes below

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

15A. NAME AND TITLE OF SIGNER *(Type or print)*		16A. NAME AND TITLE OF CONTRACTING OFFICER *(Type or print)*	
15B. CONTRACTOR/OFFEROR *(Signature of person authorized to sign)*	15C. DATE SIGNED	16B. UNITED STATES OF AMERICA *(Signature of Contracting Officer)*	16C. DATE SIGNED

Request for Quote (RFQ) SP4709-26-F-3039 is amended as follows:

This amendment contains revisions (adds/changes/deletions) to the solicitation requirements.

The following responses to questions received are hereby incorporated into the RFQ:

No.	Page Number	RFQ Section	Question	Answer
1	86	3.1	The PWS outlines nearly 15 pages of requirements that offerors must respond to with a detailed technical approach, however the PWS limits the Technical Approach to 15 pages, Times New Roman size 12 font. With this limited page count, offerors will barely be able to parrot back the Government's requirements to show compliance with the PWS, and will have limited ability to describe their actual approach. This increases risk to the Government as they will not have an opportunity to evaluate an offeror's detailed technical approach and allow the Government to effectively determine an offeror's ability to deliver against the outlined scope. Will the Government please increase the Technical Approach page limit to at least 25 pages to allow offerors to both provide both a compliant response and a detailed approach for how they will satisfy the Government's requirements?	Not to exceed 25 pages.
2	42	2.6.2	The LCAT table at the top of page 42 calls for a Non-Key Program Manager but the description for Program Manager on Page 42 refers to the Program Manager as Key Personnel. Can the government please confirm that the Program manager is Non-Key Personnel?	PWS Updated
3	39, 40, 41, 42, 58, 63, 65	2.6.2	"There are inconsistencies with the Senior Systems Administrator LCAT in Section 2.6.2: a) The table on Page 41 lists the Senior Systems Administrator as Non-Key, where as the position description at the very bottom of Page 63 lists the labor category as Key Personnel. Can the government please confirm that the Senior Systems Administrator for Task 3 is a Non-Key position to align with the table on Page 41?	PWS Updated

			b) The LCAT table on Page 40 includes the Senior Systems Administrator (VDI) (On-Site at Fort Belvoir VA) under the Task1 - Directory Services heading, which is not related to the VDI task (Task 2). Can the Government please confirm the "VDI" designation can be removed from that LCAT and that this role is intended to be aligned to Task 1 - Directory Services? c) In multiple places the Senior Systems Administrator LCAT is listed, but it is not a JETS 2.0 LCAT. Can the government please confirm this should be the Systems Administrator - Senior LCAT, and update the LCAT names on pages 39, 40, 41, 58, 63, and 65 accordingly?	
4	119	Schedules of Services, Attachment 2, and Section 4	The PWS outlines travel as FFP and requests pricing to be quoted, but does not provide a travel plug for offerors to use in their pricing submission as has been seen on other JETS RFQs. Can the Government please provide a travel cost per period that offerors should use in their submission?	Travel costs are now the onus of the offeror. Please submit travel pricing according to the Travel listed in section 2.7.1.
5	Page 16	Section 2.3.2.3	Task 2 "OT Support" is labeled as Subtask 2 instead of Subtask 3. Should this be labeled as Subtask 3?	PWS Updated
6	Page 22	Section 2.3.6	Task 6 says: "The contractor shall follow the Transition Plan submitted and approved as a deliverable in the PWS Task 4". Should this be referencing Task 5?	PWS Updated
7	Pages 40, 60	Section 2.6.2	Page 40 (LCAT table) says the Systems Engineer (Non-Key) to be On-Site but the position description of the Systems Engineer (Non-Key) on pg 60 calls for the role of be Off-Site. Is the Systems Engineer (Non-Key) is an Off-Site position?	PWS Updated
8	Pages 39, 60-61	Section 2.6.2	Page 39 (LCAT table) lists the Systems Engineer (Key Personnel) but there is not an associated position description. Can the Systems Engineer (Non-Key) description on Pages 60-61 can be used for the Systems Engineer (Key Personnel) roles?	PWS Updated

9	Page 86	Section 3.1	Can DLA please increase the page limit for the Technical Approach to 30 pages?	Not to exceed 25 pages.

SECTION 2: PERFORMANCE WORK STATEMENT

2.1 BACKGROUND

The Defense Logistics Agency (DLA) is a United States (US) Department of Defense (DoD) agency that provides worldwide logistics support for the missions of the Military Departments and the Unified Combatant Commands under conditions of peace and war. The Defense Logistics Agency (DLA) Information Operations is an Information Technology (IT) support organization within the Department of Defense (DOD). DLA Information Operations (J6), Enterprise Infrastructure Services (J64), Technology Foundation Services (J64C), Enterprise IT Architecture (EIA) Division is responsible for support to all DLA employees and DLA supported external customers.

Directory Services Branch provides a central point of contact for agency wide coordination and support/sustainment for DLAs Identity and Directory Services environment and Collaboration services as well as, security and supporting environments, which spans the globe and multiple time zones and multiple cloud environments.

Enterprise Infrastructure Application Support Branch provides support and sustainment for DLA's Virtual Desktop Environment. The Enterprise Infrastructure Application Support Branch is responsible for the design, implementation, and sustainment of DLA's server-based computing environment, to include DLA's Virtual Desktop Infrastructure (VDI).

Enterprise Software & Mobility Support Services Branch is responsible for support to all DLA employees and supportable customers. Information Operation has numerous mobile devices including iPads, iPhones, and Windows tablets.

Zero Trust Program Management Office is within Enterprise Hosting (J64) and guides DLA's development of a Zero Trust architecture that fully integrates all seven zero trust pillars (Users, Devices, Workloads, Data, Network/Infrastructure, Visibility & Analytics, and Automation & Orchestration) to allow DLA to reach an advanced level of Zero Trust maturity in order to protect the network and data against sophisticated, well-funded, and persistent cyber threat actors.

2.2 SCOPE

DLA requires support to facilitate the J6, Enterprise Infrastructure Services (EIS), Technology Foundation Services, Enterprise IT Architecture (EIA) Division mission, and Zero Trust Program Management Office (PMO. This mission consists of support for the design, implementation, administration, and sustainment of Enterprise Active Directory (AD), messaging and instant messaging capabilities, server-based computing capabilities (Citrix/Virtual Desktop Infrastructure/DaaS/Remote Access (RA) Solution), mobile device infrastructure (iOS/iPhone) and industrial mobile device support, centralized end-point administration, automated software delivery, vulnerability and audit preparedness and Enterprise monitoring and alerting capabilities. The Enterprise IT Architecture Division develops and sustains Enterprise-wide capabilities and provides management, administration and oversight of infrastructure, applications, and remote capabilities in support of the DLA and the J6 mission.

2.2.1 Directory Services

The scope of this effort encompasses full-spectrum Tier 3 engineering, administration, modernization, cybersecurity, automation, and end-user support across all DLA enterprise identity, directory, collaboration, messaging, and cloud platform services. The Contractor shall support on-premises and multi-cloud identity infrastructures including all DLA Active Directory forests and domains, Azure Entra ID, hybrid identity, Zero Trust identity enforcement, Group Policy architecture, identity protection, and integration with approved Identity Provider and ICAM solutions. The scope further includes enterprise-level engineering and operational sustainment of Microsoft 365 and Google Workspace services such as Teams, SharePoint Online, OneDrive, Exchange Online, Purview, Intune, Copilot, and Power Platforms as well as all associated compliance, governance, and data-protection functions. Cloud service support covers Azure, M365, Google Workspace and other approved platforms with responsibilities spanning tenant lifecycle management, cross-cloud integration, security hardening, RMF and cybersecurity documentation, automation of administrative and compliance tasks, evaluation and deployment of new Microsoft capabilities, and enterprise AI-readiness governance. In addition, the Contractor shall perform routine Directory Services tasks, server management and hardening, COOP and security exercise participation, knowledge base and documentation maintenance, training delivery, ticket handling and queue management, and after-hours/on-call support. Ensuring highly reliable, secure, and modernized enterprise directory and collaboration services aligned with DLA operational, architectural, and security requirements.

Furthermore, this will provide the necessary technical skills needed to support DLA's customers and offset existing support personnel through performance of support listed in Section 2.3.1 Task 1. These tasks are required on both the NIPRNet and SIPRNet. The Contractor shall use personnel qualified in labor categories described in Section 2.6. All work will be performed on DLA's Non-classified Internet Protocol Router Network (NIPRNet), Secure Internet Protocol Router Network (SIPRNet) networks and will include current and future external cloud and datacenter networks unless otherwise specified.

2.2.2 Enterprise Infrastructure Application Support

The scope of this effort will be managed by DLA Information Operations, Technology Foundation, Enterprise Infrastructure Application Support Branch. Contractors shall provide comprehensive technical, configuration, monitoring, and project management support to ensure the continuous integrity, availability, and performance of the Enterprise Virtual Desktop Infrastructure (VDI) environment. This includes maintaining operational stability through routine production support activities, delivering responsive customer service to DLA personnel, and applying industry-standard methodologies to sustain, troubleshoot, and optimize a globally distributed VDI capability. Support activities must be executed with minimal operational impact while ensuring adherence to DLA enterprise architecture, cybersecurity, and performance requirements.

This effort encompasses all Citrix and VDI technologies sustained within DLA, including but not limited to NetScalers, Citrix CVAD, DaaS and Remote Access Solutions, SQL components, and associated Azure services. DLA operates two Azure environments located in the TX/AZ and VA regions supporting more than 700 Desktop servers and multiple NetScaler and ADC devices deployed in a POD-based architecture.

These environments collectively support an average of more than 15,000 unique users daily, with demand expected to increase. VDI capabilities are additionally deployed in Southwest Asia, Europe, Hawaii, and Japan, necessitating extended-hours and geographically dispersed support. A SIPR component also requires dedicated technical, configuration, and help desk support to maintain secure, mission-critical functionality across classified environments.

2.2.3 Enterprise Software & Mobility Support Services

The scope of this effort encompasses comprehensive enterprise-level engineering, administration, sustainment, modernization, and operational support for DLA's Enterprise Software & Mobility Services. This includes full lifecycle support for all mobile device technologies, collaboration platforms, unified communications capabilities, and COTS enterprise software used across NIPRNet, SIPRNet, and Operational Technology (OT) environments. The Contractor shall provide continuous Tier 3 technical support, troubleshooting, configuration management, interoperability assistance, and end-user support for mobile endpoints including iOS, Android, Windows, macOS, and warehouse mobility devices as well as the enterprise Mobile Device Management (MDM) ecosystem. Core responsibilities include researching and implementing emerging mobility technologies, maintaining certificates and profiles, executing STIG compliance, preparing documentation and reports, performing incident response within required service thresholds, and delivering after-hours/on-call support in alignment with Enterprise Software & Mobility Services Branch operational standards. The Contractor shall further ensure all mobility-related activities remain fully integrated with DLA's enterprise security architecture, configuration management processes, and approved cloud-based services.

Additionally, the scope includes enterprise sustainment and engineering support for DLA's unified communications and collaboration platforms, such as ZoomGov, Adobe Connect, Microsoft Teams, and related conferencing, messaging, and virtual event technologies. The Contractor shall conduct feasibility testing, validate security-driven updates, provide Tier 3 incident support, maintain interoperability with DoD and cross-tenant environments, and support SIPR collaboration services. Responsibilities extend to developing and updating knowledge-based articles, delivering training to Tier 1–3 technicians and end users, supporting virtual event moderation, and maintaining compliance with all Enterprise Mobility Operations and Endpoint Engineering Configuration Management requirements. The Contractor shall also manage and resolve ServiceNow tickets including triage, routing, customer coordination, root cause analysis, and compliance with performance metrics ensuring consistent, efficient, and mission aligned support for DLA's enterprise software, collaboration, mobility, and unified communications ecosystems.

2.2.4 Zero Trust Program Management Office

The scope of work encompasses items identified for Zero Trust Architecture Support. Specifically, the vendor will provide support for DLA's Zero Trust Program by continuously evaluating DLA's fits and gaps against the DoD and DLA Zero Trust Strategy, developing, and updating DLA's Zero Trust Strategy and Roadmap, develop Zero Trust Architecture (ZTA), and guide DLA's transition to the ZTA. The Vendor will provide day-to-day support for Zero Trust Program Management office as directed by Zero Trust Program Managers and Enterprise Hosting Director.

This Task Order	JETS 2.0 IDIQ SOW Task
Task 1 – Directory Services	Task Area 2 –Technology Services
Task 2 – Enterprise Infrastructure Application Support	Task Area 2 – Technology Services
Task 3 – Enterprise Software & Mobility Services	Task Area 2 – Technology Services
Task 4 – Zero Trust Architecture Support	Task Area 2 – Technology Services
Task 5 – Task Order Project Management Support	Task Area 7 – Program/Project Management Support

2.3 TASK REQUIREMENTS

The Contractor will be required to perform tasks such as the following:

2.3.1 TASK 1 – Directory Services (Reference IDIQ RFP SP4709-23-R-0001 Task Area 2)

2.3.1.1. SUBTASK 1 – Enterprise Cloud Platform and Identity Services

A. Identity & Directory Services

The Contractor shall provide Tier 3 engineering, administration, modernization, automation, and cybersecurity support for all enterprise identity and directory services across on-premises and multiple cloud environments. This includes support for all DLA Active Directory forests and domains, Azure Entra ID, hybrid identity, and integration with approved Identity Provider (IdP) and ICAM solutions.

Support includes:

1. Tier 3 troubleshooting and support for Identity & Directory Services
2. Full lifecycle management of all identity and directory environments across on-prem and approved cloud platforms
3. IDP and Entra ID services including synchronization, federation, authentication, Conditional Access, MFA, and Zero Trust identity enforcement
4. Group Policy design, management, modernization, and troubleshooting across all enterprise directory environments
5. Security hardening, STIG compliance, RBAC governance, audit logging, vulnerability mitigation, and identity protection
6. Development of all required cybersecurity artifacts (RMF and Cyber artifacts, Cyber documentation, POA&Ms, audit evidence, compliance reports)
7. Automation of identity operations using PowerShell, cloud-native automation, and other tools to streamline repetitive tasks, enforce baselines, and apply bulk changes.
8. Evaluation, testing, and implementation of new identity-related capabilities.
9. Coordination with internal and external stakeholders to ensure identity services remain aligned with enterprise security and architectural requirements

B. Collaboration and Compliance Services

The Contractor shall provide enterprise-level engineering, administration, automation, and operational support for Microsoft 365, Google Workspace collaboration and compliance services. This includes support for products such as Teams, SharePoint Online, OneDrive, Exchange Online, Purview, Copilot, Intune, and Power Platform solutions, as well as integrations into other approved cloud-hosted environments.

Support includes:

1. Tier 3 troubleshooting and support for messaging, collaboration, compliance, endpoint environments and minor development.
2. Administration and governance of Teams, SharePoint Online, OneDrive, Exchange Online, Copilot, and associated M365 collaboration workloads
3. Full Microsoft Purview support including sensitivity and retention labels, data classification, DLP, eDiscovery, insider risk management, and governance of information protection policies
4. Administration and governance of Google Groups, Shared Drives, My Drive, Gmail, Meet, Chat, Gemini, and associated Google Workspace collaboration workloads
5. Full Google Vault and Workspace Information Protection support including data classification, DLP rules for Drive and Gmail, Access Context Manager, legal holds, eDiscovery, and governance of retention and sharing policies
6. Endpoint lifecycle management via Intune, including device enrollment, compliance policies, configuration profiles, secure baselines, app deployment, conditional access alignment, and endpoint hardening
7. Support development platforms such as Power Platform support including Power Apps, Power Automate, and Power BI covering solution development, environment governance, security controls, and integrations with enterprise systems.

8. Development of cybersecurity artifacts related to messaging, collaboration, endpoint security, and Purview configurations
9. Automation of repetitive administrative activities to improve efficiency, ensure configuration consistency across systems, support large-scale deployments, and implement policy changes across multiple workloads
10. Support for Microsoft 365 Copilot and AI technologies at the tenant capability level, including configuration, policy alignment, readiness assessments, data security posture, permissions governance, and ensuring AI access aligns with new and established governance and protections
11. Identification, testing, implementation, and sustainment of new M365, Google, and Cloud capabilities released to ensure timely adoption, secure configuration, and alignment with best practices and cyber policies
12. Support M365 and Azure integrated products supported by the branch.

C. Cloud Platforms Support Services

The Contractor shall provide Tier 3 engineering, administration, cybersecurity, automation, and modernization support for Microsoft 365, Azure, and other approved cloud environments. This includes tenant operations, cross-cloud integrations, and continuous adoption of new Microsoft capabilities.

Support includes:

1. Cloud tenant lifecycle management including configuration, redesign, migrations, upgrades, modernization, and decommissioning
2. Security hardening and Zero Trust alignment across cloud environments including access controls, logging, monitoring, RBAC enforcement, network restrictions, and compliance policies
3. Development and maintenance of all required cybersecurity artifacts for cloud environments including RMF and cyber artifacts, SSP updates, POA&Ms, audit packages, and compliance dashboards
4. Integration of services across Azure, M365, Google, or other cloud environments to ensure consistent identity, compliance, security, and operational performance
5. Automation of cloud configuration management, compliance reporting, monitoring, vulnerability mitigation, and provisioning using PowerShell, cloud automation tools, and other approved technologies
6. Continuous monitoring, performance tuning, incident analysis, capacity planning, and operational optimization of cloud environments
7. Support for evaluating, piloting, validating, and implementing new Microsoft 365 and Azure capabilities, including AI-Driven features as they become available, including documenting impacts, updating policies, and coordinating the rollout across the enterprise
8. Oversight and configuration of Microsoft 365 Copilot, Copilot Chat, Gemini and future tenant-level AI capabilities, ensuring proper data access boundaries, Purview and label enforcement, security posture readiness, and alignment with enterprise AI governance frameworks

D. Directory Services General Support:

1. Perform standard Directory Services task such as creation, moves, deletions, maintenance, onboarding and off-boarding of objects.

2. Perform management and maintenance of servers supported by Directory Services to include software support, patching, hardware maintenance, and security hardening following DOD/DISA/DLA Standards.
3. Support Coop exercises in support of Directory Services mission.
4. Support Security inspections and exercises in support of Directory Services mission.
5. Assist DLA J64 teams with taskers and other environment support projects.
6. Assist with and/or conduct Security Tests and Evaluation and Information Assurance (IA) assessment reviews as a way of validating compliance with IA policy on Directory Service supported assets.
7. Provide support for DLAs transitioning to external hosting solutions. Contractor will perform task and work as needed to support these efforts. Task will be limited in scope to task supported by directory services.
8. Generate and maintain DLA required documents for user/support Knowledge Base Article (KBA), Change Processes, Project Tracking, training material and other documents as required by DLA to support day-to-day operations. Priority and update requirements will be determined by team leads or branch chief.
9. Perform Classroom or virtual training to end user or DLA support staff as needed. This tasks scope will be limited to software, hardware, and processes supported by Directory Services.
10. End User support
11. The Contractor will provide afterhours on call support as needed. Typically, the on-call support personnel receive one (1) to (3) call per week, some of which may require on-site support to support SIPRNet.
12. The Contractor will provide afterhours support as needed. Afterhours support is not expected to exceed 8-16 hours per month and will be to cover maintenance or other scheduled task outside of normal user work hours.
13. All contractor personnel shall submit an end-of-week activity report summarizing tasks completed, planned work for the upcoming week, meetings attended, any issues or risks encountered, support provided, and any other significant activities or events relevant to ongoing projects.

E. Ticket Handling

Routine tasks are generally identified via the J64 TFS Directory Services leadership or DLA's ticket tracking system and are responded to with little to no guidance or oversight. The average number of tickets processed per week under this task is 30 with each tech averages 3-5 tickets a day with each ticket taking 2 hours to 6 hours to complete.

1. Tickets that are awaiting response from customer or other factors outside the techs control shall be placing in a "pending" status and resumed once work can continue.
2. Initial Response to the Customer (e.g., Email, Phone, IM) for Work Order / Service Request will be processed within one business day.
3. Ticket statues update is every two business days until the ticket is resolved. All tickets must be noted with major progress and customer contact attempts.
4. Monitor and triage the Directory Services ticket queue.
5. Resolve 85% of assigned Incidents within 1 business day unless noted.
6. Resolve 85% of all other assigned ticket types within 3 business days unless noted.

Deliverable 1: Meet Ticketing Support Guidelines

- Update tickets every two business days until resolution
- Resolve 85% of assigned Incidents within 1 business days unless noted.
- Resolve 85% of all other assigned ticket types within 3 business days unless noted.
- Estimated Time: Daily

Deliverable 2: Complete assigned task by agreed-upon time.
Estimated Time: As required.
Deliverable 3: Complete regularly scheduled task at agreed-upon intervals.
Estimated Time: As required.
Deliverable 4: Project Plans and Schedules
Estimated Time: As required
Deliverable 5: Slide Presentations
Estimated Time: As required
Deliverable 6: Documentation Development
Estimated Time: As required
Deliverable 7: End-of-week activity report
Estimated Time: Weekly COB

2.3.1.2. SUBTASK 2 – General Ticket Support (This subtask only applies to base period)

The Contractor shall provide general Ticket Queue management and general end user support for J64. Their primary focus will be the support of J64 Directory Services' ticket queue and customers. This support includes but is not limited to the support of all DLA's internal and external hosted identify and active directory instances, DMZ Domains, use of Microsoft M365, Microsoft Azure, and DOD Enterprise Email and commercial hosting solutions. This support will include all current and future systems supported by DLA.

The activities required to support this task include, but are not limited to, the following items. The support of these requirements are for both the NIPRNET and SIPRNET.

A. J64 Ticket Handling

Routine tasks and issue handling is generally identified via DLA's ticket tracking system and are responded to with little to no guidance or oversight. Directory Services primary mission is the support of Active Directory and E-mail. All team members are expected to work and resolve tickets to the best of their ability even if it's outside the scope of their primary job role. The contractors will provide staffing to monitor, track, assign, and work an average of 150 support tickets a week. These tickets are complex Active Directory and Email engineering tickets requiring specialized support, with an average work time of 30 minutes to 5 hours. Tickets requiring more specialized experience will be triaged by the contract staff and assigned to a technician in the appropriate team for that technology area.

1. Contractor will monitor and triage assigned J64 ticket boxes. With primary focus being the J64 Directory Services branch ticket queue. This may be subject to change at any time due to project efforts, realignment or restructuring within DLA, contractor will need to be adaptable to these changes.
2. Contractor will be expected to provide staffing to monitor or route approximately 300 tickets a week to the correct technicians.

3. Contractor will be expected to ensure no ticket assigned to the ticket queue has gone over 60 min unassigned during core business hours of 6am to 6pm EST.
4. Tickets that are awaiting response from customer or other factors outside the techs control shall be placing in a "pending" status and resumed once work can continue.
5. Contractor will be responsible for ensuring contractor's staff is working all ticket types to resolution unless higher level support is need. Contractor will route these tickets accordingly.
6. Contractor will contact and work with end users on tickets received through DLA's ticket tracking system. Initial Response to the Customer (e.g. Email, Phone, Instant Messenger (IM)) for Incidents should be within 4 business hours.
7. Contractor may be asked to take on task and perform steps before routing to higher-level engineer and will receive guidance in the form of written KBA, written direction, visual and/or verbal training from J64 staff if necessary to complete task. Contractor will ensure their technicians understand and can perform tasks and take corrective actions to train new or other team members without outside intervention.
8. Contractor will ensure all tickets worked by contractor's staff will be completed as quickly as possible during core business hours of 6 am to 6 pm EST. This task is key to the support of this requirement. Ticket volume is steady. Tickets will need to be addressed quickly to keep up. The Contractor is expected to close and Resolve 70% of all NIPR Tickets in the Directory Services ticket queue monthly, and 80% of all SIPR Tickets in the Directory Services ticket queue monthly.
9. Contractor will notify appropriate leadership about suspected outages or high call volume counts of a particular ticket type.
10. Contractor will generate weekly and monthly ticket reports that will include the following information. Number of closed tickets worked per technician per week, number of open tickets currently assigned per technician, number of tickets by category processed each week, weekly trend report showing number of tickets received and closed broken down by type for the past three months, Charts show number of tickets related to problem type. Additional items may be added as needed. Additional reports may be request on an as needed base. These reports will focus on a particular type of ticket or work. Delivery time of an on-demand report will be determined between branch chief/team leads and contractors staff.
11. Contractor will be responsible for providing experienced staff and ensuring all staff members have experience working with ServiceNow ticketing system or other similar commercial ticket systems.
12. Resolve 85% of assigned Incidents within 1 business day unless noted.
13. Resolve 85% all other assigned ticket types within 3 business days unless noted.

B. Directory Services General Support:

1. Perform management and maintenance of Mail and Active Directory servers supported by Directory Services to include the patching, hardware maintenance, and security hardening following DOD/DISA/DLA Standards.
2. Participate in Coop exercises in support of Directory Services mission.
3. Participate in Security inspections and exercises in support of Directory Services mission.
4. Assist DLA J64 teams with taskers and other environment support projects
5. Assist with and/or conduct Security Tests and Evaluation and Information Assurance (IA) assessment reviews as a way of validating compliance with IA policy on Directory Service supported assets.

6. Provide support for DLAs transitioning to external hosting solutions. Contractor will perform task and work as needed to support these efforts. Task will be limited in scope to task supported by directory services.
7. Generate and maintain DLA required documents for user/support Knowledge Base Article (KBA), Change Processes, Project Tracking, training material and other documents as required by DLA to support day-to-day operations. Priority and update requirements will be determined by team leads or branch chief
8. Perform Classroom or virtual training to end user or DLA support staff as needed. This tasks scope will be limited to software, hardware, and processes supported by Directory Services.
9. End User support
10. The Contractor will provide afterhours on call support as needed. Typically, the on-call support personnel receive one (1) to (3) call per week, some of which require on-site support. to call per week, some of which require on-site support.
11. The Contractor will provide afterhours support as needed. Afterhours support is not expected to exceed 8-16 hours per month and will be to cover maintenance or other scheduled task outside of normal user work hours.

Deliverable 1: Meet Ticketing Support Guidelines.
- ► Update tickets every two business days until resolution
- ► No more than 10% of tickets are unassigned during normal business hours.
- ► Initial Response to the Customer with in one business day
- ► Resolve >70% of combined NIPR/SIPR Tickets in the Directory Services ticket queue monthly
- ► Resolve Incidents within 1 business days unless noted.
- ► Resolve All other assigned ticket types within 3 business days unless noted.
- ► Estimated Time: Daily

Deliverable 2: Generate Weekly Reports
Estimated Time: Weekly COB
Deliverable 3: Complete assigned task by agreed-upon time
Estimated Time: As required
Deliverable 4: Complete regularly scheduled task at agreed-upon intervals
Estimated Time: As required
Deliverable 5: Documentation Development
Estimated Time: As required

2.3.2 Task 2 - Enterprise Infrastructure Application Support (Reference IDIQ RFP SP4709-23-R-0001 Task Area 2)

2.3.2.1. SUBTASK 1 – Configuration Support

The Contractor shall improve the VDI architecture through enhancements by incorporating new data feeds and products. The Contractor shall assist J64DCBB by implementing use cases in order to provide, situational awareness to ensure the health and scalability of the VDI implementation. These activities include, but are not limited to, the following tasks:

1. Research and analysis for additional VDI modules and configurations and DaaS and RA solutions.
2. Create dashboards and reports in order to provide summaries and areas of concerns from log events.
3. Integrate data / event feeds.
4. Perform upgrades, maintenance, and performance tuning.
5. Define anticipated user types and roles and maintain user access.
6. Determine data storage policies/capabilities and impacts on VDI architecture and provide supporting documentation.
7. Develop and document standards and guides for the implementation of VDI solutions including but not limited to, compliance, system security design, architecture flow, Build Guides and Change Management.
8. Prepare training materials to assist in the transition of procedures and policies for VDI to government and contractor personnel. Training materials shall usually be in the format of a presentation and/or briefing format or in CBT (LMS) format that covers policy, procedures and guidelines.
9. The Contractor will also provide Swing/Second Shift support, Mon-Fri, from the hours of 1200 to 2000 for the purposes of Patching, image rollouts, and issue resolution.
10. The Contractor will provide on call support as needed, approximately every three (3) months per person and rotation lasting two weeks. Typically, the on-call support personnel receive one (1) call per week, 10% of which require on-site support.
11. The Contractor will provide afterhours support as needed. Afterhours support is not expected to exceed 8 hours per month and will be to cover maintenance or other scheduled task outside of normal user work hours.

Deliverable 1: Implementation / Build / Change Management / Training Materials Documentation
Estimated Time: As required

2.3.2.2. SUBTASK 2 – VDI End User Support

The contractor will provide End User support at a tier 3 level for complex incidents, Problem, and tasks that cannot be resolved by Tier 1, Tier 2, or Tier 2.5. Support will include, but is not limited to, complex issues with connecting to VDI that cannot be resolved by Tier 1, Tier 2, or Tier 2.5 support, identifying and maintaining ticket assignment within Remedy software, analyzing trends with user issues within the VDI environment, and providing reports based off of ticket quantities and types and documenting resolutions.

Additionally, the contractor will interact with the Enterprise Service Delivery (ESD) program Tier 1, Tier 2, and Tier 2.5 to provide knowledgebase articles to ensure faster resolutions at the ESD level to lessen the effect on end user. Types of support shall include, but not be limited to:

1. Troubleshooting complex user login issues
2. Troubleshooting advanced issues with application launches (to identify potential cause, not to rectify the actual application)
3. Provide weekly ticket reports
4. Log out user sessions within VDI that are experiencing difficulties.
5. Create master tickets where needed to consolidate issues to prevent overlap
6. Reports, Trends, and Analysis
7. Tickets, Incidents, Or Request Task shall be resolved as soon as possible.
8. Contractor shall resolve >25% of Incidents in the VDI ticket queue monthly.

9. Tickets that are awaiting response from customer or other factors outside the techs control shall be placing in a "pending" status and resumed once work can continue.
10. Initial Response to the Customer (e.g., Email, Phone, IM) for Work Order / Service Request should be processed with one business day.
11. Target ticket statues update is every two business days unitl the ticket is resolved.
12. All tickets must be noted with major progress and customer contact attempts.

The contractor shall provide on-site VDI technologies and infrastructure support at Ft. Belvoir, VA and Dayton, OH in DLA's NIPRnet, SIPRnet, and OT computing environments:

13. Troubleshoot, research, analyze, and resolve on-site VDI connection/login issues, application functionality issues, end point related support/software issues (thick, thin, zero), infrastructure related configuration changes/updates and system performance tuning that can't be resolved remotely.
14. Perform on-site system upgrades, security enhancements and performance tuning to DLA's VDI infrastructure that can't be resolved remotely.
15. Provide white glove support to the DLA VIP front office/leadership suite in Ft. Belvoir for VDI environmental changes and solutions implementation support Monday through Friday during core business hours (9:00 AM – 5:00 PM). White glove support is defined as dedicated onsite/deskside support for VIPs.
16. Perform on-site administration, management and maintenance of VDI servers, storage and databases supporting DLA's VDI environment that can't be resolved remotely.
17. Provide on-site support to VIP and other DLA customers with technical changes associated with large-scale VDI projects that can't be resolved remotely. VIP = Very Important Persons (pre- determined by the Government)

Deliverable 1: Meet Ticketing Support Guidelines.
- ► Update tickets every two business days until resolution
- ► No more than 10% of tickets are unassigned during normal business hours.
- ► Initial Response to the Customer with in one business day
- ► Resolve >75% of all ticket types in the VDI ticket queue monthly
- ► Estimated Time: Daily

Deliverable 2: Generate Weekly Reports
Estimated Time: Weekly COB
Deliverable 3: Project Plans and Schedules
Estimated Time: As required
Deliverable 4: Slide Presentations
Estimated Time: As required
Deliverable 4: Documentation Development
Estimated Time: As required

2.3.2.3. SUBTASK ~~2~~3 – OT Support

The contractor will provide Operational Technology (OT) support services to maintain, monitor, and enhance integrated IT/OT environments. The contractor shall deploy and configure monitoring solutions, analyze collected system data, and develop clear, actionable reports and documentation for Government

leadership. The contractor shall configure and sustain OT-related devices including monitoring nodes, switches, bridges, and specialized security tools, while maintaining accurate and current asset inventories across all supported environments. All work shall be performed in alignment with Government policies, cybersecurity requirements, and mission objectives to ensure operational visibility, system reliability, and a secure OT posture.

1. Monitoring Solution Deployment: The contractor shall stand up, configure, integrate, and maintain enterprise and OT-focused monitoring platforms.
2. Data Analysis: The contractor shall analyze collected data, identify trends, detect anomalies, and provide findings to Government personnel.
3. Report Development: The contractor shall generate recurring and ad-hoc technical and executive-level reports.
4. Documentation Creation: The contractor shall develop and maintain SOPs, configuration guides, diagrams, and technical documentation.

5. Leadership Presentation Support: The contractor shall prepare technical information in clear, concise, and presentable formats for leadership briefings.
6. Device Configuration: The contractor shall configure and maintain monitoring nodes, switches, bridges, and OT security devices such as Xona gateways.
7. Security Tool Operation: The contractor shall operate, tune, and maintain security platforms including Forescout and other IT/OT security tools.
8. Asset Inventory Management The contractor shall maintain accurate, complete, and up-to-date inventories of all OT/IT assets, including lifecycle and configuration data.
9. Data Categorization The contractor shall categorize, structure, and logically compile collected data for reporting and analysis.
10. System Integration: The contractor shall integrate new devices, sensors, and monitoring components into existing architectures.
11. Troubleshooting Support: The contractor shall diagnose and resolve issues related to monitoring systems, network devices, and security platforms.

2.3.3 Task 3 - Enterprise Software & Mobility Services (Reference IDIQ RFP SP4709-23-R-0001 Task Area 2)

2.3.3.1.Mobility Support

The Contractor shall support DLA's mobile device solution and improve the mobile device user experience by researching, testing and implementing the latest mobile technologies. The Contractor shall assist the Enterprise Software and Mobility Service branch with sustainment and implementation of the current and future mobile device solution. These activities include, but are not limited to, the following tasks:

1. Provide daily guidance and direction to mobility IT professionals, including decisions related to technology, resources, and training.
2. Develop project plans identifying tasks, timelines, resources, and milestones.
3. Prepare presentations for executive-level briefings and team meetings.

4. Sustain and optimize the enterprise Mobile Device Management (MDM) environment supporting all managed mobile endpoints, ensuring certificate currency, service account maintenance, and profile/policy optimization.
5. Document the MDM environment (SOPs, network maps, process flows) and review/update every 6 months.
6. Conduct STIG reviews every 6 months for mobile device platforms and the MDM environment; file all artifacts in the Branch file-plan.
7. Develop and maintain asset/configuration reports using MDM reporting tools, PowerBI, Excel, or other resources.
8. Troubleshoot mobile provisioning, VPN, email, security policies, and collaboration services within 30 minutes during core hours (0600–1800 ET).
9. Provide after-hours support with 2-hour response and ≤16 hours/month workload.
10. Maintain a current call roster.
11. Deploy or update mobile device configurations (profiles, policies, settings) for iOS, macOS, Windows, and Android within 7 days of assignment.
12. Apply required IAVM/NVD security patches to MDM-managed components or supporting infrastructure within 3 days of assignment.
13. Remediate audit and security scan findings and assist in developing POAMs.
14. Support transitions to or integration with other enterprise MDM platforms as required (e.g., platform migrations or DMUC-related requirements).
15. Respond to mobile device-related inquiries via email, IM, phone, or ticketing systems.
16. Support ticket resolution for mobile devices through ServiceNow or other DLA ticketing systems.
17. Validate or coordinate WiFi coverage assessments for warehouses and facilities.
18. Review and approve system administrator access requests to ensure proper access control.
19. Comply with all applicable DLA and DoD Endpoint Engineering Configuration Management processes.

A. Unified Communications Platform Support

The Contractor shall support DLA's unified communications platform including, but not limited to, common features such as application/desktop sharing, audio/video conferencing and instant messaging. The Contractor shall assist the Enterprise Software and Mobility Service branch with sustainment and implementation of the current and future unified communications platform. These activities include, but are not limited to, the following tasks:

1. Conduct feasibility testing of identified collaboration tools on NIPRNet endpoints and within the VDI environment.
2. Provide virtual-event moderation and technical support for Town Halls, outreach sessions, webinars, and training events.
3. Perform periodic functionality testing of collaboration tools after required security updates; record issues and coordinate with vendor technical teams or J6 support teams.
4. Provide Tier 3 end-user support for DLA's collaboration tools.
5. Support DoD365-Sec SIPR collaboration capabilities, including endpoint troubleshooting, access validation, monitoring, and network issue resolution.
6. Sustain and optimize enterprise collaboration services (instant messaging, audio, video, conferencing) across Microsoft, iOS, and Android endpoints.

7. Adhere to DLA INFOSPOT procedures for reporting outages exceeding established time/scope thresholds.
8. Collaborate with other USG and DoD collaboration tenant organizations to ensure continued interoperability and availability.
9. Develop, create, and maintain knowledge-based articles (KBAs) for end users and Tier 1–3 technicians; store all documentation in the Branch file-plan and J6 knowledge repository.
10. Provide training to Tier 1, Tier 2, and Tier 3 technicians, and conduct classroom or virtual training for end users and support personnel.
11. Comply with all DLA Enterprise Mobility Operations and Endpoint Engineering Configuration Management practices and policies.
12. Troubleshoot collaboration tool issues within 30 minutes during core hours (0600–1800/1900 ET, Mon–Fri).
13. Provide after-hours support for work-stoppages or INFOSPOT outages; respond within 2 hours and maintain a call-roster; after-hours support shall not exceed 16 hours per month.

B. Unified Ticket Handling Support

20. Timely and accurate completion of all ticketing system assigned work items within 5 government working days, 85% of the time, without limitation to specific ticket or request types. and related work items assigned to them, across all current and future categories, classifications, and workflows established by the government.
21. Resolve Incidents items within one business day 85% of the time.
22. Update ticket Work Details every 2 business days (or every 5 days for extended tasks).
23. Provide an initial customer response within 1 business day, 85% of the time.
24. Maintain proper pending status handling.
25. Review pending items every two business days
26. Document root-cause analysis upon resolution.
27. Route elevated issues to appropriate J6 teams.
28. Perform initial triage before routing tasks to higher-level engineers.
29. Notify leadership of suspected outages or issues affecting 25 or more users.
30. Ensure all personnel are experienced with ServiceNow or similar systems.

Deliverable 1: Project Plans and Schedules
Estimated Time: As required
Deliverable 2: Slide Presentations
Estimated Time: As required
Deliverable 3: Generate Weekly Reports
Estimated Time: Weekly COB
Deliverable 4: Documentation Development
Estimated Time: As required
Deliverable 5: Meet Ticketing Support Guidelines.

- ► Update tickets every two business days until resolution
- ► Resolve >85% of Incidents within 1 business days
- ► Resolve >85% of all other ticketing system request within 3 business days
- ► Initial Response to the Customer with in one business day

2.3.4 Task 4 - Zero Trust Architecture Support (Reference IDIQ RFP SP4709-23-R-0001 Task Area 2)

Nation Defense Authorization Act of Fiscal Year 2022 (NDAA FY22) and Executive Order (EO) 14028, directs DLA to implement Zero Trust cybersecurity framework into the current DLA Enterprise Infrastructure Environment. Current support services such as directory services, enterprise application support, enterprise software and mobility support will need to be aligned to the Zero Trust Reference Architecture for compliance.

In support of DLA's Zero Trust program the contractor will assist the organization with the planning and implementation of capabilities along the pillars of Zero Trust. The capabilities will be based of the objectives and timelines listed in the DOD Zero Trust Strategy, DOW ZT Strategy TAB C (Capabilities and Activities), TAB D (Zero Trust for Operational Technology Activities and Outcomes) and TAB E (Capabilities Timeline – COA1). The contractor will perform the below activities:

a. The contractor will conduct iterative planning and co-creation working sessions with stakeholders to develop the requirements and acceptance criteria for the capabilities, addressing prioritized components of the ZT Strategy that drive ZT maturity.

b. Contractor shall maintain and update existing ZT assessment and implementation progress tracker for Information Technology (IT) NIPR and SIPR on-prem and on-cloud, as required. As necessary, the Contractor will update the existing DLA ZT Strategy documentation to address any new gaps or fits identified. Contractor will develop a Zero Trust for Operation Technology (OT), Internet of Things (IoT), and Special Access Programs (SAP) (as required) assessment methodology to create an assessment of DLA's OT , IoT, and SAP on-prem and cloud and update the existing DLA ZT Strategy to incorporate OT, IoT, and SAP requirements as required. These assessments will be additions to and maintained as part of the existing IT assessment for NIPR and SIPR environment assessments. The below are the requirements to maintain and update as needed on NIPR and SIPR in both the ZT assessment and strategy:

- The DLA Zero Trust Enterprise Environment assessment and implementation progress tracker will be maintained and updated as needed to reflect a comprehensive assessment of the NIPR, SIPR IT, OT, IoT, and SAP on premise, and cloud enclaves.
- The DLA Zero Trust Enterprise assessment and implementation progress tracker is maintained and updated as needed to address each of the 7 Zero Trust Pillars (User, Devices, Network, Data, Applications, Data Analytics, and Automation and Response) for IT, OT, IoT, and SAP

- The DLA Zero Trust Strategy shall be maintained and updated for NIPR and SIPR IT, OT, IoT, and SAP as required, to align with DLA's current enterprise environment.
- The DLA Zero Trust Strategy shall be maintained updated for NIPR and SIPR IT, OT, IoT, and SAP, as required, align with the DOW ZTA Strategy, DOW RA V 2.0, NSM-8, and NIST SP 800-207, and other future DOW or Federal Government guidance, directives, and/or regulations.
- The DLA Zero Trust Strategy shall be maintained and updated for NIPR, SIPR, OT, IoT, and SAP as required, to continue to be comprehensive and address the current DLA environment's Zero Trust maturity level and the associated hardware, software, and processes that are in place.

- The DLA Zero Trust Strategy shall be maintained and updated for NIPR and SIPR IT, OT, IoT, and SAP, as required, to address any gaps in DLA's current enterprise environment, and provides a framework to get to the target and advanced levels of maturity byDoW mandated timelines.

c. The DLA Zero Trust Strategy shall be maintained and updated for NIPR and SIPR IT, OT, IoT, and SAP, as required, include a schedule outline for DLAs implementation of the Zero Trust Strategy.

d. The contractor will lead the organization through ongoing and future roll outs of enterprise Zero Trust capabilities, founded on best practices standards, services, and processes that are measurable, repeatable, supportable, extensible, and can federate with any organization that's approved to integrate with the organization's enterprise.

e. The contractor coordinates a series of working sessions with the organization's IT stakeholders to develop requirements, plan use cases, and hold technical exchange workshops to conduct requirements traceability exercises that inform the design of the capabilities using that information and information gathered through the assessment and gap/fit analysis. These technical exchanges will further inform the organization's approach to the capability efforts and integration with the organization's cloud initiative, design of the organization's ZT IT, OT, IoT, and SAP security fabric for hosted services and applications and extending the security to as-a-service platforms and OT, IoT, and SAP platforms.

f. The contractor will coordinate, lead, and perform the following activities in support of DLA's ZT effort:

- Assessing organization's NIPR and SIPR IT, OT, IoT, and SAP solutions to crosswalk existing capabilities and plan integration with the ZT pillars for IT, OT, IoT, and SAP.
- Reviewing the current architectures and designs of organization's security services for integration with ZT capabilities.
- Conducting design work sessions, technical workshops, and planning the use cases.
- Developing capability test plans, documenting acceptance criteria, and identifying KPIs and metrics.
- Running the use cases and simulation scenarios to demonstrate the capabilities across the agreed upon use cases and scoring the outcomes against organization's stakeholders' acceptance criteria.
- Finalizing development of engineering artifacts- architectures (i.e., OVs/SVs), workflows designs, blueprints, systems' interfaces designs, and APIs code for delivery to government.
- Assist with coordination, completion, and response to DLA and DoW taskers related to ZT.
- Assist organization with drafting DoW-level ZT Implementation Plan (I-Plan) updates, data calls, and associated artifacts and taskers.
- Assist with drafting new documents and/or updating existing documents for DLA policy, standards, guidelines, and other governance documents in support of Zero Trust
- Contractor will draft and/or assist the organization with drafting quarterly IPR slides for DLA J6 leadership, as well as other briefing slides and related materials to meet DLA, DoW, and other mission partner requirements.
- Presenting to stakeholders the After-Action Report (AAR) to include lessons learned, outcomes, final metrics, results of tests, and final assessment of capability performance.

Deliverable 1: Weekly In Progress Review

Deliverable 2: Updated NIPR and SIPR IT Assessment gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities
Deliverable 3: OT Assessment gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities
Deliverable 4: OT Assessment gap analysis, and implementation progress tracker is of DLA's Zero Trust capabilities
Deliverable 5: SAP Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities as required
Deliverable 6: Update Zero Trust Strategy to include SIPR, NIPR, OT, IoT, and SAP as required
Deliverable 7: Zero Trust Engineering and Architecture Artifacts
Deliverable 8: Weekly status reports
Deliverable 9: Zero Trust DLA Policies, Standards, Guidelines, and Governance Artifacts
Deliverable 10: Zero Trust Quarterly IPRs for J6 Leadership and slide presentations and related artifacts as required for DLA, DoD, and other mission partners requirements.
Deliverable 11: Documentation Development

2.3.5 TASK 5 – Task Order Project Management Support Services (Reference IDIQ RFP SP4709-23-R-0001 Task Area 7)

The contractor shall participate in the government's kick-off meeting and articulate their plans to manage scope, contractors, schedule, and the execution of task areas. This includes the coordination of on/offboarding contractors, reporting, training and timely submission of deliverables. The Task Order Project Manager will ensure schedules are developed and meet the government's needs for the contracted employees. The Task Order Project Manager will ensure deliverables, training, reporting, and tasks are completed timely and accurately. The Task Order Project Manager will coordinate invoices and reporting with the COR to ensure reports are reviewed and approved prior to invoicing.

Deliverable: Monthly Progress Report (MPR): The Contractor shall provide a Monthly Progress Report to the COR and Program POC. The file will be provided to the COR prior to invoicing, in PDF or similar agreed upon format and indexed as ***YYYY.MM MPR***. The MPR will account for the invoiced Period of Performance and shall include, but not be limited to: Contract number and Task Order Number, Brief task description, A review of project plans including work accomplished during the reporting period and/or significant events, Deliverable progress, Problem areas and Solution or Plan to correct, Anticipated activity for the next reporting period, Description of any travel or unique services provided, and Funds/labor expended and remaining.

Deliverable: Transition Plan: The contractor shall provide a Transition Plan NTE seven (7) pages within 60 days of task order award of the base period.

The contractor shall:

a) Provide a Transition Plan to execute the transition out of all service areas if you are not awarded the follow-on; Transition Plan to transition-out all services to include knowledge transfer to personnel designated by the government.
b) Provide details on a full performance schedule for the transition-out phase.
c) Plan the transition services associated with the consolidation or divesture of DoD and/or DLA workload or uninterrupted operations.

d) Assist DLA in planning, preparing, and implementing any transition or change services.
e) Provide approved changes to DLA equipment, software, processes, and overall environment to support such consolidation or relocation.
f) Consider economies of scale and other synergies between the acquired operations of DLA.
g) Provide transition cost analysis, propose schedules and document risks associated with such transition.

Deliverable: Project Plan Development

The Contractor shall develop a project plan to accomplish the requirements of this PWS to include, but not limited to, the deployment phases: Initiation, Site Survey, Implementation, Post-Installation and Sustainment. Project plans will also be developed for specific tasks assigned by the Government within the scope of this PWS.

Deliverable: In-Process Reviews (IPRs)

The contractor shall conduct In-Process Reviews (IPRs) as needed and provide information regarding contract status. IPRs shall provide for an interchange between the Government and contractor during the execution of the task order (e.g., review of the system design, reviewing the results of functional testing, etc.).

2.3.6 TASK 6 – Transition Support (Reference IDIQ RFP SP4701-23-R-0001 Task Area 7)

In the event the Contractor is **not** awarded the follow-on task order and to facilitate a timely and orderly transition out, the Optional CLIN for Transition Support will be exercised. The contractor shall follow the Transition Plan submitted and approved as a deliverable in the PWS Task 45. Exercising the Optional Transition CLIN shall be during a base or option period of performance and may be exercised by the government as follows:

For a period of up to 30 days after the end of the contract.

2.4 TASK ORDER QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

In fulfillment of this effort, the Contractor shall provide the deliverables identified in this PWS. All deliverables shall be submitted to the Contracting Officer's Representative (COR) and Program Point of Contact for acceptance unless otherwise directed by the Government.

The COR has the responsibility to monitor the progress of the work of the Contractor personnel assigned to the tasks. Additionally, in the absence of other agreements negotiated with respect to time provided for government review, standards and actions shall be inspected and the contractor notified of the COR's findings within 5 workdays of normally scheduled review.

Unless otherwise specified, the Government will review draft deliverables and provide comments back to the contractor or approve or disapprove the deliverable(s). The contractor will have a maximum of ten (10) working days from the day comments are received to incorporate all changes and submit the final deliverable to the Government. All days identified are intended to be workdays unless otherwise specified.

The format for the individual deliverables will be determined through consultation between the COR and the contractor with recommendations from the Government Program Management Office (PMO). The QASP identifies the methods the government will use to measure performance of the service provider against the requirements and performance standards of the PWS. The QASP consists of guidelines for performance surveillance, evaluation, reporting, deficiency notification, and adjustments.

2.4.1 Performance Requirements Summary

The tasks the Contractor shall perform are defined in Section 2.3. All deliverables will be submitted to the COR and Government PMO for review and the PMO will make recommendations to the COR for acceptance unless otherwise agreed upon and the COR will advise the Contracting Officer who will direct the Contractor unless delegated back to the COR.

The Government will make objective and subjective assessments of the contractor's performance to determine whether contract performance is acceptable. The contractor is expected to perform all functions in a professional manner and prepare accurate and timely documentation. Progress will normally be tracked based on the milestone event when the contractor receives a specific task. Performance may vary with the complexity of the acquisition and/or technical document. It is expected that the documentation and procedures will comply with all major regulatory and process requirements and agency policies and procedures.

2.4.2 Method of Surveillance

The Government will ensure quality assurance and timeliness of all tasks via COR Inspections and Customer Feedback that is consolidated and submitted by the PMO. The Government will inspect and evaluate performance of each completed task or deliverable required in the task order PWS.

2.4.2.1 Inspection and Acceptance Criteria

Final inspection and acceptance of all work performed, reports and other deliverables will be performed at the place of delivery by the COR based on PMO recommendations. All deliverables will be inspected for content, completeness, accuracy, legibility and conformance to contract requirements by the COR based on PMO recommended input. At the discretion of the Government, inspection may include validation of information or software using automated tools and/or testing of the deliverables, as specified in the PWS.

If the Government finds that a draft or final deliverable contains spelling errors, grammatical errors, improper format, or otherwise does not conform to the requirements stated within the task order PWS, the document may be immediately rejected without further review and returned to the Contractor for correction and re-submission. If the Contractor requires additional Government guidance to produce an acceptable draft, the Contractor shall arrange a meeting with the COR/Government PMO.

The basis for acceptance shall be compliance with the requirements set forth in this task order PWS, the Contractor's proposal and other terms and conditions of the contract. Deliverable items rejected shall be corrected in accordance with the applicable clauses. Reports and document deliverables will be accepted when all discrepancies, errors or other deficiencies identified in writing by the COR have been corrected to the Government's satisfaction.

The Contractor shall provide electronic copies of deliverables in the format (ex. PDF, WORD, EXCEL) with the naming structure requested by the COR or identified in the PWS. Electronic copies shall be delivered via official DLA issued e-mail with attachment or other media specified by the COR. The electronic copies shall be compatible with the current DLA software products or other applications as appropriate and specified by the COR. The Contractor shall use best commercial practices for formatting deliverables under this contract. If the draft deliverable is adequate, the Government may accept the draft and provide comments for incorporation into the final version. All the Government's comments on deliverables must be incorporated in the succeeding version unless directed to correct in the current version.

2.4.3 General Acceptance Criteria

General quality measures, as set forth below, will be applied to each product received from the contractor under the resultant task order. These performance measurements are defined as:

Quality

- Accuracy – Work products shall be accurate in presentation, technical content, and adherence to accepted elements of style.
- Clarity – Work products shall be clear and concise. Any/all diagrams shall be easy to understand and be relevant to the supporting narrative.
- Consistency to Requirements – All work products must satisfy the requirements of this Performance Work Statement.
- Format – Work products shall be submitted in hard copy (where applicable) and in media mutually agreed upon prior to submission. Hard copy formats shall follow any specified Directives or Manuals. All text and diagrammatic files shall be editable by the Government.

Timeliness

- Work products shall be submitted on or before the due dates determined/specified between the task order COR and contractor or submitted in accordance with a later scheduled date determined by the Government.

2.4.3.1 Fixed Price Performance Based Service Contract Payments

The following procedures apply:

a) The contractor shall submit a monthly invoice in coordination with the monthly deliverables for 100% monthly amount for each PWS task. As part of the COR's monthly certification process, the COR will indicate on the invoice submitted the amounts authorized for payment for each task based on the performance measures described herein.
b) The determination for payment will be made in accordance with the procedures set forth below.
c) The COR or his/her designated representative will advise the contractor of what the Contracting Officer's (CO's) authorized amount of payment will be for each month. The contractor may direct questions on any withholding of payment to the Contracting Officer.

2.4.3.2 Performance Review and Payments

Below are the Performance Standards that will be used in evaluating performance in determining the amount of the payment owed to the contractor. These Performance Standards apply to the deliverables listed in Section 2.5 and to all performance under this task order PWS.

Overall Performance Ratings
Satisfactory – Performance meets or exceeds contractual requirements. The contractual performance reflects some minor problem(s) for which corrective actions taken by the contractor appear or were satisfactory. The COR recommends and the Contracting Officer will make a determination to pay the contractor 100% of the invoice amount.
Fair – Performance does not meet some contractual requirements. The contractual performance reflects a minor problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented. The minor performance problem(s) do not adversely impact the mission of the Agency. The COR recommends and the Contracting Officer will make a determination to pay the contractor 90% of the invoice amount.
Marginal – Performance does not meet some contractual requirements. The contractual performance reflects a serious problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented. The COR recommends and the Contracting Officer will make a determination to pay the contractor 80% of the invoice amount.
Unsatisfactory – Performance does not meet most contractual requirements, and recovery is not likely in a timely manner. The contractual performance contains a serious problem(s) for which the contractor's corrective actions appear or were ineffective. Payment will be withheld pending resolution of cure notice(s). Termination for default or cause may result.

Timeliness	
Satisfactory	Meets or exceeds contractual requirements in terms of timeliness of delivery. The timeliness of contractual performance reflects some minor problem(s) for which corrective actions taken by the contractor appear or were satisfactory.
Fair	Does not meet some contractual requirements in terms of timeliness of delivery. The timeliness of contractual performance reflects a minor timeliness problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented. The minor timeliness problem(s) do not adversely impact the mission of the Agency.
Marginal	Does not meet some contractual requirements in terms of timeliness of delivery. The timeliness of contractual performance reflects a serious problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented.

Unsatisfactory	Does not meet most contractual requirements in terms of timeliness of delivery and recovery is not likely in a timely manner. The timeliness of contractual performance contains a serious problem(s) for which the contractor's corrective actions appear or were ineffective.
Quality	
Satisfactory	Meets or exceeds contractual requirements in terms of quality of work performed. The quality of contractual performance reflects some minor problem(s) for which corrective actions taken by the contractor appear or were satisfactory.
Fair	Does not meet some contractual requirements in terms of quality of work performed. The quality of contractual performance reflects a minor quality problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented. The minor quality problem(s) do not adversely impact the mission of the Agency.
Marginal	Does not meet some contractual requirements in terms of quality. The quality of contractual performance reflects a serious problem(s) for which the contractor has not yet identified corrective actions. The contractor's proposed actions appear only marginally effective or were not fully implemented.
Unsatisfactory	Does not meet most contractual requirements in terms of quality and recovery is not likely in a timely manner. The quality of contractual performance contains a serious problem(s) for which the contractor's corrective actions appear or were ineffective.

Disincentives are applied for ratings of "Fair", "Marginal", and "Unsatisfactory" as follows:

Satisfactory = 100% payment
Fair = -10% disincentive
Marginal = -20% disincentive
Unsatisfactory = Payment will be withheld pending resolution of cure notice(s). Termination for default or cause may result.

2.5 DELIVERABLES

The Table below identifies the deliverables resulting from the tasks defined in this Task Order PWS. All completed deliverables shall be forwarded to the COR and PMO. The contractor shall use best commercial practices for formatting all deliverables under this task order and follow any instructions related to file format or naming convention designated by the COR. Electronic copies of all deliverables shall be sent to the COR and PMO via email in compatible formats. If deliverables exceed email size limitations coordination is required with the KO, COR, and PMO to reach an alternative solution prior to the due date.

TABLE 1: DELIVERABLES:

Table 1 identifies the Deliverables resulting from the tasks defined in Section 2.3

Deliverable	Deliverable Reference #	Quantity: No. of Reports/Data Calls	Deliverable Due Date
Complete assigned task by agreed-upon time	2.3.1.1, 2.3.1.2		As required
Complete regularly scheduled task at agreed-upon intervals	2.3.1.1, 2.3.1.2		As required
End-of-week activity report	2.3.1.1		Weekly COB
Meet Ticketing Support Guidelines	2.3.1.1, 2.3.3		Update tickets every two business days until resolution Initial Response to the Customer with in one business day Resolve Incidents within 1 business days unless noted. Resolve All other assigned ticket types within 3 business days unless noted.
Meet Ticketing Support Guidelines	2.3.1.2		Update tickets every two business days until resolution No more than 10% of tickets are unassigned during normal business hours. Initial Response to the Customer with in one business day Resolve >70% of combined NIPR/SIPR Tickets in the Directory Services ticket queue monthly Resolve Incidents within 1 business days unless noted. Resolve All other assigned ticket types within 3 business days unless noted.
Meet Ticketing Support Guidelines	2.3.2.2		Update tickets every two business days until resolution

			No more than 10% of tickets are unassigned during normal business hours. Initial Response to the Customer with in one business day Resolve >75% of all ticket types in the VDI ticket queue monthly
Generate Weekly Reports	2.3.1.2, 2.3.2.2, 2.3.3, 2.3.4	1 Soft Copy	By COB each Monday
Implementation / Build / Change Management / Training Materials Documentation	2.3.2.1	1 Soft Copy	Thursday
Project Plans and Schedules	2.3.1.1,2.3.2.2 2.3.3	1 Soft Copy	By COB each Thursday
Slide Presentations	2.3.1.1, 2.3.2.2, 2.3.3	1 Soft Copy	By COB each Friday
Zero Trust DLA Policies, Standards, Guidelines, and Governance Artifacts	2.3.4	As Required	As defined in the Deliverable
Documentation Development	2.3.3.1, 2.3.3.2, 2.3.3.2, 2.3.3, 2.3.4		As required
Weekly Status Reports	2.3.1, 2.3.2, 2.3.3, 2.3.4	1 Soft Copy	By COB each Monday
Weekly In Progress Review	2.3.4	Weekly	By COB each Monday
Updated NIPR and SIPR IT Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities and activities	2.3.4	1	As required
Operational Technology (OT) Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities and activities	2.3.4	1	As required
Internet of Things (IoT Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities and activities	2.3.4	1	As required
Special Access Programs (SAP) Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities and activities	2.3.4	1	As required

Updated Zero Trust Strategy to include SIPR and NIPR Information Technology (IT), Operational Technology (OT), Internet of Things (IoT), and Special Access Programs (SAP)	2.3.4	1	As required
Zero Trust Engineering and Architecture Artifacts	2.3.4	As Required	As required
Zero Trust DLA Policies, Standards, Guidelines, and Governance Artifacts	2.3.4	As Required	As required
Zero Trust Quarterly IPRs for J6 Leadership and slide presentations and related artifacts as required for DLA, DoD, and other mission partners requirements.	2.3.4	1	Quarterly
Monthly Progress Report (MPR)	2.3.5	12	No later than the 5th business day after each billing period and prior to invoicing.
Transition Plan	2.3.5, 2.3.6	1	Within 120 calendar days of contract start date
Project Plan and Schedule	2.3.5	1	14 Days after identification of a new requirement.
In Process Review Briefings	2.3.5	1	As required
Recuring Training and Certifications (OPSEC, 8570 Certificates, PM Certification, etc.)	2.3.5, 2.14	Continuous	Prior to annual training and certification expiration.
Contractor Quality Control Plan	2.5.1	1	Within 10 business days of contract Award date
Other Miscellaneous Reports: CAC Turn-In Form (7036), Lost/Stolen CAC Police Report	2.6, 2.13.2	As required	As required
Non-Disclosure Agreements	2.6.5	100% COR Inspection	Submit with onboarding request
Monthly GFE Report (Type of Equipment, Asset, Tag, Serial #s)	2.6.6	12	No later than the 5th business day after each billing period and prior to invoicing.
Annual CTIP Checklist	2.6.7	Annually	Annually
Monthly CAC Report (Name, CAC EDIPI #, Issuance Date, Turn-In Date)	2.13.1, 2.13.2	12	No later than the 5th business day after each billing period and prior to invoicing.
Monthly 8570 / 8140 Report	2.14	12	No later than the 5th business day after each billing period and prior to invoicing.
Sub-Contractor DD Form 254	2.6.3	1 Each Sub-Vendor	Prior to onboarding of any Contractor employees working for a sub-Contractor who requires classified access in DISS

TABLE 2: PERFORMANCE REQUIREMENTS:

Table 2 identifies the Performance Requirements resulting from the Deliverables in Table 1.

Deliverable Title	**Deliverable Reference #**	**Surveillance Method and Performance Standards**	**Surveillance Schedule (Daily, Weekly, Monthly, Quarterly)**	**Incentive**
Complete assigned task by agreed- upon time	2.3.1.1, 2.3.1.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Complete regularly scheduled task at agreed-upon intervals	2.3.1.1, 2.3.1.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
End-of-week activity report	2.3.1.1	100% COR Inspection Performance Standards – see Section 2.4.3.2	As defined in the Deliverable	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Meet Ticketing Support Guidelines	2.3.1.1, 2.3.1.2, 2.3.2.2, 2.3.3.1, 2.3.3.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Generate Weekly Reports	2.3.1.2, 2.3.2.2, 2.3.3, 2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	Weekly due on COB Thursday	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Implementation / Build / Change Management / Training Materials Documentation	2.3.2.1	100% COR Inspection	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2

		Performance Standards – see Section 2.4.3.2		
Project Plans and Schedules	2.3.1.1, 2.3.2.1, 2.3.3	100% COR Inspection Performance Standards – see Section 2.4.3.2	By COB each Friday	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Slide Presentations	2.3.1.1, 2.3.2.2, 2.3.3	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Documentation Development	2.3.1.1, 2.3.1.2 2.3.2.2, 2.3.3, 2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Weekly Status Reports	2.3.1, 2.3.2, 2.3.3, 2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	By COB each Monday	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Weekly In Progress Review	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	Weekly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Updated NIPR and SIPR Assessment, gap analysis, and implementation progress tracker of DLA's Zero Trust capabilities	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Update Zero Trust Strategy to include SIPR and NIPR Information Technology (IT), Operational Technology (OT), Internet of Things (IoT), and Special Access Programs (SAP)	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2

Zero Trust Engineering and Architecture Artifacts	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Zero Trust DLA Policies, Standards, Guidelines, and Governance Artifacts	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Zero Trust Quarterly IPRs for J6 Leadership and slide presentations and related artifacts as required for DLA, DoD, and other mission partners requirements.	2.3.4	100% COR Inspection Performance Standards – see Section 2.4.3.2	Quarterly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Monthly Progress Report (MPR)	2.3.5	100% COR Inspection Performance Standards – see Section 2.4.3.2	Monthly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Monthly CAC Report (Name, CAC EDIPI #, Issuance Date, Turn-In Date)	2.13.1, 2.13.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	Monthly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Other Miscellaneous Reports: CAC Turn-In Form (7036), Lost/Stolen CAC Police Report	2.6, 2.13.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Contractor Quality Control Plan	2.5.1	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Recuring Training and Certifications (OPSEC,	2.3.5, 2.14	100% COR Inspection	Continuous	Timeliness and quality ratings to

8570 Certificates, PM Certification, etc.)		Performance Standards – see Section 2.4.3.2		be assigned pursuant to section 2.4.3.2
Annual CTIP Checklist	2.6.7	100% COR Inspection Performance Standards – see Section 2.4.3.2	Annually	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Monthly Progress Report (MPR)	2.3.5	100% COR Inspection Performance Standards – see Section 2.4.3.2	No later than the 5th business day after each billing period and prior to invoicing.	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Transition Plan	2.3.5, 2.3.6	100% COR Inspection Performance Standards – see Section 2.4.3.2	Within 60 calendar days of contract start date	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Project Plan and Schedule	2.3.5	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
In Process Review Briefings	2.3.5	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Recuring Training and Certifications (OPSEC, 8570 Certificates, PM Certification, etc.)	2.3.5, 2.14	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Contractor Quality Control Plan	2.5.1	100% COR Inspection Performance Standards – see Section 2.4.3.2	1	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2

Other Miscellaneous Reports: CAC Turn-In Form (7036), Lost/Stolen CAC Police Report	2.6, 2.13.2	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Non-Disclosure Agreements	2.6.5	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Monthly GFE Report (Type of Equipment, Asset, Tag, Serial #s)	2.6.6	100% COR Inspection Performance Standards – see Section 2.4.3.2	Monthly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Annual CTIP Checklist	2.6.7	100% COR Inspection Performance Standards – see Section 2.4.3.2	Annually	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2

Monthly 8570 / 8140 Report	2.14	100% COR Inspection Performance Standards – see Section 2.4.3.2	Monthly	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2
Sub-Contractor DD Form 254	2.6.3	100% COR Inspection Performance Standards – see Section 2.4.3.2	As required	Timeliness and quality ratings to be assigned pursuant to section 2.4.3.2

2.5.1 Contractor Quality Control Plan (QCP)

The contractor shall submit a QCP within ten (10) business days of contract start date to the Government Program Management Office (PMO) and Contracting Officer Representative (COR). This plan shall describe the contractor's methodology of compliance with the Deliverables and Performance Requirements Summary outlined above. The COR will notify the contractor of concurrence or required modifications to the QCP within ten (10) business days of receipt. The contractor shall make appropriate modifications within five (5) business days of the COR's notification and provide a revised QCP within five (5) business days.

2.6 PERFORMANCE REQUIREMENTS

- There are multiple contractors supporting DLA and other DOD activities who are working on similar or related activities. The contractor shall work with these contractors, as required, to satisfy DLA requirements, goals, and objectives as efficiently and effectively as possible. This may include, but is not limited to, sharing or coordinating information resulting from the work required by this PWS and/or working as a team to perform tasks in concert.

- The Contractor shall provide sufficient management to ensure that these tasks are performed efficiently, accurately, on time, and in compliance with the requirements of this document. Specifically, the Contractor shall designate a single manager to oversee these tasks and supervise staff assigned to these tasks. The Contractor shall ensure that a Monthly Progress Report is submitted outlining the expenditures, billings, progress, status, and any problems/ issues encountered in the performance of these tasks.

- To ensure a smooth and orderly startup of this contract, it is essential that the key personnel specified in the Contractor's proposal be available on the effective start date of the contract.

- The contractor is expected to minimize employee turnover with respect to personnel performing under this Performance Work Statement. The Contractor shall not remove or replace any personnel designated as "key" personnel, without the prior written notification and approval by the Contracting Officer, although the Government recognizes that the contractor cannot compel any individual to remain under its employ. Written notification of the pending substitution shall be submitted to the Contracting Officer no later than ten (10) calendar days in advance of any proposed substitution and shall include a resume and justification of the proposed substitution(s) in sufficient detail to permit evaluation of the impact on contract performance. The Government will review the resume(s) and justification to ensure compliance with this clause and other requirements contained in this Performance Work Statement. Any replacement personnel proposed shall, at a minimum, be at least as qualified as the individual being replaced.

- The contactor shall work offsite to the maximum extent when permissible. In positions that require an onsite presence at DLA locations, or other Government locations, the contractor shall work within the duty hours of that location. The normal Government work hours range between 0600- and 1730-hours local time, Monday through Friday, exclusive Federal holidays. The Government may require the contractor to work longer hours on given days and/or weekends, depending on operational needs and contingencies, (i.e., installation and testing during non-peak hours).

- This contract is a "non-personal services contract" as defined in FAR 37.101. It is, therefore,

understood and agreed that the contractor and/or the contractor's employees: (1) shall perform the services specified herein as independent contractors, not as employees of the Government; (2) shall be responsible for their own management and administration of work required and bear sole responsibility for complying with any and all technical, schedule, or financial requirements or constraints attendant to the performance of this contract; (3) shall be free from supervision or control by any Government employee with respect to the manner or method of performance of the services specified; but (4) shall, pursuant to the Government's right and obligation to inspect, accept, or reject the work, comply with such general direction of the Contracting Officer, or the duly authorized representative of the Contracting Officer as is necessary to ensure accomplishment of the contract requirements.

- The contractor shall return all government-furnished Common Access Cards (CACs), Access ID Badges, electronic key cards, and any other government issued passes, e.g., vehicle pass, to the COR or designated Government Point of Contact within 24 hours of the completion of the contract or upon termination of an individual's employment, whichever comes first. Notification and coordination with the COR and Program POC are required. Completion and submission of the CAC Turn-In Receipt (DLA FORM 7036) is **REQUIRED**. Contractor personnel failing to return their CAC, Access ID Badges, and electronic key cards are subject to criminal charges under United States Code (USC) Title 18, Chapter 1, Section 499 and 701.

  Security requirements apply to the prime Contractor and any Sub-Contractors the prime Contractor may employ during this contract, as well as any temporary employees that may be hired by the Contractor. The Government retains the right to request removal of Contractor personnel whose actions, while assigned to this contract, are determined by the Contracting Officer to conflict with the interests of the Government. If such removal occurs, the Contractor shall assign qualified personnel to any vacancy.

  For contractors not meeting the CAC eligibility requirements, the COR or Government POC must contact the local security office for access control requirements and the local badging process.

  Contractor employees must follow procedures for Installation Access (Non-DOD Cardholders/Visitors). Multi-day visits or access to Restricted Areas may require Personally Identifiable Information to allow for a local records check. Physical Security will run a criminal history check on Contractor employees as a condition of access to the installation. If entry is denied, the Contractor will be immediately notified. Physical Security may require updating or rechecking criminal history based on the duration of the contract. NOTE: The Vetting Official will deny access to any person who the Installation Commander has deemed unfit for unaccompanied access. Depending on the site, a government escort may be required.

  The Contractor is responsible for employees and Sub-Contractors under their employment. Contractors will ensure that employees are familiar with and obey installation traffic, safety, and security regulations. Contractor employees, including Sub-Contractors, are required to wear the ID card conspicuously on their outer clothing, and above the waist always while working on a Government Facility. Personnel are subject to challenge and removal from the work area if the ID card is not worn. It is the Contracting Officer's or designee's responsibility to enforce this requirement. Failure to do so is just cause for ordering that work on a contract be stopped.

Expired, invalid, inaccurate, inoperative or terminated Pass or Access Control Badge shall be returned to the Contracting Officer or his designee for disposition. These cards are the property of the U.S. Government and shall not be retained by the cardholder upon expiration, replacement, or when the DoD affiliation of the employee has been terminated. The Contracting Officer or his designee shall deliver all returned Contractor badges to the Welcome Center within 5 business days. If the Pass or Access Control Badge is lost or stolen, a police report will be completed, Contracting Officer or designee will submit mandatory and certification thereof to the Contracting Officer is required prior to submitting invoices. Failure to return badges will hold up Contractor's final payment.

- The Contractor will not employ any person whose employment will violate the requirements of DOD5500.7, Joint Ethics Regulation.

- All Contractor personnel shall observe local policy and procedures provided by the Office of Information Resources governing the use of computer equipment and passwords. Violations of local policy shall include password sharing, performing personal work, file access violations or browsing files outside the scope of the contract. The Contracting Officer shall adjudicate each case, and his/her decision shall be final.

- Where the Government has requested the removal of contractor personnel, the contractor will provide an appropriately trained replacement. Individuals removed from this task order are removed for the duration of the task order. The contractor will notify the COR within 24 hours when for reasons of personnel resignations, reassignments, terminations, or completion of portions of the task order, or contractor personnel no longer require access to Government computers.

- Contractor personnel **are only** authorized to attend meetings, town halls, events as they relate to the performance of the tasks outlined in the PWS. Contractor(s) should not be attending any meetings or events that are not outlined in the PWS.

- The Contractor shall provide knowledge transfer and associated documentation to designated J6 Information Operations personnel upon the functional implementation, maintenance, and sustainment of technology products and capabilities. Such knowledge transfer and documentation shall be sufficiently detailed to enable said personnel to effectively analyze, test, and maintain operational continuity. The Contractor warrants that the provided documentation is accurate, complete, and sufficient for its intended purpose.

2.6.1 Personnel Requirements

Resumes and required certifications shall be submitted for all Key Personnel who will be directly involved in the PWS Requirements and shall be skilled, experienced, professional, or technical personnel consistent with the task-specific requirements of this PWS and in accordance with the requirements of the basic IDIQ RFP: SP4709-23-R-0001, including all amendments and modifications, Attachment 1 - JETS Labor Category Descriptions.

Note: The Government reserves the right to review non-key resumes prior to onboarding. The Government also reserves the right to reject non-key personnel that do not meet the minimum requirements listed in section 2.6.2.

2.6.2 Task Specific Personnel Minimum Requirements

The Government is providing estimates for the level of effort required to fulfill the requirements of the Performance Work Statement for each labor category below. This is only an estimate, and the contractor is required to provide a level of effort consistent with its proposed technical approach. Contractors are permitted to propose a level of effort below the government estimate if their proposed approach enables them to successfully perform the requirement at a lower level of effort. However, a Contractor proposing a level of effort below the government estimate will only be found to be technically acceptable if the Contractor is able to clearly demonstrate how their technical approach enables them to successfully perform at that level of effort. Base assurances and conclusory statements about a contractor's capability may not be deemed sufficient to support a level of effort below the government estimate.
The total range of hours for the personnel and required support is expected to be between 27,950 and 29,980 per Option Period.

Key Personnel Labor Categories anticipated for this Tasking are:

Task 1 – Directory Services

Cloud Computing Specialist (CCS)-Subject Matter Expert (SME) (On-Site) (Position 1)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	160 – 210 hours

Task 2 – Enterprise Infrastructure Application Support

Systems Architect - Senior (On-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	160 – 210 hours

Citrix/ Virtual Desktop Infrastructure (VDI) Administrator (On-Site at Dayton, OH)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	160 – 210 hours

~~Senior Systems Administrator~~Systems Administrator - Senior (VDI) (On-Site at Fort Belvoir, VA)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	160 – 210 hours

Systems Engineer (Off-Site)	
Base Period	1850 – 1980 hours
Option Period 1	1850 – 1980 hours
Option Period 2	3700 – 3960 hours
Option Period 3	3700 – 3960 hours
Transition Out	320-400 hours

Task 3 – Enterprise Software & Mobility Services

Systems Architect - Senior (On-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	160 – 210 hours

Non-Key Personnel Labor Categories anticipated for this Tasking are:

Task 1 – Directory Services

Active Directory (AD)/Group Policy Administrator (On-Site)	
Base Period	2,775 - 2,970 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Cloud Computing Specialist (CCS)-Subject Matter Expert (SME) (On-Site)	
Base Period	1850 – 1980 hours
Option Period 1	1850 – 1980 hours
Option Period 2	3700 – 3960 hours
Option Period 3	3700 – 3960 hours
Transition Out	0

Email Exchange Administrator (On-site)	
Base Period	2,775 - 2,970 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

IT Support Specialist (On-Site) Tracy, CA and Richmond, VA	
Base Period	1850 – 1980 hours
Option Period 1	0
Option Period 2	0
Option Period 3	0
Transition Out	0

IT Support Specialist (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	0
Option Period 2	0
Option Period 3	0
Transition Out	0

~~Senior Systems Administrator~~Systems Administrator - Senior ~~(VDI)~~ (On-Site at Fort Belvoir, VA)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Task 2 – Enterprise Infrastructure Application Support

Citrix/ Virtual Desktop Infrastructure (VDI) Administrators (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

IT Support Specialist (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	0
Option Period 2	0
Option Period 3	0
Transition Out	0

Systems Engineer (Off~~On~~-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Operational Technology Specialist - Basic Level (On-Site) (New Cumberland, PA)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Task 3 – Enterprise Software & Mobility Services

IT Specialist – Mobility Engineer (On-Site)	
Base Period	3700 – 4000 hours
Option Period 1	3700 – 4000 hours
Option Period 2	7400 – 8000 hours

Option Period 3	7400 – 8000 hours
Transition Out	160 – 210 hours

~~Senior Systems Administrator~~Systems Administrator - Senior (On-Site)	
Base Period	2775 - 2970 hours
Option Period 1	2775 - 2970 hours
Option Period 2	5550 – 5940 hours
Option Period 3	5550 – 5940 hours
Transition Out	160 – 210 hours

Task 4 – Zero Trust Architecture Support

Technology Executive (Off-Site)	
Base Period	100 – 140 hours
Option Period 1	100 – 140 hours
Option Period 2	200 – 280 hours
Option Period 3	200 – 280 hours
Transition Out	0

Cloud Computing Specialist (CCS)-Subject Matter Expert (SME) (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Computer Software/Integration Analyst (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Cybersecurity Subject Matter Expert – Lead (Off-Site)	
Base Period	925 – 990 hours
Option Period 1	925 – 990 hours
Option Period 2	1850 – 1980 hours
Option Period 3	1850 – 1980 hours
Transition Out	0

Task 5 – Task Order Project Management

Program Manager (Off-Site)	
Base Period	100 – 140 hours
Option Period 1	100 – 140 hours
Option Period 2	200 – 280 hours
Option Period 3	200 – 280 hours
Transition Out	0

Note: The estimated annual hours listed for the labor categories are only approximations. Contractors are not restricted to this specific quantity in their proposals. It is the Contractor's responsibility to determine the appropriate labor mix to ensure successful performance.

Task Order Project Management (Task 5/All)

PROGRAM MANAGER: (Off-Site) (None-Key Personnel) (New Cumberland, PA)
Leads projects that involve the successful management of teams composed of data processing and their information management professionals who have been involved in analysis, design, integration, testing, documenting, converting, extending, and implementing automated information and/or telecommunications systems. Performs day-to-day management of overall contract support operations, possibly involving multiple projects and groups of personnel at multiple locations. Organizes, directs, and coordinates the planning and production of all contract support activities. Demonstrates written and oral communication skills. Establishes and alters (as necessary) corporate management structure to direct effective contract support activities.

Minimum Requirement: Must hold a Project or Program Management certification (i.e., Project Management Professional (PMP) certification or other equivalent/recognized Project or Program Management certification); Project or Program Management certifications from accredited institutions are required. Examples from government and commercial sources include, but are not limited to the Defense Acquisition University, The Program Management Institute, Department of Veterans Affairs as well as Universities and Colleges. Substitutes for a Project or Program Management Certification such as training, degrees or relevant experience, will be considered and must clearly state how the credentials are equivalent to the certifications.

Have 5 years of experience in program management; and 10 years of leadership experience with progressively higher responsibility in the public and/or private sector in the IT and/or consulting fields.

Security/Certification Requirements:
Sensitivity Level: IT-II – Critical Sensitive Clearance: Secret

Directory Services (Task 1)

SYSTEMS ADMINISTRATOR - SENIOR: (On-Site) (Non-Key Personnel) (Task: 1)

Duty Locations

The primary work location for these positions will be one of the following:

Battle Creek, MI
Columbus, OH
Dayton, OH
Fort Belvoir, VA
Richmond, VA
New Cumberland, PA
Philadelphia, PA

Tracy, CA

Ensures the stable operation of the in-house computer software systems and network connections. This includes planning, developing, installing, configuring, maintaining, supporting, and optimizing all network software and communication links. Organizes and directs the configuration and operation of information management systems. Analyzes and resolves end user software program and connectivity issues. Conducts capacity and performance analysis and provides system configuration change and upgrade recommendations. Increases system administrator efficiency and accuracy via the use of automated tools and scripts, develops system administrator procedures, and conducts system administrator training and skills assessment. Provides end user training. Provides recommendations on technology direction to align with business vision. Provides local and remote maintenance support to various operational systems deployed at more than one location. Support includes general maintenance, upgrades, and new installs of servers and applications. Directs the work of other system administrators to provide the day-to-day system administration to include system and resource optimization, and user assistance. Applies advanced technical knowledge of application networking, including load balancing applications, and ensuring fault tolerance. Performs vulnerability management.

Minimum Requirements:
- Ten (10) years of overall professional IT experience
- Five (5) years of experience supporting Microsoft 365 collaboration services (Teams, SharePoint Online, OneDrive, Exchange Online)
- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, MS-203, SC-300, SC-400, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview
The M365 Collaboration & Purview Systems Engineer will provide enterprise-level Tier 3 engineering, administration, automation, and operational support for DLA's Microsoft 365 collaboration and compliance services across NIPRNET and SIPRNET environments. The engineer will support and maintain Microsoft Teams, SharePoint Online, OneDrive, and Exchange Online, along with full Purview information protection, retention, data classification, eDiscovery, and insider risk capabilities. Responsibilities include tenant-level governance, troubleshooting complex collaboration and compliance issues, developing automation using PowerShell and cloud-native tools, generating operational and compliance reporting through Power Platform capabilities, and ensuring alignment with Zero Trust, STIGs, cyber, auditing, and enterprise governance requirements. The engineer will evaluate and implement new Microsoft 365 capabilities, support secure integration of approved AI-driven features, and collaborate with stakeholders to maintain secure, reliable, and compliant enterprise collaboration services.

The engineer must be highly adaptable and able to adjust to evolving mission requirements, emerging technologies, and the rapid release cycle of new Microsoft 365 capabilities. This includes the ability to learn, evaluate, and support newly introduced collaboration, compliance, security, and cloud features as they become available within the enterprise environment. The role requires a proactive mindset toward continuous improvement, willingness to expand technical skillsets, and the ability to quickly incorporate new tools, updates, and platform enhancements into operational workflows while maintaining security, compliance, and stability across all supported services.

Recommended Experience
- Ten years of enterprise IT experience
- Five years of experience supporting Microsoft 365 collaboration services (Teams, SharePoint Online, OneDrive, Exchange Online)
- Three years of hands-on experience with Microsoft Purview (labels, retention, eDiscovery)
- Four or more years of PowerShell scripting and administrative automation
- Experience generating operational or compliance reports using Power Platform capabilities (Power BI, Power Automate)
- Experience with collaboration tenant governance, RBAC, logging, auditing, and Zero Trust alignment
- Experience supporting RMF documentation, STIG controls, and audit requirements

EMAIL EXCHANGE ADMINISTRATOR (On-Site) (Non-Key Personnel) (Task: 1)

Duty Locations

The primary work location for these positions will be one of the following:

Battle Creek, MI
Columbus, OH
Dayton, OH
Fort Belvoir, VA
Richmond, VA
New Cumberland, PA
Philadelphia, PA
Tracy, CA

Design, manage, plan, and implement Exchange or M365 Exchange Online in an Enterprise Network. Designs, plan, implements, and manage SMTP relays in an enterprise environment. Maintain security compliance at the Exchange server and enterprise level using all applicable DOD security check list and tasking's. Create Exchange disaster recover documentation. Administer Active Directory.

Minimum Experience:
- Nine (9) years of overall professional IT experience
- Five (5) years of progressive experience in Microsoft Exchange 2010 or newer administration experience. With At least one (1) year of experience occurring within the past two (2) years.
- Five (5) years of Active Directory administration. With At least one (1) year of experience occurring within the past two (2) years.
- Two (2) years of Microsoft PowerShell for exchange experience

- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission.
- Clearance: Secret
- Position destination: Mission Essential

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, MS-203, SC-300, SC-400, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview
The Administrator will provide enterprise-level engineering, Tier 3 support, administration, modernization, and automation for DLA's Microsoft 365 collaboration, messaging, and compliance services across both NIPRNET and SIPRNET environments. This includes daily management, health monitoring, troubleshooting, and lifecycle maintenance of Exchange Online, Microsoft 365 collaboration workloads, and all supporting cloud services. The Administrator will support and integrate capabilities across M365 and approved cloud-hosted environments, ensuring secure configuration, reliable availability, and alignment with DLA cybersecurity and governance requirements.
Responsibilities include Tier 3 troubleshooting for messaging and collaboration systems; administration and governance of On-Prem and Exchange Online; and support for hybrid identity integrations tied to the messaging and collaboration environment. The Administrator will manage Microsoft Purview capabilities including sensitivity and retention labels, data classification, eDiscovery, and broader information protection governance across the tenant.
The Administrator will ensure compliance with Microsoft updates, DoD cybersecurity requirements, STIGs, and RMF documentation. They will design and maintain automation using PowerShell and cloud-native tools, as well as generate operational, compliance, and service health reports using Power Platform capabilities such as Power BI or Power Automate where applicable. These reporting workflows will improve efficiency, ensure accurate visibility of collaboration services, and support large-scale configuration or policy changes.
Additional responsibilities include supporting integrations of approved AI-driven capabilities within the Microsoft 365 ecosystem. This includes assisting with configuration readiness, data access governance, policy alignment, and ensuring that any AI-related features are implemented securely and in accordance with information protection and compliance standards.
This position requires strong communication skills, precise documentation, the ability to follow detailed procedures, and the capacity to work independently and collaboratively. Candidates must possess strong analytical and problem-solving skills and be able to brief leadership on technical issues and recommended solutions.

Recommended Skills and Experience:

• Five years of experience supporting enterprise messaging or collaboration systems, with at least three years supporting Microsoft 365
• Five years of experience administering Exchange or Exchange Online
• Five years of experience with PowerShell scripting and automation
• Experience with Microsoft Purview or similar enterprise compliance/security platforms
• Experience generating reports or automated workflows using Power Platform tools (Power BI, Power Automate)
• Experience with hybrid identity, Active Directory, and Azure-based identity integrations
• Familiarity with integrating AI-based collaboration or compliance capabilities within enterprise environments
• Strong understanding of DoD cybersecurity, STIGs, and RMF documentation requirements

ACTIVE DIRECTORY(AD)/GROUP POLICY ADMINISTRATOR (On-Site) (Non-Key Personnel) (Task: 1)

Duty Locations

The primary work location for these positions will be one of the following:

Battle Creek, MI
Columbus, OH
Dayton, OH
Fort Belvoir, VA
Richmond, VA
New Cumberland, PA
Philadelphia, PA
Tracy, CA

Manage, plan, and implement AD in an Enterprise Network. Modifies AD Schema. Manage AD sites and Services. Manage AD Physical architecture and AD Logical architecture. Design, plans and implement AD Sites and Subnets. Monitor and troubleshoot AD replication. Prepare a Domain Controller Strategy.

Manages AD Domains and Trust. Design, plan, implement and manage Organizational Units (OUs). Monitor and performs backup and restore of AD. Create AD disaster recover documentation. Design, plans, implement, and manage group policies for an enterprise environment. Plans and performs Group Policy optimization, security, etc. Performs Group Policy backup and recovery. Manages administrative templates for Group Policies. Creates a strategy for configuring the user environment and the computer environment with Group Policy. Maintain security compliances at the domain controller server and domain level using all applicable DOD security check list and tasking's.

Minimum Experience:
- Nine (9) years of overall professional IT experience
- Seven (7) years of progressive experience in Microsoft Windows Server 2019 or newer administration, Microsoft Active Directory 2016 or newer administration,
- Two (2) years of Microsoft PowerShell for AD experience

- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission.
- Clearance: Secret
- Position destination: Mission Essential

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview
The Active Directory (AD) / Identity Services Engineer will provide Tier 3 engineering, administration, modernization, automation, and cybersecurity support for all enterprise identity and directory services across DLA's on-premises and cloud environments. This includes support and lifecycle management of multiple Active Directory forests and domains on both NIPRNET and SIPRNET, as well as Azure Entra ID, hybrid identity, and integration with approved Identity Provider (IdP) and ICAM solutions. The Administrator will ensure proper system functionality, directory health, monitoring, optimization, troubleshooting, and adherence to all applicable DoD and DISA security requirements.
Responsibilities include supporting synchronization, federation, authentication, Conditional Access, MFA, Zero Trust identity enforcement, and all identity protection capabilities. The Administrator will lead Group Policy design, modernization, and troubleshooting; support certificate-based authentication and PKI; and maintain full STIG compliance, audit logging, RBAC governance, and vulnerability mitigation across all directory environments. The role includes the development of required RMF and cybersecurity artifacts, POA&Ms, audit evidence, and compliance reports.
The Administrator will design and implement automation using PowerShell, cloud-native automation, and related tools to streamline operations, enforce baselines, and support large-scale changes. Additional responsibilities include evaluating, testing, and deploying new identity capabilities; supporting Quest Active Roles; and troubleshooting Windows Server and SQL issues as needed. As a member of the J64 Directory Services team, the Administrator is expected to be highly adaptable, customer-focused, and willing to learn new technologies to meet dynamic mission requirements. Work may occasionally require extended hours or weekend support to accommodate non-peak installation or testing activities.

Recommended Skills and Experience:
• Eight years of experience with Active Directory and enterprise identity services, with at least four years occurring within the past three years
• Five years of experience with automation and scripting (PowerShell strongly preferred)
• Five years of experience with Group Policy design and management
• Three years of experience supporting M365 with Entra ID, or hybrid identity environments
• Experience with PKI, certificate-based authentication, and identity security
• Experience with Quest Active Roles (desired)
• Experience troubleshooting Windows Server and SQL (desired)

IT SUPPORT SPECIALIST (On-Site) ~~(On-Site)~~ (Non-Key Personnel) (Task: 1)

Duty Locations

The primary work location for these positions will be one of the following:

Tracy, CA
Richmond, VA

Candidate shall meet the following Core Requirements and the details must be reflected on the candidate's resume:

This position covers planning and delivery of customer support services including installation, troubleshooting, user assistance, and training. Functions may include diagnosing and resolving problems in response to customer reported incidents, planning and analysis of work processes, researching and reporting trends and patterns of problems, developing training materials and performing computing/information system training sessions, developing and maintaining problem tracking databases, installing, troubleshooting, and maintaining hardware and software, performing backup and recovery operations, consulting with users to identify needs and requirements, conducting feasibility studies and trade-off analyses, preparing business cases, and ensuring the rigorous application of information security/Cybersecurity policies, principles, and practices. May be required to support DLA's eProcurement system(s).

Minimum Experience:

- Six (6) years of progressive IT experience
- Three (3) of which are specialized in Information Processing and involve a range of hardware/software solutions
- Two (2) of which are concentrated, hand-on experience in installing, diagnosing problems, and training customers in the use of software and hardware.
- Sensitivity Level: IT-I –Critical Sensitive
- Clearance: Secret
- IA Level: IAT II
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview:
The IT Support Specialist will provide first-line Tier 3 ticket support for J64 Directory Services, handling day-to-day requests related to Active Directory administration, Identity, Exchange Online mailbox support, and Microsoft 365 management. This includes processing standard account actions, Exchange Actions, and resolution of routine identity, email, and collaboration service issues. Support responsibilities also include performing all required support tasks delegated to DLA for the DoD M365 environment, ensuring accurate and timely handling of user, mailbox, and collaboration-related requests. Work will be conducted across both NIPRNET and SIPRNET environments in accordance with Section 2.3.1.2 requirements. The Government may require extended hours or weekend support based on operational needs, such as non-peak maintenance or implementation windows.

The IT Support Specialist must be adaptable, customer-focused, and able to learn new tools or procedures as mission requirements evolve. As a member of the J64 Directory Services team, this role demands strong communication skills, attention to detail, accurate documentation of actions taken, and strict adherence to established workflows and standard operating procedures. Advanced or complex issues will be escalated to senior engineers as appropriate.

Candidate Desired Skills:
- At least three years of experience supporting Active Directory administration within the past three years
- At least three years of experience supporting email administration (Exchange or M365 Exchange online) within the past three years
- Experience performing basic Microsoft 365 administration tasks (user management, licensing, mailbox settings, distribution groups)
- Ability to follow detailed technical procedures and document ticket resolutions clearly
- Strong customer service, communication, and troubleshooting skills

IT SUPPORT SPECIALIST (Off-Site) (Non-Key Personnel) (Task: 1)

Candidate shall meet the following Core Requirements:

This position covers planning and delivery of customer support services including installation, troubleshooting, user assistance, and training. Functions may include diagnosing and resolving problems in response to customer reported incidents, planning and analysis of work processes, researching and reporting trends and patterns of problems, developing training materials and performing computing/information system training sessions, developing and maintaining problem tracking databases, installing, troubleshooting, and maintaining hardware and software, performing backup and recovery operations, consulting with users to identify needs and requirements, conducting feasibility studies and trade-off analyses, preparing business cases, and ensuring the rigorous application of information security/Cybersecurity policies, principles, and practices. May be required to support DLA's eProcurement system(s).

Minimum Experience:
Six (6) years of progressive IT experience
- three (3) of which are specialized in Information Processing and involve a range of hardware/software solutions

- two (2) of which are concentrated, hand-on experience in installing, diagnosing problems, and training customers in the use of software and hardware.
- Sensitivity Level: IT-I –Critical Sensitive
- Clearance: Secret
- IA Level: IAT II
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, MS-203, SC-300, SC-400, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview:
The IT Support Specialist will provide first-line Tier 3 ticket support for J64 Directory Services, handling day-to-day requests related to Active Directory administration, Identity, Exchange Online mailbox support, and Microsoft 365 management. This includes processing standard account actions, Exchange Actions, and resolution of routine identity, email, and collaboration service issues. Support responsibilities also include performing all required support tasks delegated to DLA for the DoD M365 environment, ensuring accurate and timely handling of user, mailbox, and collaboration-related requests. Work will be conducted across both NIPRNET and SIPRNET environments in accordance with Section 2.3.1.2 requirements. Advanced or complex issues will be escalated to senior engineers as appropriate.

Candidate Desired Skills:
- At least three years of experience supporting Active Directory administration within the past three years
- At least three years of experience supporting email administration (Exchange or M365 Exchange online) within the past three years
- Experience performing basic Microsoft 365 administration tasks (user management, licensing, mailbox settings, distribution groups)
- Ability to follow detailed technical procedures and document ticket resolutions clearly
- Strong customer service, communication, and troubleshooting skills

CLOUD COMPUTING SPECIALIST (CCS)-SUBJECT MATTER EXPERT (SME) (On-Site) (Key Personnel) (Task:1) (Position 1)

Serves as a Cloud computing SME. Possesses the ability to work independently with substantial cloud computing knowledge. The SME must have the essential skillsets to identify, manage and resolve cloud computing issues, security risk, and implement "best practices" as applied within a cloud environment (across all of the different deployment and service models, and derivatives). The CCS must be well versed in administration and security of cloud solutions to include security assessment methodology and privacy controls deployed in cloud information systems to include six (6) domain areas. The six domains include:

- Architectural Concepts & Design Requirements
- Cloud Data Security
- Cloud Platform & Infrastructure Security
- Cloud Application Security
- Operations
- Legal & Compliance

Minimum Qualifications:

- Ten (10) years of overall professional IT experience
- Six (6) years of M365 services administration experience (Exchange Online, Teams, SharePoint Online)
- Two (2) years of Microsoft M365 Tenant Administration experience
- Two (2) years of Microsoft PowerShell
- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission.
- Clearance: Secret
- Position destination: Mission Essential

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview:

The Cloud Computing Specialist will support DLAs cloud tenant level administration, security, and day-to-day tickets flow of J64 Directory Services as it related to cloud support. Primary focus includes but is not limited to the administration and configuration of DLA's M365 tenant. This support will include the support of objects in Microsoft M365, AWS, and any future hosted solutions used by DLA. This position will attend DLA/DOD level meetings, provide technical briefing, and be a part of a team that will be tracking, implementing, and coordinating DOD tasks pertaining to tenant administration and support. The support of these requirements is for both the NIPRNET and SIPRNET. The Government may require the contractor to work longer hours on given days and/or weekends, depending on operational needs and contingencies, (i.e., installation and testing during non-peak hours).

The Directory Service Team member is expected to be adaptable to the needs of his support group. As a member of the J64 Directory Services team, we are customer focused and meeting the need of the customer may require them to learn new skills and perform new task regularly.

Daily Task
- Tenant Administration/configuration
- RBAC rights/configuration – M365 applications
- User license assignment/management
- Security/Compliance management/config/permissions
- Service/feature stand-up/troubleshooting
- Service Health monitoring
- Message Center monitoring/app owner comms
- M365 DoD Endpoint monitoring/ECR
- Support case review/troubleshooting
- Application Owner coordination – Exchange, Teams, SharePoint, OneDrive, Power Platforms, etc.
- Tier 3 Cloud tenant application support
- Cyber/ISSM initiative engineering/troubleshooting
- Cyber POAM engineering/troubleshooting
- DLA CERT/ESI Support
- Cloud tenant vulnerability management
- Cloud tenant security reviews
- Cloud tenant auditing
- Microsoft PFE management/support
- Tenant Config Guide (TCG) coordination and implementation – DoD CIO/MILDEPs
- Azure app registrations
- Azure conditional access policies
- Cloud tenant engineering coordination with Network/Systems teams
- Flow 3 engineering/coordination

Candidate Desired Skills
- Document at least Five years' experience with Microsoft M365 Tenant administration occurring within the past two years.
- Document at least Five years' experience with Cloud support occurring within the past two years.

CLOUD COMPUTING SPECIALIST (CCS)-SUBJECT MATTER EXPERT (SME) (On-Site) (Non-Key Personnel) (Task: 1) (Position 2)

Duty Locations

The primary work location for this positions will be:

Fort Belvoir, VA

Serves as a Cloud computing SME. Possesses the ability to work independently with substantial cloud computing knowledge. The SME must have the essential skillsets to identify, manage and resolve cloud computing issues, security risk, and implement "best practices" as applied within a cloud environment

(across all of the different deployment and service models, and derivatives). The CCS must be well versed in administration and security of cloud solution to include security assessment methodology and privacy controls deployed in cloud information systems to include six (6) domain areas. The six domains include:

- Architectural Concepts & Design Requirements
- Cloud Data Security
- Cloud Platform & Infrastructure Support
- Cloud Application Security and Support
- Operations
- Legal & Compliance

Minimum Qualifications:

- Ten (10) years of overall professional IT experience
- Six (6) years of M365 services administration experience with a focus in SharePoint Online and Purview
- Two (4) years of Microsoft PowerShell
- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission.
- Clearance: Secret
- Position destination: Mission Essential

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview:
Microsoft 365 Subject Matter Expert (SME) with deep expertise in SharePoint Online and a broad understanding of Microsoft 365 services. This role is responsible for leading the design, implementation, and support of SharePoint Online solutions at an enterprise level, while also managing M365 tenant administration and ensuring alignment with Zero Trust (ZT) principles, data governance, and AI integration strategies. The ideal candidate will possess advanced knowledge of Microsoft Purview, Graph API, data labeling, sensitivity labels, and a understanding of records retention policies. They will play a critical role in configuring and maintaining secure, compliant, and scalable collaboration environments, leveraging strong PowerShell scripting to automate tasks and enforce policy controls. This position requires a proactive leader who can translate business needs into technical solutions, support cross-functional teams, and drive the adoption of modern workplace technologies.

Key Skills & Qualifications

- Expert-level proficiency in SharePoint Online architecture, site design, and governance
- Strong experience with Microsoft 365 tenant administration

- Strong experience in deploying new M365 applications and services across environments
- Hands-on knowledge of Microsoft Purview for compliance, data lifecycle, and audit
- Familiarity with Microsoft Graph API for automation and integration
- Deep understanding of data labeling, sensitivity labels, and records retention policies
- Advanced PowerShell scripting for automation and policy enforcement
- Experience implementing Zero Trust (ZT) security principles in M365 environments
- Ability to support AI-driven features and integrations within M365 services
- Knowledge of Power Platform (Power Apps, Power Automate)
- Strong communication and documentation skills
- Proven ability to work independently and collaboratively across technical and business teams
- Ability to independently Stand-up, Sustain, Secure, and troubleshooting cloud services and features
- Services health monitoring and issue resolution.

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

Candidate Desired Skills
- Document at least Five years' experience with Microsoft M365 SharePoint Online.
- Document at least Five years' experience with Cloud support.

CLOUD COMPUTING SPECIALIST (CCS)-SUBJECT MATTER EXPERT (SME) (On-Site) (Non-Key Personnel) (Task: 1) (Position 3)

Duty Locations

The primary work location for this position will be:

Fort Belvoir, VA

Serves as a Cloud computing SME. Possesses the ability to work independently with substantial cloud computing knowledge. The SME must have the essential skillsets to identify, manage and resolve cloud computing issues, security risk, and implement "best practices" as applied within a cloud environment (across all of the different deployment and service models, and derivatives). The CCS must be well versed in administration and security of cloud solution to include security assessment methodology and privacy controls deployed in cloud information systems to include six (6) domain areas. The six domains include:
- Architectural Concepts & Design Requirements
- Cloud Data Security
- Cloud Platform & Infrastructure Support
- Cloud Application Security and Support
- Operations
- Legal & Compliance

Minimum Qualifications:
- Ten (10) years of overall professional IT experience

- Six (6) years expert experience in managing Cloud Security and M365 technologies with a focus on Cloud data security
- Five (5) years experience implementing and integrating cloud security solutions with a focus on M365 and Azure Solutions
- Two (4) years of Microsoft PowerShell
- Must possess IT-I Critical Sensitive security clearance or Tier 5 (T5) at time of proposal submission.
- Clearance: Secret
- Position destination: Mission Essential

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, or MS-102)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position Overview:
This role is responsible for securing and governing enterprise cloud data environments, with a core emphasis on Microsoft 365 and extended coverage across Google services/Cloud, AWS, and Microsoft Azure. The contractor will design and implement scalable, compliance driven security frameworks that support AI-enabled data flows such as Microsoft Copilot and Google AI while enforcing rigorous sensitivity labeling, tagging, data lifecycle governance, and platform-agnostic reporting. In addition to granular data controls, this role encompasses tenant level hardening, zero trust policy enforcement, conditional access configuration, and secure collaboration guardrails. The ideal candidate will architect proactive, future proof protections for hybrid cloud deployments, ensuring operational resilience, regulatory alignment, and cross solution security consistency.

Key responsibilities include:

- Designing and implementing secure data protection strategies across M365, Google Cloud, AWS, and Azure
- Enabling secure AI integrations such as Google AI into M365 and Microsoft Copilot across environments
- Managing data sensitivity and lifecycle controls using Microsoft Purview and equivalent tools across clouds
- Executing tenant-wide security enhancements with Zero Trust alignment across diverse platforms
- Automating tasks and reporting via PowerShell, Graph API, Google Cloud SDK, AWS CLI, and Power Platform
- Overseeing cross-platform records management, labeling, tagging, and regulatory compliance
- Translating evolving business needs and tech developments into actionable, secure solutions
- Advising on AI governance models and secure data interaction with emerging technologies
- Supporting platform expansion and evaluating new tools for data protection and secure collaboration

Key Skills & Qualifications
- Expert-level M365 administration and data security
- Strong experience in deploying new Cloud features and services across environments
- Working knowledge of Google Cloud, Google workspace, AWS, and Microsoft Azure security configurations
- Experience with AI platform integration and governance across ecosystems
- Proficiency with scripting and automation tools: PowerShell, Graph API, Google SDK, AWS CLI
- Familiarity with Zero Trust architecture and multi-platform implementation strategies
- Deep understanding of sensitivity labels, data governance, tagging, Intune, and retention
- Strong communication and cross-functional collaboration skills
- Ability to quickly adapt to emerging technologies and evolving stakeholder needs
- Strong communication and documentation skills
- Proven ability to work independently and collaboratively across technical and business teams
- Ability to independently Stand-up, Sustain, Secure, and troubleshooting cloud services and features

Expectations
The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

Candidate Desired Skills
- Document Six years' experience with Microsoft M365.
- Document Six years' experience with Cloud Security.

Enterprise Infrastructure Application Support (Task 2)

SYSTEMS ARCHITECT – SENIOR (On-Site) (Key Personnel) (Task: 2)
Develop and implement complex system architecture to include solutions leveraging software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Identifies, assesses, and presents options for meeting the functional and technical requirements including hardware and software updates or upgrades. Responsible for developing and overseeing the implementation of complex solutions to include leading project implementation. Ensures these systems are compatible and in compliance with the Agency and industry standards. Evaluates analytically and systematically problems of workflows, organization and planning and develops appropriate corrective action. Serves as the system architect for large efforts with complex tasks or projects (or a group of tasks affecting the same system) often coordinating tasks with resources and with outside teams to accomplish objectives.

Minimum Requirements
- BA/BS with at least ten (10) years of IT experience.
- Project Management certification (i.e., Project Management Professional (PMP) Certification, other recognized certification, etc.)
- five (5) years project management experience
- five (5) years of Virtual Desktop Infostructure "VDI" Engineering experience

- Position destination: Supports Mission Essential Functions

Security/Certification Requirements:
- Sensitivity Level: IT-I – Critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE) and PMP
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

CITRIX/VIRTUAL DESKTOP INFRASTRUCTURE (VDI) ADMINISTRATOR (On-Site) (Dayton, OH) (Key Personnel) (Task: 2)

Manages network performance and maintains security related to VDI. Executes test procedures to assess systems performance, identify and troubleshoot difficult or unusual problems, and analyze results for the implementation of system upgrades. Must be capable of assuming a technical leadership or supervisory role in the Citrix/VDI/DaaS areas and assist others as required. Monitors server resource allocation/utilization and performs capacity planning. Maintains expertise with, and advises management on, current technologies. Prepares technical performance and utilization reports as required for executive management. Performs Desktop Virtualization. Maintains knowledge and experience with Citrix/DaaS/RA, VMWare, HP Blade technology. Has a thorough understanding of virtual desktop technology, VMWare, COTS, GOTS, and Active Directories (AD).

Minimum Experience:
- Four (4) years' experience in a large organization responsible for administering, operating, maintaining, and securing a large-scale computer network.
- Must be familiar with and able to stand up a Virtual Desktop Infrastructure.
- Experience in a technical leadership or supervisory role with VDI technologies

Security/Certification Requirements:
- Sensitivity Level: IT-I – Critical Sensitive
- Clearance: Secret
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140

Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

SENIOR SYSTEMS ADMINISTRATOR (On-Site – Fort Belvoir) (Key Personnel) (Task: 2)

Ensures the stable operation of the in-house computer software systems and network connections. This includes planning, developing, installing, configuring, maintaining, supporting, and optimizing all network software and communication links. Organizes and directs the configuration and operation of information management systems. Analyzes and resolves end user software program and connectivity issues. Conducts capacity and performance analysis and provides system configuration change and upgrade recommendations. Increases system administrator efficiency and accuracy via the use of automated tools and scripts, develops system administrator procedures, and conducts system administrator training and skills assessment. Provides end user training. Provide recommendations on technology direction to align with business vision. Will be required to provide both local and remote maintenance support to various operational systems deployed at more than one location. Support includes general maintenance, upgrades, and new installs of servers and applications. Directs the work of other system administrators to provide the day-to-day system administration to include system and resource optimization, and user assistance. Applies advanced technical knowledge of application networking, including load balancing applications, and ensuring fault tolerance. Performs vulnerability management.

Qualifications
Seven (7) years of progressive experience in the field of Information Processing, six of which are specialized in numerous specialized Information Processing disciplines involving a range of hardware/software solutions, four of which are concentrated, hand-on experience in installing, configuring, maintaining, and resolving issues with various software.

Security/Certification Requirements:
- Sensitivity Level: IT-I Critical Sensitive
- Clearance: Secret
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)

• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

CITRIX/VIRTUAL DESKTOP INFRASTRUCTURE (VDI) ADMINISTRATOR (Off-Site) (Non-Key Personnel) (Task: 2)

Manages network performance and maintains security related to VDI. Executes test procedures to assess systems performance, identify and troubleshoot difficult or unusual problems, and analyze results for the implementation of system upgrades. Must be capable of assuming a technical leadership or supervisory role in the Citrix area and assist others as required. Monitors server resource allocation/utilization and performs capacity planning. Maintains expertise with, and advises management on, current technologies. Prepares technical performance and utilization reports as required for executive management. Performs Desktop Virtualization. Maintains knowledge and experience with Citrix/DaaS/RA, VMWare, and HP Blade technology. Has a thorough understanding of virtual desktop technology, VMWare, COTS, GOTS, and Active Directories (AD).

Minimum Experience:
- Four (4) years' experience in a large organization responsible for administering, operating, maintaining, and securing a large-scale computer network.
- Must be familiar with and able to stand up a Virtual Desktop Infrastructure.

Security/Certification Requirements:
- Sensitivity Level: IT-I Critical Sensitive
- Clearance: Secret
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
- Work Element: Information Technology (IT)
- Work Role: 451 - System Administrator
- Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

IT SUPPORT SPECIALIST (Off-Site) (Non-Key Personnel) (Task: 2)

This position covers planning and delivery of customer support services including installation, troubleshooting, user assistance, and training. Functions may include diagnosing and resolving problems in response to customer reported incidents, planning and analysis of work processes, researching and reporting trends and patterns of problems, developing training materials and performing computing/information system training sessions, developing and maintaining problem tracking databases, installing, troubleshooting, and maintaining hardware and software, performing backup and recovery operations, consulting with users to identify needs and requirements, conducting feasibility studies and trade-off analyses, preparing business cases, and ensuring the rigorous application of information security/Cybersecurity policies, principles, and practices. May be required to support DLA's eProcurement system(s).

Minimum Experience:
Six (6) years of progressive experience in the field of Information Processing, three (3) of which are specialized in Information Processing and involve a range of hardware/software solutions, two (2) of which are concentrated, hand-on experience in installing, diagnosing problems, and training customers in the use of software and hardware.

Security/Certification Requirements:
- Sensitivity Level: IT-II – Non-critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

SYSTEMS ENGINEER (Off-Site) (Key Personnel) (Task: 2)

Responsible for effective provisioning, operation, installation/configuration, and maintenance of systems hardware/software/related infrastructure. Provide technical support, guidance and hands-on delivery in the planning, implementation, and ongoing operation of application systems. The Systems Engineer shall participate in technical research and development to enable continuing innovation within the infrastructure. Ensure that system hardware, operating systems, software systems, and related procedures adhere to

organizational values and regulatory requirements. The Systems Engineer shall document specifications, project plans, configurations, test plans and results. Depicts complex ideas, issues, and designs to varied audiences; communicates project objectives, scope, and status to project teams.

Minimum Experience:
- Five (5) years of overall professional experience in the engineering field.
- Five (5) years' experience in SQL Server database. Proposed systems engineer personnel shall be fully trained and experienced with the Windows operating systems (Windows Server 2016), Proposed systems engineer personnel shall be fully trained, and industry recognized Microsoft Certified personnel experienced and familiar with Windows 2016 and operating systems.

Security/Certification Requirements:
- Sensitivity Level: IT-II – Non-critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
- Work Element: Information Technology (IT)
- Work Role: 451 - System Administrator
- Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

SYSTEMS ENGINEER (Off-Site) (Non-Key Personnel) (Task: 2)

Responsible for effective provisioning, operation, installation/configuration, and maintenance of systems hardware/software/related infrastructure. Provide technical support, guidance and hands-on delivery in the planning, implementation, and ongoing operation of application systems. The Systems Engineer shall participate in technical research and development to enable continuing innovation within the infrastructure. Ensure that system hardware, operating systems, software systems, and related procedures adhere to organizational values and regulatory requirements. The Systems Engineer shall document specifications, project plans, configurations, test plans and results. Depicts complex ideas, issues, and designs to varied audiences; communicates project objectives, scope, and status to project teams.

Minimum Experience:
- Five (5) years of overall professional experience in the engineering field.
- Five (5) years' experience in SQL Server database. Proposed systems engineer personnel shall be fully trained and experienced with the Windows operating systems (Windows Server 2016), Proposed

systems engineer personnel shall be fully trained, and industry recognized Microsoft Certified personnel experienced and familiar with Windows 2016 and operating systems.

Security/Certification Requirements:
- Sensitivity Level: IT-II – Non-critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Citrix (CCA-V or CCP-V) and Microsoft (AZ-104 or MC: ASAE)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

OPERATIONAL TECHNOLOGY SPECIALIST - BASIC (On-Site) (Non-Key Personnel) (Task: 2)

Required Site: New Cumberland, PA

Basic Level: Evaluates operational technology (OT) systems, and interfaces with other information technology (IT) and OT equipment and systems. Troubleshoots bottlenecks, purposes recommendations for their elimination, and makes recommendations for system improvements that will result in optimization of development and/or maintenance efforts. Analyzes and suggests recommended improvements to the OT system programs and systems to meet industry standards and best practices. OT systems include, but are not limited to, Utility Monitoring and Control Systems (UMCS), Electronic Security Systems (ESS), Building Automation Systems (BAS), Fire and Emergency Services Systems, Fuels Supervisory Control and Data Acquisition (SCADA) systems, Fuels Dispensing, Tank Gauging systems, Material Handling systems, and all other DLA OT control systems having automated operational control functions.

Minimum Requirements:
- Five (5) years relevant experience
- Experience with various vendors and types of OT systems, including PLCs, VFDs, HMIs, and network protocols.
- Experience with Cybersecurity standards, best practices for OT systems, evaluating security vulnerabilities, developing mitigation strategies and how to integrate them, and developing policy and procedure for DoD risk management framework requirements.
- Possession of excellent research and analytical skills
- Possession of excellent oral and written communication skills
- Must possess IT-II Non-Critical Sensitive security clearance or Tier 3 (T3) at time of proposal

submission.

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, MS-102) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Work Description – OT Support
The Operational Technology (OT) Support Contractor provides technical support to maintain, monitor, and secure integrated IT/OT environments. The contractor performs system monitoring, device configuration, data analysis, and documentation to ensure operational visibility and system reliability. Responsibilities include deploying monitoring solutions, maintaining accurate asset inventories, supporting OT security tools, and preparing technical information for leadership. This position ensures that critical OT systems remain compliant, well-documented, and aligned with mission and cybersecurity requirements.

Recommended Skills & Qualifications
- Experience deploying and maintaining monitoring platforms in IT or OT environments.
- Ability to configure switches, bridges, monitoring nodes, and related infrastructure.
- Familiarity with tools such as Forescout, Xona, or similar OT/IT security platforms.
- Skill in maintaining accurate inventories of hardware, software, and OT assets.
- Ability to interpret system data, identify trends, and detect anomalies.
- Strong writing skills for SOPs, diagrams, reports, and configuration guides.
- Ability to convert technical information into leadership-ready briefings.
- Experience diagnosing issues across monitoring systems, network devices, and security tools.
- Knowledge of integrating new OT/IT devices into existing architectures.
- Understanding of security principles, compliance requirements, and risk mitigation in OT environments.

The Contractor shall demonstrate adaptability in response to evolving operational requirements, technical environments, and mission objectives. The nature of the support role may necessitate the acquisition of new skills, tools, or procedures beyond routine expectations. The Contractor is expected to maintain a flexible approach to task execution in order to meet stakeholder needs and ensure continuity of service delivery.

Enterprise Software & Mobility Services (Task 3)

SYSTEMS ARCHITECT – SENIOR (On-Site) (Key Personnel) (Task: 3)
Develop and implement complex system architecture to include solutions leveraging software, hardware, and communications to support the total requirements as well as provide for present and future cross-

functional requirements and interfaces. Identifies, assesses, and presents options for meeting the functional and technical requirements including hardware and software updates or upgrades. Responsible for developing and overseeing the implementation of complex solutions to include leading project implementation. Ensures these systems are compatible and in compliance with the Agency and industry standards. Evaluates analytically and systematically problems of workflows, organization and planning and develops appropriate corrective action. Serves as the system architect for large efforts with complex tasks or projects (or a group of tasks affecting the same system) often coordinating tasks with resources and with outside teams to accomplish objectives.

Minimum Requirements

- BA/BS with at least ten (10) years of IT experience
- Project Management certification (i.e., Project Management Professional (PMP) Certification, other recognized certification, etc.)
- five (5) years project management experience
- five (5) years of Mobile Device Management "MDM" Engineering experience
- Position destination: Supports Mission Essential Functions

Security/Certification Requirements:

- Sensitivity Level: IT-I – Critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, MS-102) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

~~**SENIOR SYSTEMS ADMINISTRATOR**~~**SYSTEMS ADMINISTRATOR - SENIOR: (On-Site) (None - Key Personnel) (Task: 3)**

Ensures the stable operation of the in-house computer software systems and network connections. This includes planning, developing, installing, configuring, maintaining, supporting, and optimizing all network software and communication links. Analyzes and resolves end user software program and connectivity issues. Provides end user training. Provide recommendations on technology direction to align with business vision. Will be required to provide both local and remote maintenance support to various operational systems deployed at more than one location. Support includes general maintenance, upgrades, and new installs of servers and applications. Applies advanced technical knowledge of application networking, including load balancing applications, and ensuring fault tolerance. Performs vulnerability management.

Minimum Experience

Seven (7) years of progressive experience in the field of Information Processing, six of which are specialized in numerous specialized Information Processing disciplines involving a range of hardware/software solutions, four of which are concentrated, hand-on experience in installing, configuring, maintaining, and resolving issues with various software.

Security/Certification Requirements:
- Sensitivity Level: IT-I – Critical Sensitive
- Clearance: Secret
- Position destination: Supports Mission Essential Functions

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, MS-102) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Daily duties are the following:

The Senior System Administrator is designated as a Mission Essential role and will support on premise and cloud hosted M365 collaborative communication tool (e.g., Skype for Business, Teams) environment. The support will include resolving user issues related to Skype for Business or Teams client software installation and user profile configuration, contacting vendors to open support cases, and implementing changes to resolve issue and increase security posture. The Senior System Administrator will also assist in the deployment of mobile devices by testing operating system images, evaluating new hardware & accessories and recommending changes to improve functionality and assisting with system imaging as needed.

Candidate Desired Skills:
a. Documented four-year experience with Microsoft M365 or Office Communications Server, Microsoft Lync, Microsoft Skype for Business, and/or Microsoft Teams
b. Documented two-year experience supporting Microsoft M365
c. Documented two-year experience supporting tablets running Microsoft operating systems.
d. Documented 2 years' experience with an MDM tool

~~**SENIOR SYSTEMS ADMINISTRATOR**~~**SYSTEMS ADMINISTRATOR - SENIOR (On-Site) (Non-Key Personnel) (Task: 3)**

Ensures the stable operation of the in-house computer software systems and network connections. This includes planning, developing, installing, configuring, maintaining, supporting, and optimizing all network software and communication links. Analyzes and resolves end user software program and connectivity issues. Provides end user training. Provide recommendations on technology direction to align with business

vision. Will be required to provide both local and remote maintenance support to various operational systems deployed at more than one location. Support includes general maintenance, upgrades, and new installs of servers and applications. Applies advanced technical knowledge of application networking, including load balancing applications, and ensuring fault tolerance. Performs vulnerability management.

Qualifications

Seven (7) years of progressive experience in the field of Information Processing, six (6) of which are specialized in numerous specialized Information Processing disciplines involving a range of hardware/software solutions, four of which are concentrated, hand-on experience in installing, configuring, maintaining, and resolving issues with various software.

Security/Certification Requirements:
- Sensitivity Level: IT-I – Critical Sensitive
- Clearance: Secret

- Position destination: Supports Mission Essential Functions Daily duties are the following:

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, MS-102) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

The ~~Senior Systems Administrator~~Systems Administrator - Senior will support on premise and cloud hosted enterprise Mobile-Device Management (MDM) solutions for DLA's Mobile Device users which includes iOS, Android, and Windows Operating Systems. The ~~Senior Systems Administrator~~Systems Administrator - Senior is the senior technical authority of the Enterprise Mobility Project's infrastructure and supports the integration and continued functionality of the DLA's MDM environment which includes the DLA Apps Store, Microsoft M365 Mobile Device Configurations, customer issue resolution, as well as supporting testing of new mobile technologies which includes hardware and software. This position will also support knowledge management activities such as Knowledge-Based- Article development / sustainment in addition to documentation of test and configuration procedures for other J6 technicians. This position will also serve as the focal point for DLA Application Development and Infrastructure Sustainment teams to resolve technical issues with new or existing technologies and how they are integrated with DLA's Mobile Devices.

Candidate Desired Skills:
a. Documented four (4) years of experience with Microsoft M365 or Office Communications Server, Microsoft Lync, Microsoft Skype for Business, and/or Microsoft Teams
b. Documented two (2) years of experience supporting Microsoft M365

c. Documented two (2) years of experience supporting tablets running Android, iOS, or Microsoft operating systems
d. Documented 2 years' experience with an MDM tool

IT SPECIALIST – MOBILITY ENGINEER (On-Site) (Non-Key Personnel) (Task: 3)

Supports mobile computing devices in DLA. Responsible for establishing and maintaining enterprise mobile computing standards, policies, and implementation practices. Responsible for mobility infrastructure design and controls. Responsible for evaluation research related to future mobile computing strategies. Defines and maintains enterprise standards for office and line-of-business mobile solutions. Defines and maintains hardware roadmaps. Interacts with enterprise help desk staff as required to provide training, troubleshooting, and problem resolution. Conducts pilots to research new mobile technology.

Minimum Experience:
- Five (5) years of progressive experience working in a medium to large IT environment. Three years of above experience in the integration and management of Windows application servers and the installation, configuration, and support of applications and devices.
- Two (2) or more years' experience with technical troubleshooting and hands-on experience with iOS, Android, Windows, and mobile devices in an enterprise setting. Two years' experience with an MDM tool.

Security/Certification Requirements:
- Sensitivity Level: IT-II – Non-Critical Sensitive
- Clearance: Secret

Certification Requirements:
Required Certifications: Microsoft (MCSE/MCSA 2016, Az-104, SC-200, SC-300, SC-400, MD-102, AZ-800/801, MS-102) or CISA(ICS300)
DLA Computing Environment: DLA approved CE (M Account Access)
Current Requirement: DOD 8570 - IAT 2
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Information Technology (IT)
• Work Role: 451 - System Administrator
• Proficiency Level: Intermediate

Position destination: Supports Mission Essential Functions Daily duties are the following:

The IT Specialist – Mobility Engineer will support on premise and cloud hosted enterprise Mobile-Device Management (MDM) solutions for DLA's Mobile Device users which includes iOS, Android and Windows Operating Systems. The IT Specialist – Mobility Engineer is the senior technical authority of the Enterprise Mobility Project's mobile devices and supports the integration and continued functionality of the DLA's MDM environment which includes the DLA Apps Store, Microsoft M365 Mobile Device Configurations, customer issue resolution, as well as supporting testing of new mobile technologies which includes hardware and software. This position will also support knowledge management activities such as Knowledge-Based- Article development / sustainment in addition to documentation of test and

configuration procedures for other J6 technicians. This position will also serve as the focal point for DLA Application Development and Infrastructure Sustainment teams to resolve technical issues with new or existing technologies and how they are integrated with DLA's Mobile Devices.

Candidate Desired Skills:
a. Documented two (2) years of experience supporting Microsoft M365 Intune MDM
b. Documented two (2 years of experience supporting tablets running Android, iOS, or Microsoft operating systems
c. Documented two years' experience with an MDM tool

Zero Trust Architecture Support (Task 4)

TECHNOLOGY EXECUTIVE (Off-Site)

Serves as executive information technology resource with commercial, government, and Defense experience with enterprise technology implementation and strategy. Well versed in IT methodologies and templates. Expert across a broad range of technologies.

Minimum Experience:
- 20 years of progressive commercial, government, and/or DoD IT leadership experience

Required Skills:
- Experience leading large scale IT deployments in organizations of at least 50K employees across CONUS and OCONUS locations in a DoD environment.
- Ability to define and document point of view or technology decision outcomes.
- Ability to provide access to subject matter experts across technologies.
- Ability to provide staffing structure that supports pulling from a pool of technology knowledgeable resources for part-time/ad-hoc inputs.
- At least 2 years of demonstrated executive-level experience guiding or advising on the implementation of Zero Trust Architecture (ZTA) within a large federal or DoD environment.
- Must possess IT-II security clearance or have a current National Agency Check with Local Agency Check and Credit Check (NACLC) at time of proposal submission.

Certification Requirements:
Required Certifications: CISSP or CISM or CCISO or CRISC
DLA Computing Environment: N/A
Current Requirement: N/A
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Cyber Enablers / Leadership
• Work Role: 901 - Executive Cyber Leadership
• Proficiency Level: Advanced

Work Description – Advises executive stakeholders and the implementation team on aligning the enterprise architecture with the DoD Zero Trust Strategy, NIST SP 800-207, and DoW Zero Trust Reference Architecture. Provides high-level review and executive point-of-view (POV) for integrating Zero Trust

pillars across varied environments, including NIPR, SIPR, Operational Technology (OT), and Internet of Things (IoT). Supports the contractor team in translating complex Zero Trust engineering outcomes into actionable intelligence and strategic briefs for DLA J6 Leadership. Utilizes allocated hours to review, refine, and provide strategic messaging for Quarterly J6 IPRs, ensuring engineering metrics are translated into executive-level risk and compliance language

Recommended Skills & Qualifications
- Deep understanding of the 7 DoD Zero Trust Pillars and NSM-8 requirements.
- Familiarity with the unique cybersecurity challenges and Zero Trust applications within Operational Technology (OT) and Internet of Things (IoT) environments.
- Proven ability to translate complex IT/Cybersecurity engineering data into strategic briefings for SES or Flag-level leadership.

CLOUD COMPUTING SPECIALIST (CCS)-SUBJECT MATTER EXPERT (SME) (Off-Site)

Serves as an Information Assurance and Cloud computing SME with regards to Certification and Accreditation (C&A) and a broad coverage of the application of the National Institute of Standards and Technology (NIST) Risk Management Framework (RMF) standards and guidance as outlined in the NIST Special Publication(s) (SP) 800-53 and 800-37 (Current versions). The CCS will preferably have a current certification as a Certified Cloud Security Professional. Possesses the ability to work independently with substantial cloud computing security knowledge. The assessor must have the essential skillsets to identify, manage and resolve cloud computing security risk and implement "best practices" as applied within a cloud environment (across all the different deployment and service models, and derivatives). The CCS must be well versed in FedRAMP assessment methodology of security and privacy controls deployed in cloud information systems to include six (6) domain areas. The six domains include:
- Architectural Concepts & Design Requirements
- Cloud Data Security
- Cloud Platform & Infrastructure Security
- Cloud Application Security
- Operations
- Legal & Compliance

Minimum Qualifications:
- Five (5) years of relevant C&A experience; Risk Management Framework (RMF) and NIST C&A experience
- DOD Cybersecurity experience
- Must possess IT-II security clearance or have a current National Agency Check with Local Agency Check and Credit Check (NACLC) at time of proposal submission.
- Cloud Computing Security Certification (i.e., Cloud Computing Security Professional [CCSP] and Certificate of Cloud Security Knowledge [CCSK] preferred)
- Experience with modern and dynamic computing (e.g., hybrid computing, edge computing, cloud native microservices) and networking protocols or standard Internet of Things (IoT) protocols.
- Experience in assessing IA Controls and conducting C&A reviews for large, complex Information systems.
- At least 2 years of full-time Zero Trust implementation or assessment experience within a DoW organization or large-scale federal environment.

Certification Requirements:
Required Certifications: CCSP or CCSK or CISSP or CISA or CAP or CRISC
DLA Computing Environment: N/A
Current Requirement: N/A
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Cybersecurity (CS)
• Work Role: 612 – Security Control Assessor
• Proficiency Level: Advanced

Work Description – Conducts technical gap/fit analysis of DLA's cloud environments (Azure, AWS, GCP, etc.) against the 7 ZT Pillars, specifically focusing on Cloud Data Security, Platform Security, and Application Security. Develops and reviews cloud-specific engineering artifacts, including DoDAF SV/OV diagrams, micro-segmentation blueprints, and API security designs to support ZT maturity. Collaborates with stakeholders to draft and update the DoW-level ZT Implementation Plan (I-Plan), ensuring cloud-hosted assets meet intermediate and advanced maturity timelines. Designs and validates the organization's "Security Fabric" for hosted services, ensuring ZT principles (e.g., "Never Trust, Always Verify") are enforced at the identity and resource levels. Crosswalks traditional FedRAMP/RMF controls (NIST 800-53) to ZT Capabilities and Activities (TAB C/D/E) to ensure dual compliance with authorization and Zero Trust mandates. Designs and assesses the cloud-native Identity and Access Management (IAM) architecture. Ensures federated identity (SAML, OIDC) and least-privilege access are enforced across Azure, AWS, and SaaS platforms in alignment with the ZT User Pillar%

Recommended Skills & Qualifications
- At least 5 years of experience designing, securing, and assessing cloud cybersecurity architecture for Microsoft Azure, AWS, Google Cloud Platform, and/or Oracle Cloud Infrastructure (specifically IL5/IL6 environments).
- Demonstrated proficiency with DoDAF, the DoW Zero Trust Reference Architecture, and the NIST SP 800-207 Zero Trust Architecture.
- Proven experience drafting or updating DoW/DoD-level cybersecurity policies, standards, and Implementation Plans (I-Plans) for cloud-native technologies.
- Deep expertise in cloud-native Identity Providers (IdP), federated identity protocols, and cloud access security brokers (CASB).

COMPUTER SOFTWARE/INTEGRATION ANALYST (Off-Site)

Must be knowledgeable in implementing computer systems in a phased approach of requirements analysis and conceptual design, site survey, system design review, critical design review, installation, integration, and testing. Must be knowledgeable in performing requirements analysis for a wide range of users in areas of office automation. Must be able to present system designs for user approval at formal reviews. Must be capable of performing configuration management, integrating software, interpreting software test results, and recommending solutions for unsatisfactory test results. Must be knowledgeable in life-cycle support, including maintenance, administration, and management. Must be able to provide solutions to identified software problem reports.

Minimum Experience:
- Five (5) years relevant experience
- Must possess IT-II security clearance or have a current National Agency Check with Local Agency Check and Credit Check (NACLC) at time of proposal submission.

Certification Requirements:
Required Certifications: Security+ or SSCP or CASP+ or CISSP
DLA Computing Environment: N/A
Current Requirement: N/A
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Software Engineering (SE)
• Work Role: 461 – System Security Analyst
• Proficiency Level: Intermediate

Work Description – This position will bridge the gap between software development and Zero Trust security operations. The Analyst will translate Zero Trust maturity requirements into technical use cases, security scenarios, and validate the interoperability of ZT capabilities across IT, OT, and IoT environments. Develops capability test plans, acceptance criteria, and KPIs. Develops and assesses use cases to demonstrate Zero Trust capabilities (e.g., dynamic access control, micro-segmentation) and scores outcomes against stakeholder criteria. Finalizes the development of engineering artifacts, focusing specifically on systems interfaces, API security, and workflow designs required to federate internal DoW systems with external or cloud-hosted Zero Trust services. Assesses current DLA NIPR and SIPR solutions to plan seamless integration with the 7 ZT pillars. Advises DLA stakeholders on Zero Trust aligned DevSecOps best practices and develops and implements plans for applications to meet Zero Trust requirements.

Recommended Skills & Qualifications
- Experience with API integration (e.g., RESTful APIs, JSON) and orchestration.
- Proven experience drafting technical use cases, test plans, and Key Performance Indicators (KPIs) for cybersecurity tools, Identity, Credential, and Access Management (ICAM) systems, or network security solutions.
- Familiarity with integrating traditional IT software with Operational Technology (OT) and Internet of Things (IoT) platforms or telemetry data.
- Experience participating in formal DoD systems engineering reviews (e.g., System Design Review, Critical Design Review) specifically for cybersecurity or infrastructure deployments.
- Familiarity with the DoD DevSecOps Reference Design and how it integrates with the DoD Zero Trust Reference Architecture.
- Proficiency with modern DevSecOps tools.

CYBERSECURITY SUBJECT MATTER EXPERT – LEAD (Off-Site)

Provides expert support, research and analysis of exceptionally complex problems, and processes relating to them. Serves as technical expert to the Cybersecurity Assessment Program providing technical direction, interpretation, and alternatives to complex problems. Thinks independently and demonstrates exceptional written and oral communications skills. Applies advanced technical principles, theories, and concepts.

Contributes to the development of new principles, concepts, and methodologies. Works on unusually complex technical problems and provides highly innovative and ingenious solutions. Recommends secure cloud and network architecture designs and solutions and in the development of cloud Zero Trust and Secure Service Edge requirements and selection criteria. Works under consultative direction toward predetermined long- range goals and objectives. Assignments are often self-initiated. Determines and pursues courses of action necessary to obtain desired results. Develops advanced technological ideas and guides their development into a final product. Expertise is in the area of infrastructure, network, Zero Trust, edge security design and architectures.

Minimum Qualifications:

- Proven proficiency designing and engineering cloud-based Software Defined Networks, next generation firewall services, and network security services.
- Proven proficiency performing CCRI/ vulnerability assessment/ penetration testing on networks, databases, computer applications and IT frameworks.
- 7 years of IT experience
- 5 years cloud security and networking experience
- 5 years of experience with DOD cloud and data center controls up to IL6 and assessing for Vulnerabilities.
- Strong analytical and problem-solving skills for resolving security issues.
- Strong skills implementing and configuring networks and network components.
- Knowledge and understanding of DOD security regulations, DISA STIGs
- Strong knowledge of security architecture and security management
- Strong knowledge of SCAP
- Strong knowledge of RMF
- Excellent knowledge of and proficiency with: USCYBERCOM CTO Compliance Program, Wireless vulnerability assessment, Web Services (IIS, Apache, Proxy), Database (SQL Server, Oracle), Email Services (Exchange), Vulnerability Scans (NESSUS, SCCM), Knowledge of Phishing exercises, Physical Security
- Excellent knowledge of and proficiency with capabilities such as:
  - PaaS, IaaS, SaaS
  - Security compliance and risk management
  - Orchestration and Automation, Web Services (IIS, Apache, Proxy), Database (SQL Server, Oracle)
  - Data and Application Migration
  - Terraform, Ansible, CloudFormation
  - Knowledge of Data Warehousing
  - Security Operations
  - DevSecOps
  - Identity Management
  - Expert-level proficiency with the DoD Zero Trust Strategy (7 Pillars), DoW ZT Reference Architecture v2.0, and NIST SP 800-207. Must demonstrate experience designing enterprise-scale ZT solutions.

Security/Certification Requirements:

- Sensitivity Level: Must possess IT-II security clearance or have a current National Agency Check with Local Agency Check and Credit Check (NACLC) at time of proposal submission.
- Clearance: Secret

Certification Requirements:
Required Certifications: CISSP-ISSAP or CISSP or CASP+ or CCSP
DLA Computing Environment: N/A
Current Requirement: N/A
Future Requirement: DOD 8140
Primary Cyber Work Role:
• Work Element: Cybersecurity (CS)
• Work Role: 652 – Security Architect
• Proficiency Level: Advanced

Work Description – This position serves as the primary technical authority and architecture lead for the DLA Zero Trust program. The Lead SME will shift the enterprise from traditional perimeter-based defense (e.g., CCRI/HBSS) to a dynamic, identity-centric Zero Trust Architecture, overseeing the engineering of solutions across IT, OT, IoT, and SAP enclaves. Leads the finalization of Zero Trust engineering artifacts (Deliverable 7), including DoDAF Operational and System Views (i.e., OVs/SVs), workflow designs, and security blueprints for NIPR, SIPR, OT, IoT, and SAP. Oversees the technical execution and methodology for the overarching NIPR, SIPR, OT, IoT, and SAP Zero Trust capability assessments and gap/fit analyses. Acts as the primary author/reviewer for updating the DLA Zero Trust Strategy (Deliverable 6) to ensure strict alignment with the DoW ZTA Strategy, DoW RA V 2.0, NSM-8, and NIST SP 800-207. Leads co-creation working sessions, design workshops, and technical exchanges with IT stakeholders to develop requirements, use cases, and capability test plans. Crosswalks existing DLA capabilities to plan their integration or replacement within the Zero Trust pillars. Leads the technical assessment and gap analysis of DLA's OT (Industrial Control Systems/SCADA) and IoT (smart warehouse/logistics) enclaves. Adapts NIST SP 800-207 Zero Trust principles to non-traditional, kinetic environments (e.g., utilizing the Purdue Enterprise Reference Architecture).

Recommended Skills & Qualifications
- Demonstrated experience developing DoD Architecture Framework (DoDAF) artifacts (specifically OVs and SVs) to map cybersecurity capabilities and system interfaces.
- Direct experience designing and engineering cybersecurity or Zero Trust solutions for non-traditional environments, specifically Operational Technology (OT), Internet of Things (IoT), and/or Special Access Programs (SAP).
- Proven proficiency in engineering software-defined perimeters (SDP), micro-segmentation, and Identity, Credential, and Access Management (ICAM) integration beyond traditional firewall boundary defense.
- Experience developing capability test plans, defining acceptance criteria (KPIs), and leading simulation scenarios to prove Zero Trust effectiveness in a DoW/DoD environment.
- Exceptional technical writing and executive communication skills, with proven experience authoring DoD/DoW cybersecurity policies, I-Plans, and executive (J-code) briefing materials

2.6.3 Security

2.6.3.1 Access to Classified and Sensitive Information

The provisions listed below apply to the Prime Contractor and any subcontractors the Prime Contractor may employ during this contract.

This Project is categorized as **classified** at the **Secret** level and requires the contractor to obtain and maintain a favorable Facility Clearance at the same or higher level of classification. This contract **does not require** the contractor to store, handle, process classified information at their facility. Contractors with a safeguarding requirement will need to be approved for safeguarding at the same or higher level of classification listed in Block 1b of DD Form 254.

The following security access/performance requirements are required in the performance of this contract:

Requirement	Supported Contract Task
Support Tasks and Support Tickets for SIPRNET Operations	Task 1, 2, 3, 4
Requires SIPRNET Access	Task 1, 2, 3, 4
Creation of documentation to support SIPRNET	Task 1, 2, 3, 4
Support Tasks and Support Tickets for SIPRNET Operations	Task 1, 2, 3, 4
SecureView	Task 1, 2, 3, 4

Contractors are required to comply with the 32 CFR Part 117 National Industrial Security Program Operating Manual (NISPOM) in the handling, protection, and safeguarding of classified information in their possession. Security requirements outside the scope of the NISPOM, if required, will be defined in the accompanying DD Form 254.

Personnel security investigations conducted for access to classified information will be conducted by the contractor company Facility Security Officer (FSO).

2.6.3.2 Sensitive Information Access

Contractor personnel, who perform work on sensitive IT systems or applications will be required to obtain and maintain the appropriate investigation and adjudication or suitability determination commensurate with the information contained within the application or system. The Contractor shall assure that individuals assigned to the positions of this task order, as determined by the Government, have obtained the proper eligibility as required by DODI 5200.2. Note that sensitive information access does not imply or convey access to classified information. Instructions for access to classified information, if necessary, will be included on DD Form 254 attached to this contract.

Tiered Investigation Standards					
Position	Low-Risk	Moderate Risk		High Risk	
		Confidential	Secret	Top Secret	SCI
Position Sensitivity	Non-Sensitive	Non-Critical Sensitive		Critical Sensitive	Special Sensitive
Investigation	Tier 1/NACI	Tier 3/NACLC/ANACI		Tier 5/SSBI	
Formerly Known As	IT-III or IT-3	IT-II or IT-2		IT-I or IT-1	

DLA requires that all Contractor personnel assigned to this project shall have attained a favorable outcome

to the investigative requirement and be available to initiate work immediately upon delivery order award. Sensitive information access positions are designated based on access to government networks and IT systems and may exceed classified access requirements for this contract.

For sensitive information access positions, the required investigation shall be completed or interim access granted for individuals assigned to sensitive duties. The provisions outlined above apply to the prime contractor and any subcontractors the prime contractor may employ during this contract. In lieu of the correct investigations being completed when contract employees start, a waiver interim clearance may be submitted if no issues exist within the National Background Investigation Services (NBIS) Questionnaire (SF 85) for Non-Sensitive Positions or Questionnaire (SF 86) for National Security Positions. The contractor shall have the NBIS completed, with any other requirements (fingerprints taken and, if required, an OF306), and reviewed by DLA Intelligence before officially hiring any contractor employee into sensitive information access positions. Foreign Nationals are only eligible to perform non-sensitive duties and will not be investigated by the US Government.

DLA retains the right to request removal of Contractor personnel, regardless of prior clearance or adjudication status, whose actions, while assigned to this contract, clearly conflict with the interest of the Government. The reason for the removal shall be documented in writing by the Contracting Officer. When and if such removal occurs, the Contractor shall within a two to four-week timeframe, assign qualified personnel to vacancy(s) thus created regardless of whether the individual was in a key- or non-key personnel position. Current personnel security investigations conducted for access to classified information may satisfy investigation requirements for sensitive information access positions. Personnel security investigations for sensitive information access will be initiated by the DLA Personnel Security Office.

DD 254 will be housed within the NISP Contract Classification System (NCCS) through the life of the contract. The Contractor shall be registered within NCCS at time of award to gain access to the DD 254. It is incumbent upon the Contractor to ensure that the necessary security paperwork is submitted in sufficient time to enable everyone to be cleared prior to beginning work on this contract. If the NCCS is superseded by another System of Record, the same requirements apply.

2.6.3.3 SecureView

DLA requires support for SecureView. SecureView is a hardware and software solution that allows end users to access SIPR from an approved on-site or remote location that can include the home residence of the user. SecureView users are issued a customized workstation, Wireless Access Point (WAP), and one or more CAC card readers.

A User Agreement will be completed for each individual and submitted through the Functional Supervisor, through the Contracting Officer’s Representative and J64C TFS Leadership. A

2.6.4 Software

The Contractor shall observe all copyright agreements and shall be held liable for any infringement of copyrighted software licensing agreements and shall compensate the appropriate contractor for each instance of copyright violation. In the interest of protecting Government systems from computer viruses, the Contractor shall not use public domain software nor shall Contractor personnel download software from

public bulletin boards. The Contractor shall use only COTS, Contractor-developed, or Government-furnished software in performance of this statement of work. The Contractor shall use the Microsoft Office suite of software for preparation of all documentation required in the delivery order. Should the introduction of a computer virus or malicious destruction of computer software, stored information, or hardware result from the use of public domain software or from software taken from a public bulletin board, the Contractor shall be required to repair the damage at no expense to the Government and without impact on delivery schedules or daily operation.

2.6.5 Data Use, Disclosure of Information and Handling of Sensitive Information (including Personally Identifiable Information)

The contractor will maintain, transmit, retain in strictest confidence, and prevent the unauthorized duplication, use, and disclosure of information. The contractor will provide information only to employees, Contractors, and subcontractors having a need to know such information in the performance of their duties for this project.

Information made available to the contractor by the Government regarding the performance or administration of this effort shall be used only for those purposes and shall not be used in any other way without the written agreement of the Contracting Officer. Contractor personnel **will be required** to sign a non-disclosure statement.

If proprietary information is provided to the contractor for use in performance or administration of this effort, the contractor may not use such information for any other purpose except with the written permission of the Contracting Officer. If the contractor is uncertain about the availability or proposed use of information provided for the performance or administration, then the contractor will consult with the COR regarding use of that information for other purposes.

The contractor agrees to assume responsibility for protecting the confidentiality of Government records which are not public information. Each employee of the contractor to whom information may be made available or disclosed shall be notified in writing by the contractor that such information may be disclosed only for a purpose and to the extent authorized herein.

Performance of this effort may require the contractor to access and use data and information proprietary to a government agency or Government Contractor which is of such nature that its dissemination or use, other than in performance of this effort, would be averse to the interests of the Government and/or others.

Contractor and contractor personnel shall not divulge, or release data or information developed or obtained in performance of this effort, until made public by the Government, except to authorized Government personnel or upon written approval of the Contracting Officer. The contractor will not use, disclose, or reproduce proprietary data that bears a restrictive legend, other than as required in the performance of this effort. Nothing herein shall preclude the use of any data independently acquired by the contractor without such limitations or prohibit an agreement at no cost to the Government between the contractor and the data owner that provides for greater rights to the contractor.

All data received, processed, evaluated, loaded, and/or created because of a task order shall remain the sole property of the Government unless specific exception is granted by the Contracting Officer.

2.6.6 Government Furnished Equipment/Government Furnished Information

The Government shall furnish workspace, general administrative support equipment, to include access to desk phones, computers, copiers, facsimile equipment, printers, office supplies, materials, and computer software necessary to perform this task order to assigned contractor personnel working **on-site only**. Requests for additional GFE shall be submitted in writing to the Government POC.

The Government will provide computer hardware (GFE) and software, to contractor personnel working off-site. Any travel required to pick up or drop off GFE including CAC cards, Smart Card tokens, phones, hardware, software, etc., will be accomplished **at no additional cost** to the Government and is not directly reimbursable.

The Contractor is **REQUIRED** to track the issued GFE and submit a Monthly GFE Report to the COR and Program POC. The file will be provided to the COR prior to invoicing, in excel or similar agreed upon format and indexed as ***YYYY.MM Monthly GFE Report***. The following information shall be included in the report: Name, Contract # and Task Order #, Onsite/Offsite per the Contract PWS, Issuing Site, Issuer Name and Email (for Tokens), Model #, Serial #, Asset Management #, Brand, and Quantity.

2.6.7 Combatting Trafficking in Persons (CTIP)

The COR will monitor the vendor compliance with Combatting Trafficking in Persons (CTIP) clause in accordance with DFARS PGI 222.1703(4), such that noncompliance with 52.222-50 is documented to the KO, utilizing and annually completing the CTIP checklist at: DoD CTIP website (https://ctip.defense.gov/).

2.7 TRAVEL

2.7.1 OFFICIAL TRAVEL

Travel is **required** for this contract. The list below of trips and locations are expected over the term of the task order. If an emergency or unforeseen situation occurs where the government's tasks require support including travel outside this list, then the contractor may be required to travel by the government through a funded bilateral modification. The terms and conditions will be defined within the modification request. All travel conducted under this task order must be approved by the government COR **PRIOR** to commencement.

CONUS (Annual Estimate)

- New Cumberland, PA| 430 Mifflin Ave, New Cumberland, PA 17070 |5 Trips| 2 Resources
- DLA Defense Supply Center Columbus, 3990 E Broad St, Columbus, OH 43213 |5 Trips| 2 Resources

2.7.2 UNOFFICIAL TRAVEL

Contractors who are not currently occupying a sensitive position are not required to report on their Unofficial Foreign Travel.

Contractor personnel who occupy a sensitive position and have not been granted access to classified information are required to report their unofficial foreign travel to DLA Intelligence & Security.

Additionally, contractor personnel who occupy a sensitive position and have been granted access to classified information are required to report their unofficial foreign travel to their Facility Security Officer (FSO) and **not** to DLA Intelligence & Security.

2.8 PLACE OF PERFORMANCE

Personnel primary place of performance are one of the DLA Primary MSC (Major Subordinate Command) locations listed below, unless otherwise stated in as stated in section 2.6.

- DLA Disposition Services, 74 N Washington Ave, Battle Creek, MI 49037
- DLA Defense Supply Center Columbus, 3990 E Broad St, Columbus, OH 43213
- DLA Dayton, 5250 Pearson Rd, WPAFB, Dayton OH 45433
- DLA Headquarters, 8725 John J. Kingman Rd, Fort Belvoir, VA 22060
- DLA Distribution, 430 Mifflin Ave, New Cumberland, PA 17070
- DLA Ogden Defense Depot, 500 W 1200 S, Ogden, UT 84404
- DLA Troop Support, 700 Robbins St, Philadelphia, PA 19111
- DLA Defense Supply Center Richmond, 6090 Strathmore Road, Richmond, VA 23297

Personnel supporting SIPRNet duties shall be available to come onsite as needed in accordance with the locations listed above. Travel will not be paid.

SecureView Residential Use will be reviewed and approved on a case-by-case basis. Alternate work locations other than onsite or the Contractor's residence listed in the RCPA Authorization are not authorized.

2.9 PERIOD OF PERFORMANCE

Base Period	December 1, 2026 – May 31, 2027
Option Period 1	June 1, 2027 – November 30, 2027
Option Period 2	December 1, 2027 – November 30, 2028
Option Period 3	December 1, 2028 – November 30, 2029
Transition Out	December 1, 2029 – December 31, 2029

2.10 INVOICING AND PAYMENT SCHEDULE

The Contractor shall invoice no more frequently than MONTHLY. The invoice should include the specific line items performed on and accepted, and associated performance payments being invoiced for the month. Other invoice requirements are set forth in FAR 52.232-25 and DFARS 252.232-7003.

Contractors shall use the program **Wide Area WorkFlow-Receipt and Acceptance (WAWF-RA)** for Memo of Shipments (MS). WAWF-RA is a web-enabled application that allows contractors to create and

send electronic MS receiving reports and/or invoices to government inspectors/acceptors for approval, thereby eliminating paper distribution of MS.

Invoices shall be submitted to **Acceptor DoDAAC SL4792** and email notification sent to the COR/Invoice Processor for acceptance.

2.10.1 Invoice Receipt

Within seven days of the receipt of the invoice, the COR will review for accuracy, verifying services, and supplies. Inaccurate invoices will be returned to the contractor within seven days for correction. It is recommended that invoices be coordinated ahead of time with the COR to ensure the deliverables have been accepted and invoices are ready to be received in WAWF.

2.11 POINT OF CONTACT

2.11.1 Contracting Officer Representative (COR)

Deborah Wyllie
(804) 489-2065
Deborah.L.Wyllie@dla.mil

2.12 CONTRACTOR ALTERNATE WORKSITE AUTHORIZATION

The contractor may be authorized to work at an alternate worksite pending prior authorization from either the COR or Contracting Officer. Each alternate worksite effort will be for a definitive period as agreed upon by both parties. Working at an alternate worksite shall only be authorized if the COR or Contracting Officer can adequately determine that the following conditions exist for the contractor:

a. There must be a predefined need, in keeping with the organization's mission, for the contractor to work at an alternate worksite.
b. The existing task order performance outcomes/metrics and delivery requirements remain in effect during performance at the alternate worksite
c. In case of inclement weather or Federal Government closure contractors may be authorized to perform tasks from their alternate work site.
d. If the contractor needs remote access to DLA or DOD networks, systems, applications, or databases, the contractor will establish remote access through the DLA approved remote access at https://www.dla.mil/RemoteVDI/ using Contractor Furnished Equipment (CFE) or Personal Equipment (PE). The performance outcomes/metrics and delivery requirements remain in effect along with security and other requirements during performance at the alternate worksite.

2.12.1 CONTRACTOR CONTINUITY OF OPERATIONS PLAN (COOP) ALTERNATE WORKSITE AUTHORIZATION

The contractor may be authorized to perform at a Contractor alternate worksite, upon declaration of a COOP situation by the Director of the Defense Logistics Agency.

a. Alternate worksites may be authorized, upon declaration of a COOP situation by the DLA Director. An alternate worksite can be a contractor facility, personal residence, a telecommuting center, or a non-public place. A telecommuting center is a geographically convenient office setting established as an alternate to an employee's main office, residence, or non-public location.
b. Regardless of work location, all terms and conditions, including security requirements and labor laws, remain in effect.
c. Unless Mission Essential Functions are specifically detailed in the individual PWS requirements the services are not considered mission essential.

2.12.2 CONTRACTOR ALTERNATE WORKSITE REMOTE ACCESS REQUIREMENTS

a. The contractor will ensure that all CFE/PE (hardware and software) required for remote access to DLA networks, systems, applications, and databases meet the minimal configuration requirements set forth in the DLA Virtual Desktop Guide.
b. CFE/PE equipment is **strictly prohibited** from connecting to the DLA Virtual Private Network.
c. All liability for issues and troubleshooting CFE/PE is the responsibility of the equipment owner. The DLA Enterprise Help Desk will not provide support for issues with hardware/software not provided by DLA, including but not limited to CFE/PE hardware, non-DLA networks (e.g., home routers, public hot spots), and non-DLA software compatibility issues with Citrix.
d. DLA Enterprise Help Desk resources will support troubleshooting issues that are not related to the CFE/PE hardware/software, including but not limited to accounts, DLA applications, and server-side issues.
e. CFE/PE's running on Windows 10 or Windows 11 can be used to access the Virtual Desktop. Use the Virtual Desktop Guide for additional guidance.

f. It's recommended that the CFE/PE equipment minimally install:

1) CFE/PE utilize the applicable Security Technical Implementation Guides (STIGs) / checklists for system operating systems. Anti-virus, Anti-Spyware, and Host Based Intrusion Prevention software be installed, and the software be updated daily (i.e. software revisions, virus definitions). That the Host Based Intrusion Prevention Software firewall be configured to permit traffic by exception only, and dropping all other traffic.
2) CFE/PE computers scanned with the appropriate vulnerability scanner at a minimum of every 15 days and remediate vulnerability findings. Ensure contractor employees possess a current Government issued Common Access Card (CAC) and install Government approved CAC readers and middleware.

g. The Government is not responsible for any costs associated with meeting the above requirements.

2.13 COMMON ACCESS CARDS (CAC)

2.13.1 CAC REPORTING

Every month, the contractor shall **validate** the contractor CAC Report, through recurring submissions to the COR for accuracy. The file will be provided to the COR prior to invoicing each month, in excel or similar agreed upon format and indexed as ***YYYY.MM Monthly Contractor CAC Report.*** The following

information shall be included in the report: Contract and Task Order Number, Prime Contractor Company Name, Contract/Order Start Date, Contract/Order Completion Date, Contract/Order Termination (if prior to Contract/Order Completion Date), Contractor Employee Name, DLAH 1728 Receipt Date, CAC Issuance Date, CAC Expiration Date, Contractor Employee Termination Date (if applicable), CAC Turn-In Date, Comments/Issues - (e.g., notifications, lost or stolen CAC, CAC issued by another agency, etc.).

2.13.2 DEFENSE LOGISTICS AGENCY MANUAL (DLAM) 1000.13, Change 1 - ISSUANCE AND ACCOUNTABILITY OF COMMON ACCESS CARDS FOR DLA CONTRACTS

APPENDIX 1 TO ENCLOSURE 3: CONTRACTOR INSTRUCTIONS

Performance under this contract may require the contractor to obtain a Common Access Card (CAC). If CACs are issued under this contract, the contractor will complete and comply with the following steps to obtain, control, and turn-in Government-issued CACs, as well as establish procedures to always control and account for contractor CACs. This process is only for the issuance and accountability of CACs. Contractors may be required to provide additional forms and follow additional procedures for other forms of access and/or background/security checks depending on local site/installation requirements.
Common Access Card (CAC) Procedures

1. The contractor has each contractor employee requiring a CAC complete DLAH Form 1728 in accordance with Enclosure 3; 2a. Note: Contractors do not complete blocks 11, 14, 15.a. or 15.b.; these are completed by the COR.

2. The contractor hand carries the DLAH 1728 form(s) or sends via secure mail, or encrypted email to (NOTE: The contractor may forward these forms individually or as a group to):
    a. The Contracting Officer's Representative (COR) for the contract if a COR was designated.
    b. The Contracting Officer (KO) for the contract if no COR was designated.

3. Each contractor employee must verify their account information upon receipt of an email from the Government containing a username and password for the system of record, currently **Mission Partner Identity, Credential, Access Management (MP ICAM)** system. The web link for **MP ICAM** is included in the email.

4. Each contractor employee will receive an email via **MP ICAM** when their account has been approved. The email will notify the employee to obtain a government-issued CAC from the nearest Real-Time Automated Personnel Identification System (RAPIDS) office. The email will also provide a link that identifies the locations of RAPIDS offices.

5. Each contractor employee will obtain their issued CAC from the RAPIDS office.

6. The contractor, within one business day of issuance, provides written notice via email to the COR (or the KO, if no COR was designated) for each contractor CAC issued identifying the contractor employee's name, the date of issuance, and the date of expiration of the CAC. This notification may be made individually to each contractor employee or together with a group of

contractor employees. Note: This requirement is not applicable when the same person is performing both COR and **Mission Partner Affiliation Sponsor** roles.

7. The contractor always establishes procedures to control and account for Government-issued contractor CACs - to include the following:

a. Ensure contractor CACs issued for this contract are only used for the purpose of performing under this contract.
b. Ensure contractor CACs are secured in a manner that precludes unauthorized use and that recognizes the CAC is the property of the U.S. Government.
c. Ensure contractor employees do not abuse or place holes in their CACs.
d. Ensure contractor employees do not display their CACs in public.

8. If a contractor CAC is lost or stolen:

a. The contractor employee will immediately notify the contractor that the contractor CAC has been lost or stolen.
b. The contractor will immediately notify the COR (or the KO, if no COR was designated), detailing the circumstances regarding the lost or stolen contractor CAC, as follows:
    1) Face-to-face, followed within one business day by a written notice via email, or
    2) In writing, via email, or
    3) By telephone, followed within one business day by a written notice via email.

c. The contractor will report the lost or stolen CAC card to the local DLA Police/host installation police, who will provide the contractor with a police report. If there are no local DLA Police/host installation police, or no police report is provided, the contractor will provide information to the COR/KO, as applicable, detailing the circumstances of how the CAC was lost or stolen. The COR/KO will provide a memorandum for the contractor employee to support the issuance of new CAC.
d. The contractor has the contractor employee bring the report/memorandum to the nearest RAPIDS office. If the CAC can be reissued within 24 hours, bring the report/memorandum to the nearest CAC office for reissue. If the CAC cannot be reissued in 24 hours, follow the steps for a new CAC, beginning at Step 1.

9. If the expiration date for a contractor CAC is before the completion of the contract and the contractor employee is to continue working under the contract and still requires a CAC, the contractor:

a. Notifies the COR as follows:
    1) Face-to-face, followed within one business day by a written notice via email, or
    2) In writing, via email, or
    3) By telephone, followed within one business day by a written notice via email.

b. No less than 10 business days before the current CAC's expiration date, completes and complies with the steps above beginning with Step 2 for the issuance of a new contractor CAC for the employee.

c. Brings the expiring CAC to the RAPIDS office for turn-in and receives new CAC.
d. Notify the COR once a new CAC has been issued.

10. The contractor/contractor employee turns in any found CACs immediately, via hand carry, to the nearest Federal law enforcement office.

11. The contractor immediately collects all contractor CAC(s) from the contractor employee(s) at:

a. Contract completion or termination
b. Termination/Reassignment of an employee (this includes any reason the employee is no longer working for the contractor under the contract or otherwise no longer requires a CAC)

12. For contract completion or termination – within one business day after collecting the contractor CAC(s), arranges for turn-in via one of the below methods:

a. The contractor:

1) If the COR/KO is co-located or near enough that in-person transfer of CACs can be arranged, the contractor:
2) Arranges to meet the COR (or the KO, if no COR was designated) to turn-in the collected contractor CAC(s).
3) Hand-carries all collected contractor CACs for turn-in to meet the COR (or the KO, if no COR was designated).
4) Completes and signs the Government-Issued Contractor CAC Turn-In Receipt with the COR (or the KO if no COR was designated). The contractor is provided with a copy of the receipt.

b. If in-person transfer of CAC cannot be arranged, the contractor:

1) Sends, via certified mail, the CACs to the COR/KO. The contractor includes in the package the Government-Issued Contractor CAC Turn-In Receipt, with signed acknowledgement of contractor turn-in.
2) Notifies COR/KO that CACs have been sent via certified mail.
3) Receives a completed copy of the receipt from the COR/KO once the COR/KO has received the CACs.

13. For termination/reassignment of an employee:

a. Immediately notify the COR (or the KO, if no COR was designated) that the employee is no longer working for the contractor under the contract or otherwise no longer requires a CAC, as follows:
   1) Face-to-face, followed within one business day by a written notice via email, or
   2) In writing, via email, or
   3) By telephone, followed within one business day by a written notice via email.

b. Follows the turn-in procedures above for contract completion or termination, as applicable.

14. Contractor Reporting Requirements: Every month, validate the contractor CAC log with the COR for accuracy.

15. The above procedures have been established as a DLA security measure. Contractors are advised that failure to comply with any of the above requirements will be considered a violation of the terms and conditions of the contract and the Contracting Officer may take action to remedy such violations. Specifically, failure to safeguard, follow these procedures, including reporting requirements, or turn-in CACs within the established timeframes may result in the following actions, which are in addition to other actions the Contracting Officer may take under governing law and regulation and the terms and conditions of the contract:

a. Immediate work stoppage (issuance of a stop work order), not to be lifted until resolution of CAC issue
b. Disapproval of invoices and delay of payment
c. Withholding of final payment (in accordance with FAR 52.204-9)
d. Documentation of CAC Non-Compliance in the Contractor Performance Assessment Reporting System (CPARS)

1.14 DOD 8570.01-M/8140, INFORMATION ASSURANCE WORKFORCE IMPROVEMENT PROGRAM

The DOD 8570.01-M/8140, Information Assurance Workforce Improvement Program, requires training and certification for IA duties performed. All contract employees performing IA functions shall meet the requirements in accordance with DOD/DLA guidance. Additionally, all contract employees shall be certified in operating systems on any system on which System Administration duties are performed. Proof of certification shall be provided before Privileged access is granted, at time of proposal/resume submission; this includes, but is not limited to, system administration access, network administration access, router/switch access, firewall access, and Intrusion Detection System access. All documentation required for security certification will be maintained by both the Contractor and the Government. All contract employees will have acquired the necessary certification requirements, by DOD 8570.01, throughout the entire period of performance of the contract requirements. These certification requirements are not based on position title; they are based on duties. Refer to 8570.01-M/8140 Approved Baseline Certifications and Computing Environment Certification Attachments.

DoD Manual 8140.03, Cyberspace Workforce Qualification and Management Program was signed February 15, 2023. It requires DoD Components to identify all positions designated as cyberspace workforce positions in accordance with DoDI 8140.02 and Volumes 1-4 of DoDI 1442.02 within 12 months. Positions in the resulting task order may be impacted by this transition from 8570 to 8140 and a contract modification will be issued when appropriate. Until that time, 8570 requirements as spelled out in the JETS IDIQ and this task order will be followed.

Contractor personnel identified on this contract shall have their required DoD 8570/8140 security and industry competency certifications **prior to starting work** and **maintain their certifications** throughout

the life of this task order by completing and submitting monthly the Governments 8570/8140 Report. If a certification becomes obsolete during the life of the contract, the **Contractor shall be responsible for ensuring applicable personnel obtain an acceptable replacement certification prior to the IT product's end of life.** The report shall be submitted to the COR and Program POC that includes a list of applicable 8570/8140 personnel. The file will be provided to the COR prior to invoicing, in excel or similar agreed upon format, and indexed as **YYYY.MM Monthly 8570 or 8140 Report.** The following information shall be provided in the report: Name, IA Category, IA Level, Company, Contract Name/Description, COR, Contract # and Task Order #, Primary/Baseline IA Certification Held, Date of Primary/Baseline IA Certification, Date Primary/Baseline IA Certification Expires, Primary CE Certification Held, Date Primary CE Certification Received, Primary IA Certification Status (Current or Past Due), Primary CE Certification Status (Current or Past Due).
